

JOHN BUDALA

[LinkedIn Profile](#) | (850) 679-5659 | johnbudala@gmail.com

Collaborative and Transformational Leader | Business Partner | Passionate | Effective

EXECUTIVE SUMMARY

- **Strategic and Visionary Leader** with 30 years of **technology leadership** across diverse sectors, including Healthcare, Life Sciences, FinTech, Insurance/Risk, and Retail.
- **ML/AI Expert**: Experience in developing **data**-driven products and solutions from small businesses to Fortune 500 firms, with expertise in:
 - **Technology** enablement, **delivery**, and **innovation**
 - Mergers & Acquisitions (M&A), negotiations, due diligence, and portfolio assessments
 - Board-level reporting on **technology** strategies, operational performance, and risk **management**
 - Global experience in driving **innovation** and **technology transformation**
 - Department budget **management**, standards for Operations, SDLC, and **cloud** and **security** operations

CAREER HIGHLIGHTS

- **Service Delivery**: Enhanced efficiency, SDLC, and SLA through Agile/Lean, **TOGAF/Zachman** and ITIL **best practices**.
- **Global Delivery**: delivering **Cloud** and SaaS solutions across 6 countries.
- **Vendor Negotiations**: Achieved cost savings through market/vendor **analysis**.
- **Digital Transformation**: Utilized ML/AI, RPA, and **cloud** tools to drive revenue and manage cost
- **Data/ Data life cycle**: **data/information** strategy, **information/data governance** policies/controls, **Data Architecture**, Documents and content, **Data** integration and inter-operability, **Data** warehousing and business **intelligence** and analytics, Perspective and Predictive analytics, **data quality**, Metadata, Reference and master **data**, **Data Security**, and Database and storage **management**.
- **Information Security**: Established programs that led to zero critical findings and improved **security**/cybersecurity posture year-over-year. Oversaw compliance and certification of ISO 27001, SOC I/II, PCI, HIPAA, HITRUST, HiTECH, CIS, CSA and managed MDR, IR, and Retainer services
- **Enterprise Transformation**: Led a **cloud**-first, SaaS-first **transformation**.
- **M&A**: Oversaw seven M&A projects related to IT and R&D.

PROFESSIONAL EXPERIENCE

Realtime eClinical Solutions	Chief Technology Officer	May 2022 – Present
• Executive Leadership: Directed strategy, \$5M+ budgets, and global operations, overseeing engineering, DevOps, infrastructure, and security. Delivered SaaS solutions using Salesforce, Maxio, and Clinical Trial Management Solutions (CTMS), driving 50% business growth through cross-functional collaboration and strategic initiatives. • Strategic Initiatives: Led board reporting, two M&A activities, and 21 CFR Part 11 compliance. Pioneered RPA, ML/AI, and low-code platforms to boost innovation and operational efficiency, supporting 300+ employees, including 100+ engineers. • Technology Leadership: Scaled SDLC for cloud-based solutions, CTMS, Salesforce, and integrating ERP/CRM systems. Built analytics platforms and SaaS products using cloud-native solutions, CI/CD automation, and microservices, and machine learning algorithms. Drove business growth through technology innovation, including RPA, ML/AI, no-code/low-code solutions and reduce technical debt risk. • Global Operations: Oversaw IT Helpdesk, Cloud, cybersecurity, integrations, analytics, SaaS enablement, and project management for companies SaaS solutions and enterprise services.		

- **Chief Architect:** Managed end-to-end product lifecycles, ensuring readiness in Sales, Marketing, Support, and Legal for successful MVP launches and market entry.
- **Security & Compliance:** As **CISO**, ensured SOC I/II, HIPPA, HiTRUST, HiTECH, CIS, CSA, GDPR, CCPA compliance and cybersecurity certifications As **Chief Privacy Officer**, led GRC/DLP programs, addressing data privacy and application security.
- **Data Strategy:** As **Chief Data Officer**, established governance policies and analytics strategies to enhance data quality and lifecycle management. Utilized data assets to develop platforms and APIs that enabled monetization and delivered predictive and prescriptive analytics. Centralized technologies to streamline operations and reduce time to market.

