SUMMARY

Experienced Angular Developer with over five years of expertise in front-end development, specializing in TypeScript, Angular Material, and RxJS. Possesses a strong foundation in JavaScript, HTML, and CSS with a proven ability to craft scalable, high-performance user interfaces and reusable code. Adept at integrating RESTful APIs and leveraging the Azure cloud platform to optimize application functionality. Collaborative and results-driven, with a track record of delivering innovative solutions for mission-critical applications. Committed to continuous learning and staying at the forefront of emerging technologies to drive impactful digital experiences.

EXPERIENCE

12/2023 – 02/2025

Software Developer / KBX Logistics, Wichita, KS

- Spearheaded the development and enhancement of front-end solutions using Angular 16 and 17, leveraging Storybook to optimize UI scalability and reusability, improving development efficiency by 40%
- Integrated Tailwind CSS into Storybook Angular components while ensuring compliance with ADA and WCAG accessibility standards, increasing accessibility adherence by 35%.
- Engineered client-side interactions within a microservices architecture, facilitating seamless communication between front-end applications and distributed backend services. Designed and implemented robust API integrations, ensuring efficient data exchange and responsiveness.
- Implemented client-side interactions within a microservices architecture, enabling seamless communication between front-end applications and backend services, like Azure and AWS.
- Work with microservices architecture, integrating front-end components with backend APIs and cloud-based services.

02/2023 – 08/2023

Frontend Developer / American Quarter Horse Association, Amarillo, TX

- Designed and developed Angular 13+ front-end solutions for a competition horse breeding application, enhancing user functionality and data accuracy by 35%.
- Optimized reactive form data processing by implementing advanced TypeScript algorithms, improving performance efficiency by 40%.
- Enhanced front-end usability by systematically resolving tickets through SQL data analysis and collaboration with QA and business analysts, leading to a 25% increase in consumer satisfaction.
- Developed Angular 13+ code for a competition horse breeding application, improving user functionality and data accuracy by 35%

PROJECTS

[Livewell](#)
[CPS - School Details Page](#)
[Descon Plus](#)
[MYAHQA](#)

SKILLS

Software: C#, .NET Core, LINQ, Entity Framework, Angular (2-19), JavaScript, TypeScript, HTML5, CSS3, SASS, LESS, MVC, JQuery, JSON, PHP, Web Accessibility

Databases: SQL Server, T-SQL, Stored Procedures

Tools & Platforms:
StoryBook, Figma, Visual Studio, SQL Server Management Studio, WebPack, Gulp, Grunt, Git, GitHub, Azure Tailwind, Docker, Bootstrap, Postman, Storybook

CMS: Sitecore, WordPress

Education

DEC 2003
Bachelor of Fine Arts
Illinois Institute of Art
Chicago, IL
Emphasis: Multimedia & Web Design

JULY 2013
Human Factors
Certification Chicago, IL
Emphasis: UX/UI Design

- Optimized reactive form data processing with TypeScript algorithms, increasing performance efficiency by 40%.

- Streamlined front-end usability by resolving tickets through SQL data analysis and collaboration with QA and business analysts, enhancing consumer satisfaction by 25%.

03/2022 – 02/2023

Frontend Developer / Americash Loans, Chicagoland, IL

- Diagnosed and resolved production-level exceptions within Azure App Services, performing in-depth codebase analysis to identify root causes and implement targeted solutions. Leveraged logging, telemetry, and performance profiling tools to proactively detect issues, minimizing service disruptions and enhancing system reliability and uptime.

- Provided comprehensive debugging support for kiosk and storefront employee systems across multiple locations, ensuring uninterrupted operation and an optimal user experience. Investigated and mitigated platform-specific issues, optimized front-end and backend interactions, and collaborated with cross-functional teams to drive system enhancements and long-term stability.

- Diagnosed and resolved production-level exceptions within Azure App Services, conducting in-depth codebase analysis to enhance system reliability and uptime.

- Provided comprehensive debugging support for kiosk and storefront employee systems across multiple locations, ensuring seamless operational functionality and minimizing downtime.

- Investigated production-level exceptions through Azure App Services, diagnosing and resolving issues within the codebase to improve system reliability.

- Provided debugging support for kiosk and storefront employee systems across multiple locations, enhancing operational functionality.

09/2020 – 03/2022

Frontend Developer/ Aurora Health Hospital Network, Madison, WI

- Led the development of an advanced Angular 13 doctor appointment scheduling application, streamlining patient booking, appointment management, and user accessibility. Designed intuitive UI components and optimized application responsiveness to enhance user experience. Simultaneously, re-architected the Livewell website, restructuring its core framework and improving content delivery strategies, resulting in a 15% increase in visitor traffic and engagement.

- Boosted system efficiency by refactoring and debugging legacy codebases across VB.NET, SQL, and PowerShell, identifying bottlenecks and implementing performance-driven improvements. Optimized Azure pipeline deployments, reducing build errors and ensuring seamless application updates, resulting in greater system reliability and reduced downtime.

- Strengthened collaboration and code quality by facilitating Git-based version control workflows, leading peer code reviews, and promoting best practices for Angular 13 development within a team of five engineers. Provided mentorship and architectural guidance to optimize code modularity, maintainability, and scalability, fostering a more efficient and cohesive development environment.

- Led the development of an Angular 13 doctor appointment scheduling application and re-architected the Livewell website, increasing visitor traffic by 30%.

Software Application Developer/ Rex Engineering Group, Naperville, IL 10/2017 – 3/2020

Full Stack Developer/ Pearl Technologies, Peoria, IL 06/2016 – 10/2017

Web Developer/ Career Education Corporation, Chicago, IL 08/2015 – 06/2016

UI/UX Developer/ State Farm, Bloomington, IL 09/2012 – 08/2015

Lead Front End Developer/ Mitek Corporation, Chicago, IL 04/2004 – 08/2012
