LinkedIn: <https://www.linkedin.com/in/suchitra-garugu>

OBJECTIVE:

Experienced and detail-oriented **Data** Analyst in **Data Governance** and Master **Data Management** professional with 10+ years of experience. Expertise in SQL, Google BigQuery, Python, Tableau and **data** integration. Skilled in **Data** Profiling, lineage tracking, metadata **management**, **data** cataloging, and developing validation rules. Proficient in BI and analytics tools, Google Cloud Platform, **Informatica** IDQ/MDM/EDC, and STEP STIBO. Adept at ensuring **data** accuracy, consistency, and integrity across various systems. Seeking to leverage my skills and experience in a challenging and impactful role.

SKILLS:

- **Data Governance & Quality:** **Data** profiling, cleansing, validation rules, metadata **governance**, taxonomy structuring, search analytics optimization
- **Data Governance Tools and Advanced SQL:** Complex SQL queries (joins, subqueries, window functions, CTEs), query optimization, **data** transformation and **Informatica** Axon, IDQ, EDC, GCP BQ, Cloud Storage, **Data** Catalog, Collibra
- **Master Data Management (MDM):** **Informatica** MDM Product 360, STEP STIBO Systems, UI-based field mapping, product hierarchy enforcement
- **Data Security & Quality:** Encryption, access controls, **data** protection **policies**, auditing, vulnerability assessments, incident response planning, **data** validation, cleansing automation, monitoring tools, lineage tracking, quality metrics
- **Data Visualization:** Tableau, Alteryx Designer, Power BI, Qlik View, Qlik Sense, GCP Looker Studio Dashboard
- **Metadata Management:** GCP **Data** Catalog/**Data** Plex, **Informatica** Enterprise **Data** Catalog, taxonomy mapping, asset metadata validation
- **BI and Analytics:** Power BI (DAX functions, merging **data** sets), Tableau, GCP Looker Studio, ThoughtSpot, search behavior analytics
- **BigQuery & Cloud Platforms:** Strong experience working with Google BigQuery, GCP **Data** Catalog, Dataplex, and Cloud Storage for scalable **data** processing.
- **Data Management and Storage:** SQL and NoSQL databases, Hadoop, Spark
- **Data Quality and Governance:** Alteryx Workflows, Metadata **management**, **data** quality monitoring, **data** catalog best practices, GitHub, Tekton for version control and CI/CD pipelines
- **Data Modeling and Visualization:** **Data** flow diagrams, **data** models, dashboards, visualizations, STEP Stibo UI-based **data** mapping
- **Statistical Analysis and Data Mining:** Tools and techniques for uncovering actionable insights
- **Digital Asset Management (DAM):** Binder DAM, asset ingestion, tagging automation, URL tracking, metadata optimization, taxonomy **governance**
- **Documentation and Profiling:** **Data** models, ETL workflows, **data** dictionaries, **data** profiling, **data** cleansing, normalization, **governance documentation** (RACI charts, asset lifecycle workflows)
- **Applications:** MS Excel, JIRA, Rally, Codified Bridge, API, SharePoint, Agile/Scrum frameworks, Binder DAM **governance**

- **Automation & Integration:** AI-assisted tagging, metadata validation workflows, URL-based asset tracking, STEP Stibo metadata automation
- **Programming Languages:** SQL, VB, HTML/XML, Python, R and VBA
- **Databases:** MySQL, MS Access, Oracle, PostgreSQL

QUALIFICATION:

- **M.B.A,** Masters School of **Management**, India, 2008 (*Specialization: IT **Management** & Marketing **Management***)
- **Bachelor of Science in Information Technology**, Utkal University, India, 2006 (*Specialization: Information Technology & **Management***)

EXPERIENCE:

Sr **Data Governance** & Quality Lead | BDR

Wendy's International - Remote

May 2024 – Present

- Designed and implemented **data governance** frameworks to enforce **compliance**, **data** security, and lineage tracking as part of the Business Done Right (BDR) project.
- Developed and enforced SQL based **data** quality validation rules, ensuring **data** accuracy, consistency, and integrity across enterprise systems.
- Developed **automated data profiling** processes using Python, SQL, and Alteryx.
- Implemented security measures, including access controls, encryption, and auditing mechanisms, to protect sensitive **data** and prevent unauthorized access.
- Engineered automated **data** profiling and cleansing workflows, improving **data** quality monitoring and validation efficiency.
- Mapped fields through UI analysis when back-end access was unavailable, showcasing problem-solving skills and adaptability in handling legacy **data** models.
- Led metadata **management** initiatives, ensuring **data** assets were well-documented, easily accessible, and aligned with **governance policies**.
- Developed lineage tracking frameworks to maintain transparency, traceability, and **governance compliance** across multiple **data** platforms.
- Worked with stakeholders across IT, business units, and **data** stewards, aligning **governance policies** with organizational objectives.
- Created comprehensive **governance documentation**, including RACI charts, taxonomy guidelines, metadata dictionary, asset lifecycle workflows, and validation rules.
- Facilitated stakeholder alignment meetings to gather business requirements, define **governance policies**, and implement system enhancements.
- Acted as a mentor and collaborator, providing training and guidance to team members on Binder DAM, STEP Stibo, metadata **governance**, and taxonomy best practices.

Data Governance Analyst II | **Data Discovery & Data Quality** | GDI&A

Ford Motor Company, Detroit, MI

- Remote

June 2020 – May 2024

- Served as a liaison between business stakeholders and technical teams to ensure clear communication and alignment on project requirements. Documented business requirements and created wireframes and swim lanes to provide clear and understandable guidance for technical teams.

- Designed and implemented **data** quality monitoring frameworks using GCP (BigQuery, **Data** Catalog, Dataplex), **Informatica** IDQ, and Alteryx.
- Designed and optimized SQL queries in BigQuery to extract and analyze large datasets.
- Developed automated **data** validation workflows using Python, SQL, and **Informatica** PowerCenter to ensure high **data** accuracy.
- Utilize GCP services like **Data** Quality Monitoring, **Data** Catalog, or **Data** Studio to monitor and report on **data** quality issues.
- Worked with IT teams to integrate **data** quality processes into ETL workflows using **Informatica** PowerCenter to ensure that high-quality **data** is loaded into the **data** warehouse for reporting and analytics purposes.
- Created and automated interactive dashboards by utilizing Qlik Sense and Looker Studio, connecting the **data** to GCP BQ tables and an Oracle Database.
- Conducted **data** quality monitoring and anomaly detection using SQL and developed workflows using Alteryx tools.
- Played a key role in developing the Metadata **Management** User Interface, ensuring alignment with business goals.
- Hosted Office Hours to resolve pending issues and provided training to **Data** Stewards and End Users, educating them on self-service **data** discovery, exploration, and visualization using GCP Dataplex and BQ tables.
- Collaborated with stakeholders to understand **data** requirements, identify gaps, and provide **data**-driven recommendations.
- Contributed to the **Data** Architecture design and developed swim-lanes for the implementation of the **Data** Discovery Hub.
- Cleansed, validated, and transformed **data** to ensure accuracy and consistency; developed **data flow** diagrams, **data** models, dashboards, and reports using PostgreSQL Metric Master **Data** Table.
Managed and maintained version control using GitHub, ensuring seamless **collaboration** among development teams.
- Supported **Data** Stewards in **data management** efforts and managed metadata and metrics for each business unit.
- PostgreSQL databases, ensuring integrity, security, and implementing Cloud SQL strategies.

Master **Data Management** Analyst II | **Data Governance** Information Management

Ford Motor Company, Detroit, MI - Remote

- Managed **Informatica** Enterprise **Data** Catalog, improved **data** discoverability and consistency.
- Led MDM solution deployment using **Informatica** MDM Product 360, unifying customer **data**.
- Established **data** quality monitoring processes, reducing **data** errors by 50% and ensuring **regulatory compliance**.
- Developed interactive dashboards with Qlik Sense and Power BI, increasing operational efficiency by 20%.
- Develop dashboards that provide real-time visibility into IT Connect ticket metrics using Looker Studio.
- Developed and enforced **data governance policies** and procedures to ensure **data** integrity and **compliance**.
- Conducted regular **data** quality assessments and implemented measures to improve **data** accuracy and consistency.
- Monitored **data** quality metrics and initiated corrective actions to address **data** integrity issues.
- Acted as the primary point of contact for **data** engineering and big **data** initiatives, building strong relationships with business stakeholders.