PowerPlan	Chief Information Officer	March 2019 – May 2022
------------------	----------------------------------	------------------------------

- **Executive Leadership:** Partnered with customers and internal teams to drive IT strategy, product development, sales enablement, business growth, and staff development.
- **Financial Oversight:** Managed P&L, CapEx/OpEx budgets over \$8M, defined OKRs, and modernized operations using ITIL, SAgile, and Gartner best practices.
- **Security & Compliance:** As **CISO**, ensured SOC I/II, ISO 27001, GDPR, CCPA, and CSA compliance. As **Chief Privacy Officer**, led GRC initiatives for data privacy, records management, and DLP.
- **Data Leadership:** Defined strategies for data governance, analytics, and lifecycle management to enhance data quality and insights. Utilized data assets to develop platforms and APIs that enabled monetization and delivered predictive and prescriptive analytics. Centralized technologies to streamline operations and reduce time to market.
- **Global Operations:** Oversaw IT helpdesk, Cloud, cybersecurity, integrations, analytics, SaaS enablement, and project management for companies SaaS solutions and enterprise services.
- **Product Development:** Scaled SDLC and led cloud-native development, delivering PowerPlan SaaS Product Suite, Salesforce, Oracle ERP, Microsoft Dynamics and SAP integrations.
- **Commercialization:** Directed product lifecycles from MVP to market launch, ensuring readiness in sales, marketing, and support.
- **Vendor Management:** Negotiated contracts and optimized partnerships for IT, security, and analytics technologies.

M*MODAL (a 3M Company)	Vice President of IT and Data Services	Nov 2009 – March 2019
-------------------------------	---	------------------------------

- **Executive Leadership:** Achieved 400% growth over eight years through lean management and cost-effective strategies as a key executive team member.
- **Strategic Oversight:** Led the Shared Services department, aligning roadmaps with business goals while managing \$12M+ CapEx/OpEx budgets and ensuring cost efficiency.
- **Lean Management:** Implemented A3 action plans and KPIs to advance organizational goals and achieve measurable progress.
- **Global Team Leadership:** Directed global teams across enterprise systems, Data Center Operations, NOC/SOC, IT Helpdesk, and cloud services, including AWS, Azure, Salesforce CRM, and Oracle ERP. Oversaw network and telecommunication services, R&D (Dev, QA, DevOps), data governance, database management, BI/analytics, data engineering, and AI/ML predictive analytics. Successfully transitioned on-

KEY HIGHLIGHTS

- Minimize Shadow/Silo IT for Backend systems
- Vendor relationships at the Enterprise level
- Improved security posture
- Streamlined conflicting requests from Business units
- Streamlined processes for Customer RFP's, RFI, etc.,
- Streamlined Agile SDLC
- Build a DevOps team
- Fixed Business Continuity and Disaster recovery plans
- Built and monetized data analytics platform using AI/ML

premises **systems** to AWS and Azure **cloud** environments.

- **Healthcare Innovation:** Developed and delivered a healthcare **information** platform, offering mission-critical SaaS/DaaS and **mobile** solutions for speech recognition, transcription, clinical **improvement**, **computer-assisted documentation**, and medical coding. Integrated **systems** with third-party EHR platforms like EPIC, Cerner, NextGen, Meditech, and eClinicalWorks using HL7/FHIR standards.
- **Data Leadership:** Defined strategies for **data governance**, analytics, and lifecycle **management** to enhance **data quality** and insights. Utilized **data** assets to develop platforms and APIs that enabled monetization and delivered predictive and prescriptive analytics. Centralized **technologies** to streamline operations and reduce time to market.
- **Security and Compliance:** Co-led cybersecurity programs, NIST **implementation**, and certifications for ISO, SOC, HIPAA, HiTRUST, GDPR, Risk **Management** & Compliance (GRC) and **Data** Loss Prevention (DLP)
- **Vendor Management:** Oversaw vendor negotiations and contracts for **cloud**, IT, **security**, and analytics **technologies**, ensuring alignment with organizational objectives.

PAST EXPERIENCE

- ITCONRADs Principal & Owner – Feb 2008 - Nov 2009
 - Genuine Parts – Lead **Architect** – Consulting
 - TRX – **Senior** Manager – **Enterprise Information Management** – Consulting
 - COX – Technical Solutions Consultant – Consulting
- HomeDepot - Manager – **Information Systems** – Fulltime - April 2007- Feb 2008
- CompuCredit - Manager – **Information Architecture** – Full-Time Dec 2005 – Mar 2007
- ADP, GuardedNet(Micromuse), ITAAS - Lead **Architect**, Developer – Consulting- Jan 2005 – Dec 2005
- AON RiskLabs - Lead **Information Architect**, Developer - Full Time - Aug 2000 – Jan 2005
- Kendle International/Ajilon - Lead **Data/DB Architect**, DBA, Developer - Consulting - Apr 1999 – Aug 2000
- MBNA/DeLaRue Card **Systems** - Lead **Data/DB Architect**/DBA, Developer - Consulting - Apr 1998 –1999
- BFL **Software** – **Software** Engineer – Full Time - Apr 1993 – Apr 1998

