

WERNER MAASS

Senior Data Engineer

(603) 969-2056 | <https://www.linkedin.com/in/wernermaass> | wkmaass@us.ibm.com | Portsmouth, NH

Senior Data Engineering Leader with 10+ years of experience architecting and leading enterprise-scale **data** platforms across **cloud**, AI, and analytics ecosystems. Proven ability to bridge **strategic** vision with hands-on execution in **Data Lakehouse**, **Data Mesh**, **FinOps**, and **GenAI** solutioning. Adept at driving **cross-functional** alignment, optimizing **cloud** spend, and delivering measurable **business** outcomes through **data-driven innovation**. Expertly leveraged delivering transformative solutions that delight the clients across diverse industries. Deep understanding of financial reporting, budgeting, forecasting, and compliance. This ensures accurate financial statements, sound strategies, and overall financial health **management**. Intense focus, as the appointed supervisor and overseer of all **data**-related activities in the enterprise, on continuously reassessing intricate code and structures for errors and gaps. Known for thriving in dynamic settings while ensuring client satisfaction and surpassing organizational objectives. Innate ability to address risks and highlight rewards, especially during stressful times. Reinforcing what the team has discussed with the other parties at a higher level. A talent to know when to concede and when to stand firm on project and strategy.

TECHNICAL PROFICIENCIES

Data Governance | **Data Virtualization** | **Data Pipelines** | Master **Data Management** | Metadata **Management**

AWS **Cloud Services** | GCP **Cloud Service** | IBM **Cloud Services** | SAP SuccessFactors | SAP Ariba

AWS Redshift, Glue, Postgres | GCP BigQuery, DataPrep Dataflow | Snowflake | Kubernetes with Helm | IBM Hyperledger Fabric

Reltio | Manta | Atlan | Apache Spark | Kafka | Avro | Atlas | Informatica | Splunk | **Python** | Perl

Karate Framework | Safe Framework | Github | Cucumber | Gherkin

PROFESSIONAL EXPERIENCE

IBM Certified Consultant | International Business Machines | Armonk, NY

08/2010-

Present

Led enterprise-wide **data** modernization initiatives across **finance**, telecom, and healthcare sectors. Architected and governed multi-**cloud data** platforms supporting 250+ sources and real-time analytics. Drove GenAI adoption with measurable KPIs, improving model efficiency and reducing operational costs. Established federated and centralized **data** governance models across global organizations. Delivered \$12M+ in cost savings through FinOps, automation, and **data quality** improvements.

Providing expert consulting **services** for Digital Transformations and Modernization projects. Leading the development and implementation of **strategic data** initiatives that align with the company's **business** goals. This includes identifying opportunities for leveraging big **data** to drive **business** growth and **innovation**. Utilizing big **data** analytics to identify and mitigate potential risks, ensuring **data** security and compliance with regulatory requirements. This involves developing robust **data** governance frameworks and monitoring **data** usage

KEY PROJECTS

Master Data Strategist | Cencora | Conshocken, PA

Assess and consult on the MDM roadmap for next 3 years, reviewing the Indirect Spend and how **data** is handled both domestically and internationally. Analyze ERP systems and Risk **Analysis** on the differences between domestic and global procurement processes.

- Collaborate with program executives, and project sponsors in order to review S4 Hana, Sap Ariba, and other non SAP ERP systems integrating with Reltio as a golden harmonized copy of Master **data**

- Proficiency in Reltio's **data** model, survivorship rules, match/merge logic, and API-based **integration** and working as confidant between **business** users and SAP PI/PO teams resulting in an Enterprise scalable Solution across both USA and Global procurement groups.
- Design of canonical **data** models to unify disparate **data** source, with a Federated Governance group resulting in a harmonized view across systems.
- that could be enhanced to allow a centralized MDM strategy globally.
- Deployment of Reltio in **cloud**-native environment (AWS) while creating CI/CD pipelines for MDM configuration.

SAP Employee Central Payroll Consultant | IBM Internal | Raleigh, NC

Analyze **business** needs and test and debug the configuration, **business** rules and ensuring the benefits is integrated with payroll; Developed **data quality** procedures and routines to ensure transformations converted the **data** into the required EC formats.

