WWW: <https://www.linkedin.com/in/joerangitsch>

Dynamic **Cyber Security** Professional with a proven track record in fortifying digital infrastructures for global organizations. Spearheaded the development of cutting-edge cybersecurity forensics procedures and frameworks, ensuring **compliance** with ISO, CIS, and NIST standards. Extensive experience with PCI-DSS, GDPR, HIPPA, CCPA, SOC2, OWASP. Key strategist in designing robust cloud migration programs for Azure and AWS, enhancing **security** posture and operational efficiency. Partnered with executive leadership to craft governance, **risk**, and **compliance** strategies, while integrating advanced AI-driven solutions for threat hunting and mitigation. Adept at mentoring cross-functional teams and advising C-level executives on **cyber** resilience and **data** governance. Recognized for safeguarding assets worth billions and mitigating risks with proactive incident response strategies. Committed to driving innovation and excellence in cybersecurity. Experienced script writer in Python, BASH, PowerShell and other scripting languages.

SKILLS

- Cybersecurity Incident Response Expertise
- Cloud Migration Strategy Development
- **Compliance** Governance Implementation Proficiency
- **Risk** Mitigation Framework Creation
- Digital Forensics and Investigation
- **Infrastructure** as Code Mastery
- Executive-Level Mentorship Capabilities
- **Cyber** Threat Hunting Leadership
- Cloud **Security** Maturity Assessment
- Agile Process Optimization Skills

EXPERIENCE

Principal **Cyber Security** Consultant / TRUIST - Atlanta, GA, United States

06/2023 - Current

- Directed cybersecurity **planning**, incident response, and digital forensics for a \$375B **financial** institution, mitigating 85% of critical vulnerabilities within 30 days.
- Designed three **security** framework templates, ensuring 90% **compliance** with ISO, CIS, and NIST standards, and improving cloud application **security** for over 50 **business** units.
- Advised and mentored four C-level executives, enhancing cybersecurity **risk** posture and achieving a 75% reduction in **data** governance gaps across key operations.
- Discovered a **security** gap in the use of Guard Duty during 2 assessments. Mitigated the gap by coordinating and implementing the activation and **configuration** of Guard Duty as required.
- Discovered 2 **security** gaps in AMI (AWS Machine Image) consistency. Collaborated and implemented a set “Golden” AMIs for all application start points.
- Implemented AWS Config, **Security** Hub, Guard Duty, **Security** Hub, Inspector, WAF and Shield (along with other required AWS Services), integrating with Splunk for traceability, incident response and investigation. Wrote multiple scripts for Splunk queries.
- Implemented Azure Defender as part of an integration of workloads between AWS and Azure for 3 **Business** Units.
- Prevented \$65M in potential **financial** losses by executing threat hunting activities, detecting and remediating 92% of incidents within SLA timelines.
- Participated in and contributed to an internal and external SOC2 **audit**, primarily in the Incident Response and Forensic Investigation streams

Sr. **Cyber Security** Technology Consultant / Ernst & Young - Atlanta, GA, United States

07/2022 - 06/2023

- Designed six comprehensive **security** frameworks to safeguard cloud applications from development to **production**, enhancing **security compliance** by 70%.
- Implemented AWS Config, **Security** Hub, Guard Duty, **Security** Hub, Inspector, WAF and Shield (along with other required AWS Services), integrating with Splunk for traceability, incident response and investigation. Wrote multiple scripts for Splunk queries.

- Identified gaps in IAM **security** during assessment, mitigated by implementing RBAC (Role Based **Access** Control) via integration between AWS IAM and Active Directory.
- Discovered a **security** gap in the use of Web Application Firewall (WAF) during a maturity assessment. Mitigated the gap by coordinating the **configuration** issues.
- Discovered gaps in AMI (AWS Machine Image) consistency. Collaborated and implemented a set “Golden” AMIs for all application start points.
- Ensured alignment with ISO, CIS, NIST, and other international standards, driving **regulatory compliance** by 85%.
- Conducted cloud maturity assessments and developed a cloud migration program for Azure and AWS platforms, securing two **financial** institutions valued at \$975MM.
- Authored a cloud migration runbook for Azure platforms, incorporating 2023 **Microsoft** Cloud Benchmarks for streamlined adoption.

Cloud **Security Engineer / Architect** / Global Payments - Atlanta, GA, United States

05/2020 - 07/2022

- Built and deployed **security** framework templates for AWS cloud applications, safeguarding the development lifecycle for a \$25B **financial** institution.
- Ensured **compliance** with ISO, CIS, and NIST standards across \$15M in cloud **security** projects, reducing risks by 70%.
- Delivered technical briefings on **security** frameworks to eight C-level executives, enhancing leadership understanding of cybersecurity strategies.
- Authored and trained teams on an Incident Response Run Book, supporting a 36-member Global **Security** Operations Center (GSOC) for improved threat response efficiency.
- Designed AWS cloud **infrastructure** (**Infrastructure** As Code (IAC) using Terraform across multiple applications (approximately 15), enhancing configurability of applications, streamlining deployment for high availability and **security**.

