SUMMARY

Software engineer with six years of experience and a strong background in problem solving. I began my programming career by designing and implementing Python tools for data analysis and bioinformatic research before expanding on this experience as a web developer and software consultant. Experienced with modern tech including React, NextJS, NodeJS, ASP .NET, LLM applications, and more. My background in academia and education makes me an excellent problem solver with strong communication skills who works well on agile, dynamic teams.

WORK EXPERIENCE

Independent Web Developer and Software Consultant 2022-present

- Developed dozens of intuitive front-end interfaces for diverse clients, ranging from individuals to small businesses in a mix of Typescript/NodeJS/NextJS, Python and MERN stack.
- Programming experience stack including, but not limited to, JavaScript, Typescript, Python, PHP, Java, SQL, Bootstrap.
- Contribute to the broader tech community and gain new knowledge by volunteering for events such as the CodeMash polyglot tech conference, PyAtlanta, ReactATL, and ModernWeb ATL.

ThinkWell Technology Services – Software Engineer Oct 2024 - Present

- Researched and implemented AI/LLM solutions, reducing token costs by 40% via caching and prompt optimization.
- Developed full-stack applications using Java, C#/.NET MVC, React, TypeScript, and Bootstrap, ensuring seamless UI/UX for legal professionals.
- Architected and optimized LLM service calls, improving speed and accuracy in AI-generated legal document summaries.
- Led product development for an AI-powered legal tech platform, reducing deposition review time by 75% for attorneys.

Sustainable IT Manifesto – Chief Managing Officer (CMO) & Secretary Sept 2024 - Present

- Spearheaded the non-profit organization's branding and digital presence, increasing engagement by 300% through SEO and social media strategies.
- Developed and launched SITM's official website, integrating educational resources and community initiatives.
- Led the organization's presence at CodeMash 2025, demonstrating energy-efficient AI-powered coding solutions using open-source LLMs.
- Consulted on sustainable IT strategies, advising tech firms on reducing carbon footprints through eco-friendly development practices.

Seen Ventures – Web Developer (Contract) June 2024 - October 2024

- Maintained and updated university websites using JavaScript, Java, PHP, XML, XHTML, jQuery, and MERN (MongoDB, Express, React, NodeJS) stack, using Cascade and Wordpress content management systems.
- Implement web accessibility updates to meet WCAG guidelines for over a dozen large university clients.
- Co-directed development of an agentic LLM chatbot enhanced by vector search, Retrieval Augmented Generation (RAG), and PineconeDB using Langchain and OpenAI API for a major R1 university client deployed to AWS EC2.

Sevaa Group – Jr Software Developer (Full Time) March 2023 - June 2024

- Developed and Maintained 30+ client websites using WordPress, Drupal, JavaScript, PHP and Tailwind.
- Implemented responsive design and mobile-first enhancements.
- Assisted with the management and troubleshooting of CI/CD pipelines.

- Translated **design** mockups and wireframes into **responsive**, pixel-perfect, functional **web** pages using **Adobe** and Figma.
- Leveraged expertise in Tailwind and front-end **development** to accelerate the **development** of a major website for an international law firm, helping to reverse a three-week delay and ensure timely project completion.
- Tested and optimized for **accessibility** with ANDI, adhering to **WCAG** 2.1 guidelines and Section 508 **compliance**, including proper **support** for screen readers such as JAWS and NVDA.

University of Georgia – Instructor and Research Assistant

2016 – 2020

- Instructor of record teaching anatomy, cell biology, and genetics.
- Investigated the role of genes involved in ciliary tip construction and their implications for modeling neurodevelopmental diseases such as Joubert Syndrome.
- Managed and collaborated with research projects utilizing various animal and microbial models.
- Utilized cutting-edge genetic technologies such as CRISPR, RNAi, vector cloning, and biolistic guns.
- Developed bioinformatics pipelines in Python to analyze genetic datasets, improving data processing efficiency for neurodevelopmental research.
- Designed and implemented multiple Python scripts for analyzing DNA sequences and designing optimized primers, increasing cloning and primer **design** process by 30%.
- Applied machine learning and statistical modeling (YOLO net, CNNs) to identify patterned behavior in drosophila larvae to study attention circuitry.
- Automated data extraction and analysis workflows, reducing manual processing time by 50%.
- Led collaborative research projects involving genetic engineering, microscopy imaging, and molecular biology, ensuring accurate data collection and interpretation.
- Conducted statistical analyses in R, GraphPad, Matlab and Python to assess experimental results and generate visualizations for research publications and conference presentations.

SKILLS

Languages:

JavaScript, Typescript, Python, C#, PHP, HTML5, **CSS**, Java, Velocity, SQL, SQLite, MySQL, Fortran

Visual Design:

Adobe Creative Suite, InDesign, Photoshop, Illustrator, Premier, AfterEffects, **Adobe** XD, Figma

Frameworks, Libraries & CMSs:

NodeJS, React, jQuery, TypeScript, Tailwind, Bootstrap
NextJS, Vue.js, FastAPI, .NET MVC, **Wordpress**

Other Tools:

Git, TDD, VMware, NPM, Jira, Cypress, Jest, AWS, GraphQL, MongoDB, TCP/IP, Routing

EDUCATION

University of Georgia

Athens, GA | 2016-2020 | GPA: 4.0
Masters of Science: Cell Biology.
Thesis title: *"KIAA0556 is a Ciliary Tip Protein and Marker of Early Ciliogenesis."*

Georgia Southern University

Savannah, GA | 2009-2014 | GPA: 3.6
Bachelor of Science: Cell Biology,
Minor in Philosophy and Neuroscience.
Magna Cum Laude.

Harvard CS50 Coursework

Completed additional coursework in Computer Science, concentrating on fundamental computer science concepts and **software development**.

Michael Choromanski

- Atlanta, GA, US

Summary

Young professional and junior developer with a diverse background seeking opportunities as a frontend or full-stack **web** developer. As a former educator, biologist, journalist and conservationist, I am proud of the wide range of skills and domain knowledge that I am able to bring to the table. My various experiences managing teams have both fostered my skills as a leader and taught me how to follow and be a productive team member. I have always been an auto-didact and I am confident in my ability to learn new skills quickly and rapidly become an asset to any team I am a part of. My **experience** as an educator has also sharpened my ability to communicate with others and train new team members efficiently. While my preference is on working in the Atlanta area, I am open to opportunities throughout the United States and Canada.

Work History

Total Work **Experience**: 15 years

- **Web** Developer (Contract) Seen Ventures
Jun 01, 2024
- Jr **Software** Developer Sevaa Group
Jan 01, 2023
- **Web** Developer And **Software** Consultant (Contract) Freelance
Aug 01, 2022

- **Science Teacher Savannah Chatham County Public School System**
Jul 01, 2020
- **Research Scientist And Graduate Assistant Univsersity Of Georgia**
Aug 01, 2016
- **Layout Editor For The Inkwell Newspaper Georgia Southern University**
Jan 01, 2010

Education

- **Bachelors** | Georgia Southern Univeristy
- **Masters** | University of Georgia

Skills

- **javascript** - 7 years
- **attention to detail** - 6 years
- **adobe creative cloud** - 5 years
- **graphics** - 5 years
- **python** - 5 years
- **ui** - 5 years
- **adobe illustrator** - 4 years
- **educational technology** - 4 years
- **git** - 4 years
- **github** - 4 years
- **higher education** - 4 years
- **responsive design** - 4 years
- **software** - 4 years
- **tailwind** - 4 years
- **agile** - 3 years
- **frontend development** - 3 years
- **nodejs** - 3 years
- **npm** - 3 years
