SKILLS/TOOLS:

Skills: Waterfall, Gathering Requirements, Ticket **Management**, Dashboard Creation, UI/UX, Visual **Data** Creation and **Analysis**, **Data Analysis**

Tools: ServiceNow, PowerBI, SQL, Jelly Scripting, Python, R, Jira, Microsoft Office 365, **Crystal Reports**, Azure, AWS, GCP, XML, SNOW Mirror

PROFESSIONAL EXPERIENCE:

Albertsons Companies

June 2022 – Present

Business Systems Analyst

- Create dashboards to represent the performance of products being sold, application efficiency, cloud **services**, **software**, and **data** for upper-level executives to represent overall **business** performance
- Meet with members from various technical and **operations** teams including Digital Marketing, Pharmacy, and **Finance** to gather requirements regarding requests for customized ServiceNow dashboards using **data** from ServiceNow **data** warehouse or from PowerBI using SNOW Mirror
- Translate requirements into actionable items to be included in ServiceNow ticket requests
- Create custom dashboards and PowerPoint presentations to visually represent the **data** requested and according to design specifications to give recommendations to end-users based on the **data**
- Utilize Jelly scripting to create ServiceNow UX/UI pages and write SQL queries to create **reports** in **Crystal Reports**
- Generate **reports** and dashboards for end-users through filters on large **data** tables in ServiceNow
- Analyze Change and Major Incident **data** in Excel to find correlations and pinpoint areas of improvement for various departments
- Present findings on Change and Major Incident **data** to the SVP utilizing PowerPoint and Excel pivot charts

EDUCATION:

The Pennsylvania State University, University Park
Bachelor of **Science** in Applied **Data** Sciences
2022

Project: Explainable AutoML with SHAP and LIME

- Enabled users to obtain SHAP and LIME visualizations that explained the predictions of Microsoft's FLAML (AutoML)
- Developed source code that allowed for compatible interaction between FLAML-LIME and FLAML-SHAP for explaining predictions of various ML problems, such as classification and regression
