
Profile for **Enterprise Data Architect/ Solution Architect /Data Architect/Product Owner/Program Manager**

- 25 Years in the IT industry, proven track record of successful, production-implemented **data** projects. **Data** Product **Management**, **Project** Management, Product Owner
- Business Consulting, Process Consulting, **Project Management**, Program Management, Sales, **Data Management** Consulting, Presentations, Defining reference solutions, frameworks, Product Selection, and sLong/short-term **technology** roadmaps.
- Exposure to IBM Reference **Architecture**, Insurance IDM, **TOGAF**, **Zachman**, Kimball, Inmon Architectural **Framework**
- Good experience in Big **Data Technologies** I, **Data Management**, Machine **data**, sensor data, real-time **data** streams
- Extensive domain **knowledge** in the Insurance Industry, including P&C Insurance, Life, Specialty, Aerospace
- Strong experience in **Data** Test **Management**, Test Plan, Test Execution, Test Load, and Test Integration.
- Strong experience as a **Data Architect**, Big **Data**, Integration Architect, Real-time **Data** Integration, **Data Architecture**, SOA Integration **Architect**
- Active member of DAMA, Accord, Various **Data** warehousing and Analytics **Architecture** Groups
- Multiple cycles of EDW, **DM** MDM, Metadata **Management**, and Reference **Data Management** Models
- Experience in different **data** exchange standards, including XML, XSD, Accord, ISO, Clinical **Data**
- Specialized in integrating analytics and business **intelligence** to provide solutions according to clients' organizational policies and IT environment. Provide **leadership** to employees
- Strong communicator, Requirement gathering, Business Presentations, **Stakeholder** Interactions, Managed **Development** Programs
- Good experience in **cloud data management** and integration, including Managing platforms such as Azure, Amazon **Cloud**, and Google **Cloud**.

Summary:

- 5 Plus years' experience in Azure, GCP, Snowflake, Salesforce, Alation, Alation Analytics
- **5 Years experience in Snowflake, Synapse, AI, ML, RPA**
- **5 Years experience in Developing IOT and Mobile applications**

- **Data Modeling:** Over 15 years of Dimensional **Data** Modeling experience. Insurance P&C **Data** Model, Accord P&C Model, Sound **knowledge** of Dimensional Modeling, **Data** Vault Models, OLTP Models, Canonical Integration Models, EAV, Associative Modelling, Ralph Kimball and Bill Inmon Methodologies, Star/Snowflake schemas, **Data** Marts, Facts & Dimensions, Logical & Physical **data** modeling, MDM **Data** Modeling, Unstructured **Data** Modeling, Metadata, Reference **Data** Process models. ETL and Reporting **Framework** Modeling, Database **Management** in SQL Server, Oracle, DB2
- **Data Management:** Over 15 years of **Data** Warehousing experience using IBM Infosphere **Information** server 11.5 (DataStage, **Quality** Stage, IGC, **Data** Click, Multiple Connectors, CDC), Server and Parallel edition of DataStage 7.0 to 8.5, Informatica Power Center 6.0 till 9.5 (Designer, Workflow Manager, Workflow Monitor, Repository Manger), PowerConnect, Power Exchange. 10+ years of experience in **Microsoft** BI Platform (SSIS, SSRS, SSAS). 7+ years of experience in AbInitio, Express IT, **DM** Express, Pentaho, Talend
- **Big Data:** Tibco ActiveSpaces, DataBricks, Horton Works, Hadoop, Hive, Hbase, Flume, Pig, Spark, Scala, Cassandra, Sqoop, NoSQL, Kafka, Impala, , Hue, Nifi, Kibana, Apache Big **Data** frameworks and standards
- **Realtime Data:** Tibco BE, CEP, BW, IBM MQ, IBM Infosphere ISD (Infosphere Service director) for real-time **data** integration.
- **Architect:** Over 15 years of Architectural experience as a **Data** Integration **Architect**, ETL **Architect**, and **Data** **Architect**. Integration of complex legacy **systems** in the warehouse, **data** migration, architectural design, and analytics over **data**. Defined various **Data** Integration patterns and frameworks with innovative approaches. Expert **knowledge** of Integration of New generation PAS **systems** with legacy **systems**. Expert in Accenture Duck Creek Integration, Shredding.
- **Business Intelligence:** 8 years of Business **Intelligence** experience using SSRS, SSAS , Cognos , BO, Spotfire
- **Analytics:** 5 years of Experience in Multidimensional **Data** Analytics including SSAS, TM1, R
- **Databases:** 15+ years of experience using Oracle, DB2, MS SQL Server, Teradata V2R6/V2R5, Teradata
- **Hadoop:** MongoDB, Hive, Hbase, Scoop, Ambari. Hortonworks Studio, Cloudera Studio.
- **Programming Languages:** SQL, T-SQL, PL/SQL, **Microsoft** .Net, Java, VB, Perl, Python, R
- **Cloud Integration:** SalesForce, Accord Integration, DuckCreek Integration, Informatica **Cloud**.
- **Data Tools:** Trillium, Informatica IDQ, Informatica MDM

