

KANTIN TONGUE

Minnesota, USA | kantinstephane@gmail.com | (651) 318-5248 | US Citizen

PROFESSIONAL SUMMARY

Highly skilled **DevOps Engineer** and **Platform Engineer** with over 6 years of experience designing, automating, and managing secure, scalable, and high-availability **cloud infrastructure**. Expertise in **Kubernetes orchestration**, **CI/CD pipelines**, **Infrastructure as Code (IaC)**, and multi-**cloud** environments (AWS, Azure, GCP). Proficient in GitOps workflows, DevSecOps **practices**, and containerization technologies to drive **operational** efficiency and resilience. Known for enabling automated deployments, implementing robust **security** measures, and fostering **collaboration** across teams to deliver reliable **infrastructure** aligned with business needs.

TECHNICAL SKILLS

- **Cloud Platforms:** AWS (EKS, ECS, Lambda, RDS, S3, CloudFormation, Route53, CloudFront, VPC, IAM), Azure (AKS, Virtual Machines, Functions, Azure **DevOps**, Azure Monitor, Load Balancers, Key Vault), GCP (GKE, Pub/Sub, **Cloud** Storage, BigQuery)
- **CI/CD Tools:** GitLab CI/CD, **Jenkins**, ArgoCD, AWS CodePipeline, Azure Pipelines, GitOps.
- **Infrastructure as Code (IaC):** **Terraform**, CloudFormation, Pulumi, **Ansible**, **Chef**, Packer, SaltStack, Vagrant
- **Containerization & Orchestration:** Kubernetes (EKS, AKS, GKE, OpenShift), Docker, Docker Compose, Helm, Kustomize, Rancher, VMware Tanzu, Istio, Envoy, Linkerd
- **Monitoring & Observability:** Prometheus, Grafana, ELK Stack, Splunk, CloudWatch, DataDog, Fluentd, Dynatrace, Nagios
- **Scripting & Automation:** Python, Bash, Shell Scripting, GoLang, PowerShell, Ruby, Groovy, YAML, JSON
- **Networking & Security:** DNS, Load Balancers (HAProxy, NGINX, ALB, NLB), VPC, VPN, Firewall Management, **Security** Groups, NACLs, AWS WAF, SSL/TLS, Keycloak, HashiCorp Vault, IAM Policies, Zero Trust **Security**
- **Databases:** MySQL, PostgreSQL, MongoDB, Redis, DynamoDB, AuroraDB, RDS, BigQuery, **Cloud** SQL, Cassandra, MariaDB
- **Message Queues & Streaming:** Apache Kafka, RabbitMQ, ActiveMQ, AWS SQS/SNS, Azure Service Bus, Pub/Sub
- **Logging & Tracing:** ELK Stack, Splunk, Fluentd, Loki, CloudWatch Logs
- **Performance Testing & Optimization:** HAProxy, NGINX, LoadRunner
- **Collaboration Tools:** JIRA, Confluence, ServiceNow, Slack, Microsoft Teams, GitHub

- **Other Tools:** Nexus, Artifactory, Harbor, Rundeck, Packer, Consul, VMware vSphere, VirtualBox, Rancher, OpenShift
-

PROFESSIONAL EXPERIENCE

Senior **DevOps** Platform **Engineer**

AT&T – Bellevue, WA | September 2022 – Present

- Designed and deployed multi-region Kubernetes clusters on AWS, Azure, and GCP, leveraging Helm charts and Calico CNI to ensure high-availability, **scalability**, and advanced networking configurations.
 - Implemented secure and automated GitOps workflows with ArgoCD, integrating external secrets management using HashiCorp Vault to streamline deployments.
 - Developed end-to-end CI/CD pipelines using **Jenkins**, GitHub Actions, and **Terraform**, automating application releases and **infrastructure** provisioning across **cloud** environments.
 - Configured robust **monitoring** solutions with Prometheus, Grafana, and DataDog, enhancing real-time observability and enabling proactive incident response.
 - Led the implementation of a centralized ELK Stack logging **solution** to provide comprehensive root-cause analysis and **operational** visibility across distributed **systems**.
 - Conducted Kubernetes cluster **security** audits using Kube-bench, Trivy, and Terrascan, ensuring compliance with CIS Benchmarks and industry standards.
 - Migrated legacy monolithic applications to a microservices **architecture** using Docker and Kubernetes, enabling seamless **scalability** and **performance** optimization.
 - Enhanced **infrastructure security** through advanced IAM configurations, **network** segmentation, and SSL/TLS encryption for secure **communication** across environments.
 - Facilitated knowledge sharing by mentoring **cross-functional** teams on Kubernetes management, **Terraform automation**, and **DevOps best practices**.
 - Collaborated with developers to optimize workflows, troubleshoot deployments, and improve the reliability of CI/CD pipelines for faster, error-free releases.
-

Cloud Infrastructure Engineer

Guitar Center – Maryland | August 2022 – December 2022

- Designed **infrastructure automation** scripts using **Terraform** and **Ansible**, enabling consistent and repeatable provisioning across AWS, Azure, and GCP environments.
- Optimized and automated CI/CD workflows using GitLab CI/CD and **Jenkins**, integrating **security** scans and automated testing to ensure production readiness.
- Migrated legacy applications to containerized environments using Docker and orchestrated deployments with Kubernetes, implementing zero-downtime rollouts and rollback strategies.

