## Education

**M.S. in Computer Science, Boston University**

**Sep 2012 - May 2014**

**B.S., Computer Science, Boston University**

**Aug 2007 - May 2011**

## Experience

**Staff DevOps Engineer**

**SAP Concur**

**Jul 2021 - Present**

- Led micro-service migration and conversion from AWS to GCP and Azure.
- Designed best practices IaC using Terraform, CloudFormation and Ansible
- Technical lead for cross-team infra and dev support
- Technical lead for internal and external security audits and patch cycles: PCI, ISO (27K & 31K) and SOC2
- Significantly reduced vulnerability remediation time and volume s

**Senior DevOps Engineer**

**SAP Concur**

**Sep 2013 - Jul 2021**

- Led virtualization platform migration to ESX.
- Designed configuration management, monitoring/response, and data management solutions and best practices
- Reduced repeat problem incidents by 80% in the first 180 days
- Reduced incident detection and response time by 87% in the first 90 days.
- Created first DevOps and DevRel Wiki.
- Technical lead for PCI and ISO audit teams
- Technical lead for RelEng and CI/CD implementation
- Significantly reduced deploy times
- Technical lead for SRE on-call.
- Led platform migration and conversion from on-prem to AWS.

**Senior Software Engineer**

**RedHat**

**Jan 2012 - Dec 2012**

- Technical lead on stabilization project for 3-year-old infrastructure to reduce Java, Rails, and connectivity errors.
- Technical lead for tooling using Python, Bourne, and Ruby

**Senior Infrastructure Engineer**

**RueLaLa**

**Jan 2009 - Dec 2011**

- Managed a \$28-million revenue-generating infrastructure.
- Desgned load-balancer, firewall, Oracle DB, and RHEL machine deployment methods for 0% downtime.
- Technical lead for PCI DSS v2.0 initiative.
- Technical lead for two datacenter rebuilds.
- Technical lead for GSI Enterprise Service Bus (ESB) project.
- Desgined ESB infrastructure to support 3M+ OLTP and OLAP transactions.
- Technical lead for the Rue La La blog site.

**Senior Infrastructure Engineer**

**TIBCO**

**Jan 2008 - Dec 2009**

**Application Engineer**

**Google**

**Jan 2006 - Dec 2008**

## Skills

**Programming Languages:** Python / PHP / HTML / CSS / JavaScript, Shell Scripting (BaSH / Bourne / ZSH), Java v1.4

**Platforms** Amazon Web Services (AWS), Google Cloud Platform (GCP), Microsoft Azure

**Systems** UNIX and Linux (RHEL / SunOS / AIX / Debian / BSD / VMS)

**Compliance** ISO Compliance (9K / 27K / 31K), PCI DSS Compliance (v2 - v4), SOC2

**Tools and Frameworks:** DevOps, GitOps, Agile (Srum Method), Software Development Life Cycle (SDLC), Site Reliability Engineering (SRE), IaC / Cloud Formation / Terraform, Virtualization (ESX / Containers), Configuration Management (Ansible / Puppet), Visibility (Nagios / Datadog / AppDynamics / Splunk / Icinga), Continuous Deployment & Automation (Jenkins / Hudson / Git Actions), Firewall Management, AI Prompt Engineering, Revision Control (Git / Subversion / Perforce / VCS)
