PROFILE

Software Engineer focused on building scalable, high-performance applications and thriving in collaborative, fast-paced environments. Committed to harnessing data and AI-driven solutions to tackle complex challenges and enable smarter, insight-driven decision-making.

SKILLS

- **Languages:** JavaScript, TypeScript, Java, HTML, CSS
- **Frameworks & Libraries:** React, Next.js, Node.js, Express, Spring Boot
- **Cloud & DevOps:** AWS (Lambda, S3, EC2), GitHub Actions, Docker
- **Databases:** PostgreSQL, MongoDB, Firebase
- **Testing:** Jest, Cypress
- **Tools:** Git, Jira, Figma, Postman, VS Code

PROFESSIONAL EXPERIENCE

Full Stack Developer

Clearly Innovative Inc. 🔗

12/2023 – present
Washington DC

- Built responsive and performant applications using **RemixJS**, enhancing user experience and speed
- Integrated **Payload CMS** for dynamic content management, reducing dev dependency and improving content flexibility
- Wrote robust **end-to-end tests** with **Cypress**, increasing reliability across scenarios
- Designed optimized **PostgreSQL** schemas for fast data retrieval
- Implemented **Prisma ORM** to simplify database interactions and improve maintainability
- Automated the build-test-deploy process with **CI/CD pipelines**, accelerating release cycles

Senior Software Engineer

Verizon 🔗

05/2022 – 09/2023
Ashburn

- Built modular components with **React** and **Redux**, improving scalability and consistency
- Developed and maintained backend services using **Java Spring Boot** and **Node.js** with **Express**, enabling efficient data flow and robust API integrations
- Enhanced test coverage by **15%** through **Cypress** integration
- Debugged critical issues with browser **DevTool & Splunk**, leading to an **85%** conversion rate improvement
- Applied **lazy loading**, **code splitting**, and other performance techniques to reduce load times and improve user retention

Software Engineer

Asurion

04/2021 – 04/2022

- Developed with modern JavaScript environments and tooling (ES6+) to build an education platform for internal employees
- Built **Single Page Applications** (SPAs) with ES6+, React, Redux, and Webpack
- Developed servers by using Node.js and Express.js
- Developed and maintained architecture for RESTful API
- Performed code reviews for other engineers

Application Developer

10/2019 – 02/2021

Accenture

- Enhanced code to improve the application performance
- Performed aspects of the development life cycle including design, development, unit testing, and documentation
- Provided technical support for the **PeopleSoft** Production systems

Team Lead

11/2018 – 06/2019

BloomTech

- Followed agile development methods to ship quality projects on time
- Led daily stand-up meetings and **weekly 1:1 check-ins**
- Provided remote assistance with **debugging** and troubleshooting issues

EDUCATION

Montgomery College

The Ohio State University

SERVICE & LEADERSHIP

- **U.S. Army Veteran** – Civil Affairs Specialist,
- **BloomTech** - Team Lead
- **National Society of Black Engineers** – Active Member
- **CodePath** - Volunteer resume reviewer

CERTIFICATES

AWS General Practitioner
