

M. Webster
mtwebstersr@gmail.com

RELEVANT EXPERIENCE

Apr '23 – Jan '25

Vsiontek

Enterprise Architect

- Designed and implemented complex IT solutions to meet business needs, including **cloud**-based applications, **data** analytics platforms, and **enterprise** integration solutions.
- Collaborated with business and IT stakeholders to understand requirements and translate them into architectural blueprints and technical specifications.
- Experienced with EA modeling and visualization tools, including Visio and **Enterprise Architect**, Archimate and Sparx EA
- Developed integration **architecture** standards, artifacts, relevant **data governance** frameworks, and ensured compliance.
- Determine the scope of **Data** migration.
- Integrated **GCP (Apigee)** services with on-premises and other **cloud** platforms
- Support Mapping and Construction of **Data** from Legacy **Systems**
- Designed **Data** Pipeline Strategy using ETL and Big **Data** tools
- Strong **Communication** and Problem-Solving **skills**
- Utilized industry standard **Enterprise Architecture** Frameworks, **Zachman**, **TOGAF**, **DODAF**
- Experienced with delivering solutions using Agile SAFe **framework** in conjunction with SDLC
- Designed and implemented API based integrations with CRM, ERP and workforce automation applications. Created **POC**'s with **no code and low code platforms** **FlutterFlow;PowerAutomate**
- Deep and extensive **knowledge** and hands on experience with several integration platforms/**technologies** and patterns using **Mulesoft Cloudhub, MuleSoft RTF, AWS, Kafka, Snowflake and Boomi**.
- Years of in-depth hands-on experience with a diverse **technology** stack to include commercial or open-source integration platforms (**AWS Step Functions, Azure Logic Apps, Mulesoft, GCP, Power Automate, webMethods, Boomi**)
- Provide expert advice to **project** teams on use of integration **technology**, **data architecture** and modeling, system **architecture** including integration **best practices**.
- Designed and implemented Digital modernization of legacy Billing Support application.
- Defined and documented the **data** integration patterns between GCP, On Prem and AWS
- Oversee critical steps within the **Software Development** Life Cycle components that impact **enterprise-wide development / architecture** standards.
- Strong understanding of Agile methodologies Scrum, Kanban, SAFe
- Provided technical **leadership** and guidance to **development** teams throughout the **software development** lifecycle, ensuring the **delivery** of high-quality, scalable, and maintainable solutions.

- Designed and implemented API based and Micro-Service based integrations.
- Successfully designed and implemented integrations for **SAP S/4 Hana (ERP)**, **Oracle ERP Cloud**, **Salesforce**, **MS Dynamics 365 & Legacy Applications (eCommerce, B2B B2C)**.
- Provide oversight in standards adherence through reviews of **project** work including detailed technical specifications and application code.
- Work with **project** teams, orchestrate **Solution/Domain Architects** in definition of requirements for integration strategies of their projects into the **Enterprise Architecture**
- Manage internal resources as well as augmented or externally sourced **team** members.
- Oversee **development** and support of batch and back-end processes related to the application portfolio.
- Conducted **technology** assessments and proof of concept projects to evaluate new tools and frameworks for potential adoption within the organization.
- 10+ years of total experience in **Cloud Architecture & Design**
- Google **Cloud Pub/Sub & Apigee**
- Lead a **POC** using Manhattan Distributed Order **Management/Warehouse Management**.
- Assist with incident response, troubleshooting, root cause **analysis**, and problem resolution.
- Communicate **project** status to various levels of **management**.
- Oversee the **technology** and standards for version **control**.
- Partner with leaders of other disciplines to ensure proposed solutions align with **information, technology, infrastructure**, business and **security** architectures.
- Responsible Program **architecture** and **Implementation**
- Utilized industry standard **Enterprise Architecture** Frameworks, **Zachman**, **TOGAF**, **DODAF**
- Created Context, Conceptual and Logical **Architecture** design artifacts (Mulesoft, Azure)
- Developed **Solution Architecture** Design Documents for **Enterprise** solutions for **Cloud/On-Prem and Hybrid (Mulesoft Cloudhub, MuleSoft RTF, Azure Integration Services, SAP BTP, Informatica, AWS)**
- Implemented **security best practices** for GCP environments, including identity and **access management** (IAM), encryption, and **data** protection
- Responsible for **cross-program**, and **cross-project Architecture** strategies, opportunities, and problem resolution

