Technology Leader

Passionate about building and managing high performance teams and efficient architectures that align with Digital Transformation and solve real business problems. With my years of experience in the field of technology, want to use my skills innovatively so that I can enhance and add value to an organization's vision and goals.

LEADERSHIP EXPERTISE

Change leader leveraging emerging technologies to grow business and transform operational effectiveness. Extensive technology experience with Fortune 1000 companies. Comprehensive knowledge of business needs and technology solutions; bridges business-technology gap to promote efficiency and enhance productivity across technical and management lines.

Thrives in challenging and evolving environments. Successfully turns around faltering engagements and creates scalable technologies in new markets through strategic thinking and innovative problem solving. Develops roadmaps for adoption of new technologies, including embedded products (IoT). Dealt with merging Enterprise solutions with embedded firmware.

Trusted technologist and Effective technology advocate and C-level guide; sells value of digital transformation to gain full organizational commitment. Promotes culture of autonomy and accountability to foster performance excellence.

Trusted Experience. Years of hands on experience as Architect and Engineer in various transforming and efficient technologies.

CAREER HIGHLIGHTS

Developed company-wide strategies and processes to significantly reduce customer churn from 19% to 7% annually and at the same time saving money for the company, by using more open source technologies.

Guided, managed and mentored off-shore engineering teams to use new technologies and leveraged cloud technologies efficiently with embedded functionality in hardware.

Built and managed new teams from scratch on many occasions, especially in startups, leading to a successful goal achievement. Also, achieved high talent retentions in companies thru 'pin-point' motivation.

Built communication bridges between technical and non-technical teams. Have been really effective to pass the understanding of critical technical fundamentals to sales, pre-sales, marketing and product teams.

EMPLOYMENT HISTORY

Lead Enterprise Architect – Mercedes-Benz, Atlanta GA (July 2022 – Mar 2024)

- As Lead Enterprise Architect I was responsible for leading Application and Technology Architecture Governance, based on TOGAF principles, for cataloging, developing, coordinating, communicating, maintaining, and enforcing overall enterprise architecture models, representations, initiatives, capabilities, and components to perform the organization's business and technology activities.
- Identify, compare, select and implement technology solutions that meet current and future needs for North America Enterprise Applications & Platform software systems, especially on the architecture side. Be responsible for the analysis of the current technology environment to detect critical deficiencies and recommend solutions for improvement. In addition, own the analysis of technology industry and market trends to resolve their potential impact on the enterprise as well as on the enterprise technology architecture.

- Used various tools like Lean IX and PlanningIT (from Alphabet) as EAM toolkit.
- Responsible for technical digital vision of the enterprise, for example, migration to cloud and multi-cloud (AWS& Azure) attitude
- Part of technical leadership that shapes the company's digital transformation
- Responsible for introducing new technologies that improve efficiency like, Event Driven architecture, Gen AI etc
- Directly managed a team of architects for each department and coordinating all architectural end to end activities.
- Responsible for coordinating and communicating with Central Head Quarters in Germany.

Senior Cloud Enterprise Architect – Cox Communications (Consulting), Atlanta GA (Jun. 2021 – Apr. 2022)

- As a senior Enterprise Architect define a unified standard around AWS Containers and standardize technologies used in projects all around the company.
- Control technology diversity of projects
- Establish technology governance process
- Establish Enterprise level guidance and governance based on sound TOGAF principles.
- Own and drive the vision for business functionality delivery through the integration of services rather than monolithic applications, and the capabilities within the team to provide an effective integration services and processes.
- Built relationships across business and technical teams to better understand the utilization and prioritization of capabilities.
- Developed various formal and informal artifacts to communicate the vision, roadmap, architectural decisions, patterns, adopted reference standards and plans.
- Ongoing evangelization and communication of the Enterprise Architecture both within the technical teams, and the business units.
- Ongoing research and assessment of new approaches for potential use within the Enterprise.
- Developing and updating/enhancing the Enterprise Architecture
- Coordinating all Enterprise Architecture activities locally and globally
- Used various tools like Lean IX and others
- Auditing compliance within the Enterprise Architecture standards

