

DATA WAREHOUSING / ETL SPECIALIST / DATABASE (ORACLE / DB2 / SQL SERVER)

Certified Professional

SUMMARY

I have over 30 years of experience in developing large applications using SQL, PL/SQL, T-SQL, UNIX, Shell scripting, FOCUS, WEBFOCUS, SAS, and COBOL on UNIX, Windows, and mainframe platforms.

I have over 15 years of experience in a large IBM mainframe environment developing applications using COBOL, JCL, REXX, DB2 and SQL/DS.

I am an ORACLE Certified Professional (OCP). I have extensive experience as a DBA (both system and application in both Production and Development environments) using ORACLE, SQL Server, DB2, and Teradata.

I have in-depth experience in administering UNIX systems (AIX and SOLARIS). I have experience with Loss Prevention, Sales Audit, Banking, Airline, Accounts Payable, Inventory, G/L and Pharmacy Data Warehouse applications.

I have worked extensively with data modeling, database design, and data warehousing systems. Most recent ORACLE databases sized at 200TB+ using ORACLE V19c EXADATA.

TECHNICAL SKILLS

System Design & Development:	Analysis, Design, Development, Maintenance, Testing, Documentation, Implementation, User Training
Operating Systems:	UNIX (Sun Solaris, AIX), Linux, MVS, VM/CMS, DEC VAX, Windows Server
Databases:	SNOWFLAKE, ORACLE 19c, ORACLE RAC / EXADATA, DB2 V9.1+, TERADATA, SQL SERVER 2005 / 2008, FOCUS, DEC rdb
Languages:	SQL, PL/SQL, Transact-SQL, C, Java, Perl, Python, Pro*C, JavaScript, COBOL, HTML, Shell Scripting (KSH, Bash), XML, ISPF, PL/1
Database Utilities:	Toad, SQL Developer, SQL Server Management Studio, SQL*Plus, RMAN
ETL Utilities:	Pervasive, ab initio, Informatica
Reporting / 4GL Tools:	FOCUS, WEB-FOCUS, SAS, MicroStrategy, SQL*Plus
Industries:	Health Care (CVS). Banking (Bank of America), Airline (Air Canada), Loss Prevention (DataVantage)
Other Tools:	ClearCase, Control-M, Tivoli WS, NDM, Syncsort, ISPF

PROFESSIONAL EXPERIENCE

COMPANY: **CVS HEALTH**, Woonsocket, RI

TITLE: **ORACLE DATA WAREHOUSE** APPLICATION DBA

Sep 2013 to PRESENT

Responsibilities:

- Design and develop ORACLE SQL and PL/SQL applications in a large ORACLE V19c EXADATA 200TB+ data warehouse environment. This is a Pharmacy Data Warehouse holding current and historical script, patient and prescriber data (currently going back 20+ years), with largest tables having 20B+ rows.
- Strong database performance tuning skills for maintaining ORACLE applications processing 100 million+ daily transactions.

- Created and maintained AIX and LINUX shell script components used for ORACLE job execution. Supported and maintained over 1,000 daily, weekly and monthly database jobs.
- Converted large ORACLE SQL applications to SNOWFLAKE cloud database and to Google Cloud Platform as part of a corporate database migration initiative.
- Mentoring application teams and providing guidance to developers in all aspects of ORACLE and script development.
- Strong problem resolution skills in a constantly changing Production environment
- Strong data analysis, data modelling skills in a large data warehouse environment
- Strong ETL skills using a variety of tools. Almost all incoming data to the CVS Pharmacy Data warehouse is done using flat files and electronic data transfer from various internal and external systems.
- As part of CVS effort to move on prem applications to Cloud environments, migrated 100TB+ ORACLE Data Warehouse application to SnowFlake.

