<https://www.linkedin.com/in/yohannes-woldeyes-b909b0136/>

Professional Summary:

- **Java Developer** with 10+ years of experience, and a bachelor's degree in computer science.
- Experience in **Java** 1.11, JEE, **Spring** Boot, **Spring** MVC
- Strong ability to learn existing applications quickly and to be able to make modifications.
- Strong **Data** modelling ability and solid knowledge of SQL, Hibernate
- Analytical ability and communication skills with a strong sense of commitment, responsibility and an excellent team player
- Knowledge of creating REST/**API Services**
- **Google Cloud** Pub/Sub GCP
- Monitoring apps using Splunk and Kibana tools.
- Strong knowledge of database **systems**, proficiency in SQL
- Expertise in relational databases such as Oracle, Mysql and Cockroachdb
- Expertise designing and building **RESTful** APIs
- Experience with Agile development methodologies, JIRA
- Experience of CI/CD pipelines and related tools.
- Experience with Jenkins
- Experience with Stratosphere to deploy new version into **Amazon** EC2 servers and openshift
- Experience with Messaging System Kafka and RabbitMQ

Technical Skills:

Programming Languages:	Java , JEE, Groovy
Framework:	Spring Boot
Web Service:	RESTful
Web Server:	Apache Tomcat, WebSphere
UI:	Angular Js, gsp, javascript, jQuery ajax
ORM:	Hibernate
Database:	MySQL, DB2, Cockroach
Development Repository:	GitHub, Bitbucket
Other Tools:	Eclipse, IntelliJ, JIRA, Gradle, Maven, Kibana, Grafana, Splunk and Jenkins
Methodology:	Agile
Industry experience:	Finance, Healthcare, Hospitality, Social Media, Retail, Government apps
Test environment:	JUnit, Mockito, Power Mockito, Splunk

Education:

- Metropolitan State University St. Paul, Minnesota Bachelor of Science, Computer Science, Minor in Mathematics Graduated in 2007.

Professional Experience:

ISI Enterprises, LLC/Randstad (Remote Position)
March 03-28-2025

April 2024 –

Java Software Engineer/ Full Stack Engineer

Responsibilities:

- Create REST API Web Services using Spring Boot
- Add new feature according to business request
- Help with Configuration tasks.
- Create and Alter Database tables in Mysql
- Create REST CRUD API using Groovy and Spring Boot
- Support legacy applications written backend in Groovy and Grails

Best Buy, Minneapolis, MN

Nov 2020 – Mar 2024

Java Software Engineer

Responsibilities:

- Create REST API Web Services using Spring Boot
- Create Micro Services apps in the AWS Cloud environment.
- Google Cloud Pub/Sub GCP
- Help with Configuration tasks.
- Create and Alter Database tables in Cockroach DB, Oracle DB
- Write Liquibase script for Database changes.
- Event Driven Architecture applications using Kafka
- Build a new version using Jenkins and deploy to OpenShift and Cloud environment using Stratosphere tool.
- Create REST CRUD API using Groovy and Spring Boot
- Events streaming using Apache Kafka, and Avro
- Create, Test and Monitor the Rest APIs
- Write Unit tests using Spock and Mockito.

Tools: Java 1.8, Spring Boot, Micro Service, Kafka Stream, GCP

Wells Fargo, Minneapolis, MN

Apr 2020 – Sep 2020

Java Developer

Responsibilities:

- Create REST API Web Services using Spring Boot
- Create Unit Test for existing application.
- Write Unit Test for Spring MVC Controllers and Services MockWebMvc – Spring MVC
- Testing framework
- Refracting exited application
- Bug fix.

Tools: Java 1.8, Spring MVC, JUnit, Mockito, Power Mockito

Optum, Minneapolis, MN

Jun 2019 – Mar 2020

Full-Stack Java Developer

Responsibilities:

- Conducts code reviews. Guides software developers for continuous improvement
- Ensure development artifacts are in alignment with patterns/ frameworks designed by software engineering teams
- Full lifecycle application development using standard frameworks and coding standards/patterns
- Create REST API Web Services using Spring Boot
- Consume REST API Web Services in UI and use the JSON data in Angular 8 template or Angular Modal
- Unit Test REST API Web Services using JUnit and Cucumber Framework
- Write Unit Test for Services using Mockito and Power Mockito
- Follow Agile methodology