Feb '21 – Mar '23

Techmahindra (BofA, UPS, Kimberly Clark)

Sr. Enterprise Architect

- Lead and Orchestrated **Solution** Architects for completion of **Project** deliverables
- Created **Architecture** Roadmaps and Design **Best Practices** (**Mulesoft Cloudhub, MuleSoft RTF, Boomi, Informatica**)
- Determine the scope of **Data** migration.
- Support Mapping and Construction of **Data** from Legacy **Systems**
- Integrated GCP services with on-premises and other **cloud** platforms
- Designed **Data** Pipeline Strategy using ETL and Big **Data** tools
- Served as **Data Architect** for large ERP upgrade projects
- Lead meetings with business and **technology** stakeholders for mapping of future state design

- Created Context, Conceptual and Logical **Architecture** design artifacts (Mulesoft, Azure)
- Developed **Solution Architecture** design documents for **Enterprise** solutions for **Cloud/On-Prem** and Hybrid (**MuleSoft, webMethods, Azure, Informatica, Apigee (GCP), AWS**)
- Experienced with EA modeling and visualization tools, including Visio and **Enterprise Architect**, Archimate and Sparx EA
- Designed **Enterprise solution** consisting of Salesforce CRM, SAP S/4 Hana and Billing **systems**
- Responsible for **cross-program**, and **cross-project Architecture** strategies, opportunities, and problem resolution using **Oracle Cloud, AWS, & Mulesoft**.
- Lead **Architect** of **Cloud** migration **project** for Billing/Finance application hosted on AWS
- Developed and maintained the overall **enterprise architecture** strategy, including the integration of new **technologies** and **systems**.
- Responsible for **Data** Integration Strategy and roadmaps using Mulesoft; Snowflake; DataBricks; Boomi and **Cloud** Platforms.
- Led a **team** of architects and engineers to design and implement scalable and secure **enterprise** solutions, ensuring alignment with business objectives and regulatory requirements.
- Collaborated with stakeholders to define and document business processes, **information** flows, and technical requirements to support the **development** of IT solutions.
- Conducted **architecture** reviews and provided guidance to **project** teams to ensure adherence to architectural principles and **best practices**.
- Designed and implemented upgrades and added features/functionality to support **Point of Sale Systems** integration using API's.
- Evaluated **emerging technologies** and made recommendations for their incorporation into the **enterprise architecture** roadmap.
- Created and implemented integrations with **Manhattan Distributed Order Management/Warehouse Management** using Mulesoft and Boomi.
- Familiar with Azure AD, VMware and Kubernetes **technologies**
- Designed and implemented solutions using **Cloud** Applications (Salesforce, Mulesoft, Azure, AWS, Azure Integration Services, SAP BTP)
- Worked with **Solution** Architects on **Architecture** and Design **Best Practices** (Mulesoft, AWS)
- Monitored the work of developers during the **project** transition to ensure deadlines were met
- Served as Transition Manager for complex Logistics Application support initiative
- Developed relationships with key client contacts to facilitate smooth transition of application
- Led escalation matrix for onshore issues and was ultimately responsible for their resolution
- Served as the onshore Point of Contact for issues. Escalations and client **engagement**
- Preparing proposals and estimates for the design and **implementation** of IT **systems**
- AWS **Architect** Level 1 **training** completed 10/19
- Work with business unit managers to understand **project** scope, suggest possible alternatives and document each step of the design.
- Created **Enterprise** Architectural strategy, standards and **governance** artifacts (Mulesoft, AWS, Azure)
- Developed proposals for Platform Upgrades
- Responsible for mid to long term Integration Strategy and Roadmaps (Mulesoft, Azure, AWS, Informatica)
- Define **project** responsibilities with stakeholders.

