Aligning Business & IT Strategy // Defining & Reporting Program Requirements // Building Consensus
Finding Cutting-edge Solutions // Analyzing and Mitigating Risks

Seattle, WA // (206) 852-6232 // anish.nanavati@gmail.com

Seasoned Technical Program and Product Manager leader with over two decades of hands-on experience in leading and delivering high-impact technology and IT security programs for industry giants like AWS, Microsoft, and T-Mobile. Widely recognized for spearheading 15+ cross-functional products and programs at global scale, offering deep expertise and executive-level insights to significantly enhance transformation programs and elevate IT security across organizations of various sizes. Instrumental in defining product and program requirements translating customer and business needs into actionable technical strategies. Expertly define the vision and strategic pillars that drive performance and create value for an organization, bringing experience in business transformation, new product development, and operationalization.

AREAS OF EXPERTISE

IT Strategy Planning & Execution | Technical Program Management | Product Strategy & Roadmap | Cross-Functional Leadership | IT Security & Risk Management | Governance, Risk & Compliance | Enterprise Architecture | Operational Resilience | Business Continuity | Business Development | Operational Efficiencies & Process Improvements | Supply Chain Management | Team Building & Coaching | Enterprise Software | Agile/Scrum Methodologies | Team Management | Resource & Vendor Management | Global Transportation Logistics

SELECTED CAREER AND PROJECT HIGHLIGHTS

- ⇒ **Amazon IAM Workflow Migration Leadership:** Directed the migration of a critical authentication and access management service from open source to AWS, handling 600M daily transactions, which dramatically enhanced system reliability and availability for employee onboarding and infrastructure provisioning.
- ⇒ **Cross-Functional Program Management:** Managed multiple program tracks at Amazon, partnering with 3 tier-1 AWS product teams, coordinating with over 20 key globally distributed teams. Oversaw deployment in 5 new regions launched in 2022 and 3 isolated regions.
- ⇒ **Client Relations and Business Development:** Career Advisor/Manager for 5-8 individuals at Protiviti, balancing client and resource management, budgeting, and billing, catering to Microsoft, Salesforce, and T-Mobile.
- ⇒ **Cargill Alteryx Decommission Management:** Program managed a 20-month, \$4M project at Cargill, leading a 12-person onshore/offshore team and enabling data-driven business decisions through workflow migration.
- ⇒ **Microsoft Data Center Resilience, Risk, and Assurance:** Led vendor team for all three business groups, supporting 250+ global data centers. Innovated a product automating Business Impact Analysis, reducing analysis time from months to weeks and improving technology maturity and process efficiencies.
- ⇒ **Microsoft Defender Cybersecurity Initiative:** Unblocked a \$150M sales opportunity by onboarding onto Azure Gov cloud and receiving FedRAMP accreditation six months early, enhancing security posture using CIS and NIST 800-53 cybersecurity frameworks.
- ⇒ **T-Mobile FCG Team Collaboration:** Integral in T-Mobile's digital transformation, ensuring SOX compliance and designing controls for DevOps software methodology, achieving a successful SOX audit, and improving security and data access controls.
- ⇒ **Moss Adams Business Application Consulting Expansion:** Expanded the business application consulting team, leading enterprise software strategy & selection, implementation, IT compliance, and Asset Management projects across various industries and delivering technology transformation programs to senior leadership teams.
- ⇒ **Technology Transformation Leadership:** Developed a multi-year, multi-million-dollar technology transformation program to enable growth, partnering with enterprise groups, aligning business and IT goals, and implementing enterprise (ERP/CRM) and data analytics solutions supporting various business functions.
- ⇒ **Operational Process Optimization at Martinelli's:** Used lean methodology for value stream mapping, reducing production line change over time by 75 minutes increasing annual production by 50 truckloads. Standardized receiving process enhancing data visibility and shortening payment timelines improving vendor satisfaction.

Anish Nanavati

- ⇒ **Fall Creek Global Expansion Support:** Enabled global expansion by executing enterprise solution strategy, deploying and integrating 5 core business applications, implementing key business processes efficiencies across cross-functional business groups, enhancing inventory management, production planning, royalty payment management, and financial planning and forecasting.
- ⇒ **Ritter Communication Program Recovery:** Revitalized a behind-schedule, over-budget program at Ritter Communication, implementing short-term and long-term strategies to improve end-user satisfaction and order completion rates.
- ⇒ **LOG-NET Supply Chain Management Enhancement:** Oversaw global supply chain and inventory management SaaS products and programs at LOG-NET, generating \$7M revenue annually and improving product functionality for major clients like The Home Depot and Hermes Transportation Logistics.