IT Director / Fiserv - Atlanta, GA, United States

02/2018 - 05/2020

- Directed 8 global teams (32 team members) to successfully deploy 24 payment applications, ensuring 99.9% availability for millions of users.
- Streamlined workflows by implementing process enhancements, achieving a 20% reduction in rework globally utilizing a combination of ServiceNow, GitHub, JIRA, Jenkins, using DevSecOps **best practices**.
- Advanced payment processing application efficiency by refining "Scrum-like" **practices**, enabling 24/7/365 operational reliability.
- Spearheaded a CI/CD modernization initiative, implementing the initial delivery of secure, hybrid cloud-based solutions based upon the AWS platform and an on-premise datacenter.
- Implemented AWS EC2 instances, utilizing AWS Config, **Security** Hub, Guard Duty, **Security** Hub, Inspector, WAF and Shield (along with other required AWS Services), integrating with an Oracle Database.

Release Boss / Development Operations Architect - General Electric Digital / Atlanta, Ga

01/2017- 02.2018

- Coordinated between 6 teams (onshore and offshore) to ensure smooth, efficient releases of 12 different applications using the Salesforce CRM Platform and associated applications (weekly, monthly releases; periodic Platform refreshes).
- Conducted process improvement initiatives utilizing MS TeamWork.
- Utilized “Scrum like” processes to enforce a steady, high-quality set of releases to the Sales Force Platform in support of thousands of users on a 24 X 7 basis.
- Increased disciplined coding and testing methods within multiple teams by enforcing Static and Dynamic code testing using SonarQube and Fortify.
- Initiated and shepherded a **DevOps** based Continuous Integration/ Continuous Deployment CI/CD) program utilizing GitHub, JIRA, Jenkins with integration to Salesforce with an emphasis on incorporating **security** at the very beginning of a project..
- Initiated a Technical Debt reduction plan to correct technical debt from past **practices** by conducting assessments of 18 Applications for currency, anticipated lifespan (end of like / usability) and **security** risks.

Configuration / **Release Boss** - Weather Channel / Atlanta, Ga

1/2015- 01/2017

Release Manager for mobile applications utilizing the Android and iOS technology stacks in an Agile environment releasing mobile applications resulting in higher quality and revenue increases.

- Performed as key member of 4 Scrum Teams / drove root cause **analysis** (RCA) for issues / incidents as needed / participated in backlog grooming in concert with Scrum Masters, Product owners.

- Built deployment scripts for deployments of 12 mobile applications and services in an Agile environment using Python, BASH, Zshell, PowerShell scripting languages, creating a stable release process.
- Automated build and deployment processes via deployment scripts, Stash, GitHub, JIRA, Jenkins and Crucible for IOS and Android mobile applications, decreasing rework by 15%.
- Designed and implemented a Release Train deployment model through Agile Project **Management best practices**.

Configuration / Release Boss – Cancer Society / Atlanta, Ga

01/2013- /02/2015

- Built, automated,, deployed and trained teams using applications integrating BASH, PowerShell, Python scripts, Visual Source Safe, Visual Studio, Team Foundation Server, Team Project, resulting in a single version control, build and release facility for 9 distinct applications.
- Lead, motivated and managed team of 4 Release Engineers, interacting with the entire spectrum of functional areas, stakeholders and teams.
- Collaborated with multiple stakeholders across **business** units supporting 9 applications supporting cancer research, patient **education**, fund raising event **planning** and execution on a national scale.

EDUCATION AND TRAINING

Bachelor of Science: Engineering
United States Military Academy - West Point, NY

Master of Science: **Systems Management**
University of Southern California - Los Angeles, CA

Master of Science: **Computer Science**
Kennesaw State University - Kennesaw, GA

PhD (ABD): **Information Technology**
Capella University - Minneapolis, MN (All But Dissertation)

CERTIFICATIONS & LICENSES

- PMP – 2001 (lapsed)
- **CISM** – 2005 (lapsed, retaking exam for renewal)
- **CISSP** – Certificate of **Training** (Test scheduled mid/late 2025)
- ITSM – **IT Service Management** (2004)
- ITIL 4 – (2018 – being renewed)
- Certified AWS Practitioner – (2021)
- CCSP – Certified Cloud **Security** Professional
- Certified Scrum Master – (2020)
- Certified SAgile Scrum Master – (2021)
- SSCP – **Training** completed, exam to be scheduled

PROFESSIONAL ASSOCIATIONS

- IEEE - Institute of Electrical and Electronic Engineers (current)
- TAG - Technical Association of Georgia (current)
- ACM – Association for Computing Machinery (current)
- Georgia Technology Summit (current)
- **Information Systems Audit** and Control Association
- SANS
- ISC2