Feb '20 – Jan '21

eSolutions

Enterprise Integration Architect

- Mulesoft Platform **Architect Training** Completed 4/19
- AWS **Architect** Level 1 **training** completed 10/19
- Designed and implemented several integrations with Salesforce Lightning using Rest API's for **Mobile** Workforce **Management** applications
- Experienced with EA modeling and visualization tools, including Visio and **Enterprise Architect**, Archimate and Sparx EA
- Implemented **security best practices** for GCP environments, including identity and **access management** (IAM), encryption, and **data** protection
- Created and implemented integrations with **Manhattan Distributed Order Management/Warehouse Management** using **Mulesoft and Boomi**.
- Designed and implemented integration with Salesforce using Platform Events
- Work with internal teams to create the migration process of legacy **systems** to the AWS **cloud**
- Work with business unit managers to understand **project** scope, suggest possible alternatives and document each step of the design.
- Defined and documented the **data** integration patterns between GCP, On Prem and AWS
- Lead the design of scalable, and cost-effective architectures on GCP and Azure
- Created **Enterprise** Architectural strategy, standards, and **governance** artifacts.
- Developed proposals for Platform Upgrades
- Responsible for mid to long term Integration Strategy and Roadmaps using
- Created and Implemented **Enterprise** Architectures utilizing Service Discovery, Service Routing, **Data** Virtualization, Message Protocols, Message Format, Multi-**Cloud** Routing and Orchestration **Practices**
- Responsible for **Data** Integration Strategy and roadmaps using Mulesoft; Snowflake; DataBricks; Boomi; GCP and **Cloud** Platforms.
- Work with **Security** to design and manage IAM roles for users, vendors and other third party vendors
- Analyzed and presented MuleSoft Platform Alternatives to upper **management**.
- Mentored developers on **Architecture** and Design **Best Practices**
- Designed and Implemented integrations for **SAP R/3** using **IDOCs** with **Mulesoft**
- Redesigned and implemented multiple monolith APIs for migration to MuleSoft using API Lead Connectivity standards
- AWS **Architect** Level 1 **training** completed 10/19
- Assisted in Leading Domain Driven Design workshops to determine client requirements.
- Designed and implemented several integrations with Salesforce using Rest API's
- Created and Implemented **Enterprise** Architectures utilizing Service Discovery, Service Routing, **Data** Virtualization, Message Protocols, Message Format, Multi-**Cloud** Routing and Orchestration **Practices** (Mulesoft Cloudhub, MuleSoft RTF, webMethods, Azure, AWS, Snowflake, Azure Informatica and Oracle **Cloud**.)
- Designed and implemented integration with Salesforce using Platform Events
- Designed and implemented API Lead connectivity projects for Financial Services Clients

- Lead **architecture** design, **development**, **implementation**, and support for multiple **enterprise** platforms and solutions including Salesforce, Informatica, SAP and DuckCreek.
- Consistently communicated ideas to both technical and non-technical audiences
- Establish **enterprise architecture** patterns and **best practices**
- Lead Architectural Review Board
- Created and Implemented **Enterprise** Architectures utilizing Service Discovery, Service Routing, Message Protocols, Message Format, Multi-**Cloud** Routing and Orchestration **Practices**
- Manage the AWS **infrastructure** and **strategic** vendor relationships including **development** firms
- Work with internal teams to create the migration process of legacy **systems** to the AWS **cloud**
- Work with business unit managers to understand **project** scope, suggest possible alternatives and document each step of the design
- Work with **Security** to design and manage IAM roles for users, vendors and other third-party vendors
- Work with several third-party vendors in big **data** and other areas to support our overall **cloud** initiatives and to develop product roadmaps
- Partner with the sales **team**, formulate and execute a sales strategy to exceed revenue objectives through the adoption of AWS
- Extensive experience defining IT Roadmap, **cloud** strategy, **Enterprise/solution architecture**, **Architecture** assessment.