Certifications:

Informatica level -1 Certified

Domain Certification Insurance (INS 21, 22, 23)

Azure Certification, SQL, and .Net Certification

Trainings:

IBM MDM Architect

IBM IGC, IBM Frameworks (IFW, IIW, Insurance)

IBM Big Data platform

Azure Cloud

Data Modelling by Kimball Group

Snowflake Architect Training by Snowflake

Education:

Master of Computer Application – Amravati University, Oct 1998

Bachelor of Science – Nagpur University, May 1995

Work Status:

US Citizen

Contact

Email: sm.mokadam@gmail.com

Cell: 404-839-0907

Professional Summary:

Employer: Subcontractor to Booz Allen

Nov 21 –

Till Date

Architect - Enterprise Data Analytics and Visualizations

Project Description:

Define Data Governance Process, Manage Data Cataloging and Governance Platform. Build data sources and integrate them in the Alation Data Catalog. Complete Azure suit management and integration. On-Prem resources data cataloging and integration with Alation. Alation Platform Availability, Management, Maintenance, On-Boarding users, and custom data and catalog sets. Co-ordination with Public health users and query resolution

Products: Alation, Alation Analytics, Synapse, DataBricks, Azure Cloud, Azure Data Factory, SAS, Azure Cloud, MS Fabric, Dataverse, Azure Data Integration, and visualization

Responsibilities:

- Data Governance Architecture
- Defined Data Cataloging and Governance Strategy
- Setup Technical and Business Cataloging and governance Processes and SOP's.
- Metrics Building for Cataloging Process
- Alation and Alation Analytics SME
- Govern Alation Platform and co-ordinate with Product vendor

Employer: Allegis Group

Aug '17 –

Oct 21

Enterprise Data Architect/Program Manager

Project Description:

Building a Unified data integration platform as a Data Lake using Microsoft Azure cloud. Integrating different processes, including Lead Management, Recruitment, Onboarding, Hiring, workforce scheduling, workforce reporting, optimization, and cost management. This unified platform will serve as a single source of Truth to provide different operational and analytical decisions throughout the MarketSource business.

Defined and design the Architecture for Lift and Shift phase and Re-Plumb phase for Operating companies data and processes migration from On-Prem , Azure to Snowflake, Informatica to Metillion. Migrated multi-terabyte data, thousands of objects to Snowflake.

Products: Snowflake, MS Dataverse, Azure Cloud, Webfocus, PowerBI, SSIS, SSAS, IBM Kenexa, Infor, Salesforce, Peoplesoft

Responsibilities:

- Snowflake Architect, Snowflake data and process migration architecture and implementation
- Report migration from webfocus to PowerBI
- Business Requirement consolidation, work sessions, business process modeling, business rules
- Building data governance processes, Data Catalog, Data lineage mechanism, Data Consumption reports
- Cloud data management strategy, Snowflake implementation, Migration from SQL to Snowflake
- Adoption and Business leadership, Align with multiple business partners
- Logical and Physical data modeling, data model framework engineering, layered models
- Data Integration process definition and documentation

