

OBJECTIVE

A functional/technical professional—a proven adaptive problem solver, who is looking for a position utilizing his knowledge of accounting, finance, data management, stabilization, system conversion, maintenance and support incorporating a hands-on and team-oriented management style thinking “outside the box” in solving challenges yielding an increased efficiency.

BACKGROUND SUMMARY

- Audit and Compliance
- ERP Systems—SAP/JDE
- Documentation—CR, CD, FS, & TS
- Agile/Waterfall Methodologies
- SAP—FI/CO, AM, FM, PS, SAP PI, and S4/HANA
- UAT—User Acceptance Testing
- Maintenance Support—FI, CO, FM, etc.
- Data—Analysis/Design/Management/Integration
- ALM—Application Lifecycle Mngmt.

BUSINESS ANALYST/SAP R/3 FI/CO CONSULTANT

SUMMARY

- Over 19 years of IT experience in ERP software development life cycle: systems analysis, business analysis, design, development, testing and implementation of business projects, SAP R/3 and other financial systems in manufacturing, distribution, transportation, and consumer products.
- Over 9 years of strong experience in gathering business requirements and analysis including three SAP R/3 full life cycle implementations.
- Proficient in implementing, customizing, configuring, integrating, testing, end-user training and support in SAP R/3 Versions 4.0, 4.6C, 4.7 and SAP ECC—Enterprise Central Component 6.0 in FI/CO/AM/PS/MM.
- Strong experience in configuration and customization of financial accounting modules including design of CoA, GL, AR, AP, Automatic Payment program, Dunning, special GL transactions and inter-company transactions.
- Proficient in configuration and customization of controlling modules including Cost Elements, Internal Order, CCA, PCA, and PA.
- Conceptual Cross-functional knowledge across FI, CO, AM, FM, PS, SD, and MM modules of SAP.
- Requirements gathering—eliciting business requirements from client workshops, creating change design, functional specifications, creating/executing UAT—User Acceptance Testing plans, SIT—System Integration Testing plans, etc., and defect tracking utilizing ALM.

Business Analyst Skills

- Worked extensively on user requirement gathering based upon client workshops and user interviews.
- Developed functional specifications for IDoc Error Handling and Workflow; interfaces for JAD—Joint Application Development sessions.
- Strong experience in business process definition, risk analysis, gap analysis, use case analysis, baseline acceptance criteria and deliverables.
- Good experience in analyzing business data, process mapping, testing, documentation, and end-user testing with the help of MSVisio.
- Thorough knowledge in the review and documentation of system test plans—creating/executing test scripts, test cases and data sets based on product release features, client requirements and technical documents, development in business requirement and documentation.
- Ability to work collaboratively with business analysts, testers, developers and other team members in complex testing projects and in the overall enhancement of software product quality for financial environments.
- Conversion of the “specialized data” from the legacy systems utilizing SAP LSMW (Legacy System Migration Workbench), which is the equivalent of ETL—Extract, Transform, and Load, during the system UPGRADE.
- Analyzed master data—resolving data cleansing/integrity issues with team members and the client in accordance with MD Governance.
- Developed ARTIFACT documents supporting the compliancy of the Change Request Documents consisting of their Business Requirements, Processes, Solutions, and Design, confirming that the governmental Laws, Rules, and Procedures are being followed in accordance with US Governmental (FFMIA) guidelines to the Test Case and Step Level denoting the Transaction Code at the Test Step Level applying “Agile” methodology.

