

Ikjot Singh Sarao

Atlanta, GA 30308 | (762)-218-0369 | ikjotpunjabi@gmail.com | www.linkedin.com/in/ikjotsarao

SUMMARY:

Results driven Project Manager/Business Analyst with 8 years managing web-based platforms, specializing in Traditional, Hybrid, and Agile/Scrum (SAFe) Project **Management**, Logistics, and contract **management**. Proven expertise in leading experimentation processes, analyzing data for optimization, data governance, and facilitating cross-functional teams to drive large-scale change. Skilled in A/B and multivariate testing, data-driven insights, and **customer**-focused optimizations that enhance product efficiency and user engagement. Collaborates effectively with product, engineering, and UX teams to ensure seamless project delivery and continuous improvement. Passionate about cultivating a culture of experimentation and data-driven decision-making. Fluent in four languages.

PROFESSIONAL EXPERIENCE:

Fiserv, Alpharetta, GA (Remote)

Jan 2025 – Apr 2025

Project Manager

- Led and facilitated high-impact, client-facing requirements gathering sessions, collaborating with **senior** stakeholders, executive sponsors, and technical teams to define project scope, business processes, system enhancements, and key deliverables for financial services applications
- Developed detailed Business Requirement Documents (BRDs), Functional Specification Documents (FSDs), and traceability matrices to capture business needs and align deliverables across product, **development**, and operations teams, utilizing **Microsoft** Word, Excel, and Visio
- Managed all user story creation, sprint planning, and backlog grooming activities in JIRA, designing custom workflows and dashboards to improve visibility of project progress, identify bottlenecks, and drive Agile best practices across multiple concurrent **software** projects
- Spearheaded the creation of UI wireframes and end-to-end process diagrams in Visio, defining user journeys, system interactions, and integration points with middleware technologies to enhance application usability and **customer** experience
- Acted as a key technical liaison between the business and engineering teams, translating complex requirements involving J2EE, XML, JSON, and legacy middleware components into actionable **development** tasks, ensuring seamless cross-platform integration
- Served as a Scrum Master, leading Agile ceremonies including sprint retrospectives, stand-ups, and backlog grooming sessions, and mentoring junior analysts on Agile methodologies, backlog refinement techniques, and user story writing best practices
- Authored detailed user guides, training manuals, SOPs (Standard Operating Procedures), and internal knowledgebase articles to **support** operational readiness for product launches, leveraging **Microsoft** PowerPoint and Word to create client-facing collateral
- Oversaw cross-functional workshops to gather, prioritize, and validate functional requirements for digital transformation initiatives, including cloud migration, modernization of fintech platforms, and enhancements to API-driven services
- Proactively identified system and process inefficiencies during production **support** activities, leading root cause analyses (RCA), documenting findings, recommending technical solutions, and collaborating with DevOps to ensure long-term stability of deployed applications
- Provided business analysis leadership on technology modernization projects, working with enterprise architecture and cloud engineering teams to define strategies for migrating legacy banking applications to modern, scalable cloud-based environments
- Conducted detailed stakeholder interviews and business process mapping sessions to create “as-is” and “to-be” process flows, identifying automation opportunities and strategic system enhancements that improved operational efficiency

- Drove cross-departmental collaboration by building strong relationships with Product Owners, Solution Architects, QA leads, and Project Managers to ensure end-to-end alignment of business goals, technical requirements, and delivery timelines
- Authored and contributed to RFP (Request for Proposal) responses, creating persuasive business cases and tailored solution blueprints for major financial institutions, supporting revenue growth and new client acquisition for Fiserv's financial services portfolio
- Coordinated and executed User Acceptance Testing (UAT) cycles, including test planning, script creation, defect triage, and validation of system behavior against acceptance criteria, ensuring smooth client sign-off and successful deployment to production
- Designed and implemented JIRA dashboards to track KPIs such as defect resolution time, sprint velocity, and requirements traceability, providing leadership teams with real-time insights to drive data-driven decision making
- Partnered with cybersecurity and compliance teams to embed regulatory requirements, data security standards, and risk mitigation strategies into system design documents, ensuring compliance with financial industry regulations (e.g., PCI DSS, GLBA)
- Participated in product demos, stakeholder showcases, and executive briefings, presenting new system capabilities, gathering iterative feedback, and ensuring product enhancements were aligned with Fiserv's strategic roadmap and client expectations
- Supported enterprise Agile transformation efforts by promoting Scrum and Kanban best practices across the organization, coaching cross-functional teams on story estimation techniques, and contributing to continuous improvement initiatives
- Delivered process improvement recommendations and business analysis insights that contributed to a 20% increase in **development** cycle efficiency and a measurable reduction in production **support** escalations over a 12-month period
- Acted as a Subject Matter Expert (SME) for financial institution integration projects, advising internal and external stakeholders on best practices for digital banking, payment processing, **customer** onboarding, and **mobile** application integration

