

CHAD HARGROVE

PROFESSIONAL SUMMARY

Security Analyst with expertise in **cloud security**, data protection, and threat **management** across **Azure** and AWS. Skilled in **SIEM** and XDR tools like Sentinel One, CrowdStrike, and Cortex XDR. Proficient in data protection (Rubrik), network **security** (Palo Alto NGFW), and vulnerability **management** (Tenable Nessus). Adept at aligning **security** practices with industry standards, ensuring compliance, and enhancing incident response. Committed to continuous learning and adapting to evolving cybersecurity challenges.

PROFESSIONAL EXPERIENCE

Security Analyst & Incident Response Analyst

Delta Airlines September 2024 - May 2025

- Continuously monitored real-time alerts in CrowdStrike Falcon and SentinelOne for malware, ransomware, and lateral movement indicators.
- Analyzed malicious process trees and file executions using SentinelOne Deep Visibility to support root cause analysis.
- Used Expel Workbench to aggregate alerts and coordinate incident workflows across different tools.
- Performed detailed investigation of high-severity alerts, assigned incident severity levels, and initiated containment and remediation actions.
- Developed and maintained PowerShell scripts for automated collection of volatile data, system info, and memory artifacts during incident investigations.
- Conducted weekly reviews of endpoint policies to align threat prevention configurations with current threat intelligence.

Threat Intelligence and Email **Security**:

- Investigated and remediated phishing and business email compromise (BEC) threats using Proofpoint Email **Security**.
- Created YARA rules and email quarantine filters based on observed threat patterns to block suspicious content.
- Responded to Proofpoint CASB alerts to prevent unauthorized file sharing and shadow IT in SaaS applications.
- Worked closely with PhishLabs to enrich incident context using phishing intelligence feeds.
- Used Defender for O365 to track email delivery, malware scanning results, and user report submissions.

Cloud and Infrastructure Security:

- Used Wiz to perform continuous posture assessment on AWS workloads, including EC2, IAM, Lambda, and S3.
- Configured compliance frameworks in Wiz to audit against CIS benchmarks and flag misconfigured cloud assets.
- Reviewed cloud infrastructure logs in Sumo Logic and created correlation searches to detect privilege escalation, excessive API calls, or unapproved region usage.
- Deployed Microsoft Defender for Cloud to integrate Azure and AWS environments and enable centralized alerting and posture management.
- Worked with cross-functional teams to remediate security findings and documented action plans in ServiceNow.

Access Management and Policy Enforcement:

- Monitored access anomalies using PingOne and created reports to flag excessive login attempts and failed authentication events.
- Coordinated domain whitelisting and exception requests via GitLab pipelines, aligning changes with CAB review process.
- Used ServiceNow for tracking joiner/mover/leaver access control workflows and maintained audit trails for compliance reporting.
- Reviewed conditional access policies and MFA enforcement for alignment with Zero Trust principles.

Firewall and Network Security:

- Investigated network-based incidents by correlating Palo Alto NGFW threat logs with endpoint and identity data.
- Used Panorama to monitor policy changes, create firewall rule exceptions, and enforce segmentation policies.
- Participated in incident response table-top exercises and coordinated firewall changes during active threat containment.

Security Analyst
Internal Data Resources
2024

May 2022 to Sept

Cloud Security (AWS):

- Oversee security configurations for AWS services such as EC2, S3, IAM, and VPC to ensure best practices for identity and access management, encryption, and network security.
- Regularly monitor AWS CloudTrail logs to track API activity and detect unauthorized access or anomalous behavior.
- Implement AWS Security Hub and Guard Duty to automate security alerts and threat detection across AWS accounts.
- Manage IAM roles, policies, and multi-factor authentication (MFA) to enforce least privilege and ensure secure access to cloud resources.
- Use AWS Config to monitor and audit changes in AWS resource configurations and ensure compliance with security standards.
- Conduct vulnerability assessments on AWS workloads using Amazon Inspector and ensure that identified issues are remediated promptly.
- Set up AWS CloudWatch and AWS Lambda for real-time log analysis, automated responses to security incidents, and event-driven workflows.
- Proficient in analyzing metrics and data to inform security operations and decision-making.
- Ensure compliance with security frameworks like NIST or CIS through continuous monitoring and security automation.