Senior Enterprise Architect – Equifax (Consulting), Atlanta GA (Oct. 2020 – April 2021)

- As a senior Architect define a unified new architecture around GCP, AWS(Kinesis Streams, Aurora RDS, Kafka) and Google Cloud Data Flow to support our notification capabilities across all of GCS' products.
- Establish Enterprise level guidance and governance based on sound TOGAF principles.
- Establishing a new API strategy with versioning process and appropriate governance fitting the existing process at Equifax
- Establishing an enterprise architecture to support a large technology transformation across existing and new microservice applications and environments
- Understanding overall vision and objectives and solve business problems using the right set of technical tools and processes
- Ability to work within pressurized environments whilst making critical decisions
- Understanding various aspects of architecture practices: business, application, data, security, infrastructure and governance
- Successfully work with Product Architects to define technical architecture for products
- Is responsible for signs off on final design approaches
- The Enterprise Architect sets the direction and establishes the approach for integrating applications, catalogs, develops, coordinates, communicates, maintains, and enforces the overall Enterprise Architecture Models, Representations, Initiatives, Capabilities, and Standard Components used by the

- Enterprise to perform all business and technology related activities.
- Strong knowledge of EA design patterns and principles
- Definition, implementation, and execution of the processes for the definition, maintenance, and conformance of the Enterprise Architecture.
- Update and maintain the key Enterprise Architecture deliverables.
- Architectural leadership with business understanding
- Ongoing evangelization and communication of the Enterprise Architecture both within the technical teams, and the business units.
- Ongoing research and assessment of new approaches for potential use within the Enterprise.
- Developing and updating/enhancing the Enterprise Architecture
- Coordinating all Enterprise Architecture activities locally and globally
- Auditing compliance within the Enterprise Architecture standards
- Responsible for all security standards and architecture framework including governance
- Built relationships across business and technical teams to better understand the utilization and prioritization of capabilities.
- Developed various formal and informal artifacts to communicate the vision, roadmap, architectural decisions, patterns, adopted reference standards and plans.
- Part of a senior architecture team reporting to SVP in Equifax.

Chief Enterprise Architect (Consulting) – GT Research Institute, Atlanta GA (May. 2019 – Jun 2020)

- Consultant at GTRI, worked on Medicaid Enterprise System Transformation (MEST) as the lead Enterprise Architect responsible for the technical architecture for this project.
- Successfully leading all architecture activities for the whole project and brought cost to 45% levels by using cloud technologies
- Architecture guidance and coaching using TOGAF principles
- Lead the architecture team of 6 direct members, successfully by providing them direction, motivation and mentoring.
- An active part of leadership team
- Selected cost-effective AWS core technologies (Kinesis, Aurora, EKS, ECS, microservices) and tools for this project and managed external vendors for tools and services.
- Responsible for all security standards and architecture framework including governance
- Own and drove the vision for business functionality delivery through the integration of services rather than monolithic applications, and the capabilities within the team to provide an effective integration services and processes.
- Built relationships across business and technical teams to better understand the utilization and prioritization of capabilities.
- Developed various formal and informal artifacts to communicate the vision, roadmap, architectural decisions, patterns, adopted reference standards and plans.

Chief Technical Architect/CTO (Americas) - Qmatic, Atlanta GA (Apr. 2017 – Feb 2019)

- Was pivotal in defining and in driving innovation of technical solutions including frameworks and platforms, microservices development, deployment and maintenance of software applications.
- Senior presales in technical discussion with customers regarding security, compliance, deployment scenarios, network setups, auditing, cloud setups, DBA tasks
- Architecture guidance and coaching using TOGAF principles
- Lead the architecture team of 6 direct members remotely located, successfully by providing them direction, motivation and mentoring.
- Technical and cloud (AWS & Azure) expert, merging enterprise architecture with embedded technologies on hardware.
- Transformed the product landscape using cloud technologies which increased company growth by 40%.

