

WORK SUMMARY

- Over 8 years of **IT Experience** with 6 years of **experience** in **Robotic Process Automation (RPA)** and expertise in **UI Path** with full project **development**, implementation and **deployment** in agile-scrum.
- Proficient in all phases of **SDLC** such as **requirements** gathering, solution designing, coding, **testing**, debugging, documentation and implementation using **UI Path**.
- Hands on in creation of Email, Excel, Image, **process** automations in **UI Path**.
- Hands on **experience** in managing robot's workloads using **UI Path** Work queues.
- Hands on **experience** on **Blue Prism** for developing back office robots.
- Experienced in using **UI Path** Studio, Orchestrator, Screen, Data & **Web** scraping technique.
- Hands-on **Experience** with Queue Configurations, Monitoring, Internal **Blue Prism** Work Queue Actions, Exception handling, efficient use of stages, blocks, data types, Session, and environmental variables for processing of **Business Process** diagrams and **Process** flow charts using **RPA** tools.
- Performed stress test for **BOT scripts** to prove **scalability** and stability of **RPA** code.
- Experienced in a fast-paced Agile **Development** Environment including Test-Driven **Development (TDD)** and Scrum.
- Strong **user** interfaces **development experience** using **JavaScript**, **HTML**, **CSS**, and **Bootstrap**, Custom tag libraries, **jQuery**, **Swing** **API** and **ASP.net** framework.
- Extensive knowledge in database module **analysis**, **design** and developing reports/dash boards using **SQL**, **PL/SQL** and other tools under **Oracle**, **MySQL** and **SQL Server**.
- Hands on **Experience** in creating **PDD (Process** Definition Document) and developed respective **SDD (Solution** Design Documents).
- Strong analytical, problem-solving & **programming skills**, cohesive team worker with exceptional planning & execution **skills**

PROFESSIONAL EXPERIENCE

RPA Developer

United Health Group

November 2023 - Present

Software Developer

CAI – Computer Aid Inc.

October 2023

December 2021 to

RPA Developer

Magellan Health Services - New York, NY
2021

April 2020 to Nov

Project: Magellan Health Services, Inc. provides the high quality, cost-effective specialty health care management services to government agencies, corporations and health plans in the country. Its Medicaid administration services include pharmacy benefits administration, medical management information services, fiscal agent services, and healthcare management services. The process involved performing gap analysis, compiling the results, impact assessment, and designing new screens for system. It also involved the implementation and configuration of Enrolment, Billing, and Claim Payments.

Responsibilities:

- Designed and Deployment strategy of RPA under AWS -EC2 with bot's execution in parallel
- Performed UiPath control room installation with a clustered approach along with disaster recovery setup.
- Generated external scripts using VBS, VBA, and HTA and integrated with UiPath to achieve process automation
- Performed stress test for bot Scripts to prove the scalability and stability of RPA code.
- Worked closely with Process SME's to translate process into detailed design documents and educated SME's to work with Bots in production. Worked on Image comparison using Image recognition in UiPath studio.
- Used UiPath Orchestrator for deployment, monitoring, and management of UiPath Robots automation activity.
- Explained how UiPath Orchestrator works and keeping up with updates of and how to achieve the best product with efficient use of orchestrator and how UiPath will suit for the ongoing project and lessen the human involvement in repeated and time-consuming tasks and increase work efficiency.
- Implemented all the Basic, Desktop, web recordings using numerous activities and flow charts using UiPath.
- Worked with the Business Analysts in identifying and defining the requirements.
- Developed and configured Automation processes as per the technical design document (TDD) to meet the defined requirements. Create and integrate features for our enterprise software solution using UI Path RE Framework.
- Built some solutions by utilizing UiPath tool and further maintain technical responsibility for project delivery as the sole technical resource on a project.
- Worked on different modules of Epic such as Ambulatory EMR, Registration, Eligibility, Scheduling, Billing, Utilization and referrals, and Reporting. Prepared test Data sets and performed data testing using the PL/SQL scripts.
- Created Functional Requirements Documents (FRDs) for a Robotic Process Automation project, based on business process design discussions with business stakeholders.
- Performed tool evaluation and feasibility to help in selecting suitable UiPath tool for RPA implementation.

RPA Consultant

Northwell Health, NY
2020

July 2018 to March

Project: PDW (Payer Data warehouse): The project involves building of Payer data warehouse from the scratch for North well health. This warehouse would be used for Care Coordination, Performance Measurement, Outreach & Engagement and Innovation. And also it provided the ease to use analysis capabilities for business users, supported by BI Data marts for user friendly reports and dashboards. Many of the valued added capabilities were added in the warehouse which improved overall quality, productivity accuracy of health care information required for patient care and business improvement. This project is implemented based on SDLC Agile Methodology.