Mar '18 – Feb '20

Capgemini(Medco, Famers Insurance, Chase)

Senior Manager/Enterprise Architect

- Work closely with **Enterprise Architecture** and Business Stakeholders
- Hands-on experience on implementing **Cloud** Solutions using various AWS Services including EC2, VPC, S3, Glacier, EFS, AWS Kinesis, Lambda, Directory Services, **Cloud** Formation, Ops works, Code Pipeline, Code Build, Code Deploy, Elastic Beanstalk, RDS, **Data** Pipeline, DynamoDB, Redshift etc.
- Experienced with EA modeling and visualization tools, including Visio and **Enterprise Architect**, Archimate and Sparx EA
- Hands-on experience on Architecting and securing the **Infrastructure** on AWS using IAM, KMS, Cognito, API Gateway, **Cloud** Trail, **Cloud** Watch, Config, Trusted Advisor, **Security** Groups, NACL etc.
- Develop post production support model that implements **continuous improvement** tactics.
- Designed MuleSoft API's using RAML and the API Kit
- Created multiple pilot application deliverables using MuleSoft, API's, RabbitMQ Micro services and JBPM.
- Created and managed REST endpoints using the API kit in Mule
- Excellent experience with exposing web services using SOAP, REST endpoints in Mulesoft
- Design and Deploy Mulesoft applications using CloudHub
- Lead teams of developers in the use and **implementation** of Mulesoft **best practices**
- Experience in writing ANT, Maven build scripts, providing logging facility using Log4j

- Evaluate current and future **architecture** for use of **Best** Practice
- Create and Implement go-live and Production Support models.
- Create target **architecture** that meets both technical and non-technical requirement.
- Install, configure and optimize on premises MuleSoft Servers as required
- Deploy mulesoft applications and projects for both on-prem and Cloudhub solutions
- Create and administer users in MuleSoft Anypoint platform
- Created and implemented integrations with **Manhattan Distributed Order Management** using **Azure** .
- Install and Configure RabbitMQ and ActiveMQ servers to work with MuleSoft
- Attended AWS **Architect training** 9/2018
- IT strategy formulation and roadmap **development** for Integration Platforms

Nov '17 – March '18

Genzeon/Panzer Solutions

Senior Mulesoft Architect

- Lead **architecture** design, **development**, **implementation**, and support for multiple **enterprise** platforms and solutions
- Work closely with **Enterprise Architecture** and Business Stakeholders
- Develop postproduction support model that implements **continuous improvement** tactics.
- Designed MuleSoft API's using RAML and the API Kit
- Created multiple pilot application deliverables using MuleSoft, API's, RabbitMQ Micro services and JBPM.
- Created and managed REST endpoints using the API kit in Mule
- Excellent experience with exposing web services using SOAP, REST endpoints in Mulesoft
- Design and Deploy Mulesoft applications using CloudHub
- Created and Implemented **Enterprise Architectures** utilizing Service Discovery, Service Routing, Message Protocols, Message Format, Multi-**Cloud** Routing and Orchestration **Practices**
- Lead teams of developers in the use and **implementation** of Muelsoft **best practices**
- Experience in writing ANT, Maven build scripts, providing logging facility using Log4j
- Evaluate current and future **architecture** for use of **Best** Practice
- Create and Implement go-live and Production Support models.
- Create target **architecture** that meets both technical and non-technical requirements
- Install, configure and optimize on premises MuleSoft Servers as required
- Deploy mulesoft applications and projects for both on-prem and Cloudhub solutions
- Create and administer users in MuleSoft Anypoint platform
- Install and Configure RabbitMQ and ActiveMQ servers to work with MuleSoft
- Responsible Program **architecture** and **Implementation**
- Created Context, Conceptual and Logical **Architecture** design artifacts (Mulesoft, Azure. webMethods)
- Developed **Solution Architecture** design documents for **Enterprise** solutions for **Cloud/On-Prem** and Hybrid (Mulesoft, Azure, Informatica, AWS)
- Responsible for **cross-program**, and **cross-project Architecture** strategies, opportunities, and problem resolution
- Was responsible for ensuring **quality** and reusability in a middleware services **architecture**

- Provide Consultation for Design Patterns and **Best Practices** in middleware services **development**
- Lead a **team** of developers, assigning work, resolving impediments and performing **quality** (code/design) reviews
- Familiar with Azure AD, VMware and Kubernetes **technologies**
- Designed and implemented solutions using **Cloud** Applications (Salesforce, Mulesoft, Azure, AWS)
- Work closely with client upper **management** for issue resolution/mitigation related to **project** deliverables.