- Configured and managed secure networking environments including VPNs, IAM roles, and encrypted storage solutions to meet compliance requirements for GDPR and HIPAA.
 - Implemented centralized logging and **monitoring** solutions using Fluentd, ELK Stack, and CloudWatch to analyze **infrastructure performance** and detect anomalies.
 - Enhanced cost efficiency through **infrastructure** optimization, including automated resource scaling, storage management, and resource tagging strategies.
 - Collaborated with **development** and **security** teams to implement secure DevSecOps **practices**, integrating tools such as SonarQube and OWASP ZAP for automated code scanning.
 - Automated recurring tasks such as patch management and resource cleanup using Bash and Python scripting, improving **operational** efficiency.
 - Designed disaster recovery solutions leveraging AWS CloudFormation and Azure recovery tools to ensure data integrity and business continuity during outages.
 - Developed technical documentation and **operational** guides for **infrastructure** processes, enabling team knowledge sharing and improved support workflows.
-

DevOps Engineer

EKTECH Software Solutions – Houston, TX | March 2018 – August 2022

- Built and managed scalable CI/CD pipelines using **Jenkins**, integrating automated testing, code quality scans with SonarQube, and **infrastructure automation** with **Terraform**.
- Deployed and monitored Kubernetes clusters, remediating vulnerabilities and integrating Istio for advanced service mesh capabilities, including traffic management and observability.
- Configured robust **monitoring** and alerting **systems** using Prometheus, Grafana, and Loki, improving application observability and enabling proactive issue resolution.
- Led the migration of on-premises workloads to AWS, deploying **infrastructure** using EC2, RDS, and S3 to enable **scalability**, availability, and **operational** consistency.
- Collaborated with **security** teams to implement DevSecOps pipelines with automated vulnerability scanning, compliance checks, and **security** integrations within CI/CD processes.
- Deployed centralized logging solutions using the ELK Stack to enhance **operational** insights and streamline **troubleshooting** processes.
- Automated system provisioning and maintenance tasks using **Ansible** and custom scripts to improve team efficiency and **infrastructure** reliability.
- Supported the **deployment** of microservices applications using Kubernetes, Helm charts, and Docker containers for simplified scaling and resource management.
- Conducted regular system health checks, implementing patches and updates to ensure **infrastructure performance**, reliability, and **security**.
- Documented workflows, **deployment** pipelines, and **troubleshooting** procedures to support knowledge sharing across the team.

EDUCATION

Bachelor of **Science** in Information Technology

Bachelor of **Science** in **Cloud** Computing (In Progress)

Western Governor's University

CERTIFICATIONS

- Certified Kubernetes Administrator (CKA)
- Kubernetes Certified Application Developer (CKAD)
- AWS Certified Solutions Architect – Associate
- Azure Administrator Associate
- HashiCorp Certified: **Terraform** Associate
- HashiCorp Certified: Vault Associate
- CompTIA **Security+**

Stephan stephan

- Elk River, MN, US

Summary

Experienced DevOpsCloud **Engineer** dedicated to **automation** and optimization for 4 years, Understands and manages the space between operations and **development** to quickly deliver features to customers, has experience with the **cloud**, as well as **DevOps automation development** for Linux **systems** and Windows, brings maturity, enthusiasm, and a drive to learn new technologies.

Work History

Total Work Experience: 7 years

- **Senior Devops Platform Engineer** AT&T
Sep 01, 2022
- **Cloud Infrastructure Engineer** Guitarcenter
Aug 01, 2022
- **Devops Engineer** EKTECH **Software Solutions**
Mar 01, 2018

Education

- **Bachelors** | University of Yaounde

Skills

- **amazon** elastic kubernetes service - 9 years
- **amazon** relational database service - 9 years
- **amazon** simple storage service - 9 years
- **amazon** web services - 9 years
- **amazon** web services elastic compute - 9 years
- **automation** - 9 years
- **grafana** - 9 years
- **kubernetes** - 9 years
- **network** security groups - 9 years
- **prometheus** - 9 years
- **terraform** - 9 years
- **amazon** web services route 53 - 8 years