Environment: ORACLE V19c EXADATA, SNOWFLAKE, Python, GCP, KSH, Bash, AIX, LINUX, TOAD

COMPANY: PROFESSIONALS NETWORK, Citizens Bank, Cranston, RI

TITLE: CONSULTANT – TERADATA DBA / TERADATA SQL REPORT DEVELOPER

Sep 2012 to Sep 2013

Responsibilities:

- Create Teradata SQL to migrate reports from former SHAW accounting system to newly acquired AFS accounting system within the Commercial Lending organization of Citizens Bank. The AFS reporting database is Teradata V13.1. The former SHAW system was mainframe-based, so that direct migration was not possible.
- Created reusable Teradata views to extract data for common reports.
- Did performance management tuning on Teradata Reporting database to improve report performance. Re-organized Teradata database by adding appropriate primary keys and indexes.
- Created PL/SQL procedures to migrate ORACLE-based PACS system to use data from AFS reporting system. Included mapping and transforming data from prior SHAW accounting system into new AFS reporting system format.

Environment: TERADATA V13.1, OBIEE V10, ORACLE 11g2

COMPANY: OPTUM (part of UnitedHealth Group), Providence, RI

TITLE: CONSULTANT - PL/SQL DEVELOPER

Jan 2012 to Sep 2012

Responsibilities:

- OPTUM has a requirement to create versions of their production ORACLE instances for use as training platforms for organizations that are planning on becoming resellers of the various products that they market. These instances need to be fully functional copies that are HIPAA compliant.
 - Create a PL/SQL package that will create copies of all production objects in a new training ORACLE instance and then copy core FACT data to these training instances on a periodic basis.
 - Create a PL/SQL package to clone a single organization's data (within the application instance) to one of the target instances for training purposes. The cloned information needs to be obfuscated to satisfy HIPAA privacy requirements. As well all date / timestamp columns need to be adjusted (at the time of the copy) so that the training experience appears to happen within current time periods (while the training data may have been created last year, the requirement is that the training experience must appear to be as of today).
 - Integrate the PL / SQL packages with a JAVA web-based front-end to create a complete training solution for OPTUM applications.

Environment: ORACLE 10g / 11g, PL/SQL

COMPANY: Shawmut Design and Construction, Boston, MA

TITLE: CONSULTANT - PL/SQL DEVELOPER / TSQL DEVELOPER – ERP Data Conversion

Feb 2011 to Dec 2011

Responsibilities:

- Shawmut is migrating their legacy construction industry applications to a modern ERP system. The current applications reside in SQL Server 2008 databases. The target database is ORACLE 11g.
 - Map data from legacy application tables (TimberLine, Prolog, SalesLogix) to ERP (CMiC) requirements.
 - Develop TSQL procedures to extract data from legacy SQL Server apps into SQL Server staging tables.
 - Develop PL/SQL procedures / packages to import data from the SQL Server staging tables into ORACLE 11g.
 - Develop PL/SQL procedures / packages to validate and massage data to fit into ERP application tables.
 - Design and implement permanent data feeds from ORACLE ERP application to existing SQL Server apps.

Environment: ORACLE 11g, SQL SERVER 2008, PL/SQL, T-SQL, WINDOWS

COMPANY: DATAVANTAGE, Westborough, MA

TITLE: SENIOR DATABASE DESIGNER / DEVELOPER – ETL systems

Sep 2007 to Feb 2011

Datavantage is a subsidiary of MICROS RETAIL (one of the largest manufacturers of Point of Sale (POS) terminals) and develops and markets Loss Prevention and Sales Accounting (Audit) software applications.