Morgan Stanley, Atlanta, GA (Remote)

Nov 2022 – Dec 2024

Project Manager

- Fostered clear, autonomous team communication, and developed detailed project plans, minimizing external interference and integrating AI-driven tools to streamline workflows, resulting in improved project velocity
- Managed web experimentation pipeline across multiple product teams, facilitating the end-to-end **management** process from intake, requirements gathering, documentation, review, and **development** to analysis and stakeholder communication
- Collaborated with Data Product Managers, stakeholders, sponsors, and business units to gather requirements, define project scope, and prioritize initiatives based on business impact while delivering regular updates on program status, risks, and key milestones to ensure transparency and alignment
- Led infrastructure modernization initiatives, managing the deployment of scalable cloud-based solutions and on-premise network upgrades to enhance system performance, security, and reliability, while coordinating with cross-functional teams to ensure seamless integration with existing enterprise architecture
- Performed in-depth analysis of experimentation results, contextualizing data to uncover actionable insights, and presented recommendations as a primary contact to stakeholders, leading to improvement in product optimization and a 22% increase in user engagement
- Established robust data governance frameworks by ensuring compliance with data security and privacy standards, managing the integrity of experimentation data, and overseeing secure data-bearing **IT** asset movements
- Enhanced portfolio and vulnerability **management** by leveraging Excel (VLOOKUP, Pivot Tables, and Charts), Archer GRC, and ServiceNow's Vulnerability **Management** Module to track, analyze, and mitigate security risks, ensuring compliance with governance frameworks and improving risk visibility across enterprise systems
- Managed and optimized data governance processes using Snowflake as a centralized data warehouse, ensuring secure, scalable, and efficient data storage, access, and analysis across enterprise systems

- Guided Agile teams in cross-functional communication from concept to implementation logistics projects, driving the transportation **management** (TMS) of secure data-bearing **IT** asset movements while ensuring compliance with project timelines and contractual agreements
- Utilized A/B testing and data analytics to inform decision-making and product improvements, ensuring optimized product delivery based on performance insights
- Conducted global AML, sanctions, and consumer financial protection risk assessments, evaluating exposure across multiple jurisdictions and aligning methodologies with BSA/AML, OFAC, FATF, and CFPB regulatory requirements to ensure compliance and mitigate financial crime risks
- Managed the enterprise rollup of AML risk assessments, aggregating findings from multiple departments and business units to create a comprehensive risk profile, ensuring consistent risk **management** practices across the organization and alignment with regulatory frameworks
- Created and maintained dashboards in ServiceNow & leveraged advanced MS Excel functions, including VLOOKUP to cross-reference datasets, pivot tables to analyze and summarize experimentation results, and conditional formatting to highlight key trends and anomalies for monitoring key project metrics, providing real-time insights and data visualization (Looker Studio) to aid in backlog prioritization
- Evangelized a culture of experimentation and data-driven decision-making by providing workshops, technical guidance, best practices, and mentorship to team members on optimizing experimentation workflows, resulting in a 30% increase in experimentation adoption and improved decision-making based on data-driven insights
- Identified and mitigated project risks, employing advanced risk analysis techniques to minimize potential impacts on project scope, cost, timelines, and deliverables and used Jira to maintain inventories using plugins or backlogs and manage such timelines with a focus on enhancement projects
- Led automation initiatives by integrating AI-driven tools and workflow automation solutions, such as Azure Machine Learning, **Microsoft** Co-Pilot, and Power Automate Desktop, to streamline workflows and enhance team communication, optimizing web experimentation pipelines and user interaction processes and resulting in improved project velocity and a 30% increase in experimentation adoption through data-driven decision-making, automation, and testing
- Facilitated risk assessment workshops and conducted risk interviews with cross-functional teams, including compliance, legal, and operations, to identify and evaluate key risks, enhance risk awareness, and drive consensus on mitigation strategies
- Handled budgeting and financial tracking using VLOOKUP in Excel to analyze experimentation costs, optimize resource allocation, and ensure accurate forecasting, supporting data-driven decision-making for web experimentation pipelines and automation initiatives

