ICT professional with more than 10 years of project and program management experience in infrastructure, Telco/IT application development, six-sigma process improvement. Experienced in managing the project budgets from \$500K to \$500M and successful portfolio of delivering the projects within defined scope, schedule and budget using SDLC, PMLC, waterfall and agile/scrum, DevOps methodologies.

Professional Expertise

- Project, Program, & Product Management
- Executive Reporting & Communication
- People/Vendor Management
- Schedule/Resource/Risk Management
- AMPs/GSM/UMTS/LTE/VoLTE/VoWifi/IoT,5G technologies
- Year to Year Engineering Growth Forecast & Operation Management
- UAT/QA/NG911/e911 Testing/Validation/HLD, LLD Flows
- Budget Management, financial reconciliation
- Salesforce/Oracle/Remedy/Jira/ServiceNow/Power Bi
- Process Improvement/SOP Preparation
- SCTP/Diameter/SS7/SNMP/FTP/SIP/RTP/VoIP /WebRTC/Twilio/AudioVideoCodecs/CPaaS/Open Stack /VNFs/NFVs/Hypervisor etc.

Experience

Rogers Communications Inc., Brampton, ON

Feb2025-To-Date

Role: Program Manager Engineering Technical End to End Services (Consultant)

- Working on the deployment of multiple Programs e.g. Dual Mode Core new cluster, Disaster Recovery Build-Out-IMS/ Packet Core (using Public Cloud as provided by AWS infrastructure), Deep Packet Inspection, Satellite to Mobile (Terrestrial Cell phones to connect with satellites in space where traditional cell towers are non-existent).
- Managed overall budget of a project by forecasting, monitoring actual spent, variance analysis and ensured project is delivered within +/-10% of the allocated budget.
- Identified and managed interdependencies and linkages among multiple on-going projects; managed the activities of cross-functional project teams (on-shore & offshore).
- Facilitated problem solving and control changes to project baselines through change request (CR) while coordinating with both sponsor & vendor teams.
- Managed conflict assessment of multiple activities and scheduling the production changes through accepted change management practices.

BoostMobile EchoStar(Dish Wireless), Littleton, CO, USA

Jun2022-To-Feb2025

Role: Staff Engineering Program Manager Technical End to End Services

- Lead project delivery in the areas of technology and business to deliver the services to the customers resulted in increased revenue.
- Implemented 5G-SA projects configuration using AWZ Cloud Infra on Core Platforms (SMF / UPF / AMF / NRF / NSSF / PCF / UDM / AUSF, SAEGW, SPGW, etc.)
- SW upgrades of the following nodes (EKS Clusters, RADCOM, SMF/UPF/AMF/NRF/NSSF/PCF/UDM/AUSF etc.)
- Augmentation of Core Network Infrastructure to meet lifecycle of high traffic demand.
- Deployment of virtualized IMS Core, Radcom Probing deployment end to end including Core (5G, IMS, SS7 (SMSC/MMSC/Voice Mail systems, Voice (SIP/RTP) & Data Streaming etc.), & ORAN (Mavenir/Samsung both).
- Deployment of End to End self-serve automated mobile testing using different services of 5G-SA, IMS, e911/NG911, VoWifi etc.
- Understanding of system and operational standards applied in Public Safety Answering Points (PSAPs), including Computer Aided Dispatch (CAD) solutions, Medical Priority Dispatch System, and voice recording and other archival solutions.
- Managed overall budget of a project by forecasting, monitoring actual spent, variance analysis and ensured project is delivered within +/-10% of the allocated budget.

- Identified and managed interdependencies and linkages among multiple on-going projects; managed the activities of cross-functional project teams (on-shore & offshore).
- Facilitated problem solving and control changes to project baselines through change request (CR) while coordinating with both sponsor & vendor teams.
- Managed conflict assessment of multiple activities and scheduling the production changes through accepted change management practices.

Rogers Communications Inc., Brampton, ON

Mar2020-To-Jun2022

Role: Program Manager Engineering Technical End to End Services

- Lead project delivery in the areas of technology and business to deliver the services to the customers resulted in increased revenue.
- Deployment of End to End self-serve automated mobile testing using different services of 5G-SA, IMS, e911/NG911, VoWifi etc.
- Understanding of system and operational standards applied in Public Safety Answering Points (PSAPs), including Computer Aided Dispatch (CAD) solutions, Medical Priority Dispatch System, and voice recording and other archival solutions.
- Augmentation of Core Network Infrastructure to meet lifecycle of high traffic demand.
- Deployment of virtualized IMS Core, Deployment of NetScout Virtual/BearMetal Probes/Tabs end to end (Core 5G, IMS, Voice Core, RAN Core).
- Managed overall budget of a project by forecasting, monitoring actual spent, variance analysis and ensured project is delivered within +/-10% of the allocated budget.
- Identified and managed interdependencies and linkages among multiple on-going projects; managed the activities of cross-functional project teams (on-shore & offshore).
- Facilitated problem solving and control changes to project baselines through change request (CR) while coordinating with both sponsor & vendor teams.
- Managed conflict assessment of multiple activities and scheduling the production changes through accepted change management practices.

