

Professional Summary:

- 9 years of IT experience in ETL testing methodologies, data warehousing concepts, and data quality assurance techniques.
- Hands on expertise in Data Migration, Data warehousing concepts and tools. Involved in the ETL process where in the organizations using Informatica and SSIS tool.
- Proficient in testing data pipelines, data transformations, and data migrations.
- Analyzed the business requirements to get through understanding of the Testing requirements and developed Test Plans and created test cases.
- Analyzed various resource Files being used to generate the report and documented data mapping and data source interface to assist the development, Team.
- Used for SQL Querying and analysis purposes on various source tables and conditions applied and wrote SQL Joins, Sub Queries.
- Analyzed the functional specifications and helped team members to achieve test goals.
- Analyze and understand the ETL workflows developed.
- Strong Analytical skills with the ability to collect, organize, analyze, and disseminate large datasets with attention to detail and accuracy.
- Strong understanding of industry specific ETL tools and processes.
- Developed and implemented test data management strategies to support multiple testing environments.
- In-depth knowledge of banking and financial, Healthcare data structures and regulations.
- Experienced in testing FACETS and HEDIS systems for healthcare organizations.
- Extensive knowledge of healthcare data claims processing, and quality measurement.
- Experienced working with multiple databases like MS SQL Server, Oracle, Teradata etc.
- Good understanding of Big Data technologies, including Hadoop, Spark.
- Performed data validation and data quality checks for data transformations in Hadoop and Spark environments.
- Performed SQL to HQL transformation testing efforts for ETL pipelines, ensuring data accuracy and consistency.
- Experienced in setting test environment and preparing mock data to test ETL and BI applications.
- Experienced in testing Business Report developed in Cognos, Tableau, SSRS and PowerBI.
- Developed and executed test cases for Azure Data Factory workflows, ensuring data accuracy and reliability.
- Utilized Azure Databricks for data profiling and data quality assessments.
- Experienced in using informatica DVO testing tool.

- Experienced in manually **testing** the job **scheduling** that were designed using Autosys and Control-M.
- Experienced in **writing** complex SQL queries in different databases, join, sub-queries, aggregate functions, clause, operator case logic, set operator and string functions.
- Good working knowledge with QA Methodology and QA Validations to ensure **Quality**.
- Extensive experience in all phases of SDLC methodologies **Agile**, Waterfall etc.
- Expertise in analyzing **business requirements**, developing **Test plans**, **Test cases**, **Test** Script.
- Prepared **Test** artifact in **ETL testing**.
- Worked experience in web service SOAP UI and REST API **Testing**.
- Experience in Manual, **Functional** and **Automated Software Testing** tools QTP.
- Solid Back-end **testing** experience in **writing** and executing SQL Queries.
- Performed Data Migration **testing** where SQL was used heavily for validating data between source and target databases.
- Performed data validation and verification activities to ensure the accuracy and completeness of data loaded into Snowflake.
- Involved in **testing** the reports dashboards, prompts, and drill down, drill ups, filters, and various pivot reports.
- Exceptional time **management skills** and able to handle multiple competing priorities in a fast-paced environment.
- Excellent **Communication**, Analytical and Interpersonal **skills**.
- Work experience in waterfall and **agile** methodology.
- Work experience in window and **Unix** environment.

Technical Skills:

ETL Tools:	Informatica 10.4 (PowerMart &PowerCenter), Microsoft SSIS, TALEND, Azure Data Factory
BI Tools:	Tableau, Cognos, SSRS, Power BI
Testing Tools:	HP ALM, JIRA, Azure Devops
Databases:	SSMS, Oracle 21c/11g, Teradata, DB2, Azure SQL, DB Visualizer 14.0.1
Programming Languages:	MS SQL, PL/SQL
Operating System:	MS-Windows, UNIX
Other Tools:	SQL plus, JIRA, Snowflake, Microsoft officer, TOSCA , Azure Databricks, Au Control-M

First Citizens Bank
Raleigh, North Carolina
Sr. ETL Test Engineer

(April 2024 -Current)

Responsibilities:

