

Name JATHIN P

Email jatinvarma208@gmail.com

Ph: 216-333-9575

PROFESSIONAL SUMMARY:

- Having 9+ of experience in IT Industry includes 5+ years in **Guidewire PolicyCenter** Configuration and ClaimCenter Configuration.
- Good knowledge of the Policy Administration & Claim Registration in Property & Casualty **insurance** domain and experience in multiple Lines of Business configurations.
- Attending PI planning, Sprint Planning , Features Refinement sessions, Daily Scrum, Sprint Reviews.
- Understanding, analyzing the requirements and configuring them in **PolicyCenter** according to client requirements.
- Coding & Unit testing of assigned user stories & defects, which involves PC configuration in PCF files, Rules, Product Model, Data model extensions, Admin data files import/export, Gosu classes/enhancements and aware of PC integration mechanisms like GX models, Message plugins & Webservices
- **Guidewire** Cloud includes the hosting of applications in two Amazon Web Services (AWS) Availability Zones that are in a single geographic Region.
- Hosting the applications in multiple Regions is available at a higher subscription fee.
- Part of Datamodel & Code reviews to ensure GW best practices followed.
- Supporting QA team by analyzing & fixing the defects timely to avoid testing blockers.
- Excellent communication and inter-personal skills, accustomed to working in both large and small team environments.
- A quick learner to new concepts, products/tools and implement them in the project successfully.

TECHNICAL SKILLS:

Software / Tools	Guidewire PolicyCenter v10 & V8, Ant 1.8.3, Weblogic application server, JBoss application server, SVN, GIT, Rally, HP Quality Center, Toad, Altova xmlspy.
Languages	Java, PL/SQL, Gosu.
Database	Oracle

PROFESSIONAL EXPERIENCE:

Client: Kemper **Insurance**

Oct, 2019-Present

Role: GW Senior **Developer**

Project description:

Kemper **Insurance** focuses on technology transformation (“K2 Program”) to enable their future business strategy. The K2 Program comprises of a Core **Insurance** Software Solution platform using **Guidewire** Policy Center, **Guidewire** Billing Center (“GW PC/BC”), AgencyPort Portal

and Connect5 (“AgencyPortal”). The K2 program was successfully implemented for 4 pilot states and later expanded to other states across US in a phased state rollout approach.

Responsibilities:

- Experience in working on Product Designer for creating and modifying coverage and its terms, availability and also System tables.
- **Guidewire** provides a service commitment for the availability of Guidewire Cloud applications.
- Experience in building new screens by creating Datamodel extensions and configuring PCFs.
- Experience in creating and modifying Form Patterns and its configuration. Implemented Custom Form Inferences, and Forms Re-inference.
- Analyze, Gather and Define requirements for **Guidewire** Claim Center implementation.
- **Guidewire** claim center configuration with hands-on all three layers of Claim center, namely Data Model, User Interface, and Business logic.
- Experience in **Guidewire** claim center Integration with a hands-on variety of industry-standard technologies like files, database tables, Web services, and Messaging queues to share the information with external systems.
- Created new Enhancements and implemented business validation rules
- Implemented UW issues and Activities.
- Possess very good knowledge in Design Patterns.
- Expertise in deploying, and configuring applications onto application servers like WebSphere, WebLogic, and web servers and Cloud Migration.
- Experience in **Guidewire** Cloud and Cloud Migration.
- Integration experience with Claim Center, Policy Center, Contact Manager and Billing Center.
- Supported to import and export of Admin Data for various environments.
- Initiated new GX models and provided the necessary x-paths to the downstream systems to consume the data for various integrations.
- Good Functional knowledge in Policy Center Configuration like creating Policies, Quoting, doing all transactions on policies, validating Rating, Forms etc, for Small Commercial lines of business.
- Experience in debugging the local development by running the server in debug mode.
- Experience in debugging the defects on development & test environments by pulling and analyzing pc gw logs from server and connecting and querying Databases using TOAD.
- Implemented DB triggers during UAT testing for modifying columns without DB drop.
- Analyzed some performance issues while UAT testing using GW Webprofilers.
- Knowledge in invoking webservices through SOAP UI during development and unit testing or defects fixing for dependent integration functionalities.
- Involved in analyzing the requirements & creating spikes & user stories by participating in business discussions with BAs and Story Pointing user stories.
- Providing technical solutions and designs for new functional requirements using Spike analysis.
- Attending design forums, data model & code reviews for approvals.
- Coordinating with other teams that are integrated with **PolicyCenter** for development unit testing dependencies.
- Coordination with Offshore team, Client team and other vendor partner teams for delivery.
- Attending daily scrum call with team and highlighting risks & dependencies on time.