June '17 – Oct '17

Alpharetta, GA

Webster Enterprises

Enterprise Architect

- Lead **architecture** design, **development**, **implementation**, and support for multiple **enterprise** platforms and solutions
- Devise and execute IT strategies in alignment with organizational objectives
- Utilized AGILE methodology for numerous **infrastructure** projects
- Designed and implemented **enterprise** applications using Docker Containers
- Optimize and tune both Virtual and Physical servers
- Created and Implemented **Enterprise** Architectures utilizing Service Discovery, Service Routing, Messaging Protocols, Message Formats, Multi-**Cloud** Routing and Orchestration **Practices**
- Experienced with EA modeling and visualization tools, including Visio and **Enterprise Architect**, Archimate and Sparx EA
- Aided in the relocation of a \$4 million Datacenter
- Participate in portfolio **management** steering committee.

June '16 – April '17

Atlanta, GA

The Intersect Group

Senior Solution MuleSoft/ESB Architect

- In Charge of integration and built ESB (middleware) **solution**/strategy from ground floor
- Identify, analyze and design integration flows using Mule ESB Anypoint Studio
- Designed MuleSoft API's using RAML and the API Kit
- Technically own and manage the process of ensuring on time and on budget build and integration of the various elements of the **solution**
- Provide **leadership** for Agile, Scrum and iterative **development practices**.

- Develop Product Portfolio and **Architecture** roadmaps.
- Lead and mentor teams of onshore and off shore developers to ensure coding adheres to the approved **Solution Architecture**.
- Work closely with **Enterprise Architecture** and Business Stakeholders
- Create and implement reusable **architecture** that continuously feed Enterprise **Data** Stores.
- Created multiple pilot application deliverables using MuleSoft, API's, RabbitMQ Micro services and JBPM.
- Consistent use of **project management** methodology including the ability to develop detailed work plans
- Created architectures utilizing multiple SOA Design patterns.
- Worked with Network **security architecture**, IaaS, PaaS.
- Implement **architecture governance** processes for full application lifecycle
- Familiar with general **security practices** IDM, IAM, SAML **technologies**
- Taught multiple developers the concept of ESB, event-driven architectures and API based integrations, as well as **implementation** strategies.
- Provide technical, **project** and account **leadership** and ownership in large and complex business scenarios.
- Used MuleSoft to enable **Event Driven Architecture** to support **Point of Sale** and Back of House upgrades for Digital Modernization **project**.
- Install, configure and optimize on premises MuleSoft Servers as required
- Deploy mulesoft applications and projects for both on-prem and Cloudhub solutions
- Create and administer users in MuleSoft Anypoint platform
- Install and Configure RabbitMQ and ActiveMQ servers to work with MuleSoft
- Work with various stakeholders across the organization to create the appropriate **architecture**
- Designed and developed Service Oriented **Architecture** (SOA) concepts including REST-ful and SOAP-based services
- Create and maintain MuleSoft **project** Architectures that meet Business Requirements
- Create Logical and Physical **Architecture** documents for various projects.
- Developed **security architecture** and guiding principles
- Develop Companywide integration standards and roadmaps using the MuleSoft platform.
- Ensure adherence to **Enterprise Architecture** roadmaps and strategy.
- Designed and developed API and Micro services based integration solutions using MuleSoft.
- Lead meetings to explain technical issues to a variety of audiences, including CIO, CEO and experienced **software** developers/architects.
- Developed Technical **Architecture** assessments using BPM and ESB/SOAbackground.
- Lead projects utilizing both Agile and Waterfall methodologies.

Oct '15 – May '16

Atlanta, GA

MMT Enterprises/Techpro/Delta

Senior Platform/Solutions Architect

- Responsible for the design and execution of the overall **solution** design for the assigned **project**.