SAP FI-AM Configuration Skills

- FI Enterprise Structure: Chart of Accounts, Fiscal year, Posting Period, Company Code, Business Areas, and Functional Areas.
- General Ledger: Account groups, master records, field status groups, posting keys, automatic account determination, inter-company transactions, account display, number ranges, document types, tolerance groups.
- Accounts Payables: Vendor groups, vendor master data, house banks, bank accounts, check lots, reason codes, automatic payments, invoices, credit memos, AP information system, integration with MM.
- Accounts Receivables: Customer groups, customer master data, payment terms and interest calculation, incoming payments, AR information system, customer tolerance, customer credit management, closing operations.
- Asset Accounting: Configuration of Asset master data, Asset Classes, Chart of depreciation, depreciation areas, depreciation keys, internal calculation key, depreciation postings, depreciation calculation methods, etc.; developed reimbursable configuration and functional experience.
- Special Ledger: Activities, Field Movements, transferring data from other Modules, and defining Validations and Substitutions at the time of entry.
- Strong integration experience with SD and MM modules.

SAP CO Configuration Skills

- Cost Element Accounting: Creation of cost elements, overhead costing sheet, Reconciliation Ledger, Configured automatic posting for reconciliation ledger, Real & Statistical posting.
- Cost Center Accounting: Configuring and customizing the cost centers, standard hierarchy, cost centers, statistical key figures, Activity types, master data groups, assessments, distributions and reposting, allocation cycle and segment.
- Profit Center Accounting: Configuring the basic settings, maintaining profit center hierarchy, assignments, CO-Objects to Profit Centers, distribution and assessment of costs, development of Reports.
- Profitability Analysis: Configuring and Customizing Costing based CO-PA and Account based CO-PA including setting up of the operating concern, characteristics, value fields, maintaining the derivation rules using different derivation techniques.
- Internal Orders: Configuring and customizing internal orders, order types, screen layout, status management, order groups, substitution rules, commitments, overhead costing sheets, settlement profiles, planning, budget management and availability control.

Department of Defense—Independent Contractor

02/2017 to Present

- HCL Tech Consulting/HCL America, 2600 Great America Way, Santa Clara, CA 95054; Site: The Boeing Company
- Herdt Consulting, Inc., 261 Normandy Lane, Chelsea, AL 35043; Site: Washington NAVY Yard
- GP Consulting, LLC, 6337 Summerday Court, Burke, VA 22215; Site: Washington NAVY Yard
- Revolve Solutions LLC, 5616 Clermont Drive, Alexandria, VA 22310; Site: **OBT-MFCT**—Arlington/Pentagon City, VA;
- Main Sail LLC, 8279 Mayfield Road—Unit 12, Chesterland, OH 44026; Site: Mechanicsburg, PA
- TEKsystems, Inc./SAIC; 310 The Bridge Street Town Center, Huntsville, AL 35806; Site Huntsville, AL
- SMS Technologies, Inc.; 1751 Pinnacle Drive—Suite 1200, McLean, VA 22102-3881; Site: Picatinny, NJ
- JRJ Technologies, Inc.; 5107 Riverview Boulevard, Bradenton, FL 34209; Site: Mechanicsburg, PA

SAP Business Analyst/Senior Consultant

- Worked with the DoD—US Army—Office of **Business** Transformation—MFCT, the predecessor to **EBS-C**, validating the master data governance (MDG) & data elements affecting Tables—SKA1, SKAT, SKB1, BKPF, BSEG, MARA, FMFIIT, FMIOI, and FMUSFGA etc.; validating data usage/cleansing—eliminating duplicity, ensuring its integrity, providing a single data source to be utilized in the migration from ECC to S/4 HANA.
- Completed specialized **training** to ACTIVELY participate in “triaging” (**Maintenance Support**) **Functional** Client Ticket issues in FIN, FM, AM, and PS.
- Created User Acceptance Test Cases, monitored UAT with the client confirming the results, which were representative of client **business** processes.
- Utilized ALM during the system integrated testing process recording the defects.
- Utilized Atlassian/JIRA for **Project** tracking creating milestone and mapping dependencies.
- Reconciled the detail Budgetary Ledger (BL)—FM, and Proprietary Ledger—FI postings getting the ledgers in “synch” determined/resolved variances.
- Gathered **business** requirements from client workshops creating CRD, CDD, and Test Scripts tailoring them accordingly to client.

