

Experienced and highly skilled cybersecurity specialist with a strong foundation in endpoint protection, data loss prevention (DLP), network security, and systems administration. Demonstrates proven success supporting enterprise environments through hands-on work with tools, such as Symantec DLP, Microsoft Purview, Check Point Endpoint, Cisco AnyConnect, and IBM QRadar. Adept at identifying vulnerabilities, managing system encryption, and maintaining compliance across hybrid and remote infrastructures. Known for collaborating across teams to implement secure environments, troubleshoot complex issues, and protect sensitive data while aligning with industry best practices and compliance requirements.

Areas of Expertise

- Systems Engineering & Administration
 - Cloud Security, Microsoft, AWS
 - Security Monitoring & Reporting
 - Data Loss Prevention: Microsoft Purview, Symantec DLP
 - SIEM Tools: Microsoft Azure, LogRhythm Splunk, IBM QRadar, CrowdStrike Falcon
- Endpoint Security & Data Protection
 - Network Security
 - Vulnerability Management
 - Threat Detection
 - Email Tracing
 - Ticketing Systems: Service Now, Jira
- Data Discovery & Data Analytics
 - Project Leadership & Team Management
 - Security Administration & Compliance
 - Incident Response & Remediation
 - Investigations

Professional Experience

Jan 2023 — Jan 2025

Caterpillar, Remote, GA

Security Engineer 2. E-team

Configured firewall protocols, optimized spam filtering, and executed email tracing using Microsoft Windows Defender and related tools. Delivered secure cloud architecture and infrastructure solutions within Microsoft Azure environments. Enabled real-time threat detection and intelligence by implementing Azure Security Center monitoring strategies. Evaluated systems and data for security gaps, conducting in-depth analysis of threats and vulnerabilities. Conducted vulnerability scans and enforced IAM controls using Nessus, Cisco AnyConnect, and identity governance tools. Authored security protocols, operational documentation, and governance policies for Microsoft EASM platform. Collaborated with the legal team to ensure compliance with regulatory manage eDiscovery processes. Constructed customized queries and extracted data for analysis

and reporting purposes. Inspected data in motion across channels, such as email, IM, and FTP to enforce network-level DLP policies. Investigated DLP alerts, implemented remediation protocols, and escalated critical incidents as necessary in Microsoft Purview.

- Deployed new SaaS Microsoft External Attack Surface Management (EASM) tool to enhance cybersecurity monitoring capabilities.
- Developed governance policies for Microsoft Purview DLP, Microsoft External Attack Surface Management (EASM), automating risk detection workflow
- Utilized VMware to validate applications in sandbox environments, mitigating security risks through isolation protocols.
- Strengthened cybersecurity inventory and reduced SaaS-related risks by leveraging Axonius to identify vulnerabilities and automate remediation workflows.
- Mapped workloads and determined ownership through attribution analysis, facilitating enterprise asset tracking and accountability.
- Mitigated security threats by uncovering vulnerabilities, coordinating incident response, and executing timely remediation with vendors and stakeholders.
- Extracted critical insights using Microsoft Log Analytics, SQL; executed advanced queries to analyze logs from EASM and other sources.
- Correlated and visualized threat data using SIEM platforms including Microsoft Sentinel, Microsoft Azure, Microsoft Defender for Cloud App Security for timely threat response.
- Partnered with Microsoft, Palo Alto, and Prisma on cross-functional cybersecurity initiatives and strategic implementations.
- Used Service Now ticket system to track and resolve incidents.

Franklin County Data Center, Columbus, OH

Aug 2020 —Jun 2022

Enterprise Security Operations Analyst

Applied critical security patches using Ivanti Agents to maintain system integrity. Enhanced threat visibility by analyzing endpoint activity with SIEM tools including LogRhythm, O365 Security Cloud App, Azure Defender, Tanium, and Carbon Black. Led incident response and containment efforts in Microsoft Azure cloud environment. Investigated and resolved AWS cloud alerts to maintain infrastructure security. Conducted forensic investigations using Microsoft eDiscovery for legal and compliance matters. Audited security alerts and logs in Carbon Black Cloud, VMware, Microsoft 365, Azure, and LogRhythm for threat assessment. Evaluated cybersecurity posture through vulnerability and threat analysis. Performed Tenable Nessus vulnerability scans to uncover system weaknesses. Deployed phishing simulation campaigns via KnowBe4 to elevate employee security awareness. Used Service Now and Jira ticket systems to track and resolve incidents. Managed user identities and access controls using Ping Identity, CyberArk, SailPoint, and Azure Active Directory.