- Business process consolidation, **improvement**, and Integration across multiple platforms
- Overall **data** integration **architecture**, supervision, approval, **development** oversee, validation.
- Lead Allegis **Data Governance** and Cataloging Initiative to catalog Alation Opco's **Data** Assets
- Setup **Enterprise Data** Catalog using Alation Cataloging
- Setup API integration with Alation **Data** Catalog

Technologies:

- **Database: Snowflake, Azure SQL server, Oracle**
- MS Azure, Blob storage, File Storage, SQL Server as Service, BI Suite (SSAS/Tabular/SSIS)
- Informatica Salesforce Integration, DBAmp, Salesforce,
- MS HDInsight, Spark, Scala, Python, Java, Hive, Hue ,HDFS
- Alation Catalog, **Governance** APP, Alation Analytics

Employer: Webash

Norfolk Southern (Client of Webash)

July '16 –

July '17

Data Architect/Data Product Owner

Project Description:

TEP: Railroad **Transportation** Event Processing, real-time **Data** Integration, and Managing Train, Equipment, and Location **Transportation** state. The ESB and SOA-based **architecture** provides all the **data** needs for the railroad.

TEP Datalake: A **Data** Hub for real-time sensory **data**, radio data, Waybill data, **data** streams, equipment state, and event **data**. The Big **Data** platform implemented different **data** patterns.

MDM: Master **Data Management** for Customer Master, Location Master. Defined conceptual, Logical, Physical **architecture**. Defined **data** sync patterns, **access** patterns, and **governance framework**. Implemented using IBM MDM 11.5

Responsibilities:

- Evaluate **architecture** patterns, Define **best** patterns for **data** usage, **data** security, **data** compliance
- Define concept models, logical & physical **data** model
- Define **data** integration needs, rules, **data governance framework**, and **data quality framework** for the MDM program.
- Define strategy for C Level Business users, discuss with business, define short-term and long-term roadmap and blueprint.
- **Architecture** pattern **management**, a core member of the **Architecture** review board

- Process management, Project management, Resource management

Technologies:

- Enterprise Architect(EA), Tibco BE, BW, Spotfire, ActiveSpaces, IBM DB2, IBM Data Architect, Erwin
- IBM InfoSphere 11.5 (Data Stage, Quality Stage, IGC, DataClick, Data Analyzer, ISD)
- IBM Party Model
- Cassandra, Spark, Scala, Data Flux(Big Data Platform),Python, Java, Hive, Hue ,HDFS, Tibco ActiveSpaces (IMDG)

Employer: Syntel Inc.

Insurity – (Client of Syntel Inc.)- Harford

Feb '16 – June

'16

Data Architect

Project Description:

The objective of this project is to build an insurance data warehouse as an enterprise insurance data view with a new-generation technology platform, which is an integrated view of structured and unstructured data in the insurance industry. This view is built Based on the Standard Insurance data warehouse Accord Model with the extension of Dimensional model data marts, dimensions that hold structured and unstructured data. This view was practically Integrated with various COT products in the insurance industry, including PAS like Duck Creek and Marine PAS. Decision Products.

Responsibilities:

- Product Business Process Model Design
- Extension of Accord and Define Enterprise Insurance Data View Model
- Discussion with Various Project Partners and stakeholders and build a conceptual view of the Product model.
- Manage Efficiency and Integrity while Integrating with Unstructured Model design.
- Understand newer technologies like Big Data, Cassandra, MongoDB NoSQL, and NewSQL

Technologies:

- Erwin Enterprise
- Microsoft SQL Server, SSAS, SSIS, Cassandra, Python, Java, Informatica PowerCenter
- Hive, HDFS, HBase, Scoop, Data Flux, CDC (IBM CDC), IBM IFW/Reference Model

Employer: Syntel Inc.

– Jan '16

Data Modeler / Data Architect**Project Description:**

The objective of this project is to build an Insurance Data Warehouse system. This system suffices for policy management, claims management, billing, agency, and compliance data management requirements for the AIG insurance business's aerospace and marine insurance policies. This EDW design involves Integration with existing DB2-based Legacy data applications, Enterprise Data warehouses, Agency Systems, Business reporting, compliance management, and document generation applications. Integrated data from the warehouse helps generate decision dashboards, reports, and various data feeds and compliance reports.