Responsibilities:

- Designing, coding and maintaining SQL scripts and procedures for Datavantage's software applications. Created and maintained Korn Shell (KSH) for UNIX environments, and BATCH scripts in Windows Server environments, along with scripts written in Java and perl. The scripts are used to execute an ETL process that extracts data from various sources, transforms the data to meet application needs, and loads data into the application database.
 - Data source can be flat files, or data from an Electronic Data Warehouse (EDW), depending on the customer's specifications.
 - The target database is at the customer's discretion, and can be ORACLE, SQL SERVER, DB2 or Teradata.
 - Datavantage applications are designed to execute under UNIX (AIX, HP/UX, Solaris), as well as Windows Server, as per customer requirements.
- Responsible for creating, configuring and tuning ORACLE Enterprise Edition databases in-house and on client site, including RAC setups across multiple nodes, partitioned tables for high-volume data requirements, and using stand-by databases (Data Guard). Implemented database backups (RMAN) and failover and recovery procedures for these ORACLE databases. Platforms included UNIX (AIX, Solaris), Linux, and Windows.
- Converted complete ORACLE Datavantage application to DB2 SQL for a major client.
- Datavantage applications are designed to process high volumes of Point Of Sale (POS) transactional data. Data comes from a variety of sources (flat files, external databases) which are transformed and loaded into the customer's target database.
- Datavantage applications use KSH code in a UNIX environment for managing the task of loading data. The application ETL runs natively under IBM AIX, HP/UX, SUN Solaris, and MICROSOFT Windows (using the MKS Toolkit UNIX emulator environment). The data transformations are done using database procedures and functions (written in PL/SQL and T-SQL).
- Every customer has unique POS data requirements, and Datavantage applications are always customized for individual customers. I am responsible for custom design and implementation, including installing databases, designing and maintaining database code and UNIX code for customizations, and tuning and troubleshooting customer database issues. Every one of our installations is always tuned for performance - a process unique for each customer.
- I work in designing and developing ORACLE PL/SQL and SQL SERVER T-SQL procedures (and also converting SQL code between database platforms). As part of my responsibilities, I am an expert Korn Shell developer with experience in all major UNIX platforms (and creating common code that will run seamlessly on any of the aforementioned platforms without modification).

Environment: ORACLE 10g / 11g, SQL SERVER 2005 / 2008, DB2 V9.2, Teradata, AIX, HP-UX, SOLARIS,

Korn shell scripting, XML, PL/SQL, T-SQL, MICROSOFT Windows, MKS Toolkit, .NET

COMPANY: CIBER USA – CLIENT: CVS Corporation, Woonsocket, RI

TITLE: ORACLE DATABASE CONSULTANT / DEVELOPER

FEB 2007 to SEP 2007

CIBER USA is a leading consultancy and outsourcing company in the United States. CVS is one of the largest pharmacy health care companies in the United States.

Assignment:

- Develop PL/SQL package to extract log data from online Prescription (RX) Management System and Transform and Load that data to update a Master Patient RX, Address and Family Structure database. Coded ORACLE PL/SQL package (multiple procedures and functions, 5,000+ lines of code). Entered the project as the third developer. First two developers had been axed because of an inability to understand the requirements of the design document. Successfully completed assignment.

Environment: ORACLE 9i / 10g, PL/SQL.

COMPANY: BANK OF AMERICA, Providence, RI

TITLE: SENIOR DATABASE DEVELOPER

JAN 2001 to FEB 2007

Bank of America is the 2nd largest banking organization in the US. I was employed in the Risk Management Group.

Assignments:

