

David L. Overstreet

5648 118th Ave SE Bellevue, WA 98006 Phone: (206) 859-3604

E-mail: david_overstreet@yahoo.com

Professional Summary:

Network Design & Implementation Engineer with over 19 years of experience in **network** engineering & support. Over the past 10 years I have had increasing experience with **network** and services **implementation**, for data center & **wireless** networks.

Education & Training:

City University, Bellevue, WA, MBA received June 1999

City University, Bellevue, WA, Bachelor of **Science** received June 1996

Major: Business Administration

Cisco Meraki CMNA: 10/2016

Cisco CCNA Data Center CVN: 426555725869ANZM: 10/2016

Cisco CCNA R&S CVN: 392714593482JNYM: 11/2015

Palo Alto ACE: 2/2017

CompTIA A+ CVN: 1109498: 5/2000

CompTIA **Network+** CVN: 1346249: 7/2000

EXIN ITIL Foundations CVN: 536937: 12/200

Forescout CounterACT trained: 5/2018

Technical Experience:

TEK Systems @ Univar

3/18 –

6/18

Redmond, Washington

Contract **Network Implementation Engineer** – Short term contract

- Evaluated **network** hardware as pre-install step to implementing **Cisco** ISE.
 - Identified 111 **Cisco switches** that would need to be replaced.
 - Identified over 1400 devices that would require **IOS** upgrade.

- Created or upgraded (mostly created new) nearly 200 site drawings in Visio.
- Evaluated ForeScout CounterACT NACS product.
- Began rightsizing the **implementation** for both **Cisco** ISE and ForeScout CounterACT.
- Assisted with various **network** engineering projects, as requested.
- Peer reviewed & corrected **network** changes to be executed by the operations team.

Proliance Consulting @ Holland America Cruise Line

3/17 –

12/17

Seattle, Washington

Contract **Network Implementation Engineer**

- Configured firewall rules, interfaces, device objects, whitelists & NATing on **Palo Alto** 3020's (using Panorama) and Juniper SRX with multiple vSys' to add new services to either increase profits or to improve customer experience during a cruise.
- Creating VIPs, VIP monitors & device pools and nodes on F5 LTM's to expand capacity and service reliability.
- I was Responsible for **Cisco** Nexus & **Palo Alto design & implementation** for numerous projects & services that were implemented across the fleet, to include:

Teleradiology (a medical service)

TouchTunes (This included designing a services that included **troubleshooting** configurations on **Cisco** ISE, **Cisco** WLC & WGB configs)

Navigator (A service designed to sell shore excursions)

Jackpot Blitz & Jackpot Digital (two different types of electronic poker table systems)

Steiner SilverSpa (external access to our Vendor Steiner to manage their servers remotely)

- Configured and installed 5 sets of UCS 7000 series chassis to run **Cisco** Prime & **Cisco** ISE.
- Configured **Cisco** ISE for **wireless** management & AAA.
- Configured **Cisco** 5508 **wireless** controllers for ISE management & AAA.
- Configured **Cisco** Prime for **wireless** AP management.
- Configured & Installed replacement Riverbed's (CX1555's to CX3070's).
- Decommissioned the Seattle datacenter to complete office move.

Insight Global @ Amazon

9/16 – 3/17

Seattle, Washington

Contract Network Implementation Engineer

- Created load balancer rack infrastructures to expand capacity of Amazon's online store front.
- Worked with Technical PM's to determine scope, schedule & work load of project.
- I was responsible for tracking project progress.
- Reserved upstream connections for new Load Balancer racks.
- Built new router & load balancer configs.
- Configured new routers & load balancers.
- Troubleshoot setup issues.
- Validated new routers & load balancers.
- Work with end customer for project handoff acceptance.