CTO - Startup (Stealth Mode), Atlanta GA (Dec. 2016 – Apr 2017)

This was a stealth mode startup and got some angel funding.

- Met with investors and obtained angel funding bring fund levels to 100%
- Heavily contribution to the business plan and platform planning
- Got technical and financial planning and roadmap in place for development team

Chief Architect - Nexxphase Corp, Atlanta GA (Apr. 2014 – Nov 2016)

Was working for a startup called Nexxphase which got bought by Contact Solutions and then Contact Solutions was bought by Verint in the same year. I was the Chief Architect for Nexxphase and successfully architected new platform application to move from legacy application. The new platform used some of the new open-source big data technologies like Kafka and Storm with Spring on AWS cloud. This architecture directly impacted business as the sales doubled because of the scalability of this application. Managed remote teams in Russia, Brazil and India.

Architect/Lead Application Engineer - ADP, Alpharetta GA (Aug. 2012 – Mar. 2014)

Architect/Sr Software Engineer - Intuit / Bottomline Tech. (Sept. 2010 – Aug 2012)

Consulting - Intuit. (Apr. 2010 – Sept 2010)

Consulting – EBay. (Sept. 2009 – March 2010)

Staff Engineer – Intuit, Inc. (Jan. 2008 – Aug. 2009)

Architect/Sr. Software Engineer - Lead– Theranos Inc (Feb 2006 – Dec 2007)

Consulting as Sr. Software Engineer/Architect– Sun Microsystems (Aug 2005 – Feb 2006)

Consulting as Sr. Software Engineer/Architect – First Financial Bank (Feb 2005 – Aug 2005)

Software Development Engineer IV – Alcatel USA (July 2004 – Feb 2005)

Architect/Sr. Software Engineer – Robert Half Technology (Feb 2003 – July 2004)

Other Software engineer/architect experience includes

- Software Architect - Westwave Communications, Inc (Dec 2000-Feb 2003)
- Sr. Software Engineer/Architect – Lucent Technologies (Bell Labs) (June 1995-Dec 2000)

Worked abroad from 1988 to 1992.

SOFTWARE SKILL HIGHLIGHTS

- Years of experience in software industry with skills in Object Oriented Technology, Java, J2EE, microservices, GoLang and C/C++, with wide spectrum of applications on UNIX and Windows. Many years of experience in Java technologies.
- Have experience in front end technologies like React and Angular.
- 12+ years' experience with Cloud Technologies
- Wrote articles in Java Developers Journal and on LinkedIn (<https://www.linkedin.com/pulse/digital-transformation-vijay-phagura/>)

EDUCATION

- M.S. Computer Science and Engineering
- B.E. Electrical Engineering

Summary

I have been working as a **technology** leader for many years and have been leading and mentoring on-shore and off-shore teams towards scalable, efficient and low cost **software**. I have used many **technologies** to **architect** and develop applications using the latest. During this time I have also managed highly technical teams from time to time while leading projects and building new teams. I also have lot of experience working in startups and hiring the right **skills**. I'm passionate about building high performance teams and efficient and scalable architectures that align with Digital **Transformation** and solve real business problems. With my years of experience in the field of **technology**, I want to use my **skills** innovatively so that I **can** enhance and make progress to an organization's vision and goals. Specialties: Motivating Global leader, Visionary, Digital **Transformation**, **Architect** scalable applications using **enterprise technologies**, Delivering high **quality** products, **Strategic** and Tactical **management Enterprise Architecture Excellence Change Leadership Making** efficient use of **cloud technologies** (AWS, GCP and Azure) Standardizing **Cloud** Native **technologies** (Standards & Patterns)