- Detected and investigated anomalies and intrusion attempts by inspecting Barracuda firewall logs and network traffic patterns.
- Analyzed endpoint activity using SIEM tools (LogRhythm, O365 Security, Azure Defender), ensuring threat visibility

and rapid response

- Neutralized threats by identifying and eliminating malware using Carbon Black Cloud and Microsoft Defender for Cloud App Discovery.
- Directed security incident response operations and resolution strategies across Franklin County infrastructure.
- Delivered interactive security training programs via KnowBe4 to reinforce cybersecurity practices.
- Executed DLP response protocols for Microsoft O365 during data breaches, intrusions, or theft.
- Formulated and maintained DLP security policies, configured DLP rules, and authored documentation.
- Utilized Microsoft O365 eDiscovery tools to efficiently manage legal holds, conduct searches, and analyze electronically stored information (ESI).
- Secured user authentication systems using multi-factor tools including Duo and Ping.
- Ensured regulatory alignment with PCI, HIPAA, SOX, NIST, and CIS frameworks through routine testing and compliance checks.

UST Global State Auto, Columbus, OH

Oct 2018 — Mar 2020

Information Security Operations Analyst

Conducted Nessus vulnerability scans to proactively detect and address system vulnerabilities. Enabled secure infrastructure rollout by supporting OpsRamp configuration in new environments. Detected anomalies and security breaches by analyzing network traffic using Wireshark. Enforced data protection policies by monitoring Symantec Data Loss Prevention (DLP). Safeguarded sensitive data, including credit card information, SSNs, and regulatory data (PCI, HIPAA) through active DLP monitoring. Assessed threats and vulnerabilities to enhance enterprise-wide security posture. Ensured IT compliance with PCI, HIPAA, and SOX regulations while conducting user education on phishing and malware threats. Reported phishing attempts in Gmail and escalated as part of email threat detection workflow. Administered layered defence tools, including Symantec Endpoint Protection, IDS/IPS, firewalls, Active Directory, and vulnerability scanners. Participated in cybersecurity investigations, tabletop exercises, and security response drills.

- Improved incident visibility by tuning OpsRamp dashboards, remediating alerts, setting alert thresholds, and scheduling weekly patch maintenance.
- Assessed system configurations in Qualys to verify compliance and eliminate potential risks.
- Led response and remediation for cybersecurity incidents to minimize impact and ensure recovery.
- Led vulnerability management operations, conducting Nessus scans and implementing proactive remediation strategies.
- Operated and configured Splunk Enterprise Security SIEM to correlate and visualize threat data from multiple sources.
- Authored runbooks and established security policies and procedures for consistent incident handling.
- Partnered with international team members to assure cross-border collaboration on security initiatives.
- Coordinated SOC involvement, drove process improvements, implemented hardening standards, and integrated security tools with cross-functional teams.

- Applied ITIL best practices and leveraged ServiceNow for IT service management and workflow tracking.

Cardinal Health, Dublin, OH

March 2015 — May 2018

Senior Analyst, Ethics and Compliance

Managed end-to-end eDiscovery workflows aligned with Electronic Discovery Reference Model (EDRM), driving defensible collection and handling of electronically stored information (ESI). Investigated and analyzed security threats and vulnerabilities to strengthen overall risk posture. Administered Symantec Data Loss Prevention (DLP) and Cisco IronPort for email filtering and secure data handling. Developed, updated, and enforced security policies and documentation; created dashboards for enhanced visibility and reporting. Triaged and remediated DLP alerts and escalated high-priority incidents as necessary. Built and maintained strong cross-functional relationships with Legal, Ethics & Compliance, Corporate Security, and IT teams to support enterprise security needs. Conducted assessments and engaged with internal/external customers to understand needs, set priorities, and align support with enterprise objectives.

- Collaborated with international team members on global security initiatives and policy implementation.
- Automated security team processes to improve efficiency and reduce response time to incidents.
- Collaborate with the Help Desk team when alerted about Malware or any virus.
- Actively supervised for sensitive data exposure, including credit card information, social security numbers, and protected health information (PCI, HIPAA).
- Conducted digital forensics and investigations using tools, such as EnCase Enterprise and CrowdStrike Falcon to identify, analyze, and recover critical data.
- Delivered excellent customer service in high-sensitivity situations, demonstrating discretion and strong technical acumen.
- Maintained compliance with industry regulations, such as PCI, HIPAA, and SOX through testing and policy enforcement.
- Headed Business Conduct Poster (BCL) Audit project, conducting compliance audits across 48 locations to enable regulatory visibility and adherence.

