

P. Chola Sims

IT Executive (CIO/CTO/VP IT), **Enterprise/Solutions Architect** – Public and Private Sectors

Atlanta, GA • PCholaSims@gmail.com • (404) 579-4205 • linkedin.com/in/pcholasims

PROFILE

A seasoned, **strategic**, and results-oriented IT **professional** with over 25 years of experience leading and executing innovative **technology** strategies across diverse industries, including both the public and private sectors.

Proven expertise in aligning **technology** solutions with business goals, developing and implementing **strategic** plans, and driving operational excellence. Demonstrated success in managing complex portfolios, delivering **technology**-driven projects, and enhancing organizational efficiency and customer satisfaction.

An expert at leading and managing **cross-functional** and high-performing teams delivering **technology** solutions and projects, optimizing processes, integrating **systems**, and enhancing operational efficiency to achieve business objectives.

Proven track record in delivering **technology** solutions with values ranging from \$100 million to \$3.3 billion across multiple continents, including Africa, Asia, Europe, South America, and North America.

Adept at mentoring top talent, managing vendor relationships, and fostering **collaboration** and **innovation** to drive results while maintaining a strong customer focus.

HIGHLIGHTS & ACCOMPLISHMENTS

ICF International – Vice President, **Enterprise Technology**

- **Technology Frameworks** Successfully developed and implemented ICF's first-ever **Enterprise Technology Management and Governance (ETMG) Framework**, transforming ICF's **technology** services into a modern and well-governed core feature of the company.
- **Technology Strategy** - Developed **strategic** plans, and implemented prioritized digital **transformation** initiatives, multi-year **technology** roadmaps, and operating models outlined in the ETMG to support ICF's 2x5 growth strategy (doubling in size every five years).
- The ETMG included various processes, methodologies, and capabilities such as a **cloud**-first adoption strategy, **enterprise architecture**, solutions architecture, Agile **development/agile decision-making** approach, product solutions **development**, **data** and analytics, **innovation** and emerging technologies, a governance process for free and open-source software (FOSS), M&A technology due diligence, **technology** investment review (TIR), **strategic** partnerships, vendor/**stakeholder** management, **change management**, and **enterprise risk management** (ERM).

Received the 2022 Women of Color STEM Award for New Media / IT **Leadership (ICF ETMG Framework)**.

- **Product Development** - Developed and implemented product and intellectual property (IP) **development** strategy, driving business growth for an operating group/business unit. Examples of successful products include DisasTRAX®, GrantTrax®, and CATALUS®.
- **Global Delivery Network** – Revamped and oversaw the global **delivery** centers in India for **software development**, product **development**, and IT service and operations **management**.
- Fostered a culture of **innovation**, creativity, and **continuous improvement** by implementing a **cloud**-first adoption strategy, migrating to the **cloud**, streamlining processes, and improving operational performance (e.g. Tally® Loyalty Platform).

CGI Federal

- Successfully delivered solutions for medium to large complex deals with the largest deal won having a value of \$3.3 billion (U.S. Dept of State's Visa Application Program).

Accenture

- Re-architected and re-engineered **Best** Buy's Geek Squad **solution**, a **project** previously considered “at risk,” resulting in a 12-point **improvement** in customer satisfaction and over \$1 million in savings for the company.

Assurant

- **Datacenter Consolidation** - Led Assurant **Technology** Optimization (ATO) Program to consolidate 70 global **data** centers into 5 regions: North America, Latin America, Asia, Europe, and Australia.
- Designed a \$200k NFIP Private Flood Insurance **solution**, managing 250,000 policy premiums totaling \$230 million.
- Led a \$16 million email migration **project** from Lotus Notes to **Microsoft** Office 365.
- Designed Amazon's Global Warranty (GW) Program, valued at \$31 million and covered **infrastructure** and **software development**.