EDUCATION

- M.S. in **Computer Science** with Business Minor, Osmania University
- B.S. in Mathematics, Physics & Chemistry, Osmania University

CERTIFICATIONS & AFFILIATIONS

- **Certifications:** Dataiku Machine Learning Practitioner, Dataiku Core Designer
- **Memberships:** **Technology** Association of Georgia (TAG), Society for **Information Management** (SIM), National Cyber **Security** Center
- **Owner:** **Enterprise Architecture** group
 - <https://www.linkedin.com/groups/54337/>

EXECUTIVE SUMMARY

- Mr. John Budala is a highly accomplished **senior** IT executive with over 30 years of proven **leadership** across a diverse range of enterprises, from global corporations to startups. His extensive responsibilities have covered North America and international markets. As a trusted business partner, John has established robust **technology** foundations to drive **strategic** solutions that align business strategy with **technology** execution. He works closely with executives, boards, clients, and peers to elevate IT and enhance **enterprise** performance.
- With full **management** and operational accountability for the **technology** teams under his **leadership**, John has restructured operating models, strengthened **strategic** partnerships with business stakeholders, and embedded **technology** into go-to-market strategies, boosting efficiency, profitability, and market expansion.
- John is an engineer's engineer and hands-on and an AI/ML practitioner, John is passionate about solving complex problems using advanced tools and methodologies, including AI/ML, low-code, and no-code solutions, especially in **data management**. He has implemented **data governance** programs across multiple organizations, monetized **data** assets to create new products, and ensured the accuracy and **quality** of **information** for end-users.
- Deeply committed to **information security**, John has established comprehensive **security** programs and developed a compliance and maturity model to communicate progress to clients, **leadership** teams, and boards.
- With over 15 years of executive experience in roles such as CIO, CTO, and Head of **Technology** Operations and R&D, John brings extensive expertise in **strategic** planning, roadmap **development**, and oversight for mission-critical SaaS and DaaS products. He has consistently enhanced **quality** and built highly efficient teams of 20 to 100 professionals, including specialists in **Cloud**, **Systems**, **Security/Cybersecurity**, **Network/Server/Storage**, **DevOps**, **DevSecOps**, **Enterprise** Solutions, **Software/QA**, **Architects**, **Product Management**, **Business/Data** Analysts, **Business Intelligence**, **Data** Integration/ETL, **Data** Scientist, **IT Helpdesk**, **BCP**, **PMO/Agile Project** Managers, and more.
- John has managed 24/7 global **technology** operations, product **development**, and R&D across APAC, EMEA, and AMER regions, with teams in the US, Canada, UK, Australia, Dominican Republic, and India.
- He has successfully led seven mergers and acquisitions, and driven large-scale initiatives to consolidate, migrate, and upgrade **systems** including FP&A, CRM, ERP, HCM, EHR, and BI/**Data** Warehousing.
- As a Certified Dataiku Machine Learning Practitioner, John has built **data science** and analytics teams to unlock the value of **data** products, driving revenue growth and **innovation**.

EXPERIENCE and EXPERTISE DETAILS

1) MY EXPERIENCE LEADING AN **INFORMATION TECHNOLOGY DEPARTMENT, INCLUDING THE **TEAM** SIZE AND SCOPE OF RESPONSIBILITIES.**

As a seasoned **Chief Technology** Officer (CTO), **Chief Information** Officer (CIO), and VP of IT and **Data** Services with over 30 years in IT **leadership**, I have led startup and medium- to large-scale IT departments within both established enterprises and high-growth environments. My experience includes managing diverse, **cross-functional** teams, steering advanced **technologies**, and aligning **strategic** IT initiatives with organizational goals. Oversaw seven mergers and acquisitions. My **leadership** philosophy emphasizes prioritizing people and customers over processes, fostering an environment where individuals thrive, innovate, and perform at their **best**. Through servant **leadership**, I focus on **team development**, empowerment, and clear, steady guidance during times of crisis. In **collaboration** with other C-suite executives, I ensured that IT strategies were tightly aligned with business objectives. I partnered with teams across Product, Customer Services, Sales, Marketing, finance and Operations to optimize customer-facing **technologies**, improve supply chain **management**, and deliver impactful business **systems** initiatives. I also managed IT budgets, ensuring **technology** investments were optimized for ROI.