AT&T Business, Atlanta, GA (Remote)

Jan 2021 - Nov 2022

Project Manager

- Developed and maintained strong relationships with key vendors and clients, ensuring successful contract negotiations that resulted in exceeding sales quotas by 182% with 52% of customers being new logo
- Facilitated seamless communication with internal and external stakeholders, translating business requirements into technical specifications, delivering high-level presentations and technical reports using Google Suites (Google Slides, Google Sheets) for C-level executives and stakeholders with actionable project updates and strategic recommendations
- Leveraged CRM systems (Salesforce) and critical path method (CPM) tools for B2B **software** projects, including the **development** and implementation of an online **customer** portal to enhance contract **management** and real-time data analytics, while streamlining workflows, improving client engagement, analyzing project schedules, and implementing adjustments to meet milestones.
- Enhanced risk and compliance **management** by utilizing ServiceNow's Vulnerability **Management** Module to track, assess, and mitigate security risks in contract **management** processes, ensuring regulatory compliance and improving risk visibility across client engagements
- Spearheaded infrastructure enhancement projects, overseeing the deployment of scalable network solutions and cloud-based contract **management** systems to improve operational efficiency, data security, and real-time analytics, ensuring seamless integration with existing enterprise frameworks

- Aligning contract terms with client expectations and utilized **customer** data insights to enhance contract structures and drive efficiency
- Implemented integration methodology with legal and finance teams to ensure all sales agreements met compliance and financial targets while negotiating favorable terms for both parties
- Provided insights into market trends and developed strategic recommendations that contributed to improved contract structures and long-term client relationships
- Oversaw the design, **development**, and implementation of an online **customer** portal, streamlining the contract review process and enabling clients to track contracts, manage services, and view real-time data analytics for improved decision-making and **customer** engagement while working with web **development** and **IT** teams to implement
- Created and implemented quantitative risk assessment models to evaluate AML, sanctions, and consumer financial protection risks, utilizing risk-weighting methodologies to prioritize high-risk areas and enhance compliance monitoring effectiveness
- Optimized budgeting and financial analysis using VLOOKUP and Pivot Tables in Excel to track sales performance, analyze contract profitability, and enhance financial forecasting
- Streamlined contract review processes using Salesforce, Excel (VBA, VLOOKUP, and Pivot Tables), and workflow automation tools (Trello & Jira), identifying bottlenecks reducing review time by 20% and improving operational efficiency through data-driven optimizations
- Integrated AI solutions using Google Cloud AI, **Microsoft** Co-Pilot, and Tableau to analyze **customer** data and predict contract outcomes, and improving workflow efficiency in B2B **software** projects

BMW of North America, LLC, Woodcliff Lake, NJ (Remote)

May 2019 - Dec 2020

Project Manager

- Developed and executed product strategies, led end-to-end **management** of the Catalog Tech program, built and maintained comprehensive roadmaps, and business requirements for aftersales systems using tools like Jira, Confluence, and Visio, ensuring alignment with dealership needs and corporate goals
- Led cross-functional project implementation, managing timelines, budgets, and resource allocation with **Microsoft** Project, while coordinating with internal teams, BMW headquarters, and third-party vendors using Agile methodologies
- Managed budgeting processes using VLOOKUP in Excel to track expenses, analyze cost variances, and ensure accurate financial forecasting, optimizing resource allocation for aftersales systems and dealership **support** initiatives
- Streamlined testing, training, and rollout processes for system updates, employing API tools (REST, XML, JSON) and crafting training materials using PowerPoint and LMS platforms to **support** dealer adoption across the U.S. network
- Guided infrastructure modernization initiatives by overseeing the integration of cloud-based aftersales systems, enhancing dealership **support** capabilities, streamlining data **management**, and ensuring seamless system interoperability to improve **service** efficiency and compliance
- Utilized Portfolio **Management** Tools and Archer GRC to assess project risks, monitor compliance with regulatory requirements, and enhance governance across aftersales system initiatives, ensuring alignment with corporate policies and industry standards
- Directed the consolidation of AML risk assessments across global business units, synthesizing data to provide **senior** leadership with an integrated view of enterprise-wide risks, facilitating informed decision-making and compliance with international regulatory requirements
- Led cross-functional risk assessment sessions, collaborating with stakeholders across compliance, finance, and operations to evaluate risk exposure, align on risk appetite, and implement effective mitigation measures
- Presented business cases and project updates to upper **management** and dealer committees using Power BI and Tableau, securing approval for new **service** technologies and addressing stakeholder concerns
- Established **service** technology standards for third-party systems, creating qualification criteria, conducting evaluations, and implementing continuous monitoring to ensure network compliance and efficiency
- Implemented process improvements and workflow automation, driving a 15% increase in operational efficiency through tools like Zapier, Power Automate, and advanced data analytics
- Leveraged AI enhanced tools like Salesforce and Power BI to manage and analyze sales data across the dealer network, creating tailored reports and dashboards that enabled real-time tracking of sales performance, dealer

