Summery

As an accomplished Information Technology Manager, **Engineer**, and Architect, with 25+ years of experience, I specialize in designing and executing IT strategies that drive organizational growth and efficiency. I do this by leveraging my strategic planning, and project **management** expertise to exceed operational goals across diverse sectors, including Banking, Technology, and Manufacturing. My approach integrates applications with solutions such as virtual technologies, analytics, **cloud** solutions, and collaboration with cross-functional teams to deliver results.

Management & Computer Skills

Project Management & Leadership:

- IT Project Planning & Execution (**Microsoft**, Jira, Smartsheet)
- Team Leadership & Mentoring
- Vendor **Management**
- Budget **Management**
- ITSM (IT service **management**)

Infrastructure Management:

- Network **Architecture** & Administration (LAN, WAN, VPN)
- Server Administration (**Windows**, Virtualization, VMware, Hyper-V, VDI, Citrix)
- **Cloud** Computing (AWS, **Azure**)
- Datacenter & OSP Cabling (Indoor/Outdoor, Plenum CAT, Fabric Interconnect, Fiber, single-mode, multimode, and plastic optical fiber (POF))
- **Data** Center **Architecture** Design and Implementation (Power, Cooling Systems, Connectivity, Server Storage Racks, Monitoring applications)
- **Data** Center Operations & **Management** (Implementation, Optimization, Securing, Shrinking)
- Storage & **Backup** Solutions (HP, NetApp, **Data** Domain, XIO, Avamar, SAN, NAS, RAID)
- **Disaster** **Recovery** & Business Continuity (EMC Avamar, NetBackup, CommVault)

Cybersecurity:

- Vulnerability **Management** & Risk Assessment (Qualys)
- **Security** Information and Event **Management** SIEM (**Microsoft** Sentinel, **Splunk**, Rapid7, SolarWinds)
- Certificate-based authentication (CBA)

Professional Experience

CRU IT Solutions

Lead **Infrastructure Engineer** / Architect / PM

06/2024 - Present

- Leading a team of engineers involving designing, implementing, supporting new and existing **infrastructure** for external clients.
- Managing new and existing projects in implementation and upgrade of IT **Infrastructure**.
- Strategizing with clients on implementation of **Disaster Recovery** & Business Continuity solution to maintain operational functionality during and after disruptive events.
- Reducing cost and liability by refreshing **data** centers **Infrastructure**, installing new up to date hardware and shrink **data** center by deconditioning out of date equipment.
- Implementing, patching, upgrading, hardening and monitoring servers in Hyper-V clustered **Windows** environment SCOM.
- Designing **Azure cloud** solution.
- Deploying and supporting customer servers in **Azure** environments.
- Installing, configuring, upgrading and patching client's on-prem and off-prem Domain Controllers **Active Directory**, SQL, Web, and Remote Servers.

Wipro / Cisco

Infrastructure Manager

09/2020 – 12/2023

-
- Managed Projects and IT **Infrastructure** Team for Cisco, ensuring uninterrupted operations and low downtime.
- Coordinated a team of IT Engineers in maintaining the organization's server, storage, **security**, and procurement achieving an average uptime of 95%
- Implemented **Backup** and replication environment for file servers, databases, and other production critical systems on-prem and AWS.
- Worked with the **Development** and automation team to create automation for implementing, patching, and VMware server's environment that cut deployment, migration, and upgrade times by 50%.
- Researched and evaluated **security** audits on multiple **software** tools for Cisco gateways, transaction processing, AWS, and manufacturing systems.
- Utilized Capacity **Management**, for proper **Data** Centers balance.
- Planned, executed implementation, hardware refresh, and decommissioning of on-prem and off-prem **data** centers worldwide.
- Guided business owners and technology services teams to ensure the consistency of their components to the overall business capability, IT product **architecture**, and IT road maps.
- Recruited, hired, trained, and supervised staff, or participated in staffing decisions.
- Prepared and reviewed operational reports or project progress reports.
- Directed daily operations of the departments, analyzing workflow, establishing priorities, developing standards, and setting deadlines.
- Controlled operational budget and expenditures.

- Evaluated the organization's technology use, needs and recommended improvements, such as hardware, **software**, **security**, patching, and AWS **cloud** solution.

Infosys / Intel

Infrastructure Manager

03/2019 – 09/2020

- Was responsible for managing multiple projects, teams that worked on implementation, and support of on-prem and off-prem solutions.
- Provided thought leadership, and architectural expertise to a cross-functional team charged with deploying customer-related applications and **data** to the **cloud**.
- Utilized VMware and Hyper-V virtual environments, VDI **infrastructure**, on Cisco, Dell, and NetApp hardware, AWS / **Azure cloud**, SCOM, and implementing Citrix solution with Citrix receiver for virtual desktop applications.
- Implemented new **infrastructure** and managed hardware refresh projects.
- Configured and Supported new and existing **backup** and replication **infrastructure** for Servers, VMs and appliances on multi-tier segmented network.
- Implemented scripting requirements, to automate installation of virtual bulk servers.
- Interacted with line of business to improve procedures, strategic planning, and implementation of on-prem and off-prem **infrastructure**.
- Planned resources to properly manage and complete projects.
- Coordinated with vendors, clients, and service providers for problem resolution.
- Assisted the operations team with escalated issues and day-to-day operations.

