

AMARE AYELE

Beacon Ave S 11655 • Seattle, WA 98178

206.886.2619 • amareanagaw85@gmail.com • <https://www.linkedin.com/in/amare-anagaw-5a78251b4/>

JAVA DEVELOPER

Talented java developer with 8 years of overall IT industry experience, including 6 years of latest experience in design and development of web applications through all phases of software development life cycle. Dedicated mentor who guides and mentoring students through all phases of project development. Skilled in implementing technologies such as C, C++, Spring Boot, Java, Spring MVC, Hibernate, MYSQL, CICD, JavaScript, AWS, AJAX, Angular, React, and JSP.

Languages: Java

Web: Java EE, JSP, JSF, Angular, React, Servlet, Node.js, JavaScript, HTML5, CSS3, AJAX, jQuery

Web Services: SOAP, RESTful, Microservices

Web and Application Servers: Apache Tomcat, JBoss, Glassfish

Frameworks: Angular, JSF, Spring MVC, Spring Boot, Spring Data, Hibernate

Databases: MySQL, MongoDB

Design Patterns: Singleton, Factory, Abstract, Prototype, Builder, Adapter, Proxy, Façade, Template Method, Observer, Strategy, Circuit Breaker / Bulkhead, Command

SDLC: Waterfall, Agile, Iterative

Tools: Visual Paradigm, StarUML, Microsoft Visio, Git, GitHub, GitLab, Latex, Packet Tracer, Network Simulator (ns-2), MATLAB, Simulink, Jenkins, Junit, Docker, active MQ, Rabbit MQ, Kubernetes

Platforms: Windows, Linux, PCF, Azure, AWS

Big Data: Hadoop, Spark, HBase, Hive, Flume, Scala, Kafka

PROFESSIONAL EXPERIENCE

CAREER NOTE: Completed on-campus studies and currently taking distance education courses to complete a **Master's Degree in Computer Science** (Available for full-time, W-2 employment).

DEBRE MARKOS COLLEGE OF TEACHER EDUCATION, Debre Markos, Amhara • 2008-2011

Government College.

Software Engineer

Tasks Performed:

- Collaborating with management, departments, and customers to identify end-user requirements and specifications
- Designing algorithms and flowcharts to create new software programs and systems
- Producing efficient and elegant code based on requirements
- Testing and deploying programs and applications
- Compiling and assessing user feedback to improve software performance
- Observing user feedback to recommend improvements to existing software products

Achievements:

- Deliver high-Quality large-scale projects for the college.
- Give training for staff members regarding how they will use the delivered software.

Technologies Used: Python, C, Spring boot, Hibernate, C++, Java, JPA, HTML, XML, CSS, JavaScript, PHP, SQL, MySQL, MS SQL Server, Oracle, MS Access, Java DB / Derby, Windows, Linux.

continued ...

DEBRE MARKOS UNIVERSITY, Debre Markos, Amhara • 2011-2019

Government university.

Java Developer / Instructor

Evaluated and allocated budget for selected project and developing technical documentation to guide future software development projects.

Tasks Performed:

- design, implement, test, and deploy large scale projects.
- Advise students on their final projects.
- Evaluated and followed up large scale projects production.
- Implement the back-end part of various projects funded by university and Ministry of Science and Technology.
- Reviewed and evaluated graduate student projects.

Achievements:

- Deliver high-Quality large-scale projects for many clients.
- Strengthened student knowledge and understanding of software development principles by guiding student projects.

Technologies Used: *Spring Framework, Spring boot, Hibernate, C++, Java, JPA, AWS, HTML, XML, CSS, Mango DB, PHP, SQL, MySQL, MS SQL Server, Oracle, Windows, Linux.*

BEACON HILL STAFFING GROUP, Scottsdale, AZ. 01/02/2021-06/28/2021

Client: CVS Health

Java Developer/ XP Engineer

Task performed:

- Check the user stories on pivotal and change the progress status of the assigned user story to reflect the current development status. A user story can be in one of the four status, which are defined (it has been groomed), in progress (developer started developing), completed (developer has completed building, testing and demoing to the product owners -POs) and accepted (accepted by the PO).
- Developing integration codes using Spring Rest Template to communicate with other internal and external microservices.
- Configure development, testing and production environments and platforms like GitHub, Jenkins server, Nexus, PCF, Azure, Databases and so on with the technical anchor.
- Write Junit tests for every service method using JUnit testing frameworks and fix potential code breaks.
- Participate in daily technical meeting call to discuss on any technical challenges raised or encountered by any team member.

