

Atal Neupane

Arlington, TX | atalneupane586@gmail.com

PROFESSIONAL SUMMARY

- 13 years experienced in Software Development. Excellent team player with good analytical, strategic planning and interpersonal and communication skills.
- Experience working with Agile Engineering Best Practices such as TDD, BDD and ATDD.
- Strong proficiency in supporting Production Cloud environments (AWS, VMWare) as well as traditional managed hosted environments.
- Experience in implementing Service Oriented Architecture (SOA), SOAP and REST services.
- Experience in analysis, design and development of client/server-based enterprise applications using Java / J2EE Technologies in both Windows and UNIX platforms.
- Experience in implementing Java EE design patterns such as MVC, Singleton, Session Facade, DAO, DTO, and Business Delegate in the development of Multi-Tier distributed Enterprise Applications.
- Expert in designing front end interfaces using HTML/HTML5, Angular JS 1-2, React JS, CSS/CSS3, JSP, JSF, JSON, DOJO, JavaScript, JQuery and AJAX.
- Experience building cloud native app with Spring Framework and Spring Boot (Auto Configuration).
- Expert developer of restful Web Service using Spring Boot and deployed to pivotal Web Services.
- Experienced in Python Open Stack API'S and FAST API high-level experience in Base SAS.
- Experience in Creation and managing user accounts, security, rights, disk space and process monitoring in Solaris and Red hat Linux.
- Experience with configuration management tools like Ansible and Packer and automated the cloud deployments using terraform.
- Extensive experience in Java, J2EE technologies such as JDBC, Servlets, JSP, Struts, JSF, EJB, Spring, Web Services, Hibernate, JMS, XML, XSD, XSL and JNDI, AJAX.
- Experience in Implementation of MVC/ MVW architecture using Servlet, Django, and RESTful, SOAP web service.
- Experience on LAMP & WAMP. (Windows, Apache, MySQL and PHP) architecture.
- Experience with HTML, HTML5, CSS, CSS3, Bootstrap, and JavaScript, jQuery, AJAX, JSON, TypeScript, Reacts, Redux, Flux, Angular 10, Angular JS, ES5& ES6, Node.js, Vue.js and Browserify/Common JS patterns.
- Good experience on CSS background, layouts, Positioning, Animation, Borders, Padding, Tables, Pseudo classes and Pseudo elements.
- Full stack development experience working on web apps with many technologies: Angular, React, Node, GraphQL, MySQL.
- Experience in developing single page application (SPA) with Responsive design concept using different JavaScript and CSS frameworks like Angular 10, React, Polymer, Bootstraps and Foundation.
- Experience in working with Bootstrap for Responsive Web design. Worked with a SASS preprocessor.
- Strong experience in JavaScript MVC frameworks React, AngularJS and Angular 13. Deep understanding in the development of view layers using React library.
- Good experience in PHP and its frameworks WordPress and Laravel.

- Experienced with Components, Directives, Data binding, Custom Pipes, Services, Dependency Injection, Routing and Retrieving Data using HTTP in Angular 10 and Typescript.
- Experience in Linux based systems administration and troubleshooting, including CentOS, Red Hat, Ubuntu, and Debian
- Experience of working with Docker, Nginx, AWS, EC2, Apache, WebSphere, XAMP and MAMP
- Experience with Amazon Web Services like EC2, VPC, Cloud Watch, Cloud Formation, IAM, S3, Amazon RDS, Elastic Cache, SNS, SQS.
- Experience with Ansible and Terraform for infrastructure automation. Proficiency in writing SQL queries Created database using MySQL, wrote several queries to extract data from database using ETL and ELT tool (SSIS).
- Experience in writing test scripts, test cases, test specifications, and implementing unit tests using Python Unit Test (PyUnit) library.
- Experience in real-time data from data sources through Kafka data pipelines and applied various transformations to normalize the data stored in HDFS Data Lake.
- Proficient using Python packages such as NumPy, SciPy, Requests, matplotlib, Pickle, Pandas, PySide, WxPython, QT, Tkinter, PyQt, PyTables and Scikit-learn

PROFESSIONAL EXPERIENCE

Sr. Lead Full-Stack Developer

Walmart, Remote

(Nov 2021 – Present)

- Spearheaded the adoption of Micro Frontend Architecture using Module Federation and Webpack 5, enabling autonomous deployment pipelines and team ownership for cart, payments, and promotions modules.
- Developed and optimized large-scale React 18 applications with TypeScript, Redux Toolkit, and Context API, building reusable UI libraries and implementing lazy loading and memoization for performance.
- Designed responsive web interfaces adhering to WCAG accessibility standards, using CSS Grid, SCSS modules, and Emotion, delivering pixel-perfect UI across 300+ device variants.
- Led the integration of DevSecOps pipelines using AWS CodePipeline, CodeBuild, and SonarQube, embedding static code analysis, unit testing (Jest + RTL), and vulnerability scanning into the SDLC.
- Implemented a CI/CD infrastructure on AWS, deploying secure, performant apps through CloudFront + S3, with Lambda@Edge for A/B testing, feature flagging, and secure routing.
- Engineered AWS-based serverless microservices using API Gateway, Lambda, DynamoDB, and SNS/SQS to handle product recommendations, order tracking, and real-time notifications.
- Conducted knowledge-sharing sessions on shift-left practices, component isolation via Storybook, and contract testing to improve early-stage bug discovery by 60%.
- Collaborated with cross-functional stakeholders to align technical architecture with digital strategy, resulting in improved TTI/TTFB performance by 42% on the Walmart homepage.
- Led the design and implementation of a modular Micro-Frontend architecture across Walmart's global e-commerce platform, enabling autonomous team deployments and reducing release conflicts by 60%.

