SUMMARY

With more than 20 years in the information technology industry, I have a wide range of experience providing mainframe development expertise, specifically in the areas of developing, documenting, coding, modifying, testing, and implementing complete business technology solutions. My commitment to customer satisfaction, confidence, attention to detail, and ability to grasp concepts quickly are proven strengths.

My most recent employment was with Yellow Corporation, where my primary role was supporting their Invoicing application. Yellow was still undergoing its mainframe Modernization project, which aimed to convert its existing **COBOL**/CICS/DB2/MQ/Model 204 environment to a Java/MQ/SQL Server environment. I also served as the team Mentor to the Revenue-Management **Support** group for all things related to the Modernization project. This assignment was remote, work-from-home.

My previous assignment was to YRCW, Yellow-Roadway Corporation Worldwide, where I worked on their mainframe Modernization project. This project aimed to convert their existing **COBOL**/MQ/Model 204 environment to a Java/MQ/SQL Server environment. This assignment was remote, work-from-home.

Before that assignment, I worked with the Texas Juvenile Justice Department in Austin, Texas. While there, I reverse-engineered their 3270 and Janus **web**-based Model 204 Correctional Care Systems. Responsible for reducing the ticket backlog for the CCS/CCSW application to

zero. Responsible for new and ongoing security issues related to the CCS/CCSW application. This assignment was remote, work-from-home.

I have received commendations for my ability to work with others at all levels, but I also work exceptionally well alone. Both modes require that I communicate effectively and use good project coordination skills, especially since I am frequently called upon to multi-task.

EXPERIENCE SNAPSHOT

INDUSTRY

- **Health Care**
- **Education**
- **Transportation**
- **Health Insurance**
- **US Military**

TECHNICAL SPECIALIZATION

- **Database design**
- **File optimization**
- **Programming**
- **Program optimization**
- **Analysis**
- **Debugging**
- **Documentation**
- **User training**

TRAINING

- **Class Design**
- **Presentation**

TECHNICAL EXPERTISE

Hardware:	IBM-compatible mainframes, MS Windows-compatible PCs
Operating Systems:	MS Windows z/OS (JES2), OS/390 MVS/XA/ESA (JES2), OS/MVS (JES2), OS/VSE, VM/SP, OS/SVS (HASP), OS/VS1 (RES), VP/CSS, OS/MVT (HASP), DOS, z/VSE
Software	COBOL, Assembler, FORTRAN, RPG (I & II), Model 204 (User Language, Dictionary/204, Fastload, Host Language Interface (HLI), Janus Web Server), VSAM (KSDS), CSS, HTML4, xHTML, JavaScript, jQuery, SQL, DB2, CICS, ADABAS (Natural, ADAMINT, ADASCRIP, COM-LETE), IMS DB/DC (MFS, BTS), SUPERWYLBUR (WYLBUR), TSO/ISPF, CMS, ROSCOE, LIBRARIAN, PANVALET, OS JCL, OS Utilities, IDCAMS, TESTCOB, DATAMACS, TMS, RMS, FCS, UCC 7, SAS, SPSS, EASYTRIEVE, DYL-260, DATAMANAGER, OPTIMIZER III, SDSF, FILE-AID, PROFS, FISERV, ServiceNow, Teams, JIRA, Java, SQL Server, MQ, ChangeMan

PROFESSIONAL EXPERIENCE

Yellow Corporation, Overland Park, Kansas (remote)

Application Developer II – 05/21 to 07/23

- I continued to work on their application Modernization project, which aimed to convert their mainframe COBOL/CICS/Db2/MQ/Model 204 environment to a Java/MQ/SQL Server environment.
- I supported Yellow's Invoicing application.
- I was the team Mentor to the other members of the Revenue-Management Support team for all things related to the application Modernization project.

Yellow-Roadway Corporation Worldwide, Overland Park, Kansas (remote)

Consultant – 10/20 to 04/21

- I was assigned to their application Modernization project, which aimed to convert their mainframe COBOL/MQ/Model 204 environment to a Java/MQ/SQL Server environment.

Texas Juvenile Justice Department, Austin, TX (remote)

Contractor – 3/19 to 12/19

- Reverse-engineered their 3270 Janus **web**-based Model 204 Correctional Care Systems (CCS).
- Responsible for reducing the ticket backlog on the CCS/CCSW application to zero.
- Responsible for new and ongoing security issues related to the CCS/CCSW application.

Caliber Home Loans, Coppell, TX

Sr. Software Engineer – 7/17 to 5/18

- Developed new scripts and maintained existing scripts using the FISERV scripting language for a large home mortgage loan corporation.

Cognizant Technology Solutions – Kaiser Permanente, Pleasanton, CA (remote)

Sr. Programmer Analyst – 2/15 to 2/16

- Model 204 DBA/programmer analyst
- Participated in the design and test execution of the corporate disaster recovery plan.
- Was entirely responsible for all development and maintenance of **COBOL** programs using Model 204's Host Language Interface, using TSO/ISPF.

E.S. Rando Associates, Inc. – New York City Department of Education, New York City, NY

Consultant – 8/01 to 8/14

- In charge of JANUS **Web** development for the ATS system
- Developed proof of concept projects to show that Model 204 could generate **web** pages using:
 - SQL, **C#**, and .Net
 - **COBOL**, CICS, DB2, SQL, and HLI (Host Language Interface)

- Designed and co-developed a Scheduling system for submitting BATCH2 jobs within the Model 204 environment.
- Revised the Period Attendance common subroutines to allow for floating term start and end dates (new requirement for the 2005-2006 school year).
- Continued **support** for the High School Application System (HSAPS) and Office of Civil Rights (OCR).
- Developed a process to send output via FTP to a shared NYCDOE **Web** server.
- Redesignated and expanded the Regents Cohort process from a back-end system to the primary input and reporting mechanism for determining which students are expected to graduate in any given year.
- Redesignated the system that calculated the number of course cuts per student and reduced the run time from approximately 12 to about 1 hour.
- Redesignated the Janus **Web** demo for presentation to the new CIO.
- Review existing and proposed code and file changes for efficiency.
- Redesignated the Period Attendance File to improve efficiency. Supervised the project to revise all Period Attendance-related functions to accommodate new file design.
- Served as ATS (Automate The Schools) Technical Liaison for the High School Application System (HSAPS). This system supplies all eligible middle-school students with applications to the various High Schools in the City and processes the High Schools' responses.
- Wrote the ATS extracts for the bi-annual Civil Rights reports for the Federal Government.
- Primary **developer** for a feasibility study of mainframe-based **Web** implementation of ATS.
- Headed project to create new Division Reports for the school reconfiguration plan the Mayor and Chancellor implemented.
- Participated in the development project for the Related **Services** application.
- Was entirely responsible for all development and maintenance of **COBOL** programs using Model 204's Host Language Interface, using TSO/ISPF.

Consultant – 6/00 to 6/01

- Served as an application **developer** and DBA for three mainframe-based **Web** applications: Cargo Claims (customer complaints), Transit **Analysis** (textual and graphical statistical analyses showing on-time, early, and late deliveries for 13 months), and Manifest (showing shipment details).
- Learned Janus **Web** Server (Sirius Software **web**-enabling package for Model 204), HTML 4, and JavaScript.
- Was entirely responsible for all development and maintenance of **COBOL** programs using Model 204's Host Language Interface, using TSO/ISPF.

EDUCATION:

- El Centro College AA in Accounting
- El Centro College AS in Computer Science