- Migrate AIMS (Asset Information Management System) from DEC VAX / DEC rdb platform to UNIX / ORACLE platform.
- Convert Asset portion of Fleet AIMS system to Bank of America PIMS (Portfolio Information Management System).
- Convert Bank of America CRU system (Credit Reporting Utility) from AIX / SAS to Teradata data warehouse platform.
- Designed and implemented ORACLE database structure for the Fleet AIMS system. ORACLE database was RAC in clustered environment utilizing two AIX P640 servers. Created the UNIX infrastructure to migrate the Fleet Asset and Liability management systems (AIMS) application from VAX (using rdb database) to UNIX. Designed, coded, and implemented the UNIX code (using PERL and Korn shell scripting) to run all AIMS jobs. This included creating code in UNIX to completely emulate all of the functions that had been available under the VAX systems. Converted 50,000+ lines of rdb SQL to ORACLE PL/SQL. Converted over 100,000 lines of VAX FOCUS code to work under FOCUS/AIX and mainframe FOCUS.
- Migrated VAX FOCUS applications to WEBFOCUS integrating FOCUS databases with ORACLE databases via the FOCUS/ORACLE interface.
- Responsible for ORACLE and UNIX security design for AIMS application on AIX servers within the Fleet / Bank of America environment.
- Implemented Clearcase for AIMS and PIMS Source Code control.
- Implemented Tivoli / Maestro scheduling for the AIMS application.
- Installed and tuned ab initio ETL tool. Used ab initio to create a system to migrate Fleet LEASING data to Bank of America PIMS.
- Technical support (24/7) for all aspects of AIMS and PIMS (Asset and Liability management systems) on UNIX AIX and Solaris platforms, providing support to Development and Production Support teams (FOCUS, COBOL, PERL, Korn shell, application level).
- Directed the effort to migrate the CRU application database from a SAS-based configuration under UNIX to a Teradata relational database operating under the Bank of America "W" data warehouse. Worked extensively with all aspects of SAS and Teradata including the Teradata access tools.
- Optimize SQL queries for better performance.
- Created a UNIX scheduler to enhance the functioning of built-in UNIX crontab utility.

Environment: ORACLE RAC, SAS, Teradata, AIX, SOLARIS, DEC rdb, ab initio, shell scripting, PERL, JAVA, COBOL, MicroStrategy, FOCUS, WEBFOCUS, Visual Studio .NET, DEC VAX.

COMPANY: PINNACLE DECISION SYSTEMS, Quincy, MA**TITLE: SENIOR ANALYST / FOCUS CONSULTANT****SEP 1999 to DEC 2000**

PINNACLE DECISION SYSTEMS was a consulting firm specializing in Y2K work for customers using the FOCUS 4GL reporting system. I worked as a consultant with various clients.

- Designed and developed a Business Intelligence application for a large banking organization utilizing Oracle, RDB, and Cognos BI products (Impromptu and Powerplay) along with VBScript and Visual Basic. The data source was on a DEC VAX platform and the application was deployed to several remote locations over a Windows NT network.
- Responsible for maintaining in-house ORACLE databases, and providing support to various corporate project groups.
- For various clients:
 - Migrated a Human Resources application from a 1970s mainframe legacy platform to a 4GL environment.
 - Remediated 350,000 lines of FOCUS and WEBFOCUS code to make that code Y2K compliant.
 - Migrated a mainframe legacy (FOCUS and IMS) environment to a client server environment using Visual Basic and ORACLE.
 - Provided training for 4GL products (FOCUS) for several major organizations.
 - Converted a mainframe reporting system to a COGNOS IMPROMPTU based system reporting from ORACLE databases.

Environment: ORACLE, DEC rdb, VBSCRIPT, Visual Basic, FOCUS, WEBFOCUS, IBM mainframe, Windows NT, COGNOS IMPROMPTU, DEC VAX

COMPANY: AJILON, Austin, TX**TITLE: QA ORACLE DEVELOPMENT DBA****JAN 1999 to DEC 2000****Responsibilities:**

- Supported ORACLE Development environment for Quality Product testing team at BMC Software in Austin, TX.
- Responsible for installing and maintaining multiple versions of ORACLE (V7.3.2, 7.3.4, 8.0) in a mixed (SUN, HP, IBM UNIX) testing environment. QA team tested software interoperability between BMC software products and multiple UNIX environments.

Environment: SUN, HP, AIX, ORACLE V7 & V8, UNIX scripting

COMPANY: IBM GLOBAL SERVICES, Montreal, Quebec, Canada**TITLE: DATABASE ADMINISTRATOR (DB2 / ORACLE)****JAN 1992 to DEC 1998**

Employed as a DB2 DBA and ORACLE DBA and FOCUS DBA for Air Canada headquarters operations. IBM Global Services was the outsourcing provider for Air Canada IT functions.