SKILLS

ARCHITECTURE & STRATEGY

- Technology Strategic Planning
- Technology & Product Roadmaps
- Architecture Strategy
- Architecture Models

TECHNOLOGY LEADERSHIP

- Thought & Team Leadership
- Portfolio & Program Management
- Project Management
- Strategic Partnerships
- Vendor Management / CRM
- Stakeholder Management
- Change Management

DIGITAL TRANSFORMATION

- Digital Transformation
- IT Modernization

CLOUD TECHNOLOGIES

- Cloud Platforms (AWS, Azure, Google, ServiceNow, Salesforce, etc.)
- Cloud Native Solutions
- Systems Integration / APIs
- Modern Cloud Architectures

PROPOSAL DEVELOPMENT

- RFP/RFI/Proposal Development
- Technical Solution Development

MARKETING TECHNOLOGY

- MarTech Tools
- Customer Engagement

DATA MANAGEMENT &

EMERGING TECHNOLOGIES

- Data Governance, Collection, Engineering, Management, Analytics, & Data Science
- Technology Innovation
- Artificial Intelligence (AI) Solutions
- Machine Learning (ML)
- Robotic Process Automation (RPA)

COMPLIANCE & RISK

MANAGEMENT

- Enterprise Risk Management
- Governance & Compliance
- Industry Regulations, Standards, Best Practices, and Frameworks

BUDGET MANAGEMENT

- Financial Management
- Cost Control
- Resource Allocation
- ROI Reviews

PERFORMANCE METRICS &

SERVICE DELIVERY

- Performance Monitoring, Measurement, & Metrics (KPIs, OKRs, etc.)
- IT Operations Support
- IT Service Management (ITSM)
- Global Delivery Networks

SOFTWARE & PRODUCTS

- Software Development
- Intellectual Property (IP) & Product Development
- Agile & Lean Methodologies
- DevOps/DevSecOps
- Customer-Centered Design

LEARNING & PROFESSIONAL

DEVELOPMENT

- Organizational / Resource Development
- Training, Mentoring / Mentorship Programs

CYBERSECURITY

- Applications & Systems Security
- Data Privacy / Protection

PROFESSIONAL EXPERIENCE

MARCHAN GLOBAL SOLUTIONS

Principal Consultant / Chief Architect

Atlanta, GA

02/2023-Present

A senior IT consultant committed to analyzing existing technology ecosystems to recommend optimized and cost-effective IT solutions and processes that meet clients' emerging business needs. Additional services include:

IT Consulting & Leadership

- Successfully develop trusted relationships with senior-level decision-makers to influence problem-solving and strategic directions.
- Provide oversight for strategic planning, develop multi-year roadmaps to improve operations, optimize processes, and develop solutions with required scalability, while ensuring alignment with client's business objectives.
- Provide deep technical guidance and mentoring in advanced data management and AI processing, facilitating migration and rationalization of technologies for new business opportunities.

Business & Requirements Analysis

- Collaborate with clients and stakeholders to understand business needs, document the current state of technology, and gather requirements for future solutions, products, and services.

Architecture Strategy, Enterprise/Solutions Architecture, & Compliance

- Conduct in-depth technology landscape analysis, identify issues and opportunities, and recommend or design solutions to drive growth.
- Lead solution development teams in applying enterprise architecture to achieve business goals. During client projects, provide leadership for teams and oversee daily operations to ensure the successful implementation of solution designs.
- Develop and execute architecture strategies for foundational technology platforms, enhancing data processing and AI capabilities to drive revenue and operational efficiency.

Enterprise Technology Leader, IT Executive, thought leader, and trusted advisor to the C-Suite, and reported to the EVP of Corporate Strategy. Brought in to develop ICF's enterprise technology vision, growth strategy, and common technology development, management, and governance framework (ETMG). Ensured that the technology/IT strategy aligned with overall business objectives. Developed multi-year technology roadmaps and prioritized transformative initiatives to support the corporate growth strategy. The ETMG Framework included associated capabilities, methodologies, and processes necessary to accelerate the transformation and evolution of ICF's technology-focused services and organizational priorities into a modern, well-governed core feature of the company.