I have successfully led teams of 20 to over 200 professionals, including Directors, Systems Architects, Software Developers, DevOps Engineers, Cloud Engineers, Cybersecurity Experts, IT Helpdesk, Business Continuity Engineers, Agile Project Managers, Product Managers/Owners, Business/Data Analysts, and Machine Learning Engineers and many more. Whether building new teams or scaling existing departments, I strive to cultivate a collaborative environment that promotes individual growth and drives organizational success. My approach to leadership centers on servant leadership principles, prioritizing team growth to achieve departmental and organizational goals.

Throughout my career, I have led IT departments through high-impact, complex transformation projects:

- **IT Strategy & Governance:** Developed and executed both short- and long-term IT strategies aligned with company objectives, overseeing governance frameworks, and ensuring compliance with regulatory standards like SOC, ISO, GDPR, HIPAA, HITRUST, 21 CFR Part 11 and FedRAMP and more.
- **Enterprise Architecture & data governance:** Created architectural principles, policies, and standards using TOGAF & Zachman's framework. Directed data/information strategy, information governance policies, controls, data analytics, data quality, and data life cycle management. Used various tools such as SQL, IBM Information Analyzer, Alation, BigEye and Talend.
- **Cloud & Infrastructure Services:** Led major cloud migrations to hybrid environments (AWS, Azure), enhancing scalability and business continuity while reducing costs. I also led the management and optimization of on-premises and edge data centers to ensure peak performance and reliability. Managed 24/7/365 global technology (cloud, data center) operation, product, and R&D teams in APAC, EMEA, and AMER business regions, including offices in the US, Canada, UK, Australia, Dominican Republic, and India, including Internal IT support and managed many MSP.
- **Information Security & Cybersecurity:** Built comprehensive security programs and implemented multi-layered security protocols, including "shift-left" security program, to protect both enterprise and customer data. I have managed risk assessments, disaster recovery planning, and business continuity strategies to safeguard against vulnerabilities.
- **Software & Product Development:** Guided agile teams in delivering SaaS critical applications (clinical trial management systems, Speech transcription, ICD9/10 Auto coding, Clinical Documentation Improvement, Risk/Insurance Information management systems, consumer loan application and processing management system, Income & Property Tax solutions, Project, Asset & Lease Accounting solutions, Planning & Budgeting solutions to name a few), leverage COTS and many Open-Source technologies (such as Java, PHP, Python, JavaScript, C, .Net), including SaaS and integrations with Oracle, MongoDB, MySQL, PostgreSQL, Cassandra and various API services (Custom APIs, EMR/EHR, FHIR, CCDA, HIE, H17, SAP, Oracle, UltiPro, Facebook, Twilio, MailChimp etc.), along with adopting DevOps practices to enhance cross-functional collaboration and optimize deployment cycles. I also delivered AI/ML (Snowflake, Dataiku, Knime, R) solutions, BI/Analytics solutions (PowerBI, Tableau, Qlik, OBIEE, Talend, Informatica, Snaplogic, Azure Data Factory, Oracle Data Integrator, Oracle Golden Gate, AWS Glue, IBM DataStage, etc.), SaaS first, Cloud First technologies to enhance product offerings and streamline business processes. Additionally, I introduced Atlassian solutions (JIRA, Confluence), GitHub, etc., and refined DevOps practices to optimize development/deployment cycles and foster cross-functional collaboration and built, matured and monetize data platforms.
- **Digital & Process Transformation:** Championed digital transformation, leveraging AI, ML, RPA, Low Code, No Code technologies (such as retool, Oracle, salesforce etc.) to create competitive advantage, from quick go-to-market and drive operational efficiency and product innovation. I also focused on monetizing data to develop and commercialize new SaaS data analytics products and deployed RCA (5 Whys) DFMEA & PHMEA processes.
- **Vendor Management & Stakeholder Engagement:** I managed relationships with key technology vendors, negotiated contracts, and ensured adherence to service-level agreements (SLAs). I also regularly communicated IT strategies, project progress, and results to stakeholders at all levels, including the board of directors, to ensure alignment and transparency.
- **Results & Achievements:** Approx 30% increase in operational efficiency and a 25% reduction in IT-related costs. Oversaw the implementation of key performance indicators (KPIs) across IT departments, including metrics for SDLC, DevOps, DORA metrics, technical debt, security maturity/KPI, and business systems initiatives. Drove year-over-year improvements in security posture, reducing the frequency and impact of cyber incidents across the organization. Spearheaded the development of new enterprise business applications and system integrations that supported business growth and streamlined operations.