- Primary responsibility was support of Air Canada's client/server database environment.
- Senior ORACLE database specialist for UNIX (IBM AIX and SUN Solaris) client/server systems, WINDOWS NT, Novell server, and OS/2 configurations. Mixed ORACLE 7.0, 7.1, 7.2, 7.3 and 8.0 installations using SQL*NET V1 and V2. Implemented ORACLE Parallel Server on IBM AIX for increased performance.
- Responsible for PRODUCTION support of Air Canada's Fares Pricing, Aircraft Stowage, Crew Management, and Pilot Scheduling applications.
- Responsible for all development relational database systems in the non-mainframe environment at Air Canada. Also responsible for selecting and configuring software in the client/server arena.
- Also devoted approximately 40% of my time as the senior IBM Mainframe FOCUS specialist at Air Canada. Provided PRODUCTION support for Information Builder's FOCUS database product, FOCUS/DB2 interface, and EDA/SQL multi-platform middleware product. Responsible for installation and support of Information Builders FOCUS and WEBFOCUS software for Air Canada's entire mainframe environment.

Environment: FOCUS, WEBFOCUS, DB2, on **IBM** mainframes. **COBOL**, JCL, REXX. **ORACLE** Parallel Server (RAC), on **IBM** RISC 6000 and Sun/Solaris UNIX platforms. **ORACLE** on WINDOWS servers.

COMPANY: INFORMATION BUILDERS, Montreal, Quebec, Canada

TITLE: SENIOR FOCUS CONSULTANT / TOP GUN

FEB 1991 to JAN 1992

INFORMATION BUILDERS is the vendor of the FOCUS and WEBFOCUS Business Intelligence products. They are one of the largest vendors of such tools world-wide.

- Provided senior consulting services to major organizations that use the FOCUS 4GL and reporting tool (including CN RAIL, CANADAIR, CBC). Also did database design and worked extensively in performance tuning of FOCUS on all platforms.
- Taught FOCUS courses for Information Builder's training division.
- Created extensive system prototypes with FOCUS for major VAR users of FOCUS.

Environment: FOCUS 4GL on **IBM** mainframes, VAX/VMS, UNIX, PCs, OS/2, DB2 and FOCUS/DB2 interface.

COMPANY: COMPUTERTIME NETWORK CORP, Montreal, Quebec, Canada

TITLE: MANAGER / **ORACLE TECHNICAL SUPPORT**

DEC 1989 to FEB 1991

COMPUTERTIME NETWORK CORP was the official distributor of all **ORACLE** products in Canada prior to the establishment of **ORACLE** CANADA in 1990.

- Managed a staff of six Technical Support specialists for a \$17M software company specializing in distributing **ORACLE** RDBMS in the Quebec market and in selling its own **ORACLE**-based software products.
- Responsible for all hiring, dismissals, and staff reviews. Designed and implemented Technical Support policy.

Environment: **ORACLE** RDBMS running on VAX/VMS, UNIX, PC-DOS, OS/2

COMPANY: MEDIS PHARMACEUTICAL, Montreal, Quebec, Canada

TITLE: DATABASE ARCHITECT

FEB 1989 to DEC 1989

- Managed the database function within MEDIS (Canada's largest pharmaceutical distributor with branches across Canada). Managed the **data** requirements of MEDIS. Defined the corporate **data** structure. Created and maintained the corporate **data** model.
- Responsible for supervising and reviewing physical **data** models, and design specifications produced by project teams. Developed naming and **data** modeling standards. Identified and recommended to management those techniques and productivity tools that were most beneficial to MEDIS. Provided in-house training for staff not familiar with the relational database concept and its use.

Environment: SQL/DS with QMF running under VM/CMS on an **IBM** 3090/150. Also using CSP, REXX, and ISPF as development tools.