- Performed ETL testing for various data warehousing projects, ensuring data quality and consistency across systems.
- Conducted data validation, data reconciliation, and data quality checks to maintain data integrity.
- Worked in Agile methodology.
- Prepared test plan and test cases for testing.
- Implemented SQL queries to validate data integrity and perform back-end testing.
- Assisted in the development of test plans, test cases, and test data for end-to-end ETL processes.
- Strong knowledge on ETL and BI processes
- Participated in daily stand-ups and sprint planning meetings as part of Agile teams.
- Documented test results and prepared detailed reports for stakeholders.
- Participated in the defects resolve Sessions to resolve the defects quickly.
- Analyzed and understood the ETL workflows developed.
- Developed Test strategy, test plan/design, execute test cases and defect management for the ETL & BI systems.
- Validated data flows from the mainframe to the data warehouse, ensuring data consistency and accuracy.
- Developed and maintained test scripts in HP ALM and JIRA for test management and defect tracking.
- Collaborated with business analysts and developers to understand requirements and translate them into test plans.

Environment: MS SQL SERVER 2022, SQL Developer, DB Visualizer 14.0.1, DB2, HP ALM, Jira, Oracle, Toad, Share Point, MS Excel, MS Word, WinSCP, SharePoint, Putty, Informatica power center, SSIS, PowerBI.

CareFirst Blue Cross Blue Shield of Maryland
Owning Mills, MD

(Aug 2022 -March 2024)

ETL Test Engineer/Data Quality Analyst

Responsibilities:

- Performed end-to-end testing of ETL processes for data migration projects, ensuring accurate extraction, transformation, and loading the data as per the business requirements.
- Successfully validated data for Medicaid and Medicare claims.
- Collaborated with the Teams, including product owners, developers, business analysts, and data architects, to understand business requirements and design test strategies.
- Developed and implemented test data management strategies to support multiple testing environments.
- Prepared test plans, test cases and various QA artifacts and reviewed with the project team before test execution.
- Led the testing efforts for the implementation of FACETS, ensuring the accurate processing of healthcare claims.
- Developed and executed test plans and test cases for FACETS modules, identifying and reporting defects for resolution.
- Performed HEDIS data validation and ensured compliance with industry standards and regulations.
- Worked in Agile methodology.
- Documented test results, identified defects, and reported them to project stakeholders.
- Created and managed Postman Collections for various API endpoints.
- Developed detailed test cases, test scripts, and test plans for various API endpoints, including GET, POST, PUT, DELETE methods.
- Developed and executed comprehensive test cases and test scripts, identifying and documenting defects and issues in defect tracking tools.
- Verified the Data is loaded From Oracle Database to MS SQL as per the Mapping requirements.
- Verified data quality, integrity, and compliance with healthcare standards and regulations, such as HIPAA, and ICD-10 etc.
- Participated in test plan reviews, test strategy formulation and provided input for process improvements.
- Participated in the defects resolve Sessions to resolve the defects quickly.
- Provide demos/walk through weekly regarding testing results.
- Actively participated in daily stand-up meetings, project review meetings, Weekly status meetings and various other meetings which were focused on making the application more effective.
- Strong in SQL preparation in Oracle/MS SQL Server.
- Developed and executed test cases for Azure Data Factory workflows, ensuring data accuracy and reliability.
- Utilized Azure Databricks for data profiling and data quality assessments.
- Written complex SQL queries for validating the transformation rules for ETL mappings.
- Validate the Data integrity using complex SQL queries.
- Inserted data manually into the source tables from Oracle to MS SQL Server.

- Performed query conversion manually from oracle into MS SQL Server.
- Involved with **business** to support the UAT **Testing**.
- Involved in End-to-End Data **Integration Testing** between Source and Target.

Environment: MS SQL SERVER 2018, SQL Developer, HP ALM, Jira, Oracle, Toad, Share Point, MS **Excel**, MS Word, WinSCP, SharePoint, Putty, Informatica power center, Azure Data Factory, Azure Databricks.