Responsibilities:

- DuckCreek P&C Model for AIG
- Aerospace Data Model Implementation
- Gathered Business Requirements, Consolidated and defined data Integration patterns for warehouse.
- Defined, Developed and Maintain data model for EDW, Multiple Data Marts, Compliance Data Management, Metadata Management, MDM
- SQL Server Database Administration.
- Defined Architectural Framework and Pattern for Successful Integration with Legacy Systems
- Defined end-to-end data Integration strategy, methodology and Model-driven ETL Framework
- Defined Data Publishing strategy from data warehouse data
- Issue resolution with Higher Management
- Account and Project Management and Offshore Co-ordination.

Technologies:

- Erwin Enterprise Data Model, Accord Insurance Data Model
- Microsoft SSAS, SSIS, SSRS, Tableau, Teradata, R, DB2, SQL Server 2012, Power BI
- Accenture Duck Creek, Guidewire
- IBM IGC, Data Click
- XML, Java, JavaScript, .Net C# Components, R Scripting

Employer: Syntel Inc.

Tower Insurance – (Client of Syntel Inc.) Chicago, IL

Apr '11 – Apr'13

Data Modeler / Data Architect

Project Description:

The objective of this project is to build a Data warehouse for integrated data published from various Policy admin systems for Commercial and Personal Lines of business. Datawarehouse also integrates data from third-party PAS acquired by the Insurance Carrier. A data warehouse is a centralized EDW for upstream reporting and analytical data. Datamart includes Claims, Policies, Customers, Agents, and Quotes. Marts also include operational DataMart's like policy inquiries, claims inquiries, billing inquiries, and coverage clearance marts. The EDW integrates more than 10 Legacy systems, and operational systems include Guidewire and DuckCreek. ISO reports for different states are published from the data warehouse. Reinsurance and Treaty data feeds from Data Warehouse

Responsibilities:

- Interacted with End-users to gather Business Requirements and Strategize the Data Warehouse processes
- P&C Policy system Integration, Implementation of P&C Model for Insurity BI deployment
- Defined Data Model for data warehouse and Marts. Legacy Integrated Model
- Compliance Data Model for ISO reporting extending Accord Insurance Data Model.
- Maintain and manage OLTP Models for Duck Creek PAS Shredding environment.
- Guidewire Integration with Warehouse, Suggest source modifications.
- Defined ETL strategies and Best Practices for EDW environment
- Defined different data integration and validation frameworks, including data validation, Error checking process, lineage, recovery, and reconciliation.
- Defined mechanism to extract and integrate data from COBOL data sets.
- Defined data usage using OLAP and Ad-hoc Data Analysis.
- Defined SOA integration pattern with Warehouse.
- Ensured Development as per Architecture Defined

Technologies:

- Erwin Enterprise Data Model, Accord Insurance Data Model
- Microsoft SSIS, SSRS, Business Object, Cobol Copy Books, R, DB2, SQL Server 2012, TFS, Informatica PowerCenter
- Accenture Duck Creek, Guidewire
- XML, .Net, Cobol, T-SQL, Stored Procedures, DB2

Employer: L&T Infotech

Dec'10

Modeler/ETL Architect/Data Architect/Lead

Project Description:

Market Model: The objective of this project is to build the analytical model for commercial, personal, and claims administration data provided by participating carriers and TPA. This integrates data from carriers' PAS, Invoicing system, Investment system, and claims and provides an end-to-end view for stakeholders to ensure efficient outcomes and safeguard investors' investment. This also integrates data feed from third-party research agencies like Moody's and S&P.

Salesforce Integration:

The objective of this project is to establish a real-time integration environment with Salesforce (the leading cloud CRM) and the client legacy environment.

The integration provides real business opportunity sync with the downstream applications, which results in faster response to opportunities. Integration points were the Client Prospect Legacy application, People Master, and customer Datamarts.