CSC Government Solutions LLC, a CSRA Company (formerly Computer Science Corporation), Falls Church, VA by Assignment: 03/2008 to 01/2017
Logistics Modernization Program US Army; Marlton, NJ

SAP Business Analyst/Senior Consultant/ERP Product Specialist/ERP Analyst Senior

- As a member of the Compliance Team, worked closely with the BAs to determine FFMIA compliancy of their Change Request Documents consisting of their **Business** Requirements, Processes, Solutions, and Design, auditing/confirming that the governmental Laws, Rules, and Procedures are being followed in accordance with US Governmental—Federal Financial Management Improvement Act (FFMIA), guidelines to the Test Case and Step Level “linking” the FFMIA to the event taking place in the Test Script at the Test Case/Step Level with a Transaction Code in ECC validating the Justification, which incorporates a Solution Description that correlates back to the FFMIA; While the LMP Program had utilized the “waterfall method” creating the Change Request (CR), Change Design (CD), Test Script (TS), documents, the Compliance Team had utilized an iterative approach—Agile, which enabled the Team Members to work closely with the BAs reacting quicker and more efficiently to the incremental changes in addressing the tasks to be completed in the delivery of the product—the justifications at the Test Step/Transaction level; actively participating in the **development** of **business** requirements and **documentation**.
- As a member **SAP** PI-Process Integration Team, worked closely with client and TCSC personnel via meetings—clarifying/documenting client’s **business** requirements relative to the PI Migration Teams’ integrated solution for the LMP **Project**; continuing to develop a strong relationship with the client becoming a “trusted-advisor” contributing to the success of this effort migrating 200+ interfaces.
 - Analyzed the requirements/components of a specific interface (INF00113) developing a solution in a collaborative team effort with technical and **functional** team members yielding savings—a 45% reduction in process time/reduction of the file size by more than 50%.
- As a member of the EDW-AMC/RSA—Redstone Arsenal, Site Support Team, consistently demonstrated the ability to acquire new **knowledge** quickly and efficiently transferring **functional knowledge** to the Client and to his fellow CSC team members, which has had a significant impact—adding value, to this client **engagement** in delivering an integrated uniform solution.
 - Developed strong relationships and communications with RSA designees collaborating with TCSC-Marlton, etc. affecting the success of the **EDW/Business** Analytics objectives—analyzing, testing, and validating the query design of the standard reports;
 - Collaborated and developed new reports with the client, which were widely accepted by AMC Command.
 - Modified/re-designed existing reports on behalf of the Client and creation of Change Requests (CRs).
 - Upon Client review/acknowledgement, the CR is submitted via the MS Triage process consistent with the “life cycle” processes.
 - Worked closely with EDW team members, the Client, and other **functional** teams including **Solutions Development** and **Modernized Sustainment (MS)**—aka **Maintenance Support**, to accomplish specific tasks and activities.
- As a **SAP** FI/CO/FM Consultant worked on the Client SUPPORT Team at WVA—Watervliet Arsenal, during Go-Live; researching the issues presented by the Client’s Command Center; working alongside the Client Staff actively participating/guiding them in resolving their “tickets” either internally or escalating them to Modernized Sustainment (Maintenance Support) in Marlton when appropriate.
 - Worked Client site support resolving issues with the FI/CO/FM Modules and corresponding integration touch points.
 - Actively participated in TRIAGE—**Functional** Ticket issue review calls for both FIN and MNT (PS), leveraging TCSC resources to the Client’s maximum advantage, collaborating with other sites on similar issues utilizing the moment as a forum.
 - Resolved PS-**Project** System, issues and expanded **knowledge** of PS and developed client **documentation** for PS Application.