Environment: **Guidewire** **PolicyCenter** 10.0.1, ClaimCenter 10, Java 1.11, Ant 1.8.3, JBoss application server, Oracle DB, Cloud, GIT, Rally, Toad, Altova xmlspy etc.

Client: Erie Insurance
Role: GW Developer

June, 2017-Sep 2019

Project description:

Erie Insurance is an American multi-line insurance company, offering auto, home, commercial and life insurance through a network of independent insurance agents. Erie Insurance Group is ranked among the 500 largest U.S. companies, in terms of revenue, by Fortune magazine. Its geographic presence extends to 12 U.S. states and the District of Columbia, including Illinois, Indiana, Kentucky, Maryland, New York, North Carolina, Ohio, Pennsylvania, Tennessee, Virginia, West Virginia and Wisconsin. Erie use Guidewire Claim Center for their claims management. Scope of this project include assist Erie with Maintenance. This insurance claims management system also manages claims information and coordinates the claims process to ensure compliance with corporate policies and claims best practices.

Responsibilities:

- Involved in core development activities include walkthrough/discussion, requirement analysis, effort estimations.
- Worked on GOSU coding, creating new rules, PCFs, extensions, enhancements etc.
- Experience on extending and adding new entities & typelists.
- Configuring Claim Center UI (PCF) according to client's requirement.
- Worked and having good exposure on various modules like Notes, Negotiation, Subrogation and Activities & Activity Patterns
- Worked on activities & history events
- Implemented Guidewire Cloud and Cloud Migration.
- Implemented complex business rules and Validation rules.
- Extensively involved in LOB mapping configuration for regulatory enhancements
- Involved in defect fixing and unit testing of application testing various test cycles.
- Being followed Agile methodology I participated daily scrum meetings to ensure the daily timelines and timelines of sprints.
- Effectively communicated with clients and BA's directly for getting proper requirements and analyzing them functionally and technically.
- Coordinating with project members for solving critical issues within the team.

Environment: Guidewire Claim Center 8.0.7, Java, cloud GOSU, XML Spy, SOAP UI, GIT, GX Model, ServiceNow and Trello

Client: Cybage Software Private Limited Hyd India
Role: Data Engineer

Jan, 2013- May, 2017

Responsibilities:

- Documented the system requirements to meet end-state requirements and complied Software Requirement Specification Document and Use Case document.
- Prepared ETL (Extract, Transform and Load) standards, naming conventions and wrote ETL flow documentation.

- Used Microsoft SharePoint to upload, manage all project related documents and have version control.
- Segregated business requirements by analyzing them into low level and high level. Converted Business Requirements into Functional Requirements Document.
- Prepared Dashboards using calculations, parameters in Tableau and generated KPI reports to be analysed by management.
- Worked on SQL queries for data manipulation.
- Arranged weekly team meetings to assign testing tasks and acquisition of status reports from individual team members.
- Effectively managed change by deploying change management techniques such as Change Assessment, Impact Analysis and Root Cause Analysis.
- Used advanced Excel functions to generate spreadsheets and pivot tables.
- Presented solutions in written reports while analyzing, designing, testing and monitoring systems in a waterfall methodology.

TRAININGS AND CERTIFICATIONS:

- Trained on **Guidewire PolicyCenter 8.0.x**, **PolicyCenter 10.0.x**