Bank of America

(July 2021 – July 2022)

Charlotte, North Carolina

ETL Test Engineer/Data Quality Analyst

Responsibilities:

- Conducted data validation, data reconciliation, and data **quality** checks to maintain data integrity.
- Collaborated with data analysts to understand financial data **requirements** and validate data transformations.
- Verified processed customer transactions using computerized methods, accurately recorded financial transactions, and generated receipts.
- Prepared **test plans**, **test cases** and various QA artifacts and reviewed with the project team before **test** execution.
- Exposure of **TOSCA** big data **automation Testing** Tool.
- Validated the e-commerce platform, conducting thorough **functional testing** to ensure the reliability of features such as product search, order **management Testing**, and payment processing **Testing**.
- Developed detailed **test cases**, **test** scripts, and **test plans** for various API endpoints, including GET, POST, PUT, DELETE methods.
- Worked in **Agile** methodology.
- Prepared RTM which shows a complete coverage of **test cases** against the **requirements**.

- Discussed the **test cases** for **regression testing** and scope for **automation** with the **quality** engineers for each build.
- Validated and executed **ETL** jobs scheduled in Autosys.
- Wrote SQL queries to validate the **business** logic of the application.
- Experience with **design**, develop, mapping and delivery of **ETL** process using informatica.
- Experienced in using informatica DVO **testing** tool.
- Interacted with the development team to report bugs and discuss the status of bugs with open status or hold status.
- Involved in various **documentation** tasks such as daily status reports, weekly progress reports, Requirement's traceability Metrics (RTM) and defect logs.
- Performed data validation and verification activities to ensure the accuracy and completeness of data loaded into Snowflake.
- Validated MicroStrategy reports for cosmetics, function, and data.
- Extensively used **Quality** Center for **test** planning, **test** execution and bug tracking and **reporting**.
- Detected and documented defects, working closely with development teams to resolve issues.
- Actively participated in enhancement meetings, project review meetings, Weekly status meetings and various other meetings which were focused on making the application more effective.
- **Automated test cases**, for data driven tests and linked **test** scripts using QTP to perform **Regression testing** of different application versions.
- Created **Test** sets using HP ALM.

Environment: Informatica 10.2.0, SSIS, MS SQL Server 2018, DB2, HP ALM, Windows, **Unix**, MS **Excel**, Azure Devops

MS Word, Putty, TOAD, Office Communicator, SharePoint, **Microsoft** Visual Studio, TFS, Snowflake Data Warehousing.

Responsibilities:

- Performed data analytical testing for the BI systems.
- Validation of data transformations and perform End-to-End data validation for ETL & BI systems.
- Performed ETL data validation developed using Informatica /DataStage/SSIS ETL environments.
- Performed BI report validation developed using Cognos/Business Objects/MicroStrategy/SSRS BI
- Exposure to DB tools: MS SQL Server/Toad/PL SQL developer/SQL Plus
- Performed SQL preparation in Oracle/MS SQL Server/DB2/Teradata RDBMS
- Strong knowledge on ETL and BI processes
- Prepared test plan and test cases for testing.
- Worked in Agile methodology.
- Validated ETL process and reports using SQL queries.
- Developed and Design ETL test cases, scenarios, and scripts to ensure quality Data warehouse / BI applications.
- Documented the Sampling Execution Procedures for the Test execution team which include the data generation method in detail.
- Responsible for updating the transmission logs upon completion of sample transmission to track for updates and status for test.
- Modified the SQL query as per testing time frame and created dynamic date.
- Executed UAT test cases, identified defects, and documented issues using bug tracking systems such as Jira, HP ALM.
- Involved in validating the test as validator to ensure that test has followed the standards, compliance, and business processes to mitigate the risk in production.
- Developed Test strategy, test plan/design, execute test cases and defect management for the ETL & BI systems.
- Developed and executed details ETL related functional, performance, integration and regression test cases, and documentation.
- Analyzed and understood the ETL workflows developed.
- Quality Management - Knowledge of quality management methods, tools, and techniques

Environment: Visual studio 2017, SSIS, SQL Server Management studio 2018, Microsoft Server2018, Excel, Windows Server, Oracle, Share Point, Teradata SQL Assistant.