Freedom Mobile Communications Inc., Toronto, ON

May2019-To-Mar2020

Role: Engineering Manager Lab

- Schedule management of LAB Projects/Programs to have them on track for the instant reporting to Management.
- Facilitated problem solving and control changes to LAB-Projects through accepted change management practices.
- LAB infra availability for all on-going projects & coordinated & follow-up with Vendor teams for fault management & its resolution.
- Deployment of 5G-NSA & IoT (NB/LTE-M), Deployment of Probes/Tabs using Mobillium provided equipment end to (Core/IMS/RAN)
- LAB deployment/validation of NG911, eSIM, Nokia One-NDS/HSS(SDM)/Cloud (CBIS/CBAM) products.
- Software & hardware upgrades of cMM/cMG/TAS/PCRF/DNS etc.
- Managed stakeholders up-to 40-50, executive reporting to VP's by presenting milestone dashboards, proactively identified risks, mitigations, Gantt chart schedule etc.
- Identified and managed interdependencies and linkages among multiple on-going projects; managed the activities of cross-functional project teams (on-shore & offshore).
- Facilitated problem solving and control changes to project baselines through change request (CR) while coordinating with both sponsor & vendor teams.
- Managed conflict assessment of multiple activities and scheduling the production changes through accepted change management practices.

Rogers Communications Inc., Brampton, ON

Feb2015-Apr2019

Role: Program Manager Engineering Technical End to End Services

- Lead project delivery in the areas of technology and business to deliver the services to the customers resulted in increased revenue.
- Implemented 5G trial project configuration on Core Platforms (SGSN-MME/SSRs/CUDB/HSS etc.).
- Implemented enterprise cloud-based solution of product "Unison-Unified Communication" which involved wireless and wireline IT integration and platform modernization mainly including BTAS of IP telephony.

- Transformed Rogers IP Backbone bandwidth from **30Gig** to **70Gig** (SSR/QFX) for Gi traffic.
- Lead the delivery of projects for modernization of Packet/IMS-SIP/RTP/WebRTC/CPaaS and Voice core including CS2K/VOIP/Security to improve network footprint and stability.
- Implemented Rogers Smart Home Monitoring System & Monthly Data Home Sharing projects.
- Delivered network virtualization projects for Data Rating & Billing platforms (TSP/IUM).
- Completed M2M/OSS projects (OSS-RC upgrade-SNMPv2&v3), Broadband billing & Data-rating projects (IUM), DRA (diameter routing agent), PCRF, & AAA etc.
- Transformed Network Architecture project/program of VoLTE & VoWiFi. (I/S/E-CSCF, A-SBC,I-SBC, DEA, DRA, HSS, ENUM, MRF, ePDG)

Etisalat (Ufone), Lahore, Pakistan

Sep 2000 to Jan 2015

Role: Manager Engineering Technical (Jan 2007 to Jan 2015)

- Performed end to end Projects deployment & rollouts of Telecom/IT networks (Voice/Data/RAN/IT).
- Completed many projects in relation to EBU & CBU i.e. Core infrastructure rollouts & Contact Centre buildouts.
- Lead & Cash Ufone Phase-V **14 Million Subscribers Capacity Project** with Huawei provided infrastructure while swapping the existing Nortel & Siemens Networks.
- Lead the set-up of PMO Centre of Excellence & Governance following full life cycle of service management that included but not limited to reporting, standards, KPI's, performance, analysis, project intake model, compliance & governance, tools & database management, training & enablement, internal communications, project control office, financial forecast and delivery management, and process improvement.
- Lead the **RFPs** of network expansion of budget \$20M and implemented the entire core project life cycle from vendor selection, infrastructure build, QA testing and hand over to operations.
- Actively participating in the commencement of Quality Management System Program for **ISO 9001:2008 Certification** for the Technical Department.
- Implemented a culture of **KAIZEN** triggers within technical department & their KPIs tracking to comply ISO9001.2000.

Role: Business Analyst (Jan 2004 to Jan 2007)

- Developed business architecture using requirements such as scope, process, alternatives & risks.
- Conducted testing including functional, regression, usage acceptance, integration & performance.

Role: Project Coordinator (Jan 2000 to Jan 2004)

- Assisted the senior management in coordinating the platform stability and developed the support plans.
- Performed engagement procedures designed to identify and define issues, review and analyze evidence, and document support processes.

Education & Certifications

- BSc. Electrical Engineering from UET Lahore, Pakistan. **Sep1995-June1999**
- PMP®(**License#2592908**), Six Sigma (σ) Green Belt (**License#2014/0365**), ITIL® Foundation(**License#250928706**)
- SAFe Agile Certified (11171608-0278)
