Profile

Results-driven Frontend-Focused Fullstack Engineer with 7+ years of experience building responsive, scalable web applications using modern JavaScript frameworks like React and backend tools like Node.js. Proven ability to design clean, accessible UIs, create reusable component libraries, and automate development workflows. Skilled in bridging frontend and backend systems, collaborating across remote and on-site teams, and delivering high-impact features in fast-paced Agile environments. Passionate about performance, maintainability, and user experience.

Professional Experience

Senior Software Engineer, IBM

05/2018 – Present

- Developed and maintained enterprise-grade web applications using **React**, **Next.js**, **JavaScript**, **TypeScript** and **Redux** improving page speed and user engagement across key IBM tools.
- Collaborated with backend teams to design and consume **RESTful APIs**, integrating frontend UIs with backend services built in **Node**, **Express** and **Nest.js**.
- Built fullstack features end-to-end — from frontend interfaces to backend routes and database interactions — enabling real-time data updates and improved system reliability.
- Refactored legacy codebases into modern **single-page applications (SPAs)**, reducing tech debt and improving maintainability.
- Participated in backend service enhancements, including writing API endpoints and integrating with **MongoDB** for data retrieval and updates.
- Contributed to CI/CD workflows, optimizing frontend builds and backend deployment processes in collaboration with DevOps teams.
- Delivered accessible UIs aligned with **WCAG 2.1** standards, ensuring compliance and broader user reach.
- Mentored junior developers on fullstack best practices, including API design, state management and UI architecture.

Software Engineer, GE Digital

04/2017 – 04/2018

- Rebuilt the cloud storage administrative dashboard using **React** and **Redux**, modernizing the platform and improving internal user productivity by 25%.
- Designed and implemented a **modular React component library** adhering to company branding and accessibility guidelines, improving reusability across projects.
- Refreshed the frontend for the company's internal search engine, enhancing UI responsiveness and search clarity.
- Built internal widget apps to extend functionality of GE's employee web portal, helping streamline daily workflows.
- Automated data collection processes using **Node.js** scripts, improving reporting speed and accuracy for operations.

Web Developer, Mnet Media Corp.

03/2012 – 09/2016

- Redesigned and implemented modern UIs using **Sass**, **JavaScript (ES6)**, and responsive design techniques, resulting in a 30% improvement in mobile engagement.
- Introduced **npm** and **Gulp.js** to automate asset bundling, linting, and deployment, significantly speeding up development cycles.
- Customized **WordPress** installations by developing and extending plugins to meet unique business needs.
- Worked closely with designers and marketing teams to deliver web solutions that met SEO, performance, and branding standards.

Education

Bachelor of Science, Penn State University

2012 – 2016

Skills

React • Next.js • Redux • JavaScript (ES6+) • TypeScript • HTML5 • CSS3 • Sass • Node • Express • NestJS • Gulp.js • Git • RESTful APIs • Responsive Design • Accessibility (WCAG) • Component Libraries • UI/UX Design • WordPress • Agile Methodologies • CI/CD • Cross-Browser Compatibility • AWS