Technology used: *Java, Spring framework, Hibernate ORM, AzureAD, JWT Aouth2.0, RabbitMQ, Redis Cache, Config Server, Jenkins CD/CI pipeline, Nexus, PCF, Docker, Kubernetes, HTML, JSP, JQUERY Tools, MS SQL, Hive, MYSQL.*

G2O, Columbus, OHIO 07/12/2021-Present
Client: American Chemical Society (ACS)

Software Engineer

Task performed:

- Designs and develops computer software applications using Java/J2EE (JSP, Servlets, EJB, JMS, JDBC), Object Relational Mapping, Web Services, XML, WebLogic/WebSphere Application Server, and Eclipse IDE.
- Develops applications using Spring, Struts, and Hibernate.
- Analyzes and validates system requirements and existing business processes and information systems.
- Engaged in the development and implementation of new programs and/or modifications of existing applications.
- Works throughout the entire software development lifecycle from analysis through post production support.
- Works with various methodologies including Waterfall and Agile.
- Designs and develop applications on various databases including Oracle, DB2, SQL Server, and MySQL.
- Works on various tiers of the application, from developing the User Interface to developing business logic and tying it to the appropriate database.
- Execute testing responsibilities that include Unit Testing, System Testing, and User Acceptance Testing.
- Communicates with users and stakeholders to clarify any requirement questions.
- Provide production release support in case issues arise.
- Works within a team environment to achieve on time and on budget deliverables.

ACADEMIC PROJECTS

Microservice Based Airline Reservation System, Maharishi international university (2020): Decomposed project into 3 smalls independent microservices including, authentication service, airline service, and reservation service. Deployed each microservices in independent database on different computers to monitor communication between microservices used in Eureka server. **Technologies Used:** JPA, MySQL, Spring Boot, Maven, Node.js, Hibernate, Angular7.7.

Analysis of Twitter Streamed Data using Hadoop, Maharishi international university (2020): Developed simple project to collect and analyze data from live stream data from Twitter related to corona virus topic. Integrated visualization tools and visualized report. Implemented Machine Learning algorithm for classification tasks. **Technologies Used:** Scala, Hive, HBase, Java, Notebook, Python, PySpark, Spark, Kafka, Hadoop, Virtual Machine.

Hotel Management System, Maharishi international university (2020): Developed mini hotel management web application used to manage for employee data, food and drink data, food ordering, payroll, and simple reports. **Technologies Used:** JavaFX, Java, MySQL.

EDUCATION

Master of Science in Computer Science

(In progress via distance education; expected completion 2022)

Maharishi University of Management, Fairfield, Iowa

Key Courses: Fundamental Programming Practices, Modern Programming Practices, Algorithm, Big Data Technology, Web Application Programming, Enterprise Architecture

Doctor of Philosophy in Electrical Engineering (pending)

National Taipei University of Technology, Taipei, Taiwan

Master of Science in Computer Science

Bahir Dar University, Bahir Dar, Amhara

Bachelor of Science in Computer Science

University of Gondar, Gondar, Amhara

PUBLICATIONS

"Ship Detection Based on YOLOv2 for SAR Imagery," Remote Sensing, MDPI, Vol. 11, no. 7: 786 March 2019, Impact Factor: 4.89, Cite Score Rank 7/182=3.85% (SCI).

"A New Complement Naïve Bayesian Approach for Biomedical Data Classification," Journal of Ambient Intelligence and Humanized Computing, Vol. 1, Issue 1, pp. 1 - 9, Dec. 2018, Impact Factor: 2.70, Cite Score Rank 37/204=18.14% (SCI).
