

YOSEF GIRMAY

(Guidewire Developer)

girmayym29@gmail.com +1 (214) 434 4899

SUMMARY

Detail-oriented and highly organized Guidewire Developer with over 8 years' experience, focus on the implementation of Integration and Configuration modules within Guidewire Billing Center and Policy Center, Claim Center demonstrating a strong proficiency in the field with Guidewire cloud environments.

SKILLS

Programming:	Core Java, J2EE, Spring, Spring Boot/MVC, Hibernate, JDBC, GOSU
Web Technologies:	REST, SOAP WS, Guidewire PC, BC and CC
DBMS:	Cassandra, Oracle, MySQL, MSSQL
Version Control:	Bitbucket, GitLab, GitHub
Methodologies:	Agile
IDE's:	Eclipse, NetBeans, IntelliJ, Guidewire Studio
Other tools:	JIRA, Jenkins, SonarQube, Rally

PROFESSIONAL EXPERIENCE

Guidewire Integration Developer (Farmers Insurance)

Jun 2021

to Present

Capgemini

- Proficient in integrating various components such as web services (REST and SOAP), Batch processing, and Messaging within the Guidewire full insurance suite (Policy Center, Billing Center, and Claim Center).
- Proficient in Guidewire Data Model, Business Objects, and Service Programs.
- Strong understanding of Guidewire best practices and development standards.
- Collaborate with internal stakeholders to conceptualize, develop, configure, and maintain intricate integrations and migration processes, utilizing Guidewire's software integration frameworks.
- Participate actively in the analysis and requirements gathering phases, contributing to the development of design specifications.

- Successful developed different APIs within Policy Center such as Autopay API, API for managing policy, SSN verification API, Home inspection service API
- Provide technical troubleshooting, support, and resolution for **Guidewire** application issues.
- Successfully implemented integrations, such as ACH one-time and recurring payment system integration in BC, check printing integration system in CC, and AWS S3 bucket file transfer integration.
- Expertise on the Billing center configuration of invoice, payment request and payment screen.
- Created check printing inbound and outbound integration of Claim Center with downstream systems.
- Implemented home financial feed for downstream systems using messaging system in claim center.
- Involved on all the areas of Claim center application such as FNOL, Claims creation, Incidents, Exposures, Activities, Claim Settlements and Claim closure.
- Highly skilled on various Claims lob's such as Personal Auto, Homeowners and Umbrella.
- Implemented EFT file transfer to the destination and pull from Source Folder in Claim center.
- Implemented Home Financial feed to downstream using messaging systems in Claim center.
- Delivered all enhancements with minimal defects and bugs.
- Contribute to the production support team by providing valuable suggestions and ideas in day-to-day activities.
- Operate in an agile environment, participating in daily scrum meetings to furnish project status updates.
- Leadership skills including team management and client interaction.

Guidewire Developer (Affirmative insurance)

Sept 2019

to Jun 2021

Technocraft Consulting

- Develop, configure, and implement **Guidewire** Claim Center solutions to meet client requirements.
- Excellent knowledge of Claim and Policy life cycle. Performed Integration testing, System testing, Regression testing and Performance testing of Claim Center, Policy Center and Payment manager in **Guidewire** application based on the business.
- Designed and developed inbound integrators for the Claim Center to accept EFT payments and bulk payments.

- Configured Batch processes, Work queues, Activities and Contingencies.
- Ability to design and develop **Guidewire** integration solutions.
- Collaborate with business analysts and stakeholders to understand project goals and requirements.
- Design and develop **Guidewire** Gosu code for customizations and enhancements.
- Implement **Guidewire** integration solutions with third-party systems using web services and APIs.
- Perform unit testing, code reviews, and debugging to ensure high-quality deliverables.
- Provide technical guidance and support to junior developers and project team members.
- Participate in project planning, estimation, and prioritization activities.
- Excellent problem-solving and analytical skills

Java **Developer (Army and Air Force Exchange Service)**

Aug 2018 to

Sept 2019

Technocraft Consulting

- Analyzed, designed, and translated Business User requirements into actionable development tasks.
- Implemented diverse Core Java concepts, incorporating Multi-Threading and Exception handling, to enhance various features.
- Created server-side applications using Spring, Spring MVC, Spring AOP, and Spring IOC.
- Integrated the Spring MVC framework seamlessly with the Hibernate framework.
- Designed and crafted Microservices utilizing Spring Boot, adhering to microservices architecture for exposing REST endpoints. Employed Hibernate for efficient database operations.
- Developed automated unit test cases for Microservices, leveraging JUnit, Mockito, and Sonar, and seamlessly deployed them in the Jenkins pipeline.
- Utilized GitLab for version control, resolving conflicts related to source code merging.
- Conducted thorough testing of REST endpoints using Postman and Rest-api-client (Testing Tool).
- Implemented debugging functionality within the application using the Apache Log4J framework.
- Maintained code quality gate, coverage, bugs, and vulnerability tracking in the Sonar dashboard.

Java Developer (MoneyGram)

Jun

2016 to Aug 2018

Technocraft Consulting

- Contributed to the design, development, and implementation of various J2EE frameworks, including Model-View-Controller, Spring, Hibernate, and EJB.
- Designed and implemented REST web services for address validation.
- Managed database persistence through JDBC.
- Created Web services utilizing XML, SOAP, and RESTFUL web services.
- Utilized JAXB for XML binding and employed a SAX parser for XML parsing.
- Executed object-relational mapping and Persistence mechanisms using Hibernate ORM.
- Developed JMS API utilizing J2EE package.

Java/J2EE Developer (Geico)

May

2015 to Jun 2016

Technocraft Consulting

- Evaluated user requirements and crafted appropriate diagrams using UML.
- Addressed bug fixes and implemented enhancements based on change requests.
- Implemented and seamlessly integrated Spring MVC with web services.
- Created Java-based SOAP services to consume data from the WSDL.
- Adhered to the agile software development methodology, specifically SCRUM.
- Conducted testing, installation, and troubleshooting for various software programs.

AFFILIATIONS/CERTIFICATIONS

- Specialist Certification - InsuranceSuite 10.0 Integration
- Specialist Certification - ClaimCenter 10.0 Configuration
- Specialist Certification - PolicyCenter 10.0 Configuration
- Specialist Certification - BillingCenter 10.0 Configuration
- Associate Certification - InsuranceSuite 10.0 Developer
- Guidewire Certified Specialist - InsuranceSuite Integration - From Aspen to Kufri

EDUCATION

Bachelor's Business Administration and Information Systems, Addis Ababa University, Addis Ababa, Ethiopia.