ETMG implementation significantly reduced development timelines and increased consistency and quality of technology solutions.

Key responsibilities and accomplishments included:

Technology Leadership

- Led the Enterprise Technology Group, overseeing client-facing technology solutions, platforms, and products, while driving digital transformation through a blend of GenAI and traditional technologies to enhance business agility.
- Facilitated discussions with strategic internal and external customers to prioritize and define key projects and initiatives aligned with business objectives.
- Acted as a Change Agent, establishing a culture of innovation, process optimization, and operational excellence across the organization.
- Organized cross-functional groups to share best practices and enhance understanding of key technology concepts and initiatives.
- Directed large-scale IT projects, managing diverse teams to successfully implement complex technological solutions that addressed business needs.

Strategic Planning and Execution

- Collaborated with functional and technical leaders, senior leadership, the corporate strategy group, upper-level decision-makers, and key stakeholders to define and align technology solutions with business goals, while creating annual and quarterly strategic planning (SP2) processes for technology.
- Developed and executed long-term strategic plans that supported enterprise objectives, ensuring timely, fiscally responsible delivery and alignment with business goals.
- Led market and industry analysis to inform strategy, identifying emerging trends and technologies to drive innovation.
- Translated vision into actionable plans, ensuring alignment with corporate goals to drive growth and success across various domains.
- Served as the bridge between technical teams and business leaders, ensuring that technology solutions were aligned with customer requirements.
- Ensured IT strategy was aligned with overall business objectives, fostering organizational synergy and achieving key goals.

Enterprise/Solutions Architecture

- Defined the enterprise architecture framework, establishing guidelines, principles, and standards for technology solutions, while guiding tools, platforms, products, processes, compliance, and security.
- Developed and communicated value propositions to stakeholders, ensuring alignment and support for key initiatives and customer-centric, scalable solutions.
- Led the architecture of comprehensive technology solutions, including network design, security, and SaaS/PaaS/IaaS products, ensuring alignment with business goals.
- Defined and maintained the application roadmap, incorporating upgrades, migrations, and new implementations to meet evolving business needs, in collaboration with key stakeholders to select appropriate technologies and platforms.

Digital Transformation/IT Modernization

- Led cross-functional teams implementing large-scale digital transformation projects, developing new products, and modernizing legacy systems using user-centered design, agile methodologies, and cloud technologies to enhance user experience.
- Designed and implemented resilient, secure, and efficient shared software platforms, frameworks, and systems, significantly improving performance and availability.

Cloud Platforms

- Provided thought leadership and technical expertise in cloud environments (AWS, Azure, GCP).
- Designed scalable, secure, and cost-effective cloud solutions for multiple applications.
- Led cloud migrations and implemented modern application frameworks (microservices, containerization).
- Enabled data-centric solutions and frameworks for improved performance and efficiency.
- Leveraged enterprise architecture and systems engineering to enhance IT capabilities (application, data, infrastructure).
- Guided teams in adopting cloud best practices and optimizing system usage.
- Recommended technical improvements for federal client systems to ensure scalability and performance.

Systems Integration

- Ensured seamless integration of **enterprise** applications with other **systems**, enhancing interoperability and maximizing system value using integration patterns, SOA, and middleware platforms (e.g., MuleSoft and Kafka).
- Oversaw integration projects to ensure **systems** functioned cohesively within a unified **enterprise architecture framework**.

Governance, Security, and Compliance

- Established and enforced application **architecture** principles, standards, and **best practices** to ensure consistency, **quality**, and compliance across the organization's application landscape.
- Worked closely with **security** and compliance teams to ensure all application architectures met relevant regulations, policies, and **security** standards.

