

Todd Butcher
Minneapolis, MN
Email: Todd.Butcher71@gmail.com

I am seeking senior or lead technical opportunities where I can leverage my past experiences and lead projects with a focus on long-term goals. I am proficient in Kubernetes, Python, and Terraform, and I am looking for roles that include development, design, and implementations utilizing these skill sets. Ideally, I would contribute in leading and successfully handing off completed projects.

An experienced Engineer well balanced with relatable interpersonal and technology skills, process development and improvement. Automated deployments for server certificates, provisioning with Terraform IaC, to print server migrations. Currently pursuing certifications in Certified Kubernetes Administration (CKA), and Certified Cloud Security Professional (CCSP). Long term pursuing Masters in Computer Science at Colorado University Boulder remotely.

Professional Summary

- **DevOps:** Annual enterprise product lifecycle management cycles (PLM) for Ping Directory Services, and RHEL upgrades. Developed a multiple node provisioning solution utilizing Python and Terraform. Developed automated day 2 configurations in Chef Infra cookbooks, orchestrated with Jenkins, and Github. With these processes, annual server provisioning became more efficient. LDAP data migrated seamlessly with Ping Data Sync pipelines for multiple business units and environments with zero data loss.
- **On-Prem Cloud Computing:** Redhat Openshift, development of the initial namespace infrastructure and resources required for OAuth, AAuth, and HSID auth application projects, as well as post administration and support through OpenLens.
- **Script Automation:** Developed an automated renewed server certificate download and installation process in Python utilizing Venafi API's. Secure, mitigated human errors and server outages.
- Developed Powershell scripts for automated installation, status, and repair of SCOM agents. Automated SCCM maintenance window scripts, and SQL Report Builder reports.
- **Deployment Strategy:** Developed an HP thin client solution utilizing Microsoft Windows Embedded Standard 7, reducing hardware acquisition costs by 50%. I created an efficient deployment strategy, image creation process, remote device management solution, and support documentation, then lead the final nationwide rollout.
- **Leadership:** Trained multiple teams how to use device management utilities to suit their needs. Trained support teams with ways to reduce service calls and maintenance costs. Lead monthly meetings with key leadership communicate device strategies, life cycle forecasts, and project related updates.

Technical Summary

- Containerization: Kubernetes, Openshift
- Coding Languages: Python, PowerShell, GoLang
- **Infrastructure** as Code: **Terraform**
- Orchestration: **Chef**, **Jenkins**, Github
- IAM: Ping Directory Service, Ping Data Sync, Ping Federate, and Ping Access
- **Monitoring**: SiteScope, Splunk, Dynatrace, Grafana, OpenLens
- **Cloud** Training: AWS, Google **Cloud** Platform, Azure

Experience

TekSystems, August 2024 – January 2025

- **Security Architect**
 - Radiant Logic Virtual Directory **Services** (VDS) **operational** support
 - Data Center migration planning
 - PowerShell scripting for gathering server info more efficiently
 - Confluence documentation, Jira for sprint planning

Spotline, June 2023 – April 2024

- **Senior Consultant, Kaiser Permanente**
 - Technical consultant implementing NoName API **Security** Platform with Kubernetes (K3s)
 - Implemented Kubernetes Dynatrace **monitoring** to remote engine containers.

Optum, October 2016 – May 2023

- **Senior IAM Information Security Engineer**
 - Ping Directory Server and RHEL life cycle management, orchestrated installation, and configuration with **Jenkins**, Github, **Chef** Infra cookbooks and recipes
 - Optimized server provisioning processes with python and **Terraform** IaC.
 - Optimized LDAP migration with Ping Data Sync pipes for end-to-end environments affecting up to 60M records per business unit.
 - LDAP/Ping Federate administration and support (rotational on-call duties)
 - LDAP **performance monitoring** and analysis with Splunk, Grafana, SiteScope, and SiteMinder
 - OpenShift project administration, microservices **performance monitoring** with OpenLens.
 - Developed Python script with Venafi API's to automate Venafi server certificate renewals on LDAP servers
 - Lead POC and demonstration of Ping Access