NTT DATA Services / Dignity Health

Lead **Infrastructure** Architect / **Engineer**

04/2018 – 02/2019

- Lead members of team responsible for designing, implementation and update of hospitals vSphere (HA) environment.
- Designed deployment of VMware, VDI **Infrastructure** for **Windows**, on Dell VxRail hardware.
- Implemented Citrix to access applications and desktops.
- Continuously looked for a way to improve and streamline customers **Infrastructure**.
- Developed **infrastructure** procedural documentation for virtual environments.
- Mentored junior teammates on proper troubleshooting and Root Cause Analysis.

CSI

Lead VMware / **Windows** Server **Engineer**

11/2017 – 03/2018

- Deployed Physical Dell, Cisco Servers, on NetApp and Dell Storage.
- Designed, implemented, and maintained **Windows** Server on VMware ESXi and VDI solution.
- Installed several hotfixes and patches on **Windows** servers to eliminate vulnerabilities.
- Migrated VMs across hosts within a HA cluster to perform maintenance tasks on hosts.
- Used VMware vMotion to eliminate application downtime from planned server maintenance by migrating running virtual machines between hosts.
- Coordinated with vendors / Service providers for problem resolution.

- Responded to server-down alerts promptly.
- Actively demonstrated strong analytical, troubleshooting, and Interpersonal skills with a customer-focused approach.

TEK Systems / Verizon

Lead **Infrastructure** VMware / Storage **Engineer**

02/2017 – 07/2017

- Was responsible for ensuring a functional reliable VMware and NetApp storage **infrastructure** that includes maintaining the hardware and **software** at a stable level and meets the needs of the agency.
- Plan, execute, and report availability, performance, and capacity **management** of Wintel servers and services.
- Coordinated with vendor / Service provider for problem resolution.
- Ensured environments integrity and monitors real time performance and isolates operational bottlenecks by analyzing and diagnosing problems from monitors, dumps and other available information.
- Collaborated with external and internal customers to analyze information needs and functional requirements and deliver the artifacts as needed.
- Was Responsible for the assessment and optimization of hardware utilization through review and assessment of user needs.
- Implemented and supported **Backup, Recovery** and replication **infrastructure**.
- Attended weekly **management** meetings.

OS33 / External IT

Lead **Infrastructure** **Engineer**

05/2015 - 01/2017

- Designed, implemented, and maintained VMware vSphere and VDI **infrastructure**.
- Physical Solution Implementation, Rebuild and Support.
- **Windows** Server 2012 R2 and 2016 Implementation, configuration, administration.
- Installed several hotfixes and patches on **Windows** servers to eliminate vulnerabilities.
- Migrated VMs across hosts within a HA cluster to perform maintenance tasks on ESXi hosts.
- Used VMware vMotion to eliminate application downtime from planned server maintenance by migrating running virtual machines between hosts.
- Deployed several VMs from Templates and customized their configurations as needed.
- Coordinated with vendors / Service providers for problem resolution.
- Responded to server-down alerts promptly.
- **Active** demonstrated strong analytical, troubleshooting, and Interpersonal skills with a customer-focused approach.
- Implemented and improved new **Disaster Recovery** solution.
- SolarWinds, BigFix, SCOM

Hewlett-Packard / Bank of America

Infrastructure/Backup Team Lead

04/2010 – 04/2015

- Managed day-to-day operations on NetBackup, Avamar and Data Domains systems.
- Troubleshoot Data Domain, Avamar and NetBackup hardware and software issues.
- Troubleshoot with EMC Hardware.
- With Wintel, Unix/Linux Administrators configuring VM Servers for internal clients.
- Troubleshoot Windows Server in Physical and Virtual environments.
- Maintained client and vendor's relationship with Bank of America, EMC, Symantec, and Oracle.
- Worked implement new Primary and Replication Data Domains. Implement DD boost on OST Data Domains and VTL for Net Backup environment.
- Worked with EMC to implement new Primary and Replication Avamar grids.
- Installed and configured Avamar backup software on client servers.
- Developed, implemented, and enforced policies, and procedures.
- Communicated with customers, and multiple teams on day-to-day operations, coordination, and implementation of infrastructure.
- Maintained the organization's effectiveness and efficiency by defining, delivering, and supporting strategic plans.
- Recommended information technology strategies by evaluating organization outcomes.

Education

High School: 1991 - 1995

Wheeling High School, Wheeling, IL

- High School Diploma

Visual Basic Developer Program: 1998 - 1999

Computer Systems Institute, Skokie, IL

- Visual Basic Developer Program

Microsoft System Engineer Program: 1999 - 2000

Computer Systems Institute, Skokie, IL

- System Engineer Program (MCSE)

Master CCNA Security Program: 2015

Learn Smart Institute, Phoenix, AZ

- Security and Cisco Routers Course

Certification of Master CEH: 2015

Learn Smart Institute, Phoenix, AZ

- Enumeration Course

Data Domain Deduplication Backup and Recovery: 2015

EMC Learning Center, Phoenix, AZ
