

Abdul Taleb

Moraga, CA 94556 | (925) 322-3724 | abdul@talebagha.com | [github](#)

Technical Skills

- Primary Languages: JavaScript, TypeScript, Python, Golang, SQL
- Artificial Intelligence (AI): Prompt Engineering, OpenAI API, Anthropic API, LangChain, Retrieval-Augmented Generation (RAG), Model-Centric Programming (MCP), Claude Code
- Databases: MongoDB, PostgreSQL, Elasticsearch, Redis, DynamoDB, Pinecone
- Architectures: Event-Driven Architecture, Request-Driven Architecture,
- Libraries: React.js, Redux, Apollo GraphQL, Styled-Components, Material-UI, Tailwind and more!
- Testing: Jest, Testing-Library, Mocha, Playwright, Cypress, Puppeteer, Appium, Vitest
- Frameworks: React-Native, Expo.io, Next.js, Nest.js, Serverless-Stack, Serverless, AWS AppSync
- Backend Technologies: Node.js, Python, Golang, Express.js, Serverless, Nest.js, Django, GraphQL, Apollo-Server, Kafka, RabbitMQ.
- Infrastructure: AWS, Google Cloud Platform, Digital Ocean, Heroku, Terraform, K8s
- DevOps: Docker, Docker-Compose, Kubernetes, Garden.io, GitHub Actions, CircleCI, GitHub, Gitlab
- APIs: RESTful, GraphQL, SSE, RPC, WebSocket, Hypermedia
- Other: Twilio, SendGrid, Google Speech APIs, Google Maps APIs, Stripe, Braintree, PayPal and many more.
- Project Management: Jira, ZenHub, GitHub Projects/Issues, Trello
- State Management: Redux, Apollo Cache, mobX, Recoil, Jotai, React Context/State
- Platforms: Mac OS, Linux
- Text Editors: Visual Studio Code, NeoVim, LazyVim
- Familiar with: Rust, Ruby, Solidity, Web3.js

Work History

SENIOR FULL STACK SOFTWARE ENGINEER | SCALE COMPUTING | 2024 - CURRENT

- Developed and released critical public features, including comprehensive API access and Kraken integration, adopted by large international enterprises
- Implemented event-driven architecture using Nest.js and Kafka to enhance system scalability and performance for global enterprise clients
- Leveraged Kubernetes to design and deploy robust microservices infrastructure supporting mission-critical business operations
- Technologies used: Node.js, Nest.js, Kafka, Kubernetes, PostgreSQL, TypeScript, MongoDB Atlas, Garden.io, Terraform, Google Cloud, Playwright, Vue.js, React.js, Redis, Firebase, Docker, RabbitMQ and More.

SENIOR FULL STACK SOFTWARE ENGINEER | MOVECAR.COM (STOWK) | 2022 - 2024

- Architected and launched foundational version of an AI shipping platform, delivering end-to-end functionality through integrated web applications, mobile apps, and backend services for public release.
- Technologies used: Node.js, React.js, Redux, TypeScript, Golang, AWS CDK / Terraform, AWS Lambda & Serverless stack, AWS ECS, SQS, Route53, Google Cloud, PostgreSQL, DynamoDB, MongoDB Atlas, Vector DBs, GraphQL Next.js, React-Native, Apollo, GitHub Actions, Serverless-Stack & more.
- Developed the backend using Apollo-Federation architecture with a mix of serverless and server microservices. Services used mostly Node.js, with some in Golang and Python. The databases used were MongoDB, DynamoDB, Redis and Elasticsearch
- Architected the front-end applications using MPA architecture with React, React State Management and Next.js. Developed custom component library using React, Lerna and Styled-Components. The public facing site was server side rendered with a headless CMS, hosted on AWS Lambda@Edge, CloudFront and S3. Designed the React/Next.js public app to render into AMP pages for SEO advantages on mobile, and the SaaS application as client-side rendering only.

FULL STACK SOFTWARE ENGINEER | KEA. AI | 2021 - 2022

- Engineered critical components of a Voice AI restaurant platform that secured pilot program with major restaurant chain, utilizing Node.js, TypeScript, Golang, and cloud infrastructure.
- Contributed to developing agent and Ops UI using React, Recoil State Management framework and Styled-Components.

- Lead the development of the transcription and store management services.
- Aided in the menu service and the autonomous ordering service.

SENIOR SOFTWARE ENGINEER | FORMATION | 2018 - 2021

- Architected and scaled business intelligence platform from single-tenant to multi-tenant solution, enabling adoption by multiple Fortune 500 enterprises; developed comprehensive analytics dashboards and reporting infrastructure
- Built using strong functional programming principles using React, Jotai State Management library, Node.js, Golang, AWS Serverless & Sanctuary.js.
- Encouraged and developed the backend using Apollo GraphQL, Node.js, Golang and AWS API Gateway & Lambda.

MOBILE WEB ENGINEER | SAMSUNG ELECTRONICS AMERICA | 2016 - 2018

- Led development of first-generation embedded web experiences for Shop Samsung app, engineering dynamic product configurators that streamlined promotional updates and enhanced consumer interaction with Samsung's product ecosystem
- Aided in the development of web & mobile apps within Samsung Family Hub and Ecommerce apps using React & React-Native.
- Aided in the backend development of the ecommerce marketing management backend using Node.js, Restify & Apache Cassandra.

SOFTWARE ENGINEER | VERIZON | 2016

- Lead the engineering team in developing the new version of FIOS TV Web App using React/Redux, Node.js & SASS.
- Aided in architecting the web app and making engineering decisions for mass audience web app.

SOFTWARE CONSULTANT & DEVELOPER | FTR INTERNATIONAL INC. OF NEVADA | 2011 - 2015

- Developed document & asset management systems for our clients using FileMaker Pro Advanced, Ruby on Rails, Node.js, & Angular/React. Trained clients in using software and recommended best practices and proper use of software.

Education

COMPUTER SCIENCE POST BACCALAUREATE | OREGON STATE UNIVERSITY

BACHELORS OF SCIENCE, BUSINESS ADMINISTRATION | SAN FRANCISCO STATE UNIVERSITY

Certificates

GOOGLE CLOUD PROFESSIONAL CLOUD ARCHITECT