- Developed reusable, high-performance React 18 components using TypeScript, Context API, and Hooks with strict linting and testing pipelines (Jest, RTL) to ensure stability at scale.
- Architected responsive web interfaces following atomic design and accessibility (WCAG 2.1) standards; improved mobile and desktop Core Web Vitals by 40%.
- Integrated secure and scalable micro-frontends with AWS CloudFront, Lambda@Edge, and S3 for lightning-fast delivery across global CDN nodes.
- Collaborated closely with product owners and architects to align UI/UX modernization with business KPIs, resulting in a 25% lift in user engagement for personalized landing pages.
- Advocated and implemented DevSecOps shift-left practices, including static security analysis (Snyk) and container scanning integrated into CI/CD via Jenkins and GitHub Actions.
- Mentored a distributed team of 10+ engineers in React architecture patterns, including state encapsulation, lazy loading, and error boundaries for fault-tolerant design.
- Actively participated in roadmap planning and architectural reviews with leadership, influencing key technology choices for front-end evolution and performance strategy.

Discovery Channel, Remote

Sr. Full Stack Developer

(Sep 2019 - Oct 2021)

- Migrated legacy UI to micro-frontend architecture using React 17, React Router, and Web Components, enabling teams to deliver independently versioned vertical slices of the app.
- Built responsive, component-driven UIs with React Hooks, TypeScript, and Styled-Components, achieving a Lighthouse performance score of 95+ across all key journeys.
- Integrated video streaming modules and live sports interfaces with backend GraphQL APIs, and established Apollo Client caching strategies for efficient state management.
- Developed Jest and RTL-based test suites with 90%+ coverage across core features, implementing snapshot, behavioral, and accessibility testing.
- Deployed static and dynamic content through AWS CloudFront, Lambda@Edge, and S3 with automated cache invalidation and region-aware routing.
- Integrated RESTful services using AWS API Gateway + Node.js-based Lambdas, handling search indexing, user preferences, and episode analytics.
- Introduced observability tools like AWS CloudWatch, custom metrics, and error tracing, reducing mean time to resolution (MTTR) by 35%.
- Mentored junior developers in component lifecycle management, accessibility, and TypeScript interfaces, and led retrospectives that helped reduce technical debt by 20%.
- Led the migration of a monolithic frontend to a modular micro-frontend architecture, enabling independently versioned applications for content browsing, search, and live TV features.
- Built and maintained React.js components using Hooks and Context API, with TypeScript, focusing on reusability and performance optimization for dynamic, video-rich UIs.
- Integrated advanced caching strategies using SWR and service workers for offline-first PWA capabilities.
- Developed responsive UI layouts with Flexbox and Grid, ensuring pixel-perfect rendering across 300+ device profiles and maintaining parity with native app designs.

- Integrated with backend services using both REST and GraphQL, building secured interfaces with token-based auth (JWT + OAuth2).
- Used Jest, React Testing Library, and Cypress for test automation, writing behavior-driven tests and achieving over 90% coverage across core modules.
- Participated in cloud transformation by migrating static assets and frontends to AWS S3, employing CloudFront and Terraform for infrastructure-as-code provisioning.
- Worked closely with leadership and product owners to define delivery roadmaps, participated in sprint planning, and conducted retrospectives to ensure agile alignment.

Atlassian, Maryland

Sr. Software Developer

(July 2016 - Aug 2019)

- Worked on React, Node, Slim based application for Vehicle Pricing and Appraisal in which primary responsibilities include design and development of rate plan module for Online Account Management (OLAM).
- Deployed and managed containerized applications using Docker and Kubernetes on Linux-based servers, enabling seamless deployment and scaling.
- Developed custom constructs in CDK to enable teams to quickly deploy and configure resources such as Amazon EC2 instances, Amazon S3 buckets, and AWS Lambda functions.
- Developing a user interface application using HTML5, CSS3, SASS, JavaScript, Typescript, React, Redux, Angular 2, Angular 4, Angular 6, React and Node JS.
- Extensively used XML and RESTful Web Services to retrieve and send data from different applications. Built Kubernetes environment deployed via terraform. Built AMIs with packers.
- Created and Maintained HMVC Content Management System Website by using jQuery, JavaScript, HTML, CSS.
- Designed and implemented RESTful APIs to interact with AWS services and external systems, using frameworks such as Spring Boot, Express, and Flask.
- Implemented Confluence macros and plugins to extend functionality and improve user experience within the platform.
- Built scalable and fault-tolerant data pipelines using Kinesis Firehose to capture, transform, and load data into various storage and analytics services.
- Wrote and executed various MYSQL database queries from python using Python-MYSQL connector and MySQL dB package.
- Worked on creating the modules driven AWS infrastructure with Terraform. Created infrastructure Git repositories for Terraform to launch the stacks.
- Utilized Docker and Kubernetes to containerize Python applications, enabling seamless deployment across diverse environments.
- Implemented Restful API using Node Express and CI to enable the partner's price estimations.
- Built UI features using mobile components in React Native like list, button, item. AJAX (jQuery) based rich client to improve customer experience.