Client Checking Process:

The objective of this project is to develop enterprise-wide client-checking processes and a supporting enterprise-wide Client-Checking System (CCS) to identify and resolve potential business and legal conflicts between and within its Operating Companies (OpCos).

The system will also facilitate organization compliance with requirements imposed by trade sanctions and will include monitoring against the Office of Foreign Assets Control (OFAC) sanctions list.

Claims Data Mart and Market Master Research data marts

Responsibilities:

- Defined Data Models, Data Integration Meta model for Framework.
- Designed TPA Data Integration methodology, TPA Data Integration Models
- Defined SOA Integration methodologies and strategies through SOA Canonical Data Model
- Defined OLTP and SOA Data Modeling for the SFDC applications
- Interacted with business to check for data points and quality of data

- Designed ETL specification and Development
- Involved in Design and Development of ETL
- Developed Integration with web services

Technologies:

- Erwin Enterprise Data Model, EDW Standard Data Model
- IBM Infosphere DataStage, Informatica PowerCenter, PowerExchange, Web Service Hub, Oracle 9i, Teradata, SQL Server 2005
- Business Object, Universe Designer, Cognos, Cognos TM1
- XML, Java, Hybernet, Spring, Cobol, PL/SQL, Perl
- Salesforce, Apex Script, Salesforce Informatica Integration
- Metadata Management, Glossary Catalog

Employer: L&T Infotech

Harleysville Insurance - Harleysville, PA

Jan' 05 – Aug'06

Architect/ Lead

Project Description:

The objective of this project was to develop a policyholder data mart for Corporate and Stat reporting. The Corporate Stat application is responsible for generating a Policyholder Report that generates a policy's total Term Experience. These reports are used by Underwriters, Agents, and the Loss Control department.

These reports are split by Branch and further by Policy Status, viz. In-force and Expired policies. The existing system holds reports for expired policies for the past 5 years from the current date. The source from where the report is generated is the Premium Stat File, Premium Pending File, Loss Stat File, and Claims Trans file.

Data model for Group Life application, Agency Portal, Duck Creek Integration with Warehouse, AQS Integration. Guidewire Integration with Warehouse.

Responsibilities:

- Business Process Understanding and Requirement Gathering, Driving Business Meetings
- Design and Develop End-to-End Data Models for EDW, Multiple Data Marts, Compliance Reporting Structure, Canonical Modeling, Integration and Process Models, Metadata Models,
- Metadata and Master Data Management (MDM), MDM Modeling
- Define and Designed the ETL architecture of the project

- Defined Reverse engineering of Stat Application logic from Cobol programs
- Defined ETL and Reporting Process Framework Model
- Development of mapping Methodology, Data Lineage, Reference Data

Technologies:

- Erwin Enterprise Data Model, EDW Standard Data Model
- IBM DataStage Parallel Edition, Informatica PowerCenter, PowerExchange, Teradata,SQL Server 2005
- Business Object, Universe Designer
- XML, Java, Spring, Cobol, PL/SQL, Perl

Employer: L&T Infotech

Eaton

July' 02' –

Dec 04

Project Description:

Order Management and Product Configuration Portal for Eaton Hydraulics
Data Quality Management System for Eaton

Employer: Astra Mascon

Web Development, Data Quality Product, Knowledge Portals

Dec' 98

– Mar'02

Developer/Lead/DBA

Project Description:

This involves developing the Lost and Found Portal, Knowledge Sharing Portal, Product Development, and Configuration for data quality products in Java and .Net. It also involves core development activities, including business sessions, development, unit testing, Production support, and other day-to-day activities for the development life cycle.

Responsibilities:

- ETL Developer, DBA, Database Programmer
- Java Developer
- Business Analysis
- Content Developer

Technologies:

- Oracle Hyperion (BRIO Reporting)
- XML, Java, J2EE, Hibernate, Spring, JSP, Cobol, PL/SQL, Perl, PHP, Perl
- VB 6.0, .net, C#, IIS, ASP, SQL Server, COM, DCOM, DLL, C, C++