Data & Analytics

- Established an **enterprise data** and analytics practice to drive **data-driven** organizational **decision-making**.
- Developed and implemented **data management** strategies and advanced solutions, using KPIs and performance metrics to assess outcomes while ensuring compliance with **data** privacy regulations and **best practices**.
- Applied expertise in **data** analytics, **management**, and **architecture** to deliver effective solutions.
- Developed and implemented **data-centric** architectures and strategies for advanced analytics, including AI/ML solutions.

Emerging Technologies

- Led AI/ML initiatives, integrating advanced **technologies** into business processes to improve **decision-making** and operational efficiency.
- Directed end-to-end execution of AI projects, ensuring alignment with business objectives and successful outcomes.
- Oversaw **development** and deployment of AI models, ensuring they met customer needs and business requirements.
- Developed product **development** methodology to drive **strategic** solutions, product commercialization, and **enterprise** capabilities in alignment with business growth strategies.
- Acted as a trusted advisor, representing the customer's voice and partnering with Product Engineering teams to ensure alignment with customer needs.
- Created prototypes and pilots to help clients visualize and fully understand technical solutions before final product **development**.

Agile & Lean Methodologies

- Championed the shift from a **project-based** to a product-based operating model, implementing agile principles to improve time-to-value and customer satisfaction.
- Applied expertise in agile methodologies, **DevOps**, and **continuous delivery practices** to drive **project** success and improve **development** efficiency.
- Led the adoption of Agile and Lean principles, fostering a collaborative environment that ensured high-**quality**, timely **solution** **delivery**.

Federal Government Contracting & Business Development

- Over 15 years of experience working in the Federal **Government** contracting environment.
- Wrote and managed RFI/RFP responses, ensuring that proposals meet technical requirements and align with customer needs.
- Built and maintained relationships with key vendor partners to integrate relevant **technologies** into proposed solutions.
- Conducted business case **analysis** to support **decision-making** processes and identify the most effective **technology** solutions.
- Collaborated closely with growth teams to align **technology** solutions with customer **strategic** initiatives and objectives.

Operational Excellence and Technology Process Maturity

- Implemented common **technology development** and **management** processes across ICF's operating groups, enabling them to deliver larger programs (\$20 million and above) while overseeing the design, **implementation**, and maintenance of global **enterprise technology** to ensure stability, **security**, and scalability.
- Managed operational support for mission-critical **enterprise systems** and applications, ensuring seamless solutions for operating group clients.
- Spearheaded process improvements to streamline operations, delivering services in a repeatable, reliable, and efficient manner while tracking key performance indicators (KPIs) to drive **continuous improvement** and measure success.
- Prioritized external customer needs and ensured internal operational metrics were met, resulting in increased customer satisfaction.

Strategic Thinking & Problem Solving

- Demonstrated **strategic** thinking in designing **enterprise-level** solutions that addressed complex business challenges, leveraging innovative **technologies** and methods.
- Consistently applied problem-solving **skills** to resolve technical issues and optimize application performance, leading to enhanced operational efficiency and business outcomes.

Collaboration, Advisory, and Cross-Functional Leadership

- Collaborated with CIO, CISO, CTOs, leadership, architects, and engineers to deliver high-quality technology services, analyzing and prioritizing capabilities to align with organizational goals and roadmaps.
- Served as the voice for customers, partnering with product engineering teams to address gaps and enhance customer experience and satisfaction.
- Engaged with business units, IT, and cross-functional teams to gather requirements, communicate architectural decisions, and deliver solutions meeting both functional and non-functional needs.
- Worked with technical and non-technical stakeholders to align strategic goals with architectural decisions.

Service Delivery & Performance Monitoring

- Established global delivery centers in India for software development, IT service, and operations management, optimizing operations and ensuring adherence to client SLAs.
- Established clear success metrics for all projects, continuously tracking progress to ensure alignment with business objectives, and documented outcomes to communicate results to senior leadership, demonstrating the impact of IT solutions on organizational goals.
- Tracked, analyzed, and monitored KPIs to optimize operations, collaborating closely with internal clients and partners to provide end-to-end service offerings and enhance client satisfaction.

