PROFESSIONAL SUMMARY

Results-driven QA/Automation Engineer with 10+ years of experience in software testing, quality assurance, and test automation. Proven expertise in building scalable automation frameworks using Selenium and Cypress, with strong programming skills in Java, Python, C# and Javascript. Experienced in CI/CD integration, test data management, API testing, and performance testing across web applications. Adept at mentoring teams, driving best practices, and delivering high-quality solutions in fast-paced, agile environments.

SKILLS

Languages: Java, Python, C#, JavaScript

Automation Tools: Selenium, Cypress

Frameworks: TestNG, Junit, Nunit

CI/CD Tools: Jenkins, GitLab CI

API Testing: Postman, REST Assured

Performance Testing: JMeter, LoadRunner

Databases: SQL Server, MySQL, Oracle 10g

Cloud: Azure, AWS

Version Control: Git

Others: HTML, CSS, DOM, JSON, XML, Agile, JIRA, Splunk, NewRelic

EXPERIENCE

Starbucks Coffee Company, Seattle, Washington

Software Development Engineer in Test | Feb 2023 – May 2025

- Designed and implemented a modular Selenium with Java test automation framework, reducing regression time by 60%.

- Integrated automation suite with Jenkins and GitLab CI, enabling automated smoke and regression pipelines on every deployment.
- Collaborated with developers to review API documentation, ensuring clear specifications and improved usability for testing and development purposes.
- Led Cypress adoption for frontend testing, improving test speed and stability.
- Conducted load and stress testing to assess API reliability and responsiveness under high usage scenarios, enhancing system scalability and performance
- Mentored 2 QA engineers on automation best practices and framework contribution..
- Generated detailed reports highlighting API performance metrics, defect trends, and coverage statistics to drive continuous improvement and make better business decisions.
- Developed automated API test suites using REST Assured and Postman for RESTful services validation.
- Worked closely with developers, business analysts, and WFM stakeholders to align testing efforts with business objectives.
- Regularly participated in sprint planning and defect triages as part of an Agile/Scrum team

Edupoint Educational Systems, Mesa, Arizona

Software Automation Engineer II | Feb 2020 – Feb 2023

- Developed and maintained automated test scripts using Selenium with C# for functional and regression testing.
- Converted manual test cases into automated scripts, increasing test coverage and reducing execution time.
- Utilized NUnit for organizing test cases and creating assertions.
- Worked closely with manual QA and development teams to understand application workflows and ensure test reliability.
- Created Load Testing scripts for testing of different modules like assessment using LoadRunner and JMeter.

Infosys Limited, Chandigarh, India

Test Engineer | Oct 2014 – May 2018

- Analyzed business requirements, FSDs, and user stories to design comprehensive test cases

- Created, reviewed, and executed manual test cases for web and enterprise applications, ensuring thorough coverage of functionality.
- Logged and tracked defects in JIRA (or other defect tracking tools) with detailed reproduction steps and severity classification.
- Performed smoke, functional, regression, and exploratory testing across various platforms and devices.
- Participated in daily stand-ups, sprint planning, and retrospectives as part of Agile/Scrum teams.
- Validated back-end data using SQL queries to ensure data integrity and consistency.

EDUCATION

Ira A. Fulton School of Engineering, Arizona State University

Master of Science in Information Technology | Aug 2018 – May 2020

GPA: 4.0

Kurukshetra University

Bachelor of Engineering in Mechanical | Sept 2010 – Jul 2014

Percentage: 76.8%
