## Education

|                                        |                                                                |      |
|----------------------------------------|----------------------------------------------------------------|------|
| San Jose State University, CA          | Bachelors of Science Civil Engineering                         | 2011 |
| Community College Of Rhode Island, RI, | (Certificate Computer Programming & Networking                 | 2013 |
| AWS - Solutions Architect certificate, | SAA-C03- K3V51ER2ZJE1QRWV                                      | 2022 |
| UDEMY – Linux                          | administration beginner to advance (Certificate Pass 9/3/2022) | 2022 |
| UDEMY - full stack python              | developer                                                      | 2023 |
| AWS - DevOps Engineer certificate,     | online (DOP-C01 - target date November 2024)                   | 2024 |

## Technology

|                    |                                                                                                                                                           |
|--------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|
| Operating Systems: | All Windows/Server/Mac OS/Linux                                                                                                                           |
| Software/Programs: | Batchfile, Power shell, SQL, Oracle, Python, SQL, Terraform, AWS, Gitlab, AzureDevops, Ansible, Puppet, Jenkins, docker, kubernetes, prometheus, grafana. |

## Professional Experience

Umasschan medical school, Worcester, MA

Cloud Engineer

December

2022 - Present

- Setup and deploy new cloud infrastructure daily.
- Work primarily in AWS as a solutions architect.
- Maintain and support existing infrastructure in aws.
- Built infrastructure around machine learning and AI technology using sage maker, amazon Q and various other products provided by aws

Nelnet, Warwick, RI

March 2016 –

Dec2022

QA

July 2021 –

Dec 2022

Production Support

March 2016

– June 2021

- Assisted with setting up azure DevOps and octopus deploy for dev team.
- Created powershell / batchfile jobs to move and automate SFTP/File moving
- Used DataDog to get better monitoring and insight into the various applications and their underlying infrastructure.
- automate various database adhoc / queries through SQL/ORACLE
- Troubleshoot apache web servers, Java virtual machines and windows server issues.
- Assisted with patching through avanti
- Performed load, stress, stability, and reliability testing to improve software functionality and usability
- Ran test automation using Postman, jenkins and testproject to monitor, identify, and evaluated software development performance
- Followed SDLC best practices and agreement with business scope documents.
- Regularly updated GITHUB, azure devops, Nelnet sharepoint to preserve code, enact quality changes and document overall test strategy for every program.
- Ensure stability of each environment SIT, QA, UAT by testing each implemented functionality to each environment before progressing.

Goji, Boston, MA:

June 2015 – March 2016

Systems Administrator

- Setup, Deploy and manage Kaspersky security center for all corporate computers 400+ users
- Worked with network engineering to configure xen server and cisco asa firewall.
- Cleaned up previous companies GPO's and managed new GPO's, Created users profiles and managed them

MEEI Harvard, Boston, MA:

April 2015 – June

2015

## **Systems Analyst**

- Communicate with Doctors, Nurses, and Managers face to face to determine the best workflow for the facility.
- Create Gap analyst of the department by analyzing actual performance vs. desired performance
- Work with EPIC radiology and ambulatory deployment (print jobs, groups, users, network printer setup)
- Coordinate with different departments to implement the epic rollout (Partners Healthcare, Help Desk, IT)
- Tour facilities to determine the best hardware equipment deployment (where WAP should go, label printer be placed in accordance to HIPPA and staff work flow etc..)
