

## Stephen Shapiro, MBA, PMP, Certified Scrum Product Owner (CSPO)

### Career Summary:

- **Business Analyst/Project Manager** with 9+ years of experience in Banking and Capital Markets, working successfully on multiple Front Office Portfolio **Management**, Trading and Sales projects and initiatives.
- Strong understanding of Fixed Income, **Derivatives**, Algorithmic Portfolio Construction, Trade Lifecycle, Sensitivity and Scenario **Analysis**, and Rates Trading and Sales processes
- Practical experience with the creation and implementation of Machine Learning (Python) Fixed Income Portfolio Construction framework, implementation of OMS and Trading **systems** (CRD, Aladdin, **Calypso**), data repositories and CRM
- Extensive background in the full **Software** Development Life Cycle (SDLC), Agile and **Project Management** methodology
- Professional, flexible, creative, and goal oriented; combining analytical skill and creativity to find effective solutions for internal and external customers, with an emphasis on achieving top down organizational goals.

### Technical Skills:

- **Excel**, Access, VBA, PowerPoint, MS **Project**, Visio, SQL Server, Sybase SQL and Oracle SQL
- Python (including NumPy, Pandas, Matplotlib, Scikit-Learn) and Jupyter Notebook, and some familiarity with C++

### Work Experience:

#### FIS Global Oct 2021 - Current

##### **Business Systems Analyst Specialist, Product Management group** (Fixed Income Processing Suite):

- **Business Analyst** and Product **Manager** supporting Fixed Income Processing Suite application. This includes defining requirements, working with developers and QA, assisting as a scrum master, performing research on new product and enhancement initiatives including ESG Implementation and Application Modernization, and **assisting BA in system fixed income analytics and bond amac methods**.
- Participated as a BA in the UI Modernizations **project**, helped define and jointly lead UI modernization **project** team scrum of scrum sessions, lead BA for the match exception process and dashboard design and implementation plan.

#### Geode Capital Management July 2021 - Sept 2021

##### **Functional Analyst**

- Functional **Analyst** supporting front office passive fund **management** application managing over \$700B in assets. Liaison between development teams and **business** partners, perform **analysis**, create mock-ups and/or conduct demos, create user stories, support UAT, and work with QA on test plans.

#### Atos Syntel Inc. (consulting company) June 2018 - July 2021

##### **Senior Consultant**

- **Business Analyst**, as part of Atos Syntel's client site team. Specifically, lead BA on a **project** to build out client's (SSGA) algorithmic portfolio (Fixed Income) construction application (Python), and assisting BA on a **project** to integrate the application with CRD (Charles River). Participated in a **project** to create an automated middleware integration solution between the client and CRD, to support portfolio cash **management** and forecasting in CRD. **Business analyst** responsibilities included creating stories, managing the backlog, running grooming sessions, and working on BRDs, gathering requirements, creating flow diagrams, and working with on-site and offshore resources.

#### Capital Group Companies| American Funds, Fixed Income Nov 2015 - Jun 2018

##### **Senior Business Systems Analysis**

- **Business Analyst** on BlackRock Aladdin Fixed Income implementation **project**, with a focus on Security Master and Reference data **systems** data integration. Specifically, part of team building out a middleware **software** and database solution to support trading and reference data real-time messaging (JSON) and file integration between Aladdin and Capital Group internal **systems**
- Work with internal stakeholders to define requirements and create supporting stories for development
- Work with Developers and Quality **Management** (QM). This includes responsibility for creating stories, performing story walkthroughs with Developers and QM, working with QM to define test scenarios, and at story completion, responsible for final story review and signoff.
- Ongoing work with onsite vendor (BlackRock **Systems**) consultants to resolve issues

- Acted as Scrum Master for various system integration projects related to BlackRock Aladdin implementation

## **MUFG UNION BANK, N.A., Investment Banking & Markets (IB&M) Group, Los Angeles**

**Mar 2012 - Nov 2015**

### **Senior Business Systems Analyst, Vice President**

- Primary Rates **Business Analyst/Project Manager** (BA/PM) supporting **Calypso** Front Office Sales, Trading, and Middle Office
- Work with Senior **Management** Sales and Trading as BA/PM including new rates product implementations and responsible for Front Office **Calypso** risk reporting
- **Project Manager** (PM) responsible for the successful implementation of **Calypso** v13 including: OIS pricing and **Calypso**'s new risk reporting framework
- Work with Trading to build out complete Front Office OIS pricing environment, curves, and FO hedge reporting..
- Work with Market Risk **Management** group to capture requirements and create system Scenario and Sensitivity reports, bucket hedge reports, and clean P&L report.
- Primary **Business Analyst** on Algo 5 **collateral** system upgrade. Supporting BA for the implementation of Initial Margin (IM) for uncleared swaps. This included working with group's quantitative **manager** to capture requirements, build out IM process flows, and set up Sensitivity **Analysis** to support calculations.
- **Project Manager** and **Business Analyst** on the successful implementation of IB&M Cross Asset Mark to Mark **Customer** Portal, and other ad hoc initiatives and projects
- IB&M **Business Analyst** coordinating external groups requiring IB&M Technology development.
- Lead BA on **Calypso** v9 to v12 upgrade **project** which included delivering upgrade in five months
- Participating BA on creating IB&M Data Repository for reporting and analytics
- Lead BA on initial IB&M Dodd Frank Swap Dealer projects including: Swap Data Repository reporting and **Customer** Documentation **management** system implementations. This included requirements definition, participation in vendor selection and SOW negotiations.
- Member of an IB&M select committee to determine group's **project** lifecycle processes going forward including: definition, structure, roles and responsibilities, and follow up implementation.

## **WELLS FARGO BANK, Wells Fargo Securities (WFS), San Francisco**

**Jun 2008 - Mar 2012**

### **Business Systems Analyst, Vice President**

- Work with Senior **Management** Rates Sales as BA/PM on projects involving the design and successful implementation of integrated solution with: CRM, **Calypso**, Data Repository, and various other ad-hoc applications. .
- Work with Senior **Management** Sales and Compliance as joint **Project Manager** and **Business Analyst** on **Customer** Eligibility **project** to restructure and unify processes and workflows, to improve efficiency and control and support new **derivatives** sales regulatory requirements.
- Managed **project** to successfully onboard Customized Structured Products sales group to CRM.
- Worked with the Senior **Management** of Principal Investing to develop and enhance the central Managerial and Analytical **Information Systems** (MIS). This involved the development and enhancement of **systems** managing the group's Corporate Debt, Credit **Derivatives**, Synthetics, Syndicated Bank Loans, and Muni portfolios. This included managing projects to build out portfolio OTTI (other than temporary impairment) and **financial** P&L reporting.

### **Derivatives Accountant**

**Mar 2007 -**

**Jun 2008**

- Redesigned and restructured the Back Office Treasury/Repo **Management** and Accounting (\$600m notional). Included redesigning workflows and developing a 3-tier integrated application (Access, **Excel**, VBA, and ADO) system to manage and automate the P&L, settlements, and MTM/Accrual Accounting process for the group
- Involved in '**Calypso**' Treasury implementation. WF Securities formally recognized my contribution in the **Calypso** Treasury Accounting implementation.
