

Name: Rohini Kusam
Email: rohinikusam@gmail.com
Ph: +1(224)-518-9642
Visa: GC

PROFESSIONAL SUMMARY:

- Having 8+ years of experience in the IT Industry includes 5+ years in **Guidewire** Configuration.
- Good knowledge of the Claim adjudication process in Property & Casualty **insurance** domain and experience in multiple Lines of Business configurations.
- Moderate knowledge of the Policy administration process in Property & Casualty **insurance** domain and experience in Auto & Property Lines of Business configurations.
- Attending PI planning, Sprint Planning, Features Refinement sessions, Daily Scrum, Sprint Reviews
- Understanding, analyzing the requirements and configuring them in ClaimCenter & **PolicyCenter** according to client requirements.
- Coding & Unit testing of assigned user stories & defects, which involves configuration in PCF files, Rules, Data Model extensions, Product Model changes, Admin data files import/export, Gosu classes/enhancements and aware of GW integration mechanisms like GX models, JSON schemas, Messaging plugins & Webservices implementations.
- Part of Data model & Code peer reviews to ensure GW best practices followed.
- Supporting QA team by analyzing & fixing the defects timely to avoid testing blockers.
- Excellent communication and interpersonal skills, accustomed to working in both large and small team environments.
- A quick learner of new concepts, products/tools and implement them in the project successfully.

TECHNICAL SKILLS:

Software / Tools	Guidewire ClaimCenter v10, Guidewire PolicyCenter v8, Eclipse, Tomcat application server, WebSphere server, GIT, SVN, Rally, MS SQL server management studio, Toad, WinSCP, Notepad++
Languages	Gosu, PL/SQL, Java.
Database	MySQL, Oracle

PROFESSIONAL EXPERIENCE:

Client: Great American **Insurance** Group
Role: GW **Developer**

2020-Present

Project description:

The client upgraded their **Guidewire** Claim Center software to the latest on-premises version 10. While the technical upgrade was completed, certain essential functional components of the new version remained underutilized.

The project objective is to fully leverage the capabilities of Claim Center version 10 to minimize customization requirements, maintenance efforts, and prepare for a future transition to a

Cloud-based SaaS platform. As part of this, implementing out-of-the-box (OOTB) automated claim assignment, and enabling subrogation, salvage features of ClaimCenter V10 in client code base as per business requirements.

Responsibilities:

- Worked in Claim Center Configuration functions like Segmentation, Assignment , Users/Groups, Parties Involved, Teams, Desktop, Subrogation, Salvage for various personal & commercial lines of business like Auto, Property etc.
- Experience in working LOB Typelists configuration.
- Experience in building new screens by creating Datamodel extensions and configuring PCFs.
- Experience in implementing various ruleset's rules like Preupdate, Assignment, Validation, Closed etc, for Claims, Exposures, Activities and Subrogations
- Created new Enhancements with new derived properties and functions.
- Implemented new Activities & History Events.
- Configured entity role constraints by creating new contact roles as well.
- Supported to import and export of Admin Data for various environments.
- Experience in debugging the local development by running the server in debug mode.
- Experience in debugging the defects on development & test environments by pulling and analyzing gw logs from server using WinSCP and connecting and querying Databases using MS SQL server management studio.
- Implemented DB triggers for modifying copying data and retiring records in DB without any impact to Prod claims and without causing DB drops.
- Implemented Data Change scripts for updating data on claims without deployments.
- Taken care of code merges from master to development branches and vice versa.
- Used to take care of builds & deployments using Jenkins for dev & test environments.
- Knowledge in Event Fires rules and Message Queues for creating & analyzing message payloads during development and unit testing or defects fixing for various downstream destinations like EDW, Mark Logic etc.
- Involved in analyzing the requirements & creating spikes & user stories by participating in business discussions with BAs and Story Pointing user stories.
- Attended PI plannings and helped in aligning Features to various sprints based on dependencies.
- Provided technical solutions for new functional requirements using Spike analysis.
- Coordinated with other teams that are integrated with ClaimCenter for development unit testing dependencies.
- Coordinated with Offshore team, Client team and other vendor partner teams for timely delivery of Projects
- Supported QA team by analyzing & clarifying/fixing the questions/defects timely to avoid testing blockers.
- Attended daily scrum call with team and highlighting risks & dependencies on time.
- Attended Sprint reviews & retrospectives and providing required feedback/inputs.

Environment: **Guidewire** ClaimCenter v10, Tomcat application server, GIT, Rally, MySQL DB, MS SQL server management studio, WinSCP, Notepad++

Client: Elephant Insurance
Role: GW Developer

Jan, 2018 - May, 2019

Project description:

Elephant is fast growing insurance for personal auto line in US, currently it is providing insurance in four States of US and further expanding. Elephant implemented Guidewire PolicyCenter 8.0 for insurance services.

Responsibilities:

- Involved in core development activities include walkthrough/discussion of business requirements, analysis, effort estimations, and coding & unit testing, defects fixing etc.
- Worked on GOSU coding, creating new rules, PCFs, Form Patterns, Enhancements etc.
- Experience in extending and adding new entities & typelists.
- Worked on Product Mode – Adding/updating of Coverages & Terms, Conditions, and Exclusions.
- Worked on Activity Patterns, History events, and import/export of Admin Data files.
- Implemented various Business rules and Validation rules.
- Worked on Form Patterns and Custom Form Inference logics.
- Worked with integration team to configure business rules for driver's MVR data.
- Involved in defect fixing and unit testing of application testing various test cycles.
- Being followed Agile methodology I participated daily scrum meetings to ensure the daily timelines and timelines of sprints.
- Effectively communicated with clients and BA's directly for getting proper requirements and analyzing them functionally and technically.
- Coordinating with project members for solving critical issues within the team.

Environment: Guidewire PolicyCenter 8.0.4, Java 1.7, Ant 1.8.3, Weblogic application server, Oracle DB, SVN, Jira, TOAD etc.

Client: Devry Software India Pvt Ltd.
Role: Programmer Analyst

Jan, 2013- Nov, 2016

- Trained on JAVA/J2EE, and PL SQL
- Responsible for understanding and execution of requirements and developing the application as per the requirements and business rules.
- Developed the log in screen for the application and checked for user authentication using HTML, JSP and servlet under MVC architecture.
- Developed several GUI web pages using JSP, HTML, and XML.
- Used JavaScript to perform checking and validations at Client's side.
- Involved in enhancements, code reviews, design reviews and also responsible for modifying the existing code.
- Developed presentation tier using HTML, JSP, Java Script and JSF.
- Unit Tested web pages and documented the corresponding data. Tested for standards conformance.
- Understanding of the software development cycle.

Environment: Java 1.4 SDK, java Script, JSP 2.0, XML, Websphere, CSS, Eclipse, HTML

EDUCATION:

- Bachelor of Engineering from Jawaharlal Institute of Technology, India.

TRAININGS AND CERTIFICATIONS:

- Trained on **Guidewire** ClaimCenter 10.0.x.