- Lead and mentor teams of onshore and off shore developers to ensure coding adheres to the **Solution Architecture** for several projects simultaneously.
- Lead **architecture** design, **development**, **implementation**, and support for multiple **enterprise** platforms and solutions
- Work closely with **Enterprise Architecture** and Business Stakeholders
- Design and Deploy MuleSoft applications using CloudHub
- Lead teams of developers in the use and **implementation** of MuleSoft **best practices**
- Create **team** strategies and establish **project** scopes of work; communicate **project** deliverable timeframes and benchmarks to clients.
- Translated technical specifications into **project** scopes of work and product requirements while spearheading design and **development** of databases and **enterprise** solutions.
- Suggest architectural improvements, design and integration solutions, and formulate methodologies to optimize object-oriented **software** and database **development**.
- Utilized Bamboo and Jenkins for **infrastructure management** tools.
- Lead JAD sessions and activities to help define the **best** strategy from the customers As-is to their To-be state
- Created Conceptual, Logical and Physical **Architecture** artifacts based upon client requirements and budgetary constraints.
- Aided in the design and upgrading of applications that implement algorithmic based **decision** logic and interactive **management**
- Designed and documented solutions using Microservice **Architecture** for distributed processing and ease of scalability.
- Experienced with hardware/service virtualization, orchestration, automation, OpenStack and Amazon EC2
- Produce detailed **functional** design documents to match customer requirements.
- Created and present technical recommendations to stakeholders and **leadership**.
- Participate in process flow **analysis** and process redesign along with the **Engagement** Manager.

June '13 – September '15

Atlanta, GA

Capgemini

Senior Platform Architect Lead

- Participate in process flow **analysis** and process redesign along with the **Engagement** Manager.
- Produce detailed **functional** design documents to match customer requirements.
- Design and Deploy Mulesoft applications using CloudHub
- Lead teams of developers in the use and **implementation** of Muelsoft **best practices**
- Hands on experience in different stages of the **Software Development** Life cycle including Business Process **Analysis**, **Implementation** & **Training** and support.
- Designed Solutions using HADOOP and other Big **Data technologies**.
- Led several Design Teams in constructing **software architecture** across many industries.
- Experienced with **Cloud** SaaS and PaaS architectures.

- Designed and documented solutions using Microservice **Architecture** for distributed processing and ease of scalability.
- Familiar with Adobe Marketing **Cloud**.
- Experienced with hardware/service virtualization, orchestration, automation, OpenStack and Amazon EC2
- AWS certified 2013
- Designed and Deployed custom apps using Amazon Elastic Compute **Cloud** (Amazon EC2)
- Designed and utilized applications leveraging Google **Cloud** Platform.
- Google Compute Engine, **Cloud** Pub/Sub **implementation** and configuration.
- Experienced with Oracle SOA Suite 11g for the design and deployment of Web Services.
- Co-**team** with the Technical **Architect** to produce a technical specification for custom **development** and **systems** integration requirements.
- Aided in the design of IMS networks with SIP protocols.
- Experienced with telecommunication **technologies** and protocols such as 3GPP, VoIP, TCP/IP, and SS7.
- Worked with **project development** teams to validate accuracy of service metadata.
- Coordinated with **Data Architect(s)** and DB Administrators to maximize readiness for service metadata integration with multiple **enterprise** applications.
- Experienced working with SIP, RTMP, SMS/MMS and SMPP.
- Experienced working with Hadoop **Architecture** and other Big **Data** solutions.
- Designed and implemented multiple interfaces using MuleSoft ESB and MuleSoft's Anypoint platform.
- Confer with customer, prospects and salespeople to collect requirements.
- Prepare sales presentations with service offerings, case studies and proof points.
- Develop ROI and economic models to justify investments in Lionbridge proposed solutions stacks.
- Create solutions leveraging current and future **technology** capabilities to address client needs.
- Develop proposals and pricing models for innovative solutions.
- Develop **solution** briefs.
- Assess outputs from **delivery** teams to assure deliverables satisfy **quality** standards.
- Collaborate with internal subject matter experts and technical architects to devise client solutions.
- Penetrate and expand accounts thru developed relationships.
- Created and present technical recommendations to stakeholders and **leadership**.
- Substantial experience in IMS applications over LTE, SOAP, REST Webservices.
- Assisted in the design of **enterprise** branch routing, **security** and wireless solutions.
- Assisted in the design of **cloud management** solutions for the networking, **security** or wireless industry.
- Participated in **training** design, **documentation** and **delivery** efforts in concert with the **Engagement** Manager.
- Participated and lead, when needed, **project** meetings with the customer.
- Analyzing applications to be changed for particular business requirements.
- Provided guidance to support staff on **software development** and maintenance.