Norwin Technologies @ Brocade (Short Term Contract)

7/16 –

8/16

Montgomery, Alabama

Contract Network Implementation Engineer

- Built new access routers for the new data backbone network for the State of Alabama to improve connectivity.
- Cutover 250 existing sites.
- Set up new site routers.
- Worked with state resource to get current site configurations.
- Loaded configs on new routers.
- Worked with on-site resource to bring sites up on new routers.

Veredus @ Walt Disney Internet Group

11/15

–6/16

Seattle, Washington

Contract Network Implementation Engineer

- Added and changed SRX Firewall rules to add or expand new web based services.
- Created VIPs on F5 LTM's to improve reliability of web based services.

- Created VIP pointers on F5 GTM's.
- Added and changed rules on Bluecoat proxies.
- Created and implemented **network** changes on **Cisco** Nexus hardware to add new services.
- Added groups and nodes to **Cisco** ASA Firewalls to expand services.
- Created new & improved process **documentation**.

Volt @ Providence Health

7/15 – 11/15

Seattle, Washington

Contract **Network Implementation Engineer**

- Worked on the business partner DMZ & datacenter migration project.
- Built new business partner DMZ.
- Planned migration of business partners to new DMZ.
- Expanded business partner access on **Cisco** ASA.
- Static NAT **configuration & troubleshooting**.
- Planned re IP of mobile mammography bus.
- Configured Swedish **network** devices for netflow **monitoring**.
- Built standard device templates for **Cisco** equipment.
- Configured Juniper router for IPSec tunnel termination using Juniper **Security** Director.
- Configured Juniper SRX & MX series routers & EX series **switches** on business partner DMZ.

ISymmetry @ Expeditors through WWT

9/14 – 6/15

Seattle, Washington

Contract **Network Implementation Engineer**

- Reviewed site survey documents and planned new warehouse builds.
- Managed projects from site survey to handoff to operations.
- Assisted local IS personnel in getting a site survey ordered.
- Created standards & standards document for vendors who would be performing site survey's
for Expeditors.
- Created Bill of Materials in accordance with a site survey & customer standard build part list.

- Coordinated Order & shipment of equipment to site for installation.
- Configured Cisco Prime to add new sites & floors.
- Configured & installed new equipment:
 - Cisco 1921 routers
 - Cisco 5508 wireless controllers
 - HP Procurve switches
 - Cisco 2602E APs
- Troubleshoot networking issues related to the new equipment.
- Troubleshoot wireless connectivity issues.
- Converted old Cisco 1242 APs from autonomous to LWAPP.

Denali AI @ Children's Hospital

1/13 – 9/14

Seattle, Washington

Contract Network Implementation Engineer

- Assist with the physical installation of networking hardware into the new building at the hospital.
- Troubleshoot networking issues related to the new equipment installation.
- Configured new switches & got them connected to the cores.
- Performed zero downtime switch moves in critical areas of the hospital that “could not go down”.
- Troubleshoot wireless connectivity issues.
- Maintained and configured Cisco IOS, Cisco Nexus & Brocade routers & switches.
- Managed & configured both Cisco & Meru wireless systems.
- Installed & tested Cisco wireless infrastructure in unique situations, to include:
 - Stairwells
 - Elevators
 - External building coverage
 - Helipad coverage

Teksystems @ Microsoft

10/11 - 1/13

Redmond, Washington

Contract Network Implementation Engineer

- Wrote & executed MOPs for configuration remediation on Cisco enterprise

class routers (Both **IOS** & Nexus operating systems).

- Planned complex changes, gathered necessary resources, coordinated teams & executed successfully on planning.
- Created many MOP templates that are still in use.
- Trained new team members on organizational process.

