www.linkedin.com/in/rajannainar

SUMMARY

A seasoned **technology executive** with deep expertise in driving AI, cloud transformation, enterprise architecture, and data science across diverse industries. Proven success in leading large-scale digital transformations, optimizing IT infrastructure, and aligning business strategy with cutting-edge technologies. Expert in AI/ML, cloud strategy (AWS, Google Cloud, Azure), and building scalable, cost-effective systems that enhance agility and drive revenue growth.

Strategic Leadership & IT Transformation

- Partnered with C-suite executives and business leaders to streamline operations, eliminate redundancy, and align technology initiatives with organizational goals, resulting in cost reductions and operational improvements.
- Led diverse teams of 150+ professionals across regions, promoting collaboration, innovation, and high-performance cultures.
- Oversaw global IT strategy, cloud migrations, and enterprise architecture, ensuring scalability and efficiency across IT infrastructures.

Cloud & Technology Expertise

- Spearheaded cloud strategies using AWS and GCP, leading large-scale migrations and modernization efforts that improved cost efficiency and performance.
- Designed cloud-native architectures, including serverless and containerized solutions, optimizing IT infrastructure for scalability, flexibility, and reduced operational costs.
- Integrated AI/ML technologies to automate complex processes, enhance predictive analytics, and drive dynamic decision-making, improving business agility and customer experiences.

Governance, Security & Best Practices

- Developed and implemented robust governance frameworks, CI/CD pipelines, and DevOps practices to ensure efficient, secure, and compliant IT operations.
- Worked closely with cloud security and network engineering teams to build scalable, resilient hybrid infrastructures, aligning IT assets with business needs while ensuring data security and regulatory compliance.

Business Impact & Growth

- Drove significant business outcomes by leveraging cloud, AI, and predictive analytics to enhance decision-making, dynamic pricing, and customer experiences, improving market competitiveness.
- Managed strategic vendor relationships (AWS, Google, Equinix) to optimize performance and integrate new technologies, driving service delivery improvements.
- Delivered operational cost savings and revenue growth through technology-driven solutions, achieving a 20% reduction in cloud spend while increasing system scalability and efficiency.

Leadership & Organizational Development

- Mentored and developed high-performing teams, fostering a culture of continuous improvement and collaboration.
- Led Agile Release Trains (ARTs) to ensure the continuous delivery of value, aligning IT initiatives with business priorities and driving results.

EDUCATION

EXECUTIVE MBA • GEORGIA STATE UNIVERSITY, GA, USA

Executive • Leadership • Financials • Marketing • Operations • Digital Transformation • Data Analytics • FinTech • Negotiation • Entrepreneurship • Change • Leading the Enterprise

MASTER OF SCIENCE (COMPUTER SCIENCE) • M S UNIVERSITY, TAMILNADU, INDIA

Principles • Programming Languages • Algorithms • Operating Systems • Compute • Storage • Networking • Architecture • Parallel Processing • Image Processing • Graphics • Databases • Neural Networks • Trouble Shooting • SDLC & Standards

CERTIFICATIONS

AWS SOLUTIONS ARCHITECT PROFESSIONAL • AMAZON WEB SERVICES

LEAN SIX SIGMA - GREEN BELT • GEORGIA STATE UNIVERSITY

TOGAF 9.1 • THE OPEN GROUP

PROFESSIONAL EXPERIENCE

Chief Architect, AI

n-Bricks Inc – Atlanta, GA, USA | Sep 2024 – Present

- **AI-Driven Cloud Transformation:** Leading the integration of AI/ML models in cloud environments to automate infrastructure management, enable predictive analytics, and drive intelligent decision-making, enhancing operational efficiency and scalability.
- **Generative AI Expertise:** Leveraging Generative AI (Google Gemini, AWS Bedrock) to innovate content creation, boost customer engagement, and develop AI-powered applications, optimizing cloud systems and accelerating transformation.
- **Agent-Based AI Implementation:** Deploying autonomous intelligent agents for cloud operations, workflow automation, and dynamic resource management, driving real-time decision-making and cost optimization.
- **Strategic Cloud & AI Alignment:** Designing cloud strategies that integrate with AI technologies, unlocking new revenue opportunities and delivering AI-enhanced business applications for sustainable growth across industries.