Three Bridge Solutions, Senior **Systems Engineer** November 2015 – August 2016

- Renewal by Andersen, November 2015 - August 2016
 - Technical lead for multiple **customer** facing hardware projects
 - Analysis of IIS 7 **web** server

Insight Global, Senior **Systems Engineer**, December 2012 – October 2015

- 3M, *December 2012 – October 2015*
 - **Engineering** and configuration iterations of Microsoft SCOM 2012.
 - PowerShell script **development** automating SCOM agent deployments, SCCM maintenance window creation and administration. SQL database query and reporting.

Talent **Software Services**, Senior **Systems Engineer** October 2011 – December 2012

- United health Group, *October 2011 – December 2012*
 - Lead **engineer** for Windows server print server migration.
 - Pioneered developing Python scripts for Windows Print server and queue migration.

- Proactive business unit **communication** and coordination

Analysts International Corporation (AIC), Senior **Systems Engineer, October 2010 – September 2011**

- Kroll Ontrack, *October 2010 – September 2011*
 - Nationwide project management thin client hardware **deployment solution** for new document review locations.
 - Operating System image **engineering** and **deployment** process **development**
 - NetIQ to Microsoft SCOM monitor migration.

TekSystems, Senior **Systems Engineer, September 2008 – September 2010**

- Allina Hospitals & Clinics, *October 2009 – September 2010*
 - Designed mixed print server environment comprised of virtual and physical servers. Scripted automated driver installation procedures, administrative client and server tasks.
 - Developed device management strategies, standardizing configurations and **best**.
- US Bank, *June 2009 – September 2009*
 - Manage and execute server build requests, deploying and configuring virtual and physical Windows Server builds.
 - Capacity planning alert analysis and proactive disk management.
- Carlson Companies, *September 2008 – March 2009*
 - Primary script developer creating multiple scripts to remove vendor specific programs.
 - Simplified a multi-script build process for Citrix Presentation Server

Target Corporation, Senior **Systems Engineer, September 2000 – July 2008**

- Technical Lead for retail store related projects
- Designed enterprise-wide device management and evaluation process standards.
- Maintained relationships with multiple vendors (HP, Lexmark, Viewsonic, Sony, and others) regarding device life cycles, product **improvement**, and management.
- Prior to converting full time: Token ring to Ethernet Conversion Lead
 - Developed and documented conversion process. Trained and lead sub-contractors.
 - Coordinated with multiple teams on execution and **communication** with floors affected.

Military Experience:

U.S. Navy Reserves, Aviation Anti-Submarine Warfare Operator

P-3 Orion Aircrew member, specializing in multiple detection methods to identify and track various oceanic vessels.

COMMUNITY

North Star Grand Prix Bicycle Festival

Amateur Race Director, Kids Race Coordinator, Media coordinator, Officials Car driver, various other **operational** duties.

Birchwood Bike Team, Vice President Operations

Responsible for team operations, **communication**, and administration. Ensured team integrity with team by-laws. Cycling community involvement.

Minnesota Public Radio, Volunteer

Interact with audience members and promote 89.3 The Current at sponsored large events.

- Newsroom Coordinator
- Top 5 volunteer award winner 3 consecutive years
- Mentor to new volunteers

EDUCATION

Brown Institute, Electronics

Todd Butcher

- Minneapolis, MN, US

Work History

Total Work Experience: 15 years

- **Lead Engineer** Teksystems - Wells Fargo
Aug 01, 2024
- **Senior Consultant Spotline** - Kaiser Permanente
Jun 01, 2023
- **Senior Information Security Engineer** Optum
Oct 01, 2016
- **Consultant Three Bridge Solutions**
Nov 01, 2015
- **Consultant Insight Global**
Dec 01, 2012
- **Consultant Talent Consulting And Professional Services**
Oct 01, 2011
- **Consultant Analysts International Corporation**
Oct 01, 2010

Skills

- **engineering** - 29 years
- **systems engineering** - 29 years
- **windows operating system** - 29 years