- Spearheaded the automation of **data** quality monitoring processes and established best practices in **data governance**, reducing **data** errors and enhancing operational efficiency.
- Established and enforced best practices, standards, and guidelines for **data** engineering and big **data** management.

Master **Data Management** Analyst | Enterprise **Data Management** |

Southern Glazers Wines & Spirits, Miramar Florida,

September 2019 – April 2020

- Created an automated Alteryx workflow to match **data** between different sources. Performed manual matching using MySQL for items that were not matched automatically.
- Created new items and edited existing items within **Informatica** PIM 360 tool. Conducted mass-update across bulk items within PIM 360.
- Periodically performed **data** cleansing, analyzed **data**, and made decisions that ensured zero attribute mismatches. Have a keen ability to analyze **data** errors during **data** mapping and validations.
- Validated and analyzed Master list of Item **Data** for Corporate Suppliers and external vendors.
- Created Reports, Interactive Dashboards and Charts using Alteryx Designer
- Worked independently on internal continuous improvement projects that involve analyzing the existing Master **Data** and assessing the quality of that **data**, to ultimately cleanse, de-duplicate, and enrich the **data**.
- Analyzed every Master **Data** change request and coordinate with the business user community to ensure accuracy and completeness of the **data**, while avoiding duplication and misclassification
- Collaborated and maintained a professional working relationship with on-sight, off-sight team members and vendors for ensuring **data** integrity as per individual state guidelines.

Data Governance Analyst II, Item Control - **Data Governance**,

Office Depot Inc., Boca Raton Florida

October 2016 – August 2019

- Conducted in-depth **data** analysis and causal modeling to extract actionable insights, directly informing strategic decisions related to supply metrics and dimensions.
- Worked closely with the VP of Supply and their team, providing **data**-driven insights to support key strategic decisions, particularly in areas such as occupancy, quality, and pricing.
- Monitored and analyzed critical supply metrics, including location, type, size, capacity, and amenities, ensuring **data** accuracy and relevance in decision-making processes.
- Collaborated with internal team members to ensure **data** integrity is maintained across various systems.
- Performed **data** analysis and maintenance on information stored in MySQL Database
- Hands-on Experience in writing SQL queries in multiple databases, MySQL, and good **analytical** and problem-solving skills.
- Analyzed **data**, applied rule-based **data** cleansing, and made decisions that ensured zero attribute mismatches.
- Extensively used REGEX for **data** mapping across OD web portal and Vendor load files
- Obtained Vendor specific proprietary SKU Attributes using custom API calls to validate Vendor **data** in the EDW.
- Worked closely on implementing a new content **management** system called STEP STIBO
- Partnered with e-commerce teams to ensure **data** is normalized across the OD web portal.
- Back-filled missing attribute values (Researched the missing attribute **data** from the WEB)
- Perform detailed Master Item list (MIL) manual matching for various projects.
- Maintained **data** integrity by mapping SKUs to the correct location on the WEB using the Bridge system.
- Extended dedicated support during UAT and post go-live of the newly deployed CMS.

- Participated & followed agile process to handle stories related to pending issues and daily workloads.

Data Analyst I | Systems Analyst, W. H. Trading, Miami, FL

October 2010 –

March 2016

- Performed **data** queries and prepared regular reports and worked closely with database engineers to maintain integrity.
 - Executed SQL queries for backend testing to validate front-end use cases.
 - Used Excel for reporting, including Pivot tables, VLOOKUPS, and charts.
 - Supported **data** conversion processes and documented requirements and coordinated with development teams to understand technical specifications
 - Implemented a Point-of-Sale vendor product and configured based on business rules.
 - Prepared and updated Business Process Requirements (BPR) and Software System Requirements (SSR).
 - Performed **data** analysis, testing, audits, and problem resolution and researched and recommended technology solutions.
 - Performed GAP analysis of business rules and processes.