- Collaborate with program executives, and project sponsors and other **business** analysts to assist in determining project scope including configuration and **business** rule designs resulting in the reduction of over 795 defects and 15 Change requests resulting in Workday to Successfactors migration success.
- Work as a liaison and subject matter expert between technical teams and **business** owners for EC components and Benefits components for each work stream: Payroll, EC Benefits and Compensation.
- Design and Architect master **data** requirements and strategies to support the transition of HR **data** from Workday to SF.
- As **Data Engineer** identified and evaluated processes for continuous improvement opportunities, make recommendations for options/possible solutions and implement plan to achieve improvements which in turn ensure the **data quality** and the **transformation** rules applied were streamlined and satisfied the requirements, providing a timely Cutover date and eliminating 20% of the anticipated testing costs.

Data Architect Consultant | Thomson Reuters | Toronto, CA

Analyze **business** needs and lead **cross-functional** teams in the development, and documentation of Master **Data** Strategy driving the attainment of modernization **business** goals. Developed **data** visualization platform with existing **Data** lakes, Enterprise **data warehouse**, salesforce APIs and instances.

- Lead to Cash **Analysis**, including Salesforce and CPQ **data** lineage **analysis** developing **data** insight on Products and Pricing of top 100 products within TR improving the onboarding process and environmental setups reducing operating costs by 250K quarter to quarter.
- Designed **Data** GenAI Solution to leverage RAG to ground LLM's with trusted **data** to improve output **quality** and utilize LLM caching to improve efficiency by reducing number of model invocations
- Collaborated with stakeholders to understand their **data** requirements and developed customized **data** solutions to **Data** Profile and create **Data** Lineage Models for S4 Hana: leading to a 30% increase in **data** accuracy and a 20% improvement in **data** accessibility.
- Demonstrated expertise in snowflake scaling examining query complexity, resource usage, and concurrency, to determine scaling actions, assessed automatic clustering and materialized view resulting in removing long running **python** routines during peak processing hours reducing runtimes by 60%.

Data Engineering Manager | MUFG | New Jersey

Develop and execute superior **data analysis** to create an enterprise **data** platform, resulting in over 250 **data** sources and streaming **data** and **business** processes, improved customer satisfaction, and increased revenue streams.

Coordinate comprehensive release **management** for the delivery of financial metrics to Compliance, Consumer Credit, Wholesale Credit risk stripes. Managed **Production** Support team providing Incident, Change, and **Problem Management**.

- Initiated and established Enterprise **Data** Platform **production** support team
- Managed and provided level one and two support for Enterprise **Data** Platform Big **Data**: AWS EC2, Lambda, Redshift, Glue and Glacier and achieved a steady state with 100 % compliance to SLAs, resulting in lower operating costs and increased agility.
- Managed metadata **management** to support Basel Committee on banking supervision's the Regulatory and Non-Regulatory reports for the Federal Reserve; providing **quality** of risk **management**, aggregate level and direction of associated risks and any violations of laws and regulations or deficient **practices**
- Leveraged **Data Structure**, Merkle Tree, Hash Tables and Linked Lists to ensure **data** integrity, **data** retrieval times and **data** consistency and **data** analytics in order to analyze transaction behaviors, leveraging IBM Hyperledger decreased latency and increased throughput.

Data Engineering Manager | T-Mobile, Chicago | Ill

Responsible for establishing governance **structure** and NorthStar vision for Sales and Distribution Development. Coordinating all aspects of Delivery for 4 Product Lines, Supply Chain Execution, Logistics, Device life Cycle Maintenance and SAP FICA.

- Designed and architected Service Virtualization **architecture** for Disco **Quality** organization accelerating CI/CD processes and reducing required resources by 20%.
- Designed Kafka Source and Sink in Flink using Karate Framework and Gherkin scripts creating Behavior driven development, supporting parallel execution testing, and **integration** into CI/CD pipelines.