- Demonstrated efficiency in mapping business requirements, by interacting with **senior management**, **stakeholder**-clients, to **solution** design components.
- Identified business needs by defining, analyzing and documenting requirements.

November '07 – June '13

Redwood **Software**, Morrisville NC

Senior Support/ Consultant, **Data and Integration Services**

- Technically qualified and helped close **professional** services opportunities.
- Lead projects involving integration with and using MuleSoft
- Designed and implemented **solution architecture** congruent with **best practices** and client policies and requirements.
- Aided in the **development** of SaaS **Architecture** and **Implementation**
- Designed Web Services using REST, SOAP, UDDI.
- Designed and implemented several solutions providing **Data** Orchestration and Intelligent Routing.
- Virtualization: VMware ESX 3.x, VMware Server 1.4, Virtual Center 2.5, MS Virtual Server 2005 R2 MS Terminal Server 2003, MS SoftGrid.
- Determining customer requirements and designing VMware-based solutions architectures spanning VMware's product portfolio from the vCloud Suite to the Horizon Suite to meet the **functional** and business requirements of a range clients of various sizes and across verticals.
- Designed and Deployed custom apps using Amazon Elastic Compute **Cloud** (Amazon EC2)
- Designed and utilized applications leveraging Google **Cloud** Platform.
- Google Compute Engine, **Cloud** Pub/Sub **implementation** and configuration.
- Aligned new **development** specs to be congruent with SOA **Governance team** policies.
- Identified and communicated technical and business problems and implemented cost effective solutions in a timely manner utilizing **Project Management** methodologies.
- Communicated competitive product differentiators and positioned proposed **solution(s)** to technical, operations, and **management** staff.
- Created and Presented technical proposal content and **Project** Plans
- Create solutions leveraging current and future **technology** capabilities to address client needs.
- Develop proposals and pricing models for innovative solutions.
- Develop **solution** briefs.
- Assess outputs from **delivery** teams to assure deliverables satisfy **quality** standards.
- Collaborate with internal subject matter experts and technical architects to devise client solutions.
- Maximize productivity by setting clear expectations and proactively communicating **project** status, issues and risks to internal stakeholders and top **management**.
- Draft and distribute **project** objectives and tasks to the solutions **team**.
- Negotiate successfully with clients, staff and outside vendors.
- Ensure integrity and **delivery** of multiple projects with respect to time, budget, scope, **change**, risk and resources