EXPERIENCE

Amazon Web Services

2022 - 2023

Senior Program Manager - Amazon Foundational Security Services

Achieved critical goals set by Amazon's C-Level leadership to enhance the availability and reliability of business-critical Identity and Access Management solution. Served as a critical resource in remediating risks associated with large-scale events that could impact the onboarding of fulfillment center and corporate employees.

- ⇒ **Workflow Transition and Coordination:** Successfully transitioned authentication and access management workflows from open source to AWS-built solutions, supporting over 600M daily transactions across 54 global AWS regions.
- ⇒ **Cross-Team Collaboration:** Partnered effectively with three tier-1 AWS product teams and over 20 key globally distributed service teams within Amazon.

Protiviti, Inc.

2017 - 2022

Associate Director, 2021 - 2022

Senior Manager, 2017 - 2020

Led consulting programs with budgets ranging from \$1M to \$5M, focusing on aligning technology with business objectives, which included defining and implementing technology roadmaps, enterprise architecture, resilience, and IT governance. Played a key role in team growth and mentoring, enhancing program quality and reducing attrition.

Selected Client Engagements

- ⇒ **Cargill - Senior Technical Program Manager:** Enhanced data-driven decision-making across business functions such as lead-to-quote and order-to-cash, migrating 150 high-impact workflows to a new Common Data Platform. Oversaw a \$4M, 18-month program, coordinating a 12-member onshore/offshore engineering team. Achieved improved data normalization and governance, enhancing organizational data integrity and consistency.
- ⇒ **Microsoft - Senior Program Manager, Datacenter Resilience, Risk, and Assurance:** Directed a 10-person vendor team supporting resilience, risk, and assurance programs for over 250 global data centers. Developed and implemented a solution reducing Business Impact Analysis time from months to weeks. Supported key programs in business and technology resilience and crisis management.
- ⇒ **T-Mobile - Senior Technical Program Manager:** Instrumental in strengthening SOX compliance controls for new payment processing and logistics solutions. Evaluated business processes, technology architecture, and SDLC artifacts with 20 key stakeholders. Guided the internal audit team in adopting DevOps methodology for financial audits.
- ⇒ **Microsoft - Senior Security Program Manager:** Unblocked a significant \$150M sales opportunity by successfully onboarding cybersecurity software onto Azure Gov Cloud, achieving FedRAMP accreditation ahead of schedule. Enhanced security posture and remediated gaps using CIS and NIST 800-53 cybersecurity frameworks.
- ⇒ **Multiple Clients - Senior IT Governance Program Manager:** Ensured alignment of technology investments with business strategies, meeting various regulatory obligations. Developed Capability Maturity Model assessing five IT Governance domains as defined by IT Governance Institute.

Moss Adams, LLP

2013 - 2017

Manager - Technology Strategy and Enterprise Applications

Anish Nanavati

Provided technology leadership and served as a trusted advisor, overseeing transformation programs that aligned technology initiatives with strategic business goals. Grew team from 2 to 5, supporting 20+ firm partners, achieving a 45% increase in annual revenue and improving project completion rates.

Selected Client Engagements

- ⇒ **S. Martinelli and Company - Enterprise Architect and Senior Technology Program Manager:** Facilitated business expansion through a multi-year technology modernization initiative. Delivered annual savings of \$2.5M, improved product traceability, reduced inventory waste, and streamlined various business processes.
- ⇒ **Energy Northwest - Director of Enterprise Applications:** Pioneered a groundbreaking initiative enabling the Confederated Salish and Kootenai Tribes to become the first in the country to own and operate a hydro power plant, supplying electricity to over 100,000 homes. Developed and implemented comprehensive 1- and 3-year IT strategy plans, enhancing network connectivity and infrastructure integration across various sites.
- ⇒ **Darigold - Product Manager:** Enabled critical decision-making for multi-million dollar projects, developing a comprehensive forecasting tool. Worked collaboratively with cross-functional teams across multiple states.
- ⇒ **Ritter Communication:** Recovered a faltering technology program, spending \$15M in two years. Implemented short-term strategies to enhance order completion efficiency by 10% and save 400 resource hours per week.

LOG-NET, Inc.

2008 - 2013

Director, 2010 - 2013

Senior Technical Architect, 2008 - 2010

Oversaw global supply chain and inventory management SaaS products and programs, generating \$7M in annual revenue. Provided leadership for major clients like The Home Depot, Jones Apparel Group, and Dollar Tree.

- ⇒ **Strategic Committee Leadership:** Actively participated in the steering committee, driving the direction of core products and features based on customer feedback and market research.
- ⇒ **Enhanced Product Development and Implementation:** Spearheaded the development and launch of both new and existing products, significantly boosting revenue. Streamlined the overall product landscape by removing redundant functionalities, enhancing efficiency and market appeal.
- ⇒ **Team Leadership:** Coached and mentored a professional team of software engineers, program managers, and account leads, fostering a culture of innovation and growth.
