CRM Delivery Architect

CLOUD COMPUTING – FINANCIAL SERVICES – CONSUMER GOODS – FIELD SERVICE – CONNECTED FIELD SERVICE

I am an accomplished executive capable of analyzing current **business** processes and **business** requirements to design modern applications that maximize team collaboration, system capabilities as well as maximize the system's return on investment. Over the last 15 years, I have specialized in moving clients into the **cloud** computing environment with a combination of **cloud** applications, portals, chat-bots, and other Power **Platform** applications to streamline **customer** interactions.

*As a CRM Architect I have worked with the executive **management** to develop a set of challenges being faced by the company that can be addressed using Dynamics CE, develop a prioritized list of solutions, and manage the development and delivery of those solutions to the businesses.*

*As a **business** analyst, I have used a structured approach of interviews, workshops, demonstrations, and mockups to identify, track and deliver a set of **business** requirements/user stories used, function and technical design documents used for project delivery.*

*As a QA **Lead**, I have designed QA Programs, Test Plans, Test Scripts, and metrics to identify defects and verify defect resolutions to maximize the value provided by the Overall Quality Program.*

*Led 4 projects moving the **customer** from Dynamics On-Premises to a **Cloud-Base** Dynamics 365 **Platform***

Set up the Power App Center of Excellence toolkit for 7 customers and worked with the deployment team to write appropriate policies and procedures for its use to maximize business impact of the PowerApps investment.

Repeatedly utilized the Dynamics Universal Scheduler to automatically schedule custom entities within Dynamics CE automatically based on a set of skills defined in the system.

Led successful deployments of the Customer Master and/or Product Master application in Dynamics CE 13 times from 5 different platforms.

Demonstrable experience in international developments of multi-lingual, multi-currency CRM applications and portals.

Deployed Dynamics 365 CE and Microsoft Portals requiring dual-factor, federated user authentication.

EXPERIENCE:

AVANTIICO, SAN DIEGO, CA APRIL 2023 TO NOVEMBER 2024

CAPACITY, LLC

Delivered a Power Pages Customer Portal providing visibility to invoices from multiple Dynamics F & SC legal entity by creating custom pages using Liquid Templates and Java Scripts to provide access to Invoices, Payments, Balances and Credit Memo Request Creation, Management and Appeal. Additionally, the portal provided access to Customer Support Cases and Knowledge Articles.

Established security roles and web roles to align with the visibility requirements outlined by the customer.

Converted the IP created for Capacity, LLC and created a set of standardized Portal Quick Start product offering for Avantiico by genericizing and standardizing naming conventions within the Portal's supporting applications.

Converted the Capacity LLC Portal from the standard portal template and security model to the enhanced security mode with a new Power Pages Template.

Wrote 5 **marketing** web articles discussing the advantage of using Power Pages Portal within the Microsoft Dynamics ecosystem.

RSM US, TAMPA, FL

OCTOBER 2021 TO MARCH 2023

Selected **Customer**/Accomplishments*

Wrote **Java** Scripts to extend the functionality of Dynamics model-driven applications.

Delivered Power Apps that integrated to Microsoft F&SC environment to allow the ordering of supplies

Developed a Power App used to simplification of week-end and month-end processing within F & SC.

Utilized F&SC Dual-Write functionality to synchronize records between Dynamics CE and F&SC

Configured OAuth authorization for federation to Dynamics Environment.

Managed security roles for both model-driven and canvas PowerApps

*Cannot identify customers due to NDA.

MICROSOFT, DYNAMICS CRM, REDMOND, WA MAY 2015 TO MARCH 2021

US DEPARTMENT OF JUSTICE

Set up and managed the security model as well as the federated logins required by the portals deployed.

Developed a portal, with its federated login to other federal government login credentials, allows an application for benefits to be submitted to the Public Safety Officers Benefit Program, collecting both the application and attachments into an environment where multiple DOJ Employs can access, review, and approve their section as soon as the required information is provided. This system replaced a manual

system where all the information was stored in a paper file that passed from one individual to another during the **process**.

The new system reduced the time require to complete Freedom of Information Act Requests by 30% since the users no longer need to make a manual copy of the file, before beginning their review.

CITY PLANNING OFFICE, CITY OF NEW YORK The portal allowed planning applications to be submitted, updated and tracked after their submissions to the NYC Office of City Planning. This project replaced a manual, paper-based **process** with an automated **process** that stored the submitted documents digitally, allowing faster and easier updates of the required information.

The solutions provided Account and Contact **Management** along with deduplication for selected entities.

TORONTO TRANSPORT COMPANY

Extended their current **customer** service application to extend it to the Wheel Trans Department which schedules and manages transportation request for people with physical and developmental challenges.

PREMIER INC, CHARLOTTE NC

Designed and implemented Account and Contact **management** extension for a **business process** re-engineering effort that converted one **business** unit's Siebel Application and loaded it into the existing Dynamics 365 environment.

DEPARTMENT OF NATIONAL DEFENSE, OTTAWA CANADA

In a highly secure environment, extended the standard Dynamics 365 – SharePoint **Integration** automatically manage access to the files, so that only the entity owner and **sales** team can access the file.

Developed Power App Desktop flows.

ROYAL SHELL, HOUSTON, TX

Managed QA Testing on US English language solution being tested in 5 North America-based refineries.