Data Engineer | Ahold | Scarborough, ME

Project managed all aspects of the Hannaford Online program integrating Oracle EBS with **Google** analytics, and ansible automation for the Delhaize CI/CD.

- Increased Revenue by 15% instantiating BOPIS (buy online pick in store) features
- Reduced **Integration** complexity and cost with SOA **architecture** replacing complex point-to-point integrations with single service virtualization connections
- Directed and Staffed **quality assurance** and **business** analyst team on a Success factors **integration** program with Workday for union and non-union based compensation
-

Data Engineer | Brighthouse Financial | Charlotte, NC

Developed and managed **Data Engineering** Office including staffing, processes and procedures and reporting providing **services** for the MetLife to Brighthouse migration. Collaborated with various SI vendors and the Information security organization to create policies, strategies and schemes for their test and **data** governance organization and developed the test and **data** stewards within their lines of **business**. Architected **services** virtualization across **business** units as within the SAP Hana **architecture**.

- Harmonized SAP master **data** and building **data** models (in HANA or other relational databases) leveraging SAP **Data** replication and MDG tools (Master **Data** Domains, and Information Steward), accelerating **data** preparation for S4 Hana master **data** with Successfactors Employee Central.

- Developed and sourced for SAP HANA modelling [Extraction, Transformation and Load (ETL) jobs in BODS for transferring data from SAP and non-SAP systems; Efficient processes lead to cost savings of over 1.5 million cost avoidance and 30% savings of the overall 5 million dollars engagement

Program Data Integration Manager | Express Scripts | Minneapolis, MN

Collaborated with 3 vendor teams on the overall MEDCO migration; overseeing the P&L as well as design technical solutions, and implement custom software applications, resulting in streamlined processes and improved efficiencies. Managed the Release Cycle and Claims Services Capabilities. Led Enterprise Release team and managed the monthly cycle for ESI successfully completing the Express Script Medco merger.

- Program managed overall budget and P&L of Claims Services Organization of 125 consultants
- Managed and Staffed 60 Express scripts and Vendor QA Project and Program Leads
- Optimize costs and improve ROI by 35% leading the Eligibility Capability and Claims Transaction Processor capability with 30 projects per month and the delivery of the release to express scripts. On average over 2 million is cost avoidance and GP of 32%.

EDUCATION & CERTIFICATIONS

Certified Professional IBM Consultant

AWS Cloud Practitioner

Certified IBM Cloud Architect

Gen AI Practitioner

Masters, Computer Information Systems | Marist College

B.A. Mathematics & English | State University of New York College at Potsdam

Werner Maass

- Portsmouth, NH, US

Summary

• A result driven **Data Services** leader with over 20 years of recognized expertise in the field of project **management**, **data engineering** and service virtualization. • Demonstrated success working with senior leadership and executives to develop a **data** and analytic solutions roadmap and provide recommendations that drive **business** strategy and achieve **high** impact results. • Strong negotiation **skills** and able to effectively take the conceptual to the pragmatic, addressing **business** and technical obstacles as they emerge. Develops annual financial plans to support **data** and analytics work, lead the **management** and coordination of internal professional development opportunities, provide support and training to all analysts and **data** specialists, and help to troubleshoot **data** issues. • Drive **collaboration** through sharing and soliciting thoughts, ideas, feedback as well as work products (roadmaps, **architecture**, design, code etc.) across the broader organization. • A Change Leader, playing an integral part in evolving the organization's understanding of **data** by engaging and educating stakeholders on **data** vision and strategy. Has an Agile mindset. As needed, able to partner with or participate within Agile (project) teams, which are working to deliver **data** solutions. • A leader who inspires the agile team to drive results by sharing the vision of a global **data** strategy. Lead and drive the creation of a sustainable and systemic Dataops and **Data** Governance capabilities – including **integration** of **data** stewardship processes, hybrid **cloud** architectures. AREAS OF EXPERTISE • **Strategic** Planning and Leadership • **Data** Fabric Design and Development • **Data** Mesh Architectural Design • Change **Management** • **Finance** • **Data** Visualization • **Data** Pipelines • **Data** Governance • DataOps