Responsibilities:

- Involved in implementing solutions in Robotic Process Automation using UiPath.
- Involved in developing robots using UiPath.
- Implemented End to End Robotic Process Automation (RPA) using UiPath.
- Broke down processes into reusable objects using Object studio and utilized them to build processes in Process Studio efficiently. Extensively worked on a debugging application for fixing bugs and Production support
- Provided Exception handling at every possible scenario for a robust error-free development.
- Worked closely with Process SME's to translate process into Process Definition Document (PDD) & Solution Design Document (SDD) and educated SME's to work with bots in production.
- Created Object Design Instruction for a clear understanding of the activities performed during development. Made sure every small step is documented to remove ambiguity.
- Created reusable automation framework with Meta-Bots and reusable libraries with data externalization for RPA implementation. Performed stress test for bot Scripts to prove the scalability and stability of RPA code.
- Performed process assessment, RPA feasibility of processes involving the web, mainframe, and Windows-based applications. Developed robotic bots using Blue prism to automate SAP process which was done using manual interference.
- Performed tool evaluation and feasibility to help in selecting a suitable Automation tool for RPA implementation.
- Involve in project cycle plan for the data warehouse, source data analysis, data extraction process, transformation and ETL loading strategy designing. Involved with Data Warehouse team and generated reports using Oracle BI tool.
- Worked on the requirement gathering for the SQL and SSRS Reports and testing the report using UAT process against the data in the system. Analyzed and performed quality assurance to determine areas impacted by HIPAA 5010 and ICD 10 related data.
- Developed and configured automation processes as per the technical design document (TDD) to meet the defined requirements. Experienced in staging and deploying the automation solution into test and live environments.

RPA Consultant

Deutsche Bank, New York, NY

Feb

2016 to June 2018

Project: Deutsche bank is one of the largest financial institutions in the world. The organization is championing the use of Financial Services management as part of a customer retention and acquisition strategy. Deutsche Bank is implementing

RPA as its solution suite for processing. It includes all the Backend operations like capturing invoices, Daily Reports and order processing. To this end, business processes and requirements have been captured.

Responsibilities:

- Involved in all the phases of Software Development Life Cycle (SDLC) to develop this application with agile methodology.
- Configuring new UI path processes and objects using core workflow principles that are efficient, well structured, maintainable and easy to understand for further requirements.
- Implemented UI path user authentication by defining user roles, creating users and setting password policies. Worked on Image comparison using Image recognition in UiPath studio.
- Expert in providing solution on process automation for different Business Applications (Windows based, Browser based).
- Identifying and debugging the errors using Error Handlers, Solid Design, Coding, Testing and Maintain the RPA's (Robot's).
- Creating and documenting test procedures and scenarios for Pre-UAT phases supporting the operational teams during UAT and rollout Phases.
- Used UI path Orchestrator for deployment, monitoring, and Management of UiPath robot's automation activity.
- Implemented all Basic, Desktop, web recordings using numerous activities and flow charts using UiPath.
- Demonstrate work experience in using different activities in UiPath, mainly on Database, Web and Windows Applications, Excel, PDF etc.
- Implemented Data Access Layer utilizing Entity Framework to connect, update and retrieve data from SQL server.
- Utilized Team Foundation Server (TFS) as Source Control and Document Management.

Business Consultant / Analyst

AmSouth Bank - Silver Spring, MD
2015

Aug 2013 to December

Project: AmSouth is a leader among regional banks in the Southeast in several key business segments including consumer and commercial banking, treasury management, small-business banking, mortgage lending, equipment leasing, annuity and mutual fund sales, and trust and investment management services. The project involved the Enhancement of the current Personal Financial products by advancement of the present web application and implementation of a new IVR (Interactive Voice Response) system that allows account holders to access their Checking, Savings or Ready Reserve accounts, to pay bills, transfer funds or get account balances over the phone without actually having to speak with a customer representative.

Responsibilities:

- Facilitated Joint Requirement Planning (JRP) sessions with SME's in understanding the Requirements.
- Extracted the Business Requirements from the end users keeping in mind their need for the application and prepared Business Requirement Documents (BRD) using Rational Requisite Pro.
- Participated in development, enhancement, testing and implementation of IVR applications, routing logic, CTI, reporting and associated integration to backend systems.

- Used CMTS (Change Management Tracking System) to keep track of requirements in progress, and estimated and actual time for requirements. Assisted in developing the test scripts of the IVR application.
- Assisted with Integration of telephony systems with other call center applications such as Computer telephony integration (CTI), Interactive Voice Response (IVR). Created Data Structuring, Data Modeling, Data Mapping and Data Flow Improvement.
- Created and managed Project Templates, Use Case Project Templates, Requirement Types and Traceability Relationships in Requisite Pro. Prioritized, planned and managed multiple projects using Primavera Project Planner Tool.
- Involved in creating automated Test Scripts representing various Transactions, Documenting the Load Testing Process and Methodology. Created meaningful reports for analysis and integrated the Performance Testing in the SDLC.
- Developed and managed Project Plans and Schedules, managed resolution of Project issues and conflicts, interacted with team members and external systems. Used Traceability Matrix to track business requirements and business rules to Use Cases.
- Conducted Functional Walkthroughs, User Acceptance Testing (UAT), and supervised the development of User Manuals for customers. Followed the RUP methodology for the entire SDLC. Used MS Project for status reporting and planning.
- Worked as a User/Customer advocate and negotiated with user as well as with developers and management staff to resolve any requirement conflict to bridge the Gaps between IT and Business.
- Tested the final application for Usability testing to verify whether all the User Requirements were catered to by the application.

Education:

- Bachelor of science in Finance 2011
(University of Texas at Dallas).
- Master of Business Administration 2013
(Johnson and Wales University, Providence, Rhode Island).

Certification:

- UI Path Certified Advanced RPA Developer Issued Mar 2022. No Expiration. Candidate ID: UIP00187014
- Completed UI Path Diploma certificate In Studio, Orchestrator, Document understanding
