SUMMARY

- SRE / DevOps Engineer with almost 5 years of experience automating infrastructure, managing scalable CI/CD pipelines, and optimizing cloud-native systems.
- Proven track record in incident response, problem Management, and proactive observability maturity improvements.
- Skilled in building secure, resilient environments using Terraform, AWS, Azure, and orchestration with Kubernetes.
- Experienced with Dynatrace, Splunk, Prometheus, Grafana, and AWS API Gateway for performance optimization and root cause analysis.
- Adept at partnering with developers to improve logging & runbooks driving faster MTTR and more reliable deployments.
- Brings a strong foundation in Site Reliability Engineering (SRE) and is **certified as an AWS Solutions Architect – Associate**.

SKILLS

Programming Languages: Java, Python, C/C++, MySQL

Scripting: Shell Scripting, HCL, PowerShell, Ruby

Source code management: Git, GitHub, GitLab, Azure Repos, Bitbucket

Developer Tools: VS Code, IntelliJ, Maven, Ant, Gradle Nexus

Collaboration & Methodology: Jira, Confluence, Agile, Waterfall

AWS: EC2, S3, Lambda, VPC, RDS, SNS, CloudFormation, Route 53, IAM

Azure & GCP: Azure DevOps, Azure Cloud Shell, Compute Engine, Cloud Storage

Containerization: Docker, ECS, EKS

Orchestration: Kubernetes, Helm, Rundeck

CI/CD: Jenkins, ArgoCD, GitOps

Infrastructure (IaC): Terraform, Ansible, Chef, puppet, CloudFormation

Monitoring: Prometheus, Grafana, CloudWatch, Dynatrace, Splunk, SonarQube

Soft Skills: Incident Response, Triaging, Blameless Postmortems, Runbook Development, Observability Best Practices

EXPERIENCE

MetLife, USA | (Domain: Healthcare)

Jan 2024 – Present

Site Reliability Engineer

- Defined and monitored SLIs/SLOs using Prometheus and Grafana, contributing to error budget tracking & reliability targets.
- Led critical incident response, conducted blameless postmortems, and implemented preventive measures to enhance system resilience.
- Enhanced observability maturity by identifying performance bottlenecks, improving logging, and developing detailed runbooks for faster triage.
- Provided .NET application production support, using Splunk and ServiceNow (SNOW) to monitor logs, troubleshoot incidents.
- Integrated Dynatrace and Splunk with Prometheus/Grafana, reducing root cause analysis time by 50%.
- Configured and optimized AWS API Gateway for high traffic microservices, reducing latency by 25%.
- Automated CI/CD pipeline deployments with Kubernetes and Terraform, enabling zero-downtime rollout of 10+ microservices in 3 months.
- Embedded AI-powered failure analysis into CI/CD workflows, cutting MTTR by 60% in Kubernetes environments.
- Collaborated with architects and developers to deliver scalable, secure, cloud-native solutions aligned with HIPAA & SOC2 compliance.

Metasystems, India | (Domain: Banking / FinTech)

Jan 2020 - Jun 2022

DevOps Engineer (SRE)

- Automated Linux patching with Ansible via Azure DevOps, reducing manual effort by 80% and enhancing OS security.
- Created Splunk dashboards and alerts for fraud detection, enabling rapid anomaly detection and triage.
- Implemented observability best practices by enhancing log structures, updating runbooks, and automating alert enrichment..
- Contributed to containerized deployments and multi-tier architecture design using Spring Boot and Kubernetes.
- Built centralized logging and monitoring using the ELK stack (Elasticsearch, Logstash, Kibana) integrated with AWS CloudWatch and PagerDuty, enabling proactive incident response and reducing mean time to recovery (MTTR) by 40%.
- Maintained and enhanced CI/CD processes with Jenkins, Maven, and Docker, supporting automated testing, building, and deployment across multiple environments.
- Collaborated in Agile development teams, participating in daily standups, sprint reviews, and backlog grooming to deliver features aligned with business objectives.
- Administered and automated tasks across Linux-based systems using Bash scripting and cron jobs, including log rotation, service restarts, and system updates, improving operational efficiency and reducing manual intervention by 70%.

EDUCATION

Master of Science in Information Technology | Arizona State University, Tempe, AZ

May 2024

Bachelor of Engineering in Electronics and Communication Engineering | Anna University, Chennai, India

May 2021