Principal Data Science Engineer

Travelport – Atlanta, GA, USA | April 2024 – Sep 2024

- **Cloud Migration & Cost Savings:** Led the migration of 5 petabytes of Travelport's data to AWS, optimizing infrastructure and reducing costs by 20% through automated scaling and cost-effective storage solutions.
- **Booking Optimization:** Developed predictive models for airline availability, improving booking accuracy by 60% and increasing conversion rates by 40%, boosting revenue and customer satisfaction.
- **Dynamic Pricing:** Engineered price prediction models with deep learning (LSTM, GRU), reducing pricing errors by 35% and enabling data-driven pricing strategies globally.
- **Offer Rating System:** Created a machine learning-based offer ranking system, increasing acceptance by 97% and enhancing personalization in air shopping.
- **Performance Optimization:** Optimized global cache systems with Apache Spark and AWS Lambda, reducing latency by 70% during peak events, improving user experience.
- **Cross-Functional Collaboration:** Collaborated with teams to translate complex data models into actionable business insights, driving growth, efficiency, and cost savings.
- **Scalable Solutions:** Led a team in deploying serverless, cloud-native solutions for real-time prediction systems, optimizing performance while reducing infrastructure overhead.

- **Pricing Optimization with RL:** Applied reinforcement learning for dynamic pricing, increasing revenue per flight by 28% and optimizing profitability during peak seasons.
- **Model Improvement:** Directed A/B testing and retraining to maintain model accuracy and relevance in a fast-paced market.

Principal Enterprise Architect, Cloud

Travelport – Atlanta, GA, USA | August 2021 – March 2024

- **Executive Leadership & Strategic Alignment:** Built strong relationships with C-level and senior stakeholders, guiding AWS Cloud initiatives and ensuring alignment with business objectives.
- **Cloud Transformation Strategy:** Developed a Cloud Transformation & Acceleration Framework, leveraging the 7R's migration model and adopting serverless, containerized, and event-driven architectures for faster cloud adoption and modernization.
- **AWS Landing Zone & Governance:** Designed and launched an AWS Landing Zone, establishing governance, security models, and multi-account management across 90+ accounts, ensuring alignment with TOGAF principles.
- **Multi-Cloud & Hybrid Connectivity:** Led hybrid cloud architecture design using AWS Direct Connect and Equinix interconnections for low-latency, secure connectivity between AWS, Azure, and on-prem systems supporting PCI and non-PCI workloads.
- **Infrastructure as Code (IaC):** Developed a reusable service catalog using Terraform and AWS CloudFormation, enhancing deployment efficiency by 30%.
- **CI/CD Automation:** Implemented end-to-end CI/CD pipelines using Docker, Jenkins, GitHub, and Artifactory, accelerating deployment cycles and improving time-to-market for new features.
- **Monitoring & Security:** Integrated Splunk and Datadog for real-time monitoring, and configured AWS Security Hub, IAM, and SSO to ensure proactive security and compliance.
- **Cost Optimization:** Led cloud cost management initiatives, optimizing cloud spend by 20% through improved cost allocation, visibility, and forecasting.
- **Cloud Migration Leadership:** Managed the Lift-and-Shift migration of key Travelport services (Air, Hotel, Car, Rail) to AWS, leveraging cloud-native architectures to improve scalability and availability.
- **SAP & AI/ML Migration:** Led the secure and efficient migration of SAP and AI/ML workloads from on-prem and GCP to AWS, driving operational efficiencies.
- **API Management & Platform Modernization:** Partnered with Google and Kong to modernize the API management platform, migrating from legacy systems (Akana, IBM DataPower) to cloud-native solutions.
- **Vendor & Partner Collaboration:** Managed technical engagements with AWS, Google, and Equinix to define cloud architecture, migration strategies, and ensure successful integrations across platforms.

