

Chidera Onwuzurike

Atlanta, GA | 4702650429 | Onwuzurikechidera@gmail.com | [LinkedIn Profile URL](#)

Cybersecurity Analyst

Results-driven Cybersecurity professional with 5 years of comprehensive experience in AI, Risk Management, and Security Operations. Adept at implementing advanced threat detection, response, and vulnerability management solutions to protect critical assets. Recognized for strong leadership, dependability, and team-building capabilities. Proven track record in network security, cloud security, GRC, digital forensics, and incident response with a focus on emerging technologies and continuous improvement. Skilled in refining detection rules, enhancing security efficiency, and aligning controls with compliance standards. With deep technical knowledge of cloud platforms, SIEM solutions, vulnerability scanners, and forensic tools. A strong collaborator, able work across IT, compliance, and executive teams to protect digital assets, sustain business continuity, and continuously refine security programs for maximum resilience.

EDUCATION

BSc, Economics
Cybersecurity

University of Lagos, 2017
SANS Institute, 2026

TRAININGS AND CERTIFICATIONS

- CompTIA Security+
- (ISC)² Certified in Cybersecurity (ISC² CC)
- Google Cybersecurity Professional Certification
- OneTrust GRC Professional
- Securi AI Security & Governance
- PMI Certified Associate in Project Management
- Professional Scrum Product Owner
- Professional Scrum Master
- In Progress: Certified Information Systems Security Professional (CISSP)

PROFESSIONAL EXPERIENCE

Avanade Inc, (Remote)

Senior SOC Analyst

June 2021 – Present

- Directed incident response activities shortening response time by 40% and conducted digital forensic investigations to identify causes and prevent future occurrences.
- Developed and refined SIEM systems (Splunk) to detect and process more than 2 million security occurrences every month, enhancing identification of abnormal behavior by 35%.
- Implemented cloud security strategies for AWS and Azure environments with a design that minimized vulnerabilities by 25% by maintaining ongoing monitoring capabilities with automated alert systems.
- Conducted security assessments and maturity reviews of multiple business unit IT environments against various industry standards and regulations, including CIS, ISO 27001/2, and NIST 800-53.
- Employed tools such as VirusTotal, AbuseIPDB, AnyRun, Malware Analytics, Cisco Talos Intelligence, and several others to analyze IP reputations and malicious URLs

TemDaniels Consulting, Texas

SOC Analyst

May 2019 – June 2021

- Monitored and managed security alerts through SIEM solutions by filtering and ranking threats, maintaining a 99.8% security operation uptime.
- Performed periodic penetration testing and vulnerability scans resulting in the identification and resolution of security vulnerabilities.
- Collaborated with both internal IT staff and outside vendors to institute strong network security protocols, which brought about a 30% decrease in unauthorized access violations.
- Conducted forensic evaluations after security incidents in order to present detailed reports and actionable information for enhancing defenses.
- Trained junior analysts in best practices, use of tools, and incident response procedures, encouraging a culture of continuous improvement and knowledge transfer.
- Employed Endpoint Detection and Response solutions (CrowdStrike Falcon) to identify, monitor, respond to and limit the impact of cybersecurity threats.
- Conducted security controls assessment based on NIST SP 800-53 for a simulated enterprise environment.
- Mapped existing security controls to NIST 800-53 control families and identified gaps.
- Developed and implemented additional controls to address gaps and improve overall security posture. Conducted continuous monitoring to ensure ongoing compliance.

Simi Group, Lagos

IT Help Desk

May 2017 – May 2019

- Assisted 50+ end users daily with technical issues across hardware, software, and networks.
- Reduced the average ticket resolution time from 45 minutes to 30 minutes, improving team efficiency.
- Managed support tickets and escalated unresolved issues to senior teams
- Resolved 95% of help desk tickets within first response time.
- Conducted vulnerability scans on 100+ systems, identifying and mitigating 90% of high-risk threats.
- Improved security awareness training compliance from 70% to 95% across the organization.
- Documented and resolved service tickets while ensuring timely responses.
- Reduced security incidents by 30% through proactive threat detection and mitigation strategies.