engagement, and inventory levels, which led to a 20% increase in sales efficiency and enhanced collaboration with dealers

Cellairis, Alpharetta, GA (Remote)

May 2017 - May 2019

Project Manager

- Directed the end-to-end **development** of web applications for retail operations using Jira (including customization, workflow **management**, and integration capabilities) for task management, Confluence for documentation, and Slack for cross-functional team communication, ensuring seamless collaboration between developers, UX designers, and QA testers
- Monitored project schedules and budgets using **Microsoft** Project and Asana, aligning deliverables with business objectives while mitigating risks through proactive analysis and stakeholder engagement
- Facilitated agile workflows by organizing sprint planning, daily stand-ups, and retrospectives using Scrum methodologies and tracking sprint metrics through Jira dashboards, achieving a 20% reduction in project cycle times
- Enhanced retail operations by implementing web app features like real-time inventory tracking and **customer** analytics dashboards with AI driven tools like Power BI, Google Analytics, and **Microsoft** Co-Pilot, increasing efficiency by 25% and improving decision-making processes
- Streamlined stakeholder communication by delivering progress reports and risk assessments via PowerPoint and Visio, using data visualization techniques to clarify project roadmaps and secure buy-in for strategic initiatives
- Proactively identified, monitored, and escalated project-related issues to ensure timely resolution, effectively managing competing priorities across multiple simultaneous projects within strict deadlines in a fast-paced retail technology environment
- Facilitated project kick-off meetings, regular progress updates, and reviews to ensure stakeholder alignment, maintaining clear and consistent communication with team members and **management** for early issue identification and accurate status reporting

Champs Sports, Augusta, GA

Apr 2015 - Apr 2017

Sales Associate

- Engaged with customers using personalized sales techniques to identify their needs, provide product recommendations, and drive purchasing decisions
- Proactively gathered **customer** feedback to enhance the shopping experience and refine sales approaches for increased conversion rates
- Maintained a well-organized and visually appealing sales floor by strategically stocking and arranging merchandise to optimize **customer** engagement
- Collaborated with team members to achieve sales targets, deliver exceptional **customer service**, and foster a positive shopping environment
- Developed strong product knowledge to effectively educate customers on features, benefits, and promotions, leading to informed purchasing decisions
- Processed transactions efficiently while ensuring accuracy, handling returns, and addressing **customer** inquiries to provide a seamless checkout experience

PROJECTS:

FDM Training **Management System (TMS) POD**

Apr 2024 – Dec 2024

Scrum Master

- Facilitated all Scrum (SAFe) ceremonies including sprint planning, backlog grooming, daily stand-ups, demos, and retrospectives with a team of 25+ (developers, quality engineers, and business analyst) to discuss progress of the current sprint as well as identifying any blockers for developing a web-based platform (TMS)
- Collaborated with the Product Owner & stakeholders for agile documentation through Sharepoint; to define user stories, acceptance criteria, and experimentation goals, incorporating insights from A/B testing and user behavior analysis to guide product enhancements and ensuring the team's backlog was well-maintained, project scope was define, and DOR/DOD adhered to