- Collaborated with MM—Materials Management, team members resolving client issues while expanding **knowledge** of MM;
- Worked on the UPGRADE and DATA CONVERSION teams creating change design documents, **functional** specifications, technical specifications, and developing a solution for the data conversion of the “specialized data” from the legacy systems utilizing **SAP** LSMW (Legacy System Migration Workbench), which is the equivalent of ETL—Extract, Transform, and Load.
 - Mapped data elements for Accounts Receivable, Accounts Payable, General Ledger, Cost Centers, Internal Orders, etc. from the Legacy systems into the high specialized LMP system utilizing both **SAP** Tables and highly Customized Z-Tables, which were used/designed specifically for compliancy with DoD/US Government and FFMIA—Federal Financial Management Improvement Act of 1996, regulations, and requirements; updating Solution Manager as required with appropriate **documentation**.
- Transitioned to DM—Data Migration, working closely with programmers in developing programs for **Deployment 3 conversions**.
 - Resolved DM issues associated with FM—Funds Management, updating tables with current client information consistent with the client CCD—Change Design Documents and **business** requirements, increasing **knowledge** base of Funds Management.
- In conformance with MD Governance, analyzed master data-resolving **data cleansing/integrity** issues with team members and the client.
- Designed/created the expansion of specific BTA Data Elements of Ledger 95 making LMP SFIS—Standard Financial Information Structure, compliant with DoD and USSGL and subsequently auditing the results.
- Designed a significant portion of the Local Vendor Pay solution; passing the CDD—Change Design Document, transferring his **knowledge** to his fellow team members to complete enabling him to transition to the Data Migration Conversion Team.
 - Designed/created a series of “linked” MS Visio documents depicting the complex Local Vendor Pay **business** process flows;
- Worked closely with the ABAP programmers in developing solutions for DATA CONVERSION.
- Worked with **SAP** Asset Management/Reimbursable Team developing configuration/**functional** skills.

Computer Science Corporation, New York, NY by Client Assignment: Federal Mogul Corporation, Southfield, MI

SAP Business Analyst—FI/CO Consultant

03/2007 – 02/2008

- Gathered additional client **business** requirements from the various workshops incorporating them into the BLUEPRINT **documentation** in Solution Manager; creating the **functional** specifications based upon client **business** requirements.

Jefferson Wells International, New York, NY

06/2006-02/2007

Business Professional—Project Consultant

- Developed **functional** specifications for IDoc Error Handling, Workflow, and interfaces for JAD—Joint Application **Development**, sessions.

Answerthink, Inc., Miami, FL

07/2005-05/2006

SAP Applications Consultant-Manager

- Delivered configuration solutions of the FI/CO/AM modules of **SAP** supporting **analysis**, design, **development**, testing, in the deployment of solutions and post-production support/maintenance functions as well as **documentation** via —BPP's (**Business** Processes Procedures), MSVisio's—Flow Charts, end-user **training**; streamlining the process increasing overall productivity/ increasing efficiencies of R/3 system.
- After the requirements gathering via workshops, interviews/meetings; assisted in the design FI/CO/FM configuration solution for **GFEBS—General Fund Enterprise Business System**, DFAS—Indianapolis, IN.

J. C. Hendricksen & Associates, Inc. Kingston, New York

05/2004-06/2005

Financial/Cost/ Systems Analyst—Contract Consultant

Consulting to a variety of businesses in the construction, food, retail, distribution, publishing, manufacturing, and service industries in the areas of accounting, computers, and finance.

- Designed/implemented cost accounting systems based upon client requirements conferring with client's personnel—CFO, VP of Manufacturing, Engineering, and Logistics, and utilizing Engineering Component Masters—ECM's, in creating BOM models.
- Trained client personnel on the mechanics of the new systems; documenting and developing an in-house **training** program.