Vaco Technologies @ T-Mobile

10/08 -

10/11

Redmond, Washington

Contract **Network Implementation Engineer**

- Created work orders & **configuration** scripts for **Cisco** carrier class routers / **switches** to be executed by operations team.
- Configured 7600, 6500, 4900 series devices.
- Configured F5 Big IP's 6900, 6400 & Viprion series LTM's (initial setup configurations only).
- Configured **Infoblox** 1800 series devices (initial setup configurations only).
- Configured BGP, OSPF, Route maps, prefix lists, HSRP & GLBP.
- Managed internal customer expectations through complex process changes.
- Worked on large scale / carrier class IP implementations interfacing to telco equipment.
- Individual contributor in multi-team projects.
- Coached junior team members with new process changes & **Cisco** specific training.
- Wrote all **Cisco network** configurations for a nationwide Alcatel MGW SIP VoIP projects.
- Created and tracked 1920 /29 networks for new services listed in main projects below.
- Tools Used: Visio, Granite, IP Control

Main projects:

- Ericsson & Nokia RNC – UMTS (IP router configs only)
- Alcatel call server & media gateway refresh (new installs & hot slides, MGW rehome & MGW recable – IP router configs only). This project saved T-Mobile over \$50MM per year in telco transport costs.

This project spanned:

55 sites

Configs for 126 **Cisco** 7600 series routers

381 Alcatel devices (68 call servers & 313 media gateways)

- Alcatel MGW VoIP/SIP **implementation** (This project saved T-Mobile over \$3MM per year in telco transport costs).

Wrote all **Cisco network** configurations for a nationwide project that would allow T-Mobile to get rid of their entire ATM **infrastructure** & move **it** all over to IP on Higher bandwidth, lower cost circuits.

This project spanned:

55 sites

Configs for 126 **Cisco** 7600 series routers

313 Alcatel media gateways.

VerizonBusiness @ Weyerhaeuser

7/08-9/08

Federal Way, Washington

Contract **Network Implementation Engineer**

- Designed **Cisco** Centralized **wireless** systems to be installed at multiple sites.
- Designed & configured Point-to-Point VPN solution from Mumbai India to Denver Colorado.

- Manage & maintain **networking** equipment.
- Configured 7600 & 6500 series devices.
- Configured spanning tree on a per VLAN basis.
- Re-IP'd WAN links.
- Wrote scripts for changing SSID's on **Cisco** AP's & assisted in managing the process.
- Updated site **documentation**.
- Wrote scripts for post divestiture switch **configuration** clean up.

Zango

11/07-6/08

Bellevue, Washington

Network Engineer

- Manage & maintain **Cisco Wireless** system (WLSE).
- Managed **network** devices using **Cisco** Works.
- Backed up **network** devices using **Cisco** Works.

- Setup & configure Cisco ASA 5510 from scratch.
- Configured Juniper Netscreen firewalls.
- Upgraded OS on Netscreen, SilverPeak & Cisco devices.
- Managed & maintain Cisco Call Manager.
- Managed & maintain all networking equipment.
- Troubleshoot WAN connectivity issues.
- Implemented wireless PEAP authentication.
- Setup Cisco works to backup all Cisco devices.
- Managed SilverPeak WAN Accelerators.
- Documented Network using Visio.
- Managed companies IP address scopes.
- Suggested improvements to network design.
- Installed, troubleshoot & replaced network equipment as necessary.
- Managed projects for the team that I am a contributor in.

VerizonBusiness @ WAMU

12/04 -

11/07

Seattle Washington

Network Engineer III

- Designed, implemented & managed Cisco Centralized Wireless system with over 300 LWAPs.
- Implemented VoIP Pilot Program.
- Managed & monitored network devices using Cisco Works.
- Configured 7600 & 6500 series devices.
- Configured spanning tree on a per VLAN basis.
- Created work level instructions for how to monitor wireless system for NOC personnel.
- Created impact assessments & scripts for adding access layer devices to the network.
- Engineered configs for addition & deletion of devices on the MAN.
- Assisted in the design & implementation of the main data center expansion.
- Designed & implemented configs for the addition of Subnets, VLANs, routes & ports to support the addition of new hardware.
- Installed, troubleshoot & replaced network equipment.

- Managed projects for the team that I was also a contributor in.
- Created impact assessments in high risk situations.

David Overstreet

- Bellevue, WA, US