Executive Enterprise Architect

Anthem – Atlanta, GA, USA | April 2020 – July 2021

- **C-Level Advisory & Strategic Alignment:** Built trusted relationships with C-suite and senior stakeholders, ensuring alignment between IT strategy and business objectives. Delivered key pharmacy benefits initiatives to improve operational efficiency and customer outcomes.
- **Enterprise Architecture Leadership:** Developed and governed Anthem's enterprise architecture, establishing reference architectures, guidelines, and standards to drive consistency, scalability, and integration across the organization.
- **Architecture Governance & Solution Design:** Founded the Architecture Governance Framework and led the Architecture Review Board. Applied TOGAF principles to design and evaluate solution architectures, ensuring alignment with business goals and seamless system integration.
- **Vendor Collaboration & Platform Development:** Led external vendor partnerships to design and implement the Rx benefits platform, ensuring integration with Anthem's broader IT ecosystem.
- **Microservices & API Strategy:** Architected core microservices for the pharmacy platform and launched a Drupal-based developer portal for API access, supporting both internal and external consumers as part of the digital API strategy.
- **AI/ML Integration:** Partnered with AI/ML teams to integrate predictive analytics into the pharmacy benefits platform, enhancing operational efficiency and customer service through faster drug delivery and improved decision-making.

- **Technology Innovation & Industry Leadership:** Founded the Technology Forum to drive innovation, and participated in Gartner and Forrester evaluations, providing thought leadership on emerging technologies and industry trends.
- **Cloud Optimization & Cost Savings:** Collaborated with CloudOps and DevOps teams to optimize AWS environments, implementing CI/CD pipelines, auto-scaling strategies, and cost reduction initiatives, leading to significant savings while maintaining high performance.

Enterprise Architect

Delta Airlines – Atlanta, GA, USA | **June 2019 – March 2020**

- **Leadership & Team Management:** Led a 150+ team of directors, architects, and developers, ensuring successful execution of revenue management and digital projects. Fostered collaboration to meet business goals.
- **Stakeholder Engagement:** Defined Statements of Work (SOW) and aligned project goals with business needs, establishing architectural principles and best practices across engagements.
- **Cloud Enablement & Transformation:** Developed and executed Delta's cloud migration strategy, transitioning to AWS, optimizing cost, and improving operational efficiency.
- **Agile & PI Planning:** Championed Agile practices and PI planning to drive incremental development, ensuring alignment with business priorities and delivering on-time features.
- **Architecture Governance & Standards:** Led Architecture Review Board, aligning solution designs with enterprise architecture frameworks (TOGAF) to ensure scalability, performance, and integration.
- **Technology Innovation:** Introduced new technologies like AMQ and Kafka for event-driven architectures, improving real-time data processing and decision-making.
- **Cloud Migration & Modernization:** Designed migration strategy for key systems, including refactoring MyTrips Java apps to AWS Serverless, reducing overhead and enhancing scalability.
- **High Availability & Resilience:** Partnered with IBM RedHat to design resilience strategies for OpenShift, ensuring high availability and minimal downtime for critical systems.
- **Agile Mentorship:** Mentored Agile teams, promoting continuous improvement and high-performance culture to consistently deliver quality solutions.