Tools: Java 1.8, Spring Boot with Microservice, JUnit, RESTful Web Service, Cucumber, DB2 Angular 8, TDD

Ameriprise Financial

Mar 2017 - Jun 2019

Java Developer

Responsibilities:

- Ensuring that development tasks are completed within the timeline provided and that issues are fully tested with minimal defects
- communicate task estimates, ETAs, and work breakdown structure to the management
- Supports users by developing documentation and assistance tools
- Enhance the Electronic Advisor Report (EAR) Application according to business requirements.
- Create a Batch Processing to generate a report for advisor and member
- Create a Batch Processing to Sync two environments
- After Member enters information in EAR application, create a Batch Processing to generate PDF file, generate UPS Tracking number using UPS SOAP Service, including Tracking number into PDF file and send a report to shipping department when the Batch Processing completed.
- Unit Test - JUnit, Mockito
- Follow Agile methodology

Tools: Java 1.8, J2EE, Spring Boot, JUnit, PDF generation in Java, RESTful Web Service, Oracle DB, SOA, TDD

Optum

Sep 2016 – Jan 2017

Full-Stack Java Developer (Agency portal Development Project)

Responsibilities:

- Maintaining tuning and repairing applications to keep them performing according to technical and functional specifications
- Working effectively with the Test and Verification team to resolve issues
- Being involved in Development, Continuous Integration and time-boxed iterative development.
- Performing code reviews and reviews of technical documentation
- Working with off-shore vendor resources and development activities.
- Learning new technologies and languages

Tools: Java, J2EE, Spring MVC, JUnit, PDF generation in Java, RESTful Web Service, AngularJS

Mediture

Mar 2014 – Sep 2016

Full-Stack Java Developer

Responsibilities:

- Worked with the team to build new Electronic Health Record (EHR) system **software**.
 - Development of UI/client-side **web** application in **Java**-based **Java**/JEE environment
 - Troubleshooting and debugging using the ant debugger and Chrome debugger tools.
 - Designed wireframe prototypes of UI screen, presented to management and business representatives for discussion and approval.
 - Worked closely with other **software** developers and testers on multiple projects as needed.
- Tools:** **Java**, J2EE, **Spring** MVC, JUnit, PDF generation in Java, **RESTful Web** Service

Grand Yordanos Hotel

July 2013 – March 2014

Java Developer

Responsibilities:

- Online Hotel booking website that handles all aspects of the booking process, improves **customer** interactions and facilitates hotel management.
- Provides an automatic room booking system and the ability to manage rooms, seasonal rates, and discounts.
- **Design** and develop the combination of back end and UI
- Continuing to troubleshoot, debug, and add new features as desired.
- Environment: **Java**, **RESTful** JAX-RS, HTML, CSS, JavaScript, jQuery, MySQL

Tools: **Java**, Servlet, **Spring** Boot, HTML, CSS, JavaScript, jQuery, AJAX, JSP, AngularJS, **RESTful**, MySQL, JIRA

AdamaTube - Social Media Site

Dec 2012 – Jun 2013

Web Developer

Responsibilities:

- Similar to YouTube, this social media site allows people to discover, watch and share originally-created videos, and provides a system to connect, inform and inspire others across the community.
- Designed and developed the site and integrated **Restful API** and Hibernate.

Tools: **Java**, Servlet, **Spring** Boot, HTML, CSS, JavaScript, jQuery, AJAX, JSP, AngularJS, **RESTful**, MySQL

Health Partners

Sep 2011 – Nov 2012

Laboratory Information System

Responsibilities:

- Instrument troubleshooting and support in the clinics and hospital
- Connect instruments to lab system (interface)

Yordanos Hotel

Feb 2008 – Sep 2011

Web Developer

Responsibilities:

- Focused on developing UI features for the site

Environment: HTML, CSS, JavaScript

Need/Help Connection

Nov 2007

Web Developer (Volunteer)

Responsibilities:

- Created a dynamic webpage for members of local church
- Site to match a need that someone or an entity has with another individual or entity that is capable of meeting the need.

- Anyone with a legitimate need that needs to be met can submit the connection form. The need would then be posted.

Environment: Java, Servlet, MySQL
