SUMMARY

An **Information Security** Analyst working for a Fortune 500 tech company. I have a passion for cybersecurity and a master's degree (MBA in Cybersecurity). I have earned industry relevant certifications like **Security+** and AVSE. Have experience using AlienVault, LogRhythm and Splunk **SIEM** tools. Also worked with SentinelOne and Carbon Black **Cloud** EDR solutions. Used Tenable for vulnerability **management** and PDQ Deploy for pushing upgrades. I have the enthusiasm to keep learning about technology. I am a United States citizen currently working from Houston, TX.

WORK EXPERIENCE

GLOBAL PAYMENTS INC.

WORKING REMOTELY

FROM HOUSTON, TX

Information Security Analyst

May

2024 – Current Date

- **Monitoring** the network using LogRhythm **SIEM** tool.
- **Monitoring** alerts using Splunk.
- On-call duty on rotation basis. Responding to paging alerts triggered by incidents.
- Tuning the alarm rules by creating exclusions in the LogRhythm console to reduce false positives.
- Troubleshooting when log sources fail to send the logs.
- Adding new log sources and retiring logs sources that are decommissioned. Configuring log sources for the **SIEM** tool to receive application, system and **security** logs
- Investigating the alerts received in Carbon Black **Cloud** EDR.
- Utilizing OSINT tools like AbuseIPDB, VirusTotal, Hybrid Analysis, IPVoid, BrightCloud, etc. to investigate the alerts.
- Vulnerability **management** using Tenable Vulnerability **Management** and Tenable **Security** Center.
- Vulnerability **management** using Qualys.
- Creating support tickets to escalate any issues encountered with vulnerability **management** applications to Tenable.
- Reviewing firewall changes.
- Reaching out to users with vulnerabilities on their machines, providing support to eliminate the vulnerabilities and pushing updates to **Windows** machines using PDQ Deploy.
- Using Jamf to deploy **software** (Nessus agent, Carbon Black **Cloud** agent, etc.) on Mac machines.
- Reviewing **SIEM** Dashboard
- Creating tickets using Jira whenever needed and tracking progress.

- Resolving issues related to machines not checking into the web filter (Zscaler).
- Discussing incidents that require further investigation with the team during daily team meetings.
- Troubleshooting machines that are not getting scanned by uninstalling/reinstalling and unlinking/relinking scanning agents.
- Building queries, dashboards, charts and pulling reports in Axonius.
- Worked on a project to determine whether a certain authentication method is used in the environment or not.
- Reviewing HTML files for suspicious or malicious data.
- Running commands in PowerShell and command prompt to retrieve data about users/hosts.
- Creating presentations and explaining to members of the **management** team.
- Conducted training for a new hire.

INSIGHT GLOBAL (CLIENT: LEVELBLUE)
AUSTIN, TX

WORKED REMOTELY FROM

Network **Security** Engineer

January 2023 – May 2024

- Worked at a 24x7 **Security** Operations Center.
- Monitored the customer network using AlienVault **SIEM** tool.
- Took inbound calls from customers, answered technical questions related to events and ongoing investigations.
- Monitored the SOC inbox and responded to emails.
- Conducted briefing session towards the end of a shift about important communications and handing off to the next shift.
- Acted as first level support for all **security** Issues.
- Analyzed real-time **security** incident(s) and determined whether it is a true positive or a false positive.
- Performed real-time **monitoring**, investigation, analysis, reporting and escalation of **security** events from multiple log sources.
- Raised true positive incidents to the next level for further action.
- EDR using SentinelOne. Utilized file hash values for eliminating, quarantining or un-quarantining files after utilizing OSINT tools to investigate.
- Adding file hash values to Blocklist or creating an Exclusion at Global, Account, Site or Group levels based upon file reputation.
- Escalated the **security** incidents based on the client's SLA and providing **information** related to **security** incidents by doing in-depth analysis of an **event**, providing recommendations regarding **security** incidents mitigation which in turn makes the customer's business safe and secure.
- Used filters to create reports related to an incident and adding them to an investigation.

- Contacted the customers directly in case of medium/high/critical priority incidents and helped the customer in the process of mitigating attacks.
- Monitored **security** systems and networks for anomalies.
- Investigated malicious phishing emails, domains, and IPs using open-source tools and recommended proper blocking based on analysis.
- Constantly learning about evolving internet threats to ensure the **security** of client networks.

SECURITAS (CLIENT:

ORACLE)

Austin,

TX

GSOC Operations Analyst

June

2022 – January 2023

- **Monitoring** alarms received from corporate locations across the United States utilizing CCURE and Lenel OnGuard **monitoring** platforms.
- Troubleshoot badge reader issues remotely.
- Dispatching **security** personnel to investigate the cause of an alarm.
- Creating tickets to get malfunctioning **security** systems repaired or replaced.
- Contacting all stakeholders within **security** whenever deemed necessary.
- Contacting the fire department for incidents related to fire alarms.
- Escalating **security** incidents reported by employees and contractors.
- Writing incident reports.

JPMORGAN CHASE & CO.

PHOENIX, AZ
