

Name: Kumar Mandadapu
Email: Kumarmandadapu4748@gmail.com
Phone: 5134966769

Professional Summary :

- 5+years of experience in the IT industry with 4+ years of experience in BPM application using Strong Experience developing application .
- Experience in Designing, Capturing and Implementing requirements using **Appian** BPM suite.
- Worked with **Business** to understand their requirements and designed Process Models, Interfaces and other **Appian** objects accordingly following **agile methodology** Strong in requirement **analysis**, functional specification **design** and **documentation**.
- Expertise in SAIL, proficient in creating interfaces using SAIL.
- Designed the network infrastructure to support **Appian** Environment with the external systems.
- Expertise in **analysis**, **design**, **development** and managing Workflows and **User Interface** (UI), Involved in validations, Flows and Process Modular **design** using **Appian**.
- Worked on **Appian** BPM version 19.X to 23. X.
- Developed expression rules, query entities, **Web API** as per requirement to support the SAIL forms created in **Appian**.
- Implemented and customized "No-code/low-code" BPM solutions using **Appian** for streamlined workflow automation, resulting in improved operational efficiency and reduced manual errors.
- Experience in designing and using **Web** APIs and integrations to integrate with external systems.
- Extensive knowledge in **development** and **integration** of **web** based and **integration** applications using JAVA/J2EE and BPM technologies.
- Experience in **web development** using HTML, JavaScript, CSS and XML.
- Implemented rapid developments using records. Implemented expression backed records, entity backed records and process backed records.
- Experience in developing **web** applications using technologies like HTML, XML, Java Script.
- Proven record of developing excellent working relationships with colleagues, clients.

- Designed, developed, and supported **end-to-end systems** leveraging **ASP.NET**, **JavaScript**, and **REST/SOAP web services**, ensuring high performance, scalability, and maintainability.
- Strong hands-on experience working with **SQL Server 2022** (including versions 2016 and above), developing complex queries, stored procedures, and performance tuning.
- Excellent Problem - solving capabilities with good knowledge of **debugging** tools like Tracer, clipboard, DB Trace, Performance Analyzer (PAL), UI Inspector.
- Good experience in working with IDE's such as Eclipse, JDeveloper and RAD.

EDUCATION :

- Master's in computer Engineering, Wichita State University, Wichita, KS in Jan 2021- Dec 2022.
- Bachelor's in Electronics and Communications Engineering ,K L University, Guntur, India in May 2016- DEC 2019(Accelerated Course work).

Certifications:

- **Appian** L-1 Certified.
- **Appian** L-2 Certified.
- Microsoft Azure Fundamentals (AZ-900)
- RPA Basic

Technical Skills :

- **BPM Tools** : **Appian** 16.2, 17.x, 18.x, 19.x, 20.x, 21.x, 22.x,23.x
- **Languages** : C, .Net ,Core java, j2EE, HTML, CSS, JavaScript, SQL, PL/SQL
- **Web Technologies** : HTML, XML, SOAP, WSDL, Servlets, JSP, AJAX
- **Operating Systems** : Windows XP, Linux, Windows 7, UNIX
- **Databases** : Oracle 10G, MySQL **Database**, Snowflake, Oracle, SQL, PL/SQL
- **Deployment tools** : AMT, Blade logic
- **Tools** : MS Office, Eclipse, Introscope, Soap UI, QC 10.x/11.0,
- **Application Servers** : WebLogic 9.2, Websphere 7.0, JBoss 6.0
- **DevOps Tools** : Jenkins, Git Bash, Bit Bucket, Jira
- **Methodologies** : **Agile**, Waterfall.

Work Experience :

Client: Bank of the West, Tx

Jul 2022–

Till date

Role: **Appian Developer**

Responsibilities:

- ❑ Developed rich **user** interfaces using **Appian** SAIL Rules, **Appian** SAIL Components, Query, and ExpressionRules.
- ❑ Developed BPM Workflows using **Appian** Process Modeler, Gateways, Events, and Smart Services.
- ❑ Integrate **Database** with front-end through **Data** Services in the process model as well as Query or QueryExpress Rules in rules.
- ❑ Developed **business** application- Processes, Rules and SAIL Forms based on client requirements.
- ❑ Designed relational databases **management** systems, **data** modeling, **database design**, and structured Query Language (SQL) from scratch.
- ❑ Utilized **Git** and similar source control systems for effective version **management** and team collaboration in fast-paced **development** environments.
- ❑ Actively participated in **Agile/Scrum teams** using **Azure DevOps** and **Jira** for backlog **management**, sprint planning, and issue tracking.
- ❑ Responsible for planning and designing the infrastructure with disaster recovery planning and engaged in **testing** all the environment starting from DEV, UAT, STG, PERF, UPG, PRE-PROD, TRAINING, BFUAT. PROD and DR before going Live.
- ❑ Proven ability to integrate **Appian** with various AWS services for enhanced functionality and seamless operations.
- ❑ Installed, configured and built the infrastructure with middleware products like Tibco, Apache to host or deploy **Appian** and its applications on the Red-Hat Linux Servers.
- ❑ Responsible for building any new environment that is required for **Appian testing** or upgrade.
- ❑ Develop various scripts and setup monitors to monitor system usage and performance for all the consumer and wealth **management** bank products and **Appian** applications.
- ❑ Submit Firewall rules for the application to talk to external/other services that need firewall ports to be opened while setting up new environments.

- ❑ Provided the Dashboards and to track the measure the impact of external innovation activities.
- ❑ Develop, build, automation and test scripts to automate the process for various consumer and wealth **management** banking applications.
- ❑ Hands on experience in various **Appian** concepts like **Security**, Authentication, SAIL, **Integration**, **Web** APIs, workflows, Plugins, Deployments.
- ❑ Proposing and Implementing Release Cycle with a Release **management** process.
- ❑ Implemented **best practices** for RESTful **API design**, including resource modeling, authentication, and versioning.

Environment : **Appian** 19.1, 19.2,19.3,19.4,20.1versions, MySQL, Tibco, **Web** Services, Oracle, SQL Server, Java 1.6, Struts 1.2, j boss 5.1, Eclipse, **Web** Sphere, Oracle 10g, Windows Server 2003/2008, GIT, Linux.

Client: Xlogic Solutions India pvt ltd
2021

Feb 2019 – Jan

Role: **Appian Developer**

Responsibilities:

- ❑ Works with other **business** technology teams to understand requirements and patterns and ensure consistency in **design** across applications built on the **Appian** platform.
- ❑ Hands on coding and **development** experience on **Appian** BPM platform.
- ❑ Worked with **Business** to understand their requirement and **design** and develop them into Process flows and Models within
- ❑ Designed in the different types of Reports, Rules and Interfaces.
- ❑ Designed in different types of validations in the Workflow Process.
- ❑ Developed the SAIL form interfaces.
- ❑ Involved in adding the members in different types of **User** Groups.
- ❑ Build and deploy of applications Help Review application **design** and code review.
- ❑ Created BPM workflows in **Appian** using the process modeler. Involved in the designing and **implementation** of all modules.
- ❑ Followed **Agile development methodology** while developing the application.
- ❑ Prepared and developed acceptance test **case** scenarios in the application.
- ❑ Detailed **analysis** to support **design** and **development** of the **Appian** BPM 17 x 18 x applications.

Environment : Appian 17.X, 18.X versions, Web Services, Oracle, SQL Server, Java 1.6, Struts 1.2, J boss 5.1, Eclipse. Web Sphere, Oracle 10g. Windows Server 2003/2008.
