PROFESSIONAL SUMMARY

Jalen is a seasoned **Workday** Implementation Specialist with an impressive five-year track record in designing and executing complex projects across various modules, including Expenses, Banking and Settlement, AP, Customers, Procurement, and Inventory for Wellstar Health Network, Lehigh Valley Health Network, Advocate Aurora Health, and Cowiltz Gaming Company. His expertise extends to creating tailored solutions for clients, exemplified by his role in designing full-cycle implementations and customer model tenants for both healthcare and insurance and banking partners. Jalen has successfully managed intricate integrations, including EPIC, Lawson, and Birchstreet, G-Treasury, Expenses and AP legacy systems to **Workday**, showcasing his adaptability and in-depth understanding of legacy system transitions. He has a mild experience with custom **reporting** as he has helped design BIRT reports for AP requirements and custom reports for **security** requirements. Notably, he has demonstrated outstanding **leadership** in overseeing large-scale Kanban rollouts and effectively managing over 20 contractors across multiple sites. With a proven ability to lead design and customer confirmation sessions, Jalen is a valuable asset in ensuring the successful implementation and **optimization** of **Workday** solutions for clients in diverse industries.

EXPERIENCE

Workday Implementation Specialist
PricewaterhouseCoopers | Atlanta, Georgia

July 2019 - March 2024

- Successfully implemented Expenses, Banking and Settlement, AP, Customers, Procurement, and Inventory modules in Workday across multiple projects for Advocate Aurora Health Network, Lehigh Valley Health Network, Wellstar Health, and Cowiltz Gaming Company
- Executed EPIC, G-Treasury, and BOA integrations seamlessly, connecting Workday with vital healthcare systems and banking institutions to enhance data flow and accuracy.
- Designed a model tenant for Banking and Settlement, focusing on insurance and banking clients, to optimize processes and connecting Workday with vital healthcare systems and banking institutions to enhance data flow and accuracy.
- Enhanced client's PO 2-way matching process to a 3-way matching, building out desired needs within Workday platform.
- Facilitated client-facing workshops of 500+ key employees to educate on operations of the configuration through the development/testing phase of the prototype.
- Worked on-site alongside 15+ Hospital SCM Supervisor for multiple weeks during go-live environment to advise on warehouse management practices in order to optimally maximize software solution.
- Achieved client outcomes utilizing BIRT report in Workday to address client requirement for tri-fold check printing layout.
- Facilitated legacy system to Workday migration for a cross-state healthcare network, overseeing SCM configuration, discovering business needs and leading Procure-to-Pay design sessions.
- Conducted configuration reviews via weekly check-ins with client and managed the transition from legacy systems, ensuring a smooth and efficient process.
- Spearheaded a Kanban rollout in the Supply Chain Management (SCM) domain, managing 20+ contractors and overseeing installation across 26+ sites and small clinics.
- Driving configuration as implementation lead for customer accounts, accounts payable, expenses, and banking/settlement for a large hospital network.
- Driving end-to-end configuration within implementations for Procure-to-Pay and Inventory management design with Healthcare and Gaming partners, conducting design sessions, confirmation sessions, and software testing.
- Conducted Delivery Assurance reviews for customer accounts and accounts payable configuration for health care network.

- Oversaw communication pertaining to modules and reported to project manager as implementation lead during **Workday** implementation for a "US Top 12 Largest Integrated Health Network," ensuring a seamless transition and enhanced functionalities for the client.
- Provided 1-on-1 go-live support for SCM supervisor and procurement network within hospital as lead contact to troubleshoot **configuration** and provide educational support, ensuring a smooth transition and optimal system performance.
- Facilitated project **management** procedures during stand-ups with C-Suite professional utilizing project **management software**, such as JIRA and Concourse.
- Analyze **business** needs to provide unique client solution that enhanced **business** operations and achieve goals and successfully transferred data over via EIB files uploads/data migrations.

COMMUNITY SERVICE