My **cross-functional collaboration** with Product, Customer Services, Sales, Finance and Marketing teams ensured that IT initiatives directly supported business objectives and optimized customer-facing **technologies**.

2) MY **PROJECT MANAGEMENT EXPERIENCE, EDUCATION, AND TRAINING**.

In my roles as CTO, CIO, and VP of IT and **Data Services**, I have led a diverse portfolio of IT projects, from **enterprise transformations** to targeted **technology** implementations including SaaS product **development**. With 30 years of **project management** experience, I consistently deliver results that align with organizational goals, on time and within budget.

- **IT Transformations:** Directed **enterprise-wide** IT initiatives, including **cloud** migrations, ERP implementations, and digital business reengineering, IT help desk **management** using various MSP, and instilling ITIL **best practices** resulting in improved efficiency and scalability. These projects often required managing **cross-functional** teams, engaging multiple stakeholders, and working with third-party vendors. The results included substantial cost savings, improved operational efficiency, and enhanced scalability.
- **Information/data Governance:** For 20 years, I have applied **information/data governance** frameworks to develop and implement policies and procedures that ensure regulatory compliance and operational integrity across various organizations. I have established and enhanced areas such as **Data Stewardship**, Metadata **Management**, Reference and master **data management**, **Data Quality**, Compliance and **Security**, Process Automation, and Critical Report Certification. Additionally, I have leveraged tools and **technologies** like IBM **Information Analyzer**, Alation, Collibra, Big Eye, Talend, and IGC for **data** cataloging, monitoring, and **quality** assessment. 30 years of expertise in SQL and other programming tools for **data analysis** and **management**.
- **Agile & DevOps:** Championed Agile, SAFe, Scrum and Kanban frameworks and **DevOps practices** to streamline and accelerate product **development** & business **systems implementation**, reduce technical debt, and improve responsiveness to evolving business needs. I implemented a culture of **continuous improvement** significantly improved **project** timelines and the **quality** of deliverables.
- **Risk Management & Compliance:** Led/overhauled projects focused on risk **management** and **security**, ensuring compliance with SOC 2, ISO 27001, GDPR, and HIPAA. These initiatives required meticulous planning, thorough risk assessments, and ongoing **engagement** with key stakeholders to ensure successful **implementation** and adherence to regulatory requirements.
- **Vendor & Stakeholder Management:** I involved multiple stakeholders, including C-suite executives, department heads, and external **technology** vendors. I built strong, **strategic** relationships with key vendors, negotiated favorable contracts, and ensured service-level agreements (SLAs) were met. Effective **communication**, negotiation, and alignment of vendor deliverables with organizational goals were key to the success of these projects.
- **Cross-Functional Collaboration:** Many of the IT projects requires close **collaboration** with various business functions, including Marketing, Sales, Finance, and Customer Service. I focused on **cross-departmental collaboration** to ensure that IT initiatives met business requirements and delivered measurable value. For instance, when developing a new SaaS platform, I worked closely with Product, Sales, and Customer Success teams to ensure the platform aligned with customer needs and market demands. I build and deployed COTS solutions such as CRM solutions Salesforce, Hubspot, **Microsoft Dynamics 365**. FP&A Solutions such as Oracle **Enterprise Performance Management** (Oracle Financial Planning & **Analysis**), Vena, Sage Maxio etc., HRIS such as UltiPro, ADP. Office **Systems** such as **Microsoft Office Suite**. **Security** Solutions such as CrowdStrike, Rapid7, LastPass, Keeper, Venta, Darta, OneTrust etc., and many more.
- **Education:** I have a strong academic background in both **technology** and business, providing me with the foundation to lead complex IT projects. My educational credentials include a Master's degree in **Computer Science** and Business Applications, which covered programming, **systems architecture**, IT, **Cloud**, **Data** Center Support Services, database **management**, **software** engineering, and business **management** principles. I have certification in Dataiku Machine Learning Practitioner and Dataiku core designer
- **Training & Certifications:** Throughout my career, I have prioritized ongoing education and **professional development**. I've curated and led **training** programs for my teams, including certifications in **Project Management Professional** (PMP), Certified ScrumMaster (CSM), AWS Certified Solutions **Architect**, Certified **Information Systems Security Professional** (CISSP), and Certified **Cloud Security Professional** (CCSP), among others. I have also participated in various executive **leadership**, technical, and **project management training** programs to refine my **skills**. Additionally, I created in-house **training** programs in Agile **project management** and Scrum methodologies, enabling **cross-functional** teams to work more efficiently, improve **project** timelines, and enhance deliverable **quality**.

