

Project Manager | Scrum Master | Release Train Engineer

PROFILE SUMMARY

Accomplished Project Management Professional (PMP), SAFe Program Consultant (SPC), and Release Train Engineer with 25+ years of IT project delivery and transformation leadership. Proven expertise in managing multimillion-dollar budgets and driving enterprise-scale Agile programs across healthcare, government, finance, retail, ecommerce, Education, and aged care sectors.

- Led the delivery of national-scale healthcare and aged care digital platforms, tasked with improving service accessibility and operational efficiency for over 27M citizens. Designed and executed streamlined processes, developed user-centric solutions, and aligned cross-functional teams to ensure effective implementation, resulting in a 70% improvement in process efficiency, significantly enhanced patient engagement, and measurable increases in customer satisfaction.
- Designed and deployed multiple data analytics products across diverse user groups, empowering decision-making and unlocking business insights.
- Digitized state record transfer systems across 260+ public agencies, boosting record processing speed by 80% and achieving high satisfaction among NSW government stakeholders.
- Developed and delivered a Learning Management System (LMS) with 300+ educational courses, reducing training resource time by 25% and improving operational efficiency across the organization.
- Launched large-scale ticketing solutions used by 8M+ people, improving ticketing accuracy and reducing internal revenue processing time by 50%.
- Recovered over \$60M in government losses by delivering innovative digital platforms that eliminated inefficiencies and strengthened accountability.
- Consistently drove customer satisfaction growth from 50% to 80%, while optimizing internal processes to improve efficiency by up to 80%.
- Delivered end-to-end digital transformation initiatives including customer portals, AI/ML solutions, cloud platforms (AWS, Azure), and ERP systems, driving operational efficiency and post-launch enhancements.
- Optimized value streams and portfolio management, resulting in measurable improvements in delivery speed, transparency, and cost efficiency.
- Guided Agile teams in VUCA environments, leveraging strong influencing and coaching skills to drive collaboration and delivery focus.
- Partnered with Product Owners to align sprint execution with product roadmaps, ensuring delivery of high-priority initiatives.
- Improved Agile maturity and performance by coaching teams, tracking metrics, and facilitating continuous improvement initiatives.
- Facilitated Agile ceremonies (sprint planning, daily stand-ups, retrospectives, Scrum of Scrums) to ensure effective communication and value delivery.
- Utilized Agile tools such as Jira, Kanban, and Lean practices to enhance team efficiency, predictability, and customer value delivery.
- Skilled in facilitating Agile ceremonies—including PI Planning, Scrum of Scrums, ART syncs, and retrospectives—to align distributed teams, manage risks, issues, budget, dependencies, and resources, ensuring accelerated business value delivery.

- Led Technical and/or infrastructure projects with documentation skills and experience to support project chartering, scoping, plans and other project deliverables.
- project management with strong customer service and relationship management
- Provided positive and productive work environment, problem solving abilities, effective communication skills and collaborative mindset.