Project Management & Change Management

- Led change initiatives to adopt new technologies, managing their impact on existing processes to minimize disruptions and enhance system capabilities.
- Directed large-scale application development and integration projects, ensuring successful outcomes, customer satisfaction, and operational efficiency.
- Applied change management strategies to guide teams through transitions and ensure smooth adoption of new technologies and methodologies.

Vendor Management, CRM, and Partner Engagement

- Established and nurtured strategic relationships with key vendors, aligning with business goals and negotiating contracts for timely, cost-effective service and product delivery.
- Collaborated with third-party vendors to integrate innovative solutions into the technology stack, evaluating outsourcing opportunities for organizational alignment.
- Maintained strong relationships to drive business growth and foster client loyalty.
- Managed client engagement, ensuring high-quality service delivery through regular project and operational reviews.
- Delivered presentations and published white papers to promote ICF's differentiated solutions, capabilities, methodologies, and processes.

Product Development

- Developed product development methodology for strategic solutions, commercialized products, and enterprise capabilities to support business growth and organizational goals.
- Acted as a trusted advisor to internal and external clients, serving as the customer's partner and voice when collaborating with Product Engineering teams.
- Created prototypes and pilots to help clients visualize and understand technical solutions before final product development.

Team Leadership and Professional Development

- Mentored and developed high-performing teams by focusing on talent attraction, retention, professional growth, and coaching to achieve individual and team objectives.
- Managed performance reviews, career paths, and provided feedback to drive continuous improvement.
- Collaborated with internal leaders and external partners (LinkedIn, Udemy, AWS, Microsoft, Google) to establish ICF's Technology Training Practice for over 1,700 technologists.
- Partnered with HR and senior leaders to create professional development plans for the technology workforce, aligning with organizational goals.

Technology Trends

- Identified problems, growth opportunities, and emerging technologies to give ICF a competitive advantage. Maintained ongoing perspective on key technology trends.

Mentoring

- Mentored technologists and team members and shared knowledge across various technologies and business problems.
- Founded and led ICF's Women in STEM group and worked with HR to create a mentorship program for junior technologists, focusing on supporting women in technology.

CGI **Fairfax, VA**
08/2017 – 12/2019
Director Consulting, Solutions Architect
Reported to the Chief Solutions Architect and Head of Emerging Technologies Practice (ETP) and provided support to proposal teams from CGI's 4 Business Units. Worked on complex enterprise projects that served the U.S. federal government and commercial accounts. Provided advisory services to C-level executives and subject matter experts (SME) in strategic business and technology consulting services, capture management, enterprise architecture, and solutions development.

Accomplishments:

Successfully architected and delivered solutions for medium to large complex deals ranging from \$100 million up to \$3.3 billion (U.S. Dept of State's Consular Section's Visa Application program).

ASSURANT **Marietta, GA**
06/2012 – 08/2017
Technology Solutions Architect

Served as Senior Technology Solutions Architect responsible for the design and delivery of transformative technology solutions for Assurant's five (5) business segments. Led cross-functional teams in analyzing, developing, and managing enterprise-wide programs. Prioritized enterprise-level architectures and influenced executive leadership to make decisions to adopt innovative and cutting-edge solutions. Provided expertise in Mergers and Acquisition services and oversaw the integration of newly acquired businesses.

Accomplishments:

- Led Assurant Technology Optimization (ATO) Program to consolidate 70 global data centers into 5 regions: North America, Latin America, Asia, Europe, and Australia.
- Designed a \$200k NFIP Private Flood Insurance solution, managing 250,000 policy premiums totaling \$230 million.
- Led a \$16 million email migration project from Lotus Notes to Microsoft Office 365. Designed Amazon's Global Warranty (GW) Program, valued at \$31 million covering infrastructure and software development.