COMPANY: BANK OF MONTREAL, Montreal, Quebec, Canada

TITLE: DATABASE ADMINISTRATOR / INFORMATION CENTER MANAGER

APR 1983 to JAN 1989

- Provided database expertise and advice on system usage, database architecture, database design, and **data** modeling techniques to Bank project teams (Human Resources Information Systems, Financial reporting, and on-line Customer Information).
- Identified ways to use and integrate personal computers into Bank projects.
- Planned, directed, and organized the activities of the Bank's Eastern Information Center (IC) serving users in Montreal and Eastern Canada. Managed a staff of four Information Analysts. Advised on management information requirements. Provided day-to-day user application support and problem resolution.
- Responsible for keeping up with the latest in Information Systems technology and for providing that information to the user

community.

- Database Administrator responsible for FOCUS, DB2, and the FOCUS/DB2 interface product.
- Consulted with Corporate Systems project teams on database use and design. Responsible for adherence to database standards and use of the Global **Data** Dictionary.

Environment: FOCUS, DB2, SQL/DS, JCL, REXX, Information **Engineering** Workbench (IEW), PC applications, TSO/ISPF, VAX, PL/I.

EDUCATION

Diploma in Computer **Programming** – Control **Data** Institute, Montreal, Quebec
 Course of study: BA / Political Science Major – Concordia University, Montreal, Quebec
 Course of study: Bachelor of Science program – McGill University, Montreal, Quebec

TRAINING

- ✓ **ab initio Administrator** - ab initio, Feb, 2004
- ✓ **ab initio Developer** - ab initio, Feb, 2004
- ✓ **MicroStrategy Narrowcaster Certification** - MicroStrategy, Sep/2003
- ✓ **MicroStrategy Administrator** - MicroStrategy, Jun/2004
- ✓ **ORACLE 9i New Features** - Oracle, Mar/2003
- ✓ **C for AIX Programming** - IBM, Feb/2003
- ✓ **Korn Shell for AIX** - IBM, Oct/2002
- ✓ **COGNOS Impromptu V5 Administrator** - Cognos, Oct/1999
- ✓ **Report Building with COGNOS Impromptu V5** - Cognos, Oct/1999
- ✓ **Advanced COGNOS Impromptu Reporting** - Cognos, Oct/1999
- ✓ **ORACLE INTERNALS - V7** - 5-day course – May/1994
- ✓ **ORACLE FOR DATABASE ADMINISTRATORS, V7** - 10-day course, Feb/1994
- ✓ **UNIX FOR SYSTEM ADMINISTRATORS I** - 5-day course – IBM, Nov/1993
- ✓ **UNIX FOR SYSTEM ADMINISTRATORS II** - 5-day course – IBM, Jan/1994
- ✓ **FOCUS TOP GUN** - 6-day course, Jan/1991
- ✓ **FOCUS INTERNALS** - 3-day course – IBI, New York, Sep/1990
- ✓ **FOCUS/DB2 INTERNALS** - 5-day course – IBI, New York, Aug/1990
- ✓ **ADVANCED 'C' PROGRAMMING** - 3-day course, Ottawa, Jun/1990
- ✓ **ORACLE INTERNALS - V6** - 5-day course, Montreal, Feb/1990
- ✓ **ORACLE FOR DATABASE ADMINISTRATORS** - 3-day course – Dec/1989
- ✓ **ORACLE FOR DATABASE ADMINISTRATORS** - 3-day course, Aug/1989
- ✓ **ADVANCED SQL*FORMS** - 10-day course – Jul/1989
- ✓ **SQL/DS FOR DATABASE ADMINISTRATORS** - 5-day IBM course, Toronto, Feb/1988
- ✓ **DB2 FOR DATABASE ADMINISTRATORS** - 10-day IBM course, Toronto, Feb/1986

PROFESSIONAL ACCREDITATION

- 1983 **Certificate in **Data** Processing (CDP)** - Institute for Certification of Computer Professionals (ICCP).
- 2000 **ORACLE Certified Professional (OCP)** Version 7.3.
- 2000 **ORACLE Certified Professional (OCP)** Version 8.
