

Evens Guerrier

Mid-Level Security Engineer

As a Security Analyst, Evens plays a critical role in safeguarding company's digital environments. Conducts a thorough risk assessment to ensure its security implications are properly managed. Actively monitor network activity and analyze alerts—investigating true positives to assess potential threats and closing false positives to maintain operational efficiency. Works extensively with Azure, managing both domain-joined computers and devices connected to Entra ID. Oversees mobile device management via Intune, ensuring seamless security integration. His responsibilities extend to patching all servers, establishing domain controllers from the ground up, organizing OUs, and implementing group policies for structured access control. Security hardening is a top priority for Evens—he configures password policies enforcing a 15-character requirement and implemented multi-factor authentication (MFA) on Outlook and workstations for additional protection. Additionally, he defines firewall policies to bolster network security. To promote security awareness, he conducts phishing simulations, requiring employees who fall for simulated attacks to retake training to reinforce best practices.

CERTIFICATIONS

CompTIA Security+ / Nov 2022
CompTIA CYSA+ / June 2023
CompTIA SAP / June 2023
CCNA in Progress

PROFESSIONAL WORK EXPERIENCE

American West Construction **Cyber Security Analyst**

November 2024 - Current

- Monitor compliance information security and data privacy policies and other applicable policies that guarantee compliance with SOC1 Type 2 or PCI standards.
- Develop strategic and tactical roadmaps/plans to address issues identified, including people, processes, and technologies required.
- Provide recommendations for the continuous improvement of system and network security in the face of new threats
- Communicate with the software development teams and administrators on vulnerabilities and remediation.
- Risk-based vulnerability management using InsightVM (Nexpose) and Tenable
- Monitor and analyze SIEM (InsightIDR, LogRhythm, Azure Sentinel) logs and alarms
- Perform investigations and respond to threats using industry leading EDR tools.
- Using ThreatX for WebApp http/s traffic filtering, monitoring and blocking
- Participate in audits (security, compliance and intrusions) and coordinate the implementation of action plans
- Developing security plans and implementing security controls across environments.
- Manage and monitor Palo Alto, Cisco firewalls traffic logs
- Generate and review monthly logs reports with customers
- Maintaining firewalls, virtual private networks, web protocols, and email security
- Identify the best cloud architecture solutions to successfully meet the strategic needs of the business
- Modifying the technical, legal, and regulatory aspects of the system security

Brown & Brown**SOC Analyst****January 2021 – November 2024**

- Generate and review monthly logs and Alert reports with customers
- Performing firewalls rules and policies review
- Phishing emails analysis
- Packets analysis with Wireshark and TCPDump to detect malicious traffic into network
- EDR (CrowdStrike, SetinelOne)
- SIEM (Microsoft Sentinel, InsightIDR)
- Threat Intelligence (The HackerNews, SANS NewsBites, etc) to keep up with current threats
- Run diagnostic tests and analyze data to spot threats to computer systems

Care Synergy Associates**Associate IT Manager,****January 2019 – January 2021**

- Managing Windows, Linux, and Mac systems
- Maintaining firewalls, virtual private networks, web protocols, and email security
- Managing/troubleshooting SonicWall/Meraki based network
- Upgrading, installing, and configuring application software and computer hardware
- Troubleshooting and providing technical support to employees
- Creating and managing system permissions and user accounts
- Performing regular security tests and security monitoring
- Maintaining networks and network file systems
- Overseeing the annual IT budget and ensuring cost-effectiveness
- Selecting and purchasing new and replacement hardware and software, when necessary

Nissan North America**Jr System Admin/Helpdesk Supervisor****July 2014 – January 2019**

- Manage ticketing system to ensure service levels are maintained
- Manage and monitor internal assets to ensure accurate inventory records
- Work with software and hardware vendors
- Evaluate and modify system's performance
- Maintain integrity of the network, server deployment, and security
- Maintain network servers such as file servers, VPN gateways, Intrusion Detection Systems
- Manage and monitor VMware vSphere Hypervisor (ESXi 6.5)
- Ensure software is patched and able to protect from threats
- Make recommendations for mitigating identified risks
- Coach the helpdesk staff
- Onboard new hires

Unibank Haiti**IT Security Technician****September 2009 – January 2012**

- Manage proxy server
- Manage identity and access to the proxy
- Monitor web and database servers
- Packets analysis with Wireshark and TCPDump to detect malicious traffic into network

- Continuously updating company's incident response and disaster recover plans
- Conduct security assessments through vulnerable