- Integrated Amazon Kinesis streams with React Native applications to capture and process real-time data from various sources.
- Developed additional UI Components using JSF and implemented an asynchronous,
- Worked extensively with Terraform and wrapped it Terragrunt and managed the back-end state in S3 bucket.
- Developed UI components for email and link sharing of documents and files for a Content Management System using Backbone.js and jQuery.
- Implemented Restful API using Node Express and CI to enable the partner's price estimations.
- Worked over Hybrid app development using PhoneGap and AngularJS.
- Wrote an Ansible role that combined with Terraform and Terragrunt DSL for automating inside Aws cloud.
- Involved in Agile software development life cycle (SDLC) with SCRUM methodology.
- Used JavaScript DOM manipulation and JavaScript event to generate the data result in UI.
- Implemented JWT token-based authentication for the REST API. Implemented API using Node Express to describe endpoints.
- Designed and implemented sharable and re-usable software service API's.
- Built and optimized server-side applications with Node.js, handling routing, API endpoints, and server-side rendering for improved performance.
- Worked closely with cross-functional teams (QA, BA, PM, Product Owner) as a part of AGILE environment.
- Maintenance of applications in all the environments. Worked with GIT Version control.
- Monitored and managed Kinesis applications using CloudWatch, CloudTrail, and other monitoring tools to ensure high availability and reliability.
- Implemented Drupal's content management capabilities to allow for easy management and customization of the newly created components.

Freeman, Maryland

Sr. Software Developer

(Sep 2013 - June 2016)

- Worked on JavaScript for client-side scripting to reduce server trips and decrease the response time of the web application request.
- Used JavaScript frameworks such as jQuery, HTML5, CSS3 preprocessors.
- Implemented caching strategies to improve the performance of DynamoDB queries and reduce costs.
- Implemented AJAX calls with Ext JS and handled requests and responses for various modules like Bootstrap.
- Developed website using UI/UX on Unix/Linux operating system, backed by MySQL.
- Worked on versatile environment like Eclipse, WebLogic and NetBeans
- Used CVS & SVN as a version control system, an important component of Source Configuration Management (SCM) with support tools such as Jira.
- Worked on Unit test with JEST and cucumber-JVM in a page object model and cleaned up the duplicate code and maintained a good standard of coding. Later we created the framework with TestNG.

- Worked on agile methodology for software development and working on Atlassian products kind of Jira, Hipchat, confluence.
- Integrated with Hipchat for team chat, for continuous integration.

Ernst & Young, New York, NY

Software Developer

(July 2012 - Aug 2013)

- Worked on various UI technologies like JSF, HTML, CSS, JavaScript and JSP tag libraries.
- Made the web pages Responsive using jQuery UI and bootstrap, which can be operated in both PC's and Mobiles.
- Used advanced JavaScript concepts to validate input fields using regular expression.
- Extensively used CSS (Cascading Style Sheets) along with Responsive Web Design (RWD) to support the web page in Mobile browser as well.
- Involved in Enhancement of existing application utilizing JavaScript, created HTML navigation menu that is role-based menu items changes dynamically, derived from the database in the form of XML
- Used GIT for Python source code and Jenkins for automating the build Docker containers.
- Created Test strategy, Test plan, execution plan and Identified test data requirements.

Environment: JavaScript, HTML, CSS, jQuery, DHTML, XML, Java, DOM, JSON, Bootstrap, AJAX, Adobe Flash, Photoshop, AEM, PLSQL, Oracle, Windows.

Tech Mahindra, Bengaluru, India

Web Developer

(Oct 2010 - Jun 2012)

- Developed Enterprise level applications using Java, Spring, Hibernate, Oracle, MVC Securities, Web Services and AJAX.
- Coded web application utilizing programming languages including JavaScript, HTML, CSS and AJAX.
- Developed the Reusable templates using HTML, CSS, JavaScript, jQuery, handlebars.
- Built web pages that are more user-interactive using jQuery, Plugins for Drag and Drop, JSON, JavaScript and created Typescript controllers for the different pages in the views using Typescript.ts.
- Responsible for migrating/supporting the application to Amazon Web Services cloud infrastructure.
- Worked on implementing Ajax, jQuery methods in retrieving the data from JSON files and loading the claims data on the HTML elements.

EDUCATION

- Bachelors of Engineering in Computer Science - 2010 from ASCT, Bhopal, India