Endpoint Security (Sentinel One):

- Deploy and configure Sentinel One Singularity to protect endpoints from malware, ransomware, and advanced persistent threats.
- Leverage Sentinel One Ranger for visibility into unmanaged devices on the network, reducing shadow IT risks.
- Utilize Sentinel One Vigilance to investigate and respond to detected threats, automating remediation where possible.
- Monitor threat landscapes using Sentinel One Deep Visibility, analyzing threat intelligence and indicators of compromise (IOCs).
- Perform real-time behavioral monitoring of endpoint activity to detect unusual patterns or unauthorized actions.
- Integrate Sentinel One with other security tools to enhance detection, investigation, and response workflows.
- Regularly review incident reports generated by Sentinel One and work with teams to enhance endpoint defenses.
- Conduct threat hunting activities using Sentinel One's telemetry data and threat intelligence feeds to identify advanced attack vectors.
- Triage ticket escalations via Service Now ticketing system

Mobile Device and Application Management (MDM/MAM):

- Managed device enrollments (Windows, iOS, Android) and deployed applications to mobile devices.
- Created and enforced compliance policies (e.g., OS version requirements, password settings, and device threat-level based on Microsoft Defender signals).
- Used conditional access policies to control access to corporate resources based on device compliance and security risk.
- Implemented Single Sign-On (SSO) across the organization using Okta to simplify the user experience and enforce secure access controls.
- Managed and configured MDM auto-enrollment for company devices to ensure secure device onboarding.
- Handled the lifecycle of devices, including enrolling, wiping, and retiring devices.

Endpoint Security Management:

- Integrated **Microsoft** Defender for Endpoint with Intune for real-time **security** tasks, identifying and remediating risks on managed devices.
- Used **security** baselines to deploy best-practice configurations for devices to ensure they meet organizational **security** standards.
- Reviewed **security** tasks from Defender for Endpoint and acted on Intune to resolve issues.
- Application **Deployment** and Configuration:
- Deployed LOB (Line of Business) applications and store apps (iOS, Android, **Windows**) to devices via Intune, ensuring controlled access to apps for end users.
- Managed app protection policies to secure corporate data in mobile apps without requiring full device **management**
- Integrated Okta with **cloud** environments such as AWS and **Azure** to ensure seamless identity federation and role-based access **management** (RBAC).

NOC Analyst

ServIT

August 2019 to April 2021

- Set up network printers and performed **software** deployments.
- Monitored network traffic and system performance using tools such as Zabbix to identify and resolve network issues
- Managed and prioritized alerts through a ticketing system such as ServiceNow ensuring timely resolution of network issues.
- Documented network changes, incidents, and resolutions in technical reports to maintain accurate operational records.
- Generated daily, weekly, and monthly reports on network performance, outages, and resolution times to present to senior **management**.
- Monitored traffic logs and system health using the Palo Alto Panorama **management** console, ensuring firewalls are performing optimally and securely.
- Managed and updated firewall policies to align with business **security** requirements, ensuring that only authorized traffic was permitted. Monitored wireless network health using Aruba Central, ensuring uptime and troubleshooting issues like signal interference, user connectivity, or bandwidth bottlenecks.
- Ensured alignment of **Security** Operations with industry standards such as NIST, SOC2, and ISO 27001.
- Led training sessions and provided mentorship for **Security** Operations and Incident Response teams.
- Optimized **SIEM** correlation rules and managed their lifecycle for enhanced threat detection efficiency.
- Hands-on experience with infrastructure-as-code tool Terraform for **cloud security** automation.

Help Desk Analyst Tier 1

Apex Systems

March 2018 to January 2019

- Managed Break/Fix situations.
- Conducted decommissioning of devices for surplus or re-imaging purposes
- facilitated new hire onboarding by configuring Dell Optiplex 5090 workstations
- set up network printers and mapped them using IP address
- Handled BitLocker Recovery Key Request and Data Loss and Recovery tickets.
- Effectively oversaw and organized AutoTask ticket queue, guaranteeing prompt resolution of service requests and incidents, all while upholding superior levels of customer satisfaction.
- Assisted with user account **management** tasks, including password resets, access provisioning, and account deactivation in Active Directory.
- Effectively used remote tool Bomgar to resolve desktop and laptop issues quickly.

EDUCATION and CERTIFICATIONS

Hinds Community College - Raymond, MS - BA in Computer Science

Palo Alto Networks Certified **Software** Firewall Engineer

Palo Alto Networks Certified Detection and Remediation Analyst

AWS Certified Cloud Practitioner

CompTIA Security+ Certification

Chad Hargrove

- Marietta, GA, US

Contact Information