RCS Help Desk Analyst

Oct 2014 — March 2015

Supported setup of Assuramed in Twinsburg, OH to ensure seamless implementation and system readiness. Deployed and configured VMware applications, performing regular updates and troubleshooting to verify optimal functionality. Administered user accounts through Active Directory, such as group assignments, account unlocking, and password resets, ensuring

timely and secure user **access** and responding to Service Now tickets.

Installed and troubleshot multiple browser versions (IE8-10, Google Chrome) and Java versions (6.17, 6.30, 7.21, 7.55), ensuring compatibility and **security** across **systems**.

Provided VDI support, imaging PCs, encrypting laptops, and utilizing Symantec PGP, Symantec Endpoint, and **Cisco** AnyConnect to ensure device **security** and proper system functionality.

Managed **software** assignments using Symantec **Management** Console, Altiris, and DameWare for remote **access** and **troubleshooting**.

PCM/Huntington, Columbus, OH

March 2011 — Oct 2014

IT Help Desk Specialist

Prevented **data** loss by utilizing Check Point Endpoint **Security**, managing encryption, antivirus, antimalware, and endpoint **security** protocols. Migrated **Windows** XP **systems** to **Windows** 7 for seamless transitions and system compatibility. Encrypted **Windows** 7 laptops with BitLocker and **Windows** XP laptops with Pointsec, enhancing **data** protection. Implemented **Cisco** AnyConnect Secure Mobility Client for VPN **access** to drive secure remote connectivity. Troubleshot and resolved network issues, isolating problems with components and providing setup and maintenance support for seamless **data** network functionality. Supported VDI, HP laptops, and HP workstations to verify **systems** ran optimally for end-users.

- Led **data** recovery efforts, restoring critical files (usernames, documents, favorite, desktop) using tools like **Windows** 7 Backup & Restore, EZ Connect, Checkpoint Pointsec, and Check Disk, mitigating **data** loss during system failures or employee transitions.
- Delivered Remote Desktop Support both onsite and remotely using VPN with RSA Secure Token, Novell ZENworks, and MS Lync, ensuring continuous operational efficiency.
- Supported and troubleshot **software**, including Novell Client 4.91, Novell iPrint, and ZENworks Control, improving **software** reliability and performance.
- Configured and troubleshot HP/Xerox printers on Huntington network for assuring consistent availability via TCP/IP print servers.
- Provided technical support for **Microsoft Office** 2010, Lotus Notes, Pega Ace, **Microsoft** Lync 2010, and Passport, resulting in enhancing user productivity.
- Utilized **Windows** 7/XP GUI and CLI command utilities for **troubleshooting** and support, ensuring efficient issue resolution.
- Managed tickets in BVS, Service Now, and SRO to drive timely resolution of support issues by prioritizing and escalating when necessary.
- Headed a printer optimization team of six at Huntington National Banks, enhancing printer efficiency and reducing downtime across corporate locations in Columbus, OH.
- Partnered with teams to develop procedures and **policies** for printer optimization, streamlining operational workflows.

Education

ITT Tech, Hilliard, OH

Bachelor of Science, Computer Science | 2012

Certifications

FEMA IS-00700.b An Introduction to the National Incident Management System

FEMA IS-00100.c Introduction to Incident Command System, ICS-100

Microsoft MS-500 Microsoft 365 Security Administrator

Certificate of Training Symantec Data Loss Prevention 14.0 Administration

Implement Endpoint Data Loss Prevention (DLP) with Microsoft Purview

Certificate of Completion: Performing Basic Splunk Searches (Pluralsight)

Certificate of Completion: Building Reports, Dashboards & Alerts in Splunk (Pluralsight)

Certificate of Completion: Installing & Configuring Splunk (Pluralsight)

Certificate of Completion: Employing the Splunk Common Information Model (CIM) (Pluralsight)

Certificate of Completion: Incident Detection and Investigation with IBM QRadar (Pluralsight)

Certificate of Completion: Powershell (Pluralsight)

APS - HP Desktops, Workstations and Notebooks