Atlas Air, Inc., Purchase, New York

10/2001-04/2004

Senior ERP/Financial Systems Analyst

- Collaborated with Process Excellence Team consisting of various management members and the Director of ERP Systems, in the **development** of qualitative/quantitative procedures to stabilize the **SAP** R/3 system.
- Interacted with the end-user community providing a high level of customer service to **business** units and groups in gathering requirements for either enhancements or identification of problems in the production environment.
- Developed requirements from the user community for **SAP** User Exits/solutions collaborating with the BASIS—technical team, the timely delivery of a system solution configuration of the **business** process resulting from a either a **project** or enhancement request—coordinating the **SAP** Transport with the BASIS staff from the DEV environment, into the TST environment—testing the result and enabling the users to confirm the desired result, transporting the request into the Production environment.
- Analyzed/corrected production problems as they occurred in **SAP**; confirming with colleagues, management, and **business** unit(s) the issues; communicating the status of the production problems/disposition of the issues via Production Issues Log.
- Ensure consistency of **SAP** configuration across all **business** units/maintained integrity of the system through all environments.
- Liaison with the **SAP**—BASIS technical staff in the application of OSS notes, and any required upgrades.
- Worked with Accounting/Financial management resolving issues with **SAP** master data and transactional data, including General Ledger, Chart of Accounts, Accounts Receivable, and Accounts Payable, as well as interfaces to other modules.
- Working closely with the end-user security authorization administrator during **development**/implementation of end-user security objects by area of responsibility.

- Developed/created/designed/translated **Functional**/Technical Specifications for a variety of programs, reports, data extracts, and data conversions guiding the **SAP** ABAP Developers, enhancing the functionality of the **SAP** R/3 system meeting the user's specific needs.
- Worked/coordinated/managed ASSET IMPAIRMENT effort reducing the asset basis in accordance with FASB 144--Accounting for the Impairment or Disposal of Long-Lived Assets in the **SAP** R/3 System per management request prior to transition to JDE--data conversion.

SAP America, Inc. Parsippany, New Jersey

06/1998 -- 09/2001

Applications Consultant

Specializing in the implementation and support of the FI/CO Modules with an extensive background, working with all facets of Accounting and Accounting Information Systems including client requirements and reports **analysis**, design, **development**, implementation, **documentation**, **training** and support.

- Worked with **Project** team in identifying key requirements--conducting client workshops, mapping fundamental requirements to core R/3 transactions, and customizing ASAP Blueprint Questionnaires in preparation for the client workshops during Phase 2.
- Defined the coding strip, gathered the master data, developed a Client Chart of Accounts and Cost Center Hierarchical structure, and assisted in customization to meet the input, processing and reporting requirements.
- Configured Controlling (CO) to include Cost Center Accounting, Assessments/Distributions, Statistical Key figures, and Internal Orders, which were settled to profit centers and cost centers.
- Configured Profit Center Accounting while working closely with users and technical consultants in developing the Sales & Distribution billing procedures.
- Configured/reviewed the Account Determination/Automatic Postings for various modules--AM, SD, MM, etc., interfacing with FI--AP and AR enabling postings to specific General Ledger accounts.
- Coordinated/directed consulting efforts for all client reporting requirements; designed/created/enhanced system **documentation**--BPP's.
- Liaison between FI-CO and working with the AM, SD, MM, PM, and PS Team Leads creating MSVisio's--flowcharts (97), depicting the integrated processes from an overall perspective by module denoting the client specific processes.

EDUCATION

M.B.A., Finance - Iona University, New Rochelle, NY

B.S., Accounting - Fordham University, Bronx, NY

COMPUTER SKILLS

SAP ECC 6.0, **SAP** PI (Process Integration), Certified in ASAP Methodology--Solution Manager (SolMan), MS Office Suite--MS Excel, MS Access, MSWord, MS Visio, HP Performance/Quality Center, ALM--Application Lifecycle Management, MS SharePoint, User Acceptance Tools, Atlassian/JIRA, Waterfall, and Agile Methodologies, S/4 HANA, OSS Notes