- **Continues Learning:** I regularly attend industry conferences and vendor-specific **training**, such as AWS re and **Microsoft Ignite** SIM, TAG etc., to stay informed about the latest trends in **cloud technologies** and **emerging** innovations. This ongoing education ensures that my projects leverage the most current tools and **practices**, giving the organization a competitive edge. Given the increasing importance of cybersecurity, I have also participated in specialized **training** focused on risk **management**, IT **governance**, and **security** compliance. I stay up-to-date with the latest **security** threats, tools, and **best practices**, ensuring that all IT projects I oversee meet the highest standards for **security** and **data** protection.

3) HIGH-LEVEL IT MODERNIZATION INITIATIVE I LED AND THE **SKILLS** I USED TO MINIMIZE COSTS AND RISKS.

In my role as CTO, CIO, and VP of IT and **Data** Services, I led a comprehensive IT modernization **project**, transitioning a mid-to large-sized **enterprise** from a legacy **infrastructure** to a scalable, **cloud**-based environment which was crucial for fostering growth, boosting operational efficiency, and enhancing agility.

- **Infrastructure Modernization:** Migrated on-premises **data** centers to AWS and Azure **cloud**, hybrid (on-premise and **cloud**) **data** center, reducing operational costs and enhancing disaster recovery.
- **Enterprise Applications:** Replaced outdated ERP and CRM **systems** with **cloud**-based solutions like SAP S/4HANA, Salesforce, Maxio, and **Microsoft** Dynamics 365 etc., enabling real-time **data access** and better **cross-functional collaboration**.
- **Software & Product Development & Data Management:** Built, delivered Low Code, No Code **technologies**, Modern **data** storage and analytics solutions (Snowflake and Dataiku AI/ML) solutions, along with **data** lakes and big **data** analytics platforms, were adopted to facilitate improved **decision-making** and greater **data** accessibility across the organization.
- **Security and Compliance:** Updated **security architecture** with Zero Trust models and compliance frameworks, including GDPR and SOC 2.
- **Cost Control:** I utilized **cloud cost management** tools such as AWS Cost Explorer and Azure Cost **Management** to optimize resource usage and **control** expenses. Strong SLAs and clear escalation paths were established to resolve issues promptly, while **strategic** vendor partnerships provided **access** to specialized expertise, helping to prevent costly delays or errors and ensuring efficient, cost-effective **project** execution.
- **Results:** The IT modernization was completed within budget and on schedule, leading to a 25% reduction in IT costs, a 30% increase in system uptime, and faster time-to-market. By adopting a phased approach, we minimized disruptions and built organizational confidence in the new **infrastructure**.

Summary

A seasoned leader and professional focused on technological innovation, information security, cybersecurity, digital transformation, thought leadership, and a change agent for growth and operational efficiencies to solve business problems and deliver solutions. Proven global digital leadership with strategy and planning skills across various industries such as healthcare, retails, communications, energy, financebanking, riskinsurance, and information technology. Built, delivered, and maintained many mission-critical SaaS products and solutions, business systems, analytical, and information management platforms for medium to large and fortune 500 corporations across multiple industries. Managed global operations related to Innovation, LeanAgile management, Cloud & SaaS Services, Information Technology & Engineering Services such as (Systems, Servers, Storage, Network, Telecommunications, Helpdesk, etc.), Information Governance and Management such as (Data Governance, Business Intelligence, Advanced Analytics, MLNLPNLU, and AI), Information Security and Cyber Security Management (Compliance, Maturity, Continues Improvements, etc.), Data Privacy and compliance, Software Engineering and R&D, Enterprise systems and integration such as (EHR, BPM, EA, CRM, ERP, HRM, FP&A, etc.), Mergers and Acquisitions, Budgeting & Forecasting, Vendor relationships, etc., to name a few.