- Ensured MoSCoW prioritization was followed during sprint planning, categorizing tasks into Must-haves, Should-haves, Could-haves, and Won't-haves to align with project goals. Actively protected the team from external interference, maintaining focus and a stable project flow.
- Directed the **development** of user stories and managed bug resolution using Jira, created detailed wireframes with Visio, and collaborated with Tech Leads to integrate **Microsoft** Co-Pilot for AI driven automation, enhancing code review processes, streamlining **development** workflows, and accelerating project timelines by automating routine coding tasks and error detection in efforts to develop a client contact solution (Chatbot)
- Organized and scheduled meetings aligned with sprint requirements, onboarding new POD members, and allocated tasks to the appropriate team members for optimal sprint execution and solution design
- Tracked key Scrum metrics (Burndown Chart) by implementing actions to optimize team performance and remove obstacles that hindered progress; focused on attaining stable sprint velocity to meet sprint objectives, and presented all work in the Sprint Review using MS PowerPoint
- Led experimentation and data analysis efforts on large-scale SaaS and e-commerce platforms, optimizing user experiences and driving product enhancements through A/B testing and multivariate experiments, improving conversion rates by 18%

EDUCATION:

Augusta University, Augusta, GA

Completed

Bachelors of Science in Mathematics, Minor in **Computer Science**

CERTIFICATIONS:

Scrum Alliance – Certified ScrumMaster (CSM), Scrum Alliance

Completed - Dec 2024

- Acquired skills in facilitating Scrum events, coaching teams, and driving continuous improvement. Also learned to **help** teams embrace self-organization, optimize workflows, and deliver high-quality products. Developed skills on fostering collaboration, transparency, and delivering value, to **support** agile transformations and enhance team performance

PMI - Fundamentals of Predictive Project **Management**, Project **Management** Institute

Completed - May 2024

- Acquired an understanding of predictive processes and terminology. Also demonstrated key concepts, including: how to build project charters, identify project stakeholders, write clear requirements, sequence and assign work, create the project schedule, make risk mitigation plans, review the plan and stay aligned with sponsors, conduct a kick-off meeting, measure project success, and successfully close out a project

PMI - Fundamentals of Agile Project **Management**, Project **Management** Institute

Completed - May 2024

- Gained a strong foundation in agile processes, including setting a clear vision, building high-performing teams, managing scrum boards, creating user stories, and running effective sprint planning, daily scrums, reviews, and retrospectives to **support** efficient product delivery

FDM Academy - BA/PM Training Certificate, FDM Group

Completed - Jan 2023

- Trained in FDM's Business Analyst/Project **Management** stream which focused on Excel, Data Visualization (Power BI), Finance, Traditional and Agile Project **Management**, SQL, Risk and Regulatory, and Business Analysis

Google Data Analytics - Professional Certificate, Coursera

Completed - Aug 2022

- Learned how to code in SQL and R (Programming language) while also gaining skills in using spreadsheets (Excel/Google Sheets) and data visualization (Tableau)

SKILLS: Communication, **Customer Service**, Sales, Negotiation, Vendor Relations, B2B, Outreach, Google Suite, MS Office, **Microsoft** Project, **Microsoft** Planner, Project Online, MS Teams, Slack, Zoom, Visio, Excel (VLOOKUP, Pivot Tables), Word, Contract **Management**, Project Management, Complex Projects, UX, Engineering, Product Teams, Budgeting, Quadrilingual (**English**, Punjabi, Hindi, **Spanish**), Sprint Planning, Applied Mathematics, Public Speaking, Coding (C#, Python, Matlab, SQL, R), Data-Driven Decision Making, Data Visualization (Tableau and Power BI), Data Governance, Social Networking, CRM (Salesforce), Cold-Calling, Optimizely, Google Optimize, ServiceNow, Jira, Trello, Confluence, Agile, Waterfall, Kanban, Scrum, Scope, Data Integrity, Risk Assessment, Regulatory Compliance, KYC, SWOT, KPI, Wireframes, A/B Testing, Multivariate Testing, Validation, User Behavior Analysis, Vendor Relations, Contract Negotiation, Requirement Gathering, Financial Compliance, AI (Artificial Intelligence)

Summary

I'm a graduate of Augusta University where I received a Bachelors of Science in Mathematics. After over 7 years in the Sales Industry, I am looking to progress further in my career within the data and IT fields. Currently, I am a Secure Shipping Project Coordinator with Morgan Stanley. After completing the Google Data Analytic - Professional Certificate, I was able to code in SQL and R (Programming language). I also gained skills in using spreadsheets and data visualization through Tableau. I later received a Certificate of Completion from FDM Academy where I trained in their Business Analyst Project Management stream. There I learned data visualization through Power BI, Finance, Excel, and Traditional and Agile Project Management, and Business analysis. Opinions are my own.
