Full Stack **Web** Application **Developer** with expert level background in PHP and a reputation for effective, collaborative, efficient problem solving.

Experience

MaverickLabel.com

Full Stack **Web Developer** 2015 - 2024
2004 - 2007

At Maverick, I was an integral part of a small cohesive team tackling fullstack projects. We implemented user facing features (MERN stack over PHP/MySQL backend) and internal admin tooling (classic LAMP stack), with shared business logic implementation and **data** stores, all while working to improve the maintainability and performance of an aging codebase. Notable accomplishments include:

- Led a yearslong project to incrementally refactor legacy backend PHP monolith into organized classes to improve codebase stability, reducing bugs and time to fix
- Spearheaded several version rolls for PHP, including v5.2 → v5.6, which required rewriting inline SQL connectors to use PDO
- Closed a significant security hole by migrating hundreds of uses of inline SQL to prepared statements and parameterized queries
- Identified limitations to our existing MySQL version that were negatively affecting our **data** integrity and led a project to upgrade to a version that improved performance, gave us transactional capabilities at the DB level and solved issues we had been having related to character sets.
- Migrated servers from self hosted to AWS
- Collaborated closely with technical and non-technical **leadership** to create clarity around feature needs and limitations, and advised on feasibility, cost, and potential ROI for **engineering** projects
- In-house subject matter expert and team **lead** for SysAdmin/DevOps tasks, including incident management and resolution, server management
- Designed and created **data**-driven templates to generate 30+ different customer-facing product marketing **web** pages, enabling management to bypass the development process for updates to these
- Owned report creation, creating clear and accurate presentations of complex **data**, providing invaluable business insights across the company
- Integrated UPS Worldship software with internal **data**, enabling **automated** shipping label creation, saving time and decreasing errors in the shipping process

- Built an internal system to generate dynamic PDF documents automatically or on-demand as needed to support sales, manufacturing, QA, and shipping processes
- Collaborated with sales to digitize their end-to-end process from an entirely paper-based system to a clear order visibility dashboard, facilitating a 4x increase in the team's order throughput, while also reducing errors

AT&T, Bothell WA

2007 to 2015

- Led a team in designing, creating, and maintaining a **web**-based application for tracking and archiving **data** from retiring corporate applications. This enabled better compliance with records retention laws and policies and greatly reduced COGS for **data** storage
- Developed a much-needed user-friendly **web**-based UI to layer over NetApp ONTAP, allowing for easier and faster management of volume snapshots on network filesystems. Involved complex integration between in-house SSO and NetApp's permission system.
- Integrated a variety of applications with internal systems and database engines, including Oracle, MS SQL, Sybase, Postgres, DB2 and more.

Skills

- Programming Languages: PHP, JavaScript, Perl, Python, SQL, HTML, CSS
- Technologies: **Apache**, AWS, React, NodeJS, Laravel, VueJS, Tailwind
- Databases: MySQL, Oracle, MS SQL, MariaDB, Postgres, DB2, Couch, MongoDB
- Tools: Git, **Jira**, Subversion, **Docker**

- **css** - 15 years
- **subversion** - 10 years
- **windows server** - 11 years
- **oracle** - 7 years
- **sql server** - 7 years
- **perl** - 4 years
- **sybase** - 6 years

Work Preferences

- Desired Work Settings: Remote or Hybrid
- Likely to Switch: True
- Willing to Relocate: False
- Travel Preference: 0%
- Work Authorization:
 - US
- Work Documents:
 - US Citizen
- Security Clearance: True

- Desired Hourly Rate: 65+ (USD)
- Desired Salary: 150,000+ (USD)
- Third Party: False
- Employment Type:
 - Full-time
 - Contract - W2
 - Contract to Hire - W2