- Designed custom functionality/interfaces using Java and Web Services
- Tested Web Services using SOAPUI.
- Lead and mentored client teams of developers both onshore and offshore
- Trained onshore and offshore resources in the use/configuration and design of solutions
- Designed and Implement **Solution Architecture** to meet client's defined requirements using **Enterprise** Process Automation and SOA principles.
- Utilized API based integration **technologies**.
- Conduct **systems** design, feasibility and cost studies and recommend cost-effective **cloud** solutions.
- Deliver major releases to stakeholders on time and under budget.
- Designed and built **cloud** service models including **Infrastructure**-as-a-Service, Platform-as-a-Service, and **Software**-as-a-Service for multiple companies.
- Reduced process redundancies and learning curves by configuring business rules and transactions to fit each organization's needs.
- Lead **systems** design, feasibility and cost studies and recommend cost-effective **cloud** solutions.
- Created proposals and official responses to RFP's.
- Participated and Lead SOA **Governance** committees.
- Utilized industry standard **Enterprise Architecture** Frameworks, **Zachman**, **TOGAF**, **DODAF**
- Created and presented custom, warranted modifications of core products as agreed in a customer requirements definition document and SOW utilizing J2EE, SOA and **Cloud** based **technologies**.
- Meet customer acceptance criteria, e.g., performance, functionality and reliability.
- Mentor and trained other consultants in their roles.
- Ensured customer satisfaction within customer accounts.
- Assisted customers with installation, configuration, and use of core and near-core products.
- Actively participate in the resolution of customer issues as directed Identify business issues and play a **strategic** role in business **development**.
- Articulated business benefits and develop technical strategies. Travel to customer, partners, and auxiliary sites as necessary.
- Served as **Enterprise Architect** to determine and implement long term IT strategy.
- Translated business needs into **Enterprise Architecture** requirements, and estimated the financial and architectural impact of **Enterprise Architecture** alternatives.
- Performed other duties and responsibilities as necessary and assigned work on a wide range of problems of diverse scope and complexity where **analysis** of **data** and/or situations requires evaluation of various factors.
- Exercised judgment within established **practices** to determine appropriate action

July '05 – November '07

Yum! Brands, Louisville KY

Senior Architect/Team Lead, Data and Integration Services

- Provide EA support and **Architecture** guidance for Business **Systems Development** and SOA strategy
- Advanced understanding of SOA principals.

- Accountable for **management** of financial risk and opportunities across multiple **project** phases and **delivery** groups
- Direct and oversee multiple PMs and/or **team** leads on complex projects.
- Apply effective **project management** methodologies and **control** techniques
- Lead EAI **architect** for the SRE and JCAPS 5.1.x Sun/SeeBeyond product
- Kept the base business running for all above store **systems** with minimal disruption to legacy **systems** and cyclical processes
- Provide growth opportunities for **Team** members through increased visibility and delegation of **leadership** opportunities
- Assist in refining operational solutions for new projects
- Designed and developed SOA and Web Services Proof of Concept for EAI **infrastructure** using J2EE compatible **framework**
- Developed & implemented common J2EE components and interfaces: EJB, JMS, JDBC, Servlets, Web Services, WSRP, AJAX
- Provide **Data Architecture** and Integration support for the completion of all projects within budget, on time, meeting customer expectations, and following technical standards for current e*Gate 4.5.3 environment
- Extensive experience with Web services **architecture** for **enterprise** service bus on EAI platforms
- Responsible for **development** and **implementation** of EA infrastructural roadmaps
- Responsible for **management** of key client relationships to ensure **project** success, attainment of revenue and margin goals
- Created Portal applications using eVision
- Lead the upgrade effort to e*Gate SRE and subsequently to JCAPS
- **Development** and **Implementation** of SOA using **Web Services** to support **Point of Sale** integration.
- Managed several IT projects with both shared and dedicated resources
- Managed multi-million dollar IT projects
- Ensured **project** scope, deliverables and timelines to meet individual client needs
- Managed a **team** of 5 core members up to 25 including on and offshore resources.
- Develop long term staffing and **training** recommendations
- Responsible for negotiating service level agreements with multiple internal clients
- Responsible for Design and **Architecture** of Integration solutions in ICAN & JCAPS 5.1.2 for ESB

May '04 – June '07

Cook **Systems** Intl./Commonwealth Office of **Technology**
Louisville, KY

Senior Project Manager

Jan '04 – April '04

PDR/Lexmark
Lexington, KY

Director Enterprise Application Integration Operations

Aug '03 - Dec '03

AdeptSource

Louisville, KY

SeeBeyond Architect/Project Manager

May '03 – July '03

HandySoft Corporation

Hampton, VA

Senior Project Manager/Consultant

May '01 – April '03

SeeBeyond Technology Corporation

Monrovia, CA

Senior Architect

Apr '00 – May '01

Eagle Creek Software

Atlanta, GA

Asst. Director/Senior Principal Consultant

Eagle Creek Software \Chase Manhattan Bank

June '96 – April '00

HP

Atlanta, GA

Consultant
