

Bo Frank

Senior Front-end Developer / Product Lead

With decades of development experience spanning startups, large companies, and volunteer work, my career traverses front-end and UI development, product management, and technical leadership, bringing projects from concept to launch. I consistently translate complexity into easy-to-use human-centered digital experiences, building apps, sites, and platforms across AI services, games, and fintech, while driving innovation to improve accessibility and user experience. My technical foundation and drive for continuous learning brings a rare blend of engineering depth and product expertise to every project I develop.

EXPERIENCE

Microsoft (TEKsystems)

May, 2020 -
Present,
Redmond, WA;
Remote in Seoul

Web Developer (Product and Performance PM)

- Developed the Cloud Intelligence / AIOps Workshop website.
- Developed an internal Microsoft portal for AIOps.
- Built and maintained site architecture, assets, navigation, and code (JavaScript, HTML, CSS).
- Aligned user needs and workshop goals based on UI/UX research.
- Provided analytics reports and automatic site monitoring.

Abstract Tokenization (Abstract IQ)

August 2019 -
May 2020,
Seattle

Front-end Developer

- Delivered end-to-end development for a platform that democratizes commercial real estate investing by implementing blockchain.
- Updated legacy PHP with modern async JavaScript (React+Vue).
- Provided a solution for a legacy system inherently encumbered by a massive amount of documentation and tedious illiquid financial servicing.

StratusCore (Ravel)

July 2018 -
July 2019,
Seattle

Front-end Developer

- Developed a scalable, cloud-based platform for 3D software subscriptions and artist profiles that simplified user workflow and talent discovery.
- Refactored legacy PHP code to Vue for improved performance and easier maintenance working with database engineers and backend developers.

Verisart

2018,
London;
Remote in
Seattle

UI Developer

- Helped create a fine art digital certification platform for verisart.com using React, Redux, and Go to complete a beta launch.

Microsoft (Affirma)

2016 - 2017,
Redmond, WA

Senior Software Design Engineer

- Redeveloped the Xbox Community Support Platform and MVP gallery.