Blue Cross Blue Shield of Michigan (BCBSM)

(April 2016 – May 2018)

Detroit, Michigan

ETL Tester/Data Analyst

Responsibilities:

- Understand Business requirement document/Mapping document and business rules.
- Validation of data transformations and perform End-to-End data validation for ETL & BI systems.
- Performed ETL data validation developed using Informatica environments.
- Performed BI report validation developed using Tableau.
- Exposure to DB tools: Toad/PL SQL developer/SQL Plus.
- Performed SQL preparation in Oracle/ MS SQL Server/DB2/Teradata RDBMS.
- Wrote SQL queries and tested front end developed data in the databases.
- Strong knowledge of ETL and BI processes.
- Provided status metrics on testing.
- Provided demos/walk through regarding testing results.
- Developed and Designed ETL test cases, scenarios, and scripts to ensure quality Data warehouse / BI applications.
- Performed data analytical testing for the BI systems.
- Prepared test plan and test cases for testing.
- Analyzed Host Membership and claims data.

- Worked in Agile methodology.
- Validated ETL process and reports using SQL query.
- Actively participated in enhancement meetings, project review meetings, Weekly status meetings and various other meetings which were focused on making the application more effective.
- Written complex SQL queries for validating the transformation rules for ETL mappings.
- Designed mappings for dimensions and facts.
- Supported Testing team, UAT Team & Productions support team.
- Tested graphical representation of reports such as Bar charts, Pie charts etc. as per End user requirements.
- Tested ad hoc and canned reports for Business objects.

Environment: Oracle 12c, SSMS 2018, Informatica DVO 9.6, Tableau, JIRA, Microsoft Planner, word, Excel 2016, Notepad++.

Lanvera Ltd
Coppell, Tx
QA/ETL Test Engineer

(March 2015 – March 2016)

Responsibilities:

- Prepared and executed **Test Cases** manually according to the BRD, Technical Specification, **Functional Design** and Use Case documents, identifying applications functionality, **test requirements** and coverage.
- Performed **regression testing** against the various builds of the application.
- Wrote SQL queries and tested front end developed data in the databases.
- Executed **automated test** scripts using QTP 9.2 to perform through **testing**.
- **Integration** and **testing** of MDM **system** to facilitate better product **management**.
- Developed and **automated** Web Services API **testing** using SoapUI frameworks.
- Defects were tracked, reviewed, analyzed, and reported using **Quality** Centre.
- Prepared **test cases** for the **ETL** application according to technical specification document and extensively tested data extraction, transformations and loading processes.
- Validated **ETL** process and reports using SQL queries.
- Validated the **ETL** mappings and Sessions developed in Informatica.
- Migrating their legacy application data to MDM **system**.
- Performed Configuration and compatibility **testing**, verified the application on different operating systems.
- Interfaced with developers to resolve technical issues and investigated **software** faults.
- Prepared RTM Document to ensure that all the **requirements** had sufficient coverage for **testing**.
- Analyzed the **functional** specifications and helped team members to achieve **test** goals.
- Defects were tracked, reviewed, analyzed, and reported using **Quality** Center.
- Designing **test** scenarios and **test cases** and **testing** all Data Migration and Data transformation rules and major MDM functionalities like Match & Merge, Suspect Duplication, and Survivorship etc.
- Tested the reports developed in the **system** as per company standards and **requirements**.
- Prepared **documentation** of the Prescription fulfilment and **management** module for **management** review and project **presentations**.
- Responsible for giving demonstrations and **presentations** to the **management** and mentoring other junior team members.
- Performed match/merge and ran match rules to check the effectiveness of MDM process on data.
- Involved in auditing **documentation** for CMMI certification.

Environment: Informatica, SQL, HP **Quality** Center 10, Informatica 9.0, MS **Excel**, MS word, Oracle10g, TOAD, Putty.

Education: Master of **Business** Studies in Information **Management System**.

Bachelor of **Business** Studies in Information **Management System**.