IT Architect

Eaton – Peachtree City, GA, USA | **May 2008 – May 2019**

- **Cloud Architecture & Strategy:** Defined principles for IaaS, PaaS, and SaaS solutions, driving Eaton's cloud transformation across Google Cloud, AWS, and Red Hat OpenShift. Led hybrid cloud strategies and containerization to modernize infrastructure.
- **Cloud Migration:** Executed cloud migration strategies for legacy applications, improving scalability, reducing costs, and optimizing performance across business-critical systems.
- **IoT/IIoT Solutions:** Led IoT/IIoT initiatives with ThingWorx, enhancing production efficiency and automating processes by gathering real-time data to drive insights and improve OEE.
- **SOA & Integration:** Designed and implemented SOA principles for seamless integration across internal and external systems. Established A2A and B2B messaging standards, leveraging TOGAF to ensure scalability, security, and interoperability.
- **Technology Evaluation & Modernization:** Led evaluations of emerging technologies and vendor solutions, modernizing legacy applications and driving business transformation. Participated in Gartner forums to assess new B2B platforms.
- **Order & Pricing Systems:** Architected a scalable core pricing engine, integrating with SAP, Oracle CPQ, and Zilliant, improving pricing accuracy and system integration.
- **System Upgrades & Re-platforming:** Led re-platforming efforts for order processing systems, ensuring scalability and alignment with business needs. Designed and implemented the Lighting Order Processing System for seamless integration across departments and partners.
- **WMS & SaaS Integration:** Developed integrations between Red Prairie WMS, SAP, and Zilliant, enhancing warehouse management and pricing model accuracy.

TECHNICAL SKILLS

Programming Languages & Frameworks:

- **Languages:** Java, Scala, Python, C, C++, Objective-C, Swift
- **Web & Full Stack Development:** JavaScript, TypeScript, ReactJS, NodeJS

Cloud Platforms & Infrastructure:

- **Cloud Providers:** Amazon Web Services (AWS), Google Cloud Platform (GCP), Microsoft Azure
- **Infrastructure Management:** Kubernetes, OpenShift, Docker, Helm, Karpenter, ArgoCD
- **Cloud Networking:** AWS Direct Connect, AWS Transit Gateway, AWS VPC, Google Cloud VPC, Google Cloud Interconnect, Azure VNet, Azure ExpressRoute, Equinix Fabric Cloud Router

AI/Deep Learning:

- **Frameworks/Platforms:** TensorFlow, Keras, OpenAI (GPT), Google Gemini, AWS Bedrock
- **Technologies:** Neural Networks, **Generative AI** (e.g., Gemini, OpenAI GPT), Natural Language Processing (NLP), Computer Vision, **Reinforcement Learning**, **Generative Models** (GANs, VAEs), **Multimodal AI** (text, image, video, audio integration)
- **Cloud Services:** Google Cloud AI, Vertex AI, Google Gemini API, AWS Bedrock, AWS SageMaker

Networking & Load Balancing:

- **Load Balancing:** F5, Akamai, AWS Route53, GSLB, AWS NLB, AWS ALB, Google Cloud Load Balancing, Google Cloud DNS, Azure Load Balancer, Azure DNS

API & Microservices:

- **API Protocols:** SOAP, RESTful, GraphQL, gRPC, WebSocket
- **API Management & Gateways:** APIGEE, Kong, AWS API Gateway
- **Microservices:** Design, development, and orchestration of microservices architectures

Databases & Data Management:

- **Relational Databases:** DB2, SQL Server, Oracle, Sybase, MySQL, PostgreSQL, AWS RDS
- **NoSQL Databases:** MongoDB, Cassandra, Redis, DynamoDB
- **Big Data Technologies:** Hadoop, Spark, Hive, MapReduce, AWS EMR, AWS Glue, AWS Athena, AWS S3, AWS Redshift, Google Cloud Storage, Big Query, Azure Blob Storage, Azure Data Lake

Enterprise & Integration:

- **SAP Integration:** SAP, SAP PI/XI, SAP Business Connector

Messaging & Streaming Technologies:

- **Message Queues & Streaming:** MQ Series, AMQ, Kafka, Kinesis, Google Cloud Pub/Sub, Google Cloud Dataflow, Azure Service Bus, Azure Event Hubs

DevOps & CI/CD:

- **Infrastructure as Code (IaC):** Terraform, CloudFormation (CFT), CDK, SAM
- **Build & Dependency Management:** Maven, Ant, SBT, NPM
- **Version Control & Collaboration:** Git, GitHub, GitOps
- **Continuous Integration & Deployment (CI/CD):** Jenkins, CircleCI, GitLab CI

Software Design & Methodologies:

- **Design Patterns & Architecture:** Design Patterns, Archimate, UML, Object-Oriented Analysis and Design
- **Agile Methodologies:** Waterfall, Agile, SAFe, Scrum