ACCENTURE **Manila, Philippines**
08/2008 – 09/2009
Senior Solutions Architect, Infrastructure Outsourcing Group

Certified Systems Outsourcing Solutions Architect and a member of the IO leadership team. Utilized strategic thinking to drive priorities for the success of the organization. Created versatile business development strategies for the generation of new revenue sources for IT projects, after the 2008 Global Financial Crisis. Utilized technical knowledge and expertise, management skills, organizational skills, interpersonal skills, problem-solving, and decision-making skills to develop the Infrastructure Outsourcing Practice. Developed a client base and facilitated business growth by fostering and promoting strong relationships with partners and prospective customers.

Accomplishments:

- Researched, re-designed, and implemented changes to the Server Management Plan – which led to a 20% increase in Server Reliability, Availability, and Performance. Projects included:
 - Best Buy Canada's Network Operations
 - Best Buy US's Geek Squad Project
 - Caterpillar's Messaging and Collaboration Services (5,000+ mailboxes).
- Developed and implemented a "Reputable Local Business Plan" which produced funds for new lines of services that increased the PDC IO's annual profit margin by 22%.

Key responsibilities:

- Managed 25+ staff for global IT Systems/Infrastructure projects.
- Managed legacy systems and led integration of systems and other technology change initiatives.
- Updated Infrastructure Outsourcing Group's technology strategy and service offering roadmaps.
- Formulated and delivered Outsourcing Solution Plans for infrastructure, applications, hosting, managed services, business processes, and systems integration projects.
- Served as key technologist at Accenture's sister company Avanade and supported their Sales Support Teams.
- Served as Project Manager for Asian Development Bank (ADB) OIST Department's DNS Infrastructure Assessment Project, analyzed DNS infrastructure geographically located in 34 Asian countries.

UNISYS **Reston, VA**
06/2005 – 08/2007
Systems Engineering Manager

Served as Systems Engineering Manager / Project Manager leading teams supporting government agency projects hosted at Unisys Government Transformation Center.

- Managed a team of 30 Systems Engineers and Field Technicians supporting IT operations for US Government projects. Successfully met contractual SLAs for each client.
- Managed 30 Systems Engineers and Field Technicians supporting various US Government client projects.

- Led initiatives involving resource utilization, risk management, financial planning, and performance management.
- Designed IT system solutions for projects ranging from US\$2 million to US\$16 million using Project Management (PM) and Infrastructure Planning techniques.
- Supported U.S. government client infrastructure with 10,000 servers, 200+ hosted applications, and 10,000+ Microsoft Exchange mailboxes in data centers across the United States.
- Oversaw migration and consolidation of FDA and NIH data centers in the Washington DC metro area, ensuring data backups, data recovery, and IT service continuity.

LOCKHEED MARTIN

Staff Senior Tech Support Analyst

Marietta, GA

06/ 1997 – 04/2003

Served as a member of the Server Management Team at LMEIS, IT Provider for Lockheed Martin Aeronautical Company.

- Supported 6,000+ servers and 15, 000+ workstations used for F-22 and C-130J airplane production.
- Managed software distribution service delivery.

EDUCATION

Asian Institute of Management

Makati City, Philippines

Masters Degree, Development Management

Kennesaw State University

Marietta, GA

Bachelor of Science, Computer Science

Evelyn Hone College

Lusaka, Zambia

Diploma, Computer Science

TRAINING & CERTIFICATIONS

- AWS Cloud Practitioner
- AWS Solutions Architect
- Accenture's Systems Integration Solution Architecture
- ISACA CGEIT
- SAFe / Scaled Agile Framework
- MIT's Tackling Challenges of Big Data
- TOGAF 9.1 (Enterprise Architecture)
- CGI's Risk & Cost Driven Architecture (RCDA)
- Project Management
- ITIL v3 Certification
- Lean Thinking & Six Sigma
