## CERTIFICATIONS

**Certified Salesforce Administrator & App Builder** | Certs-School, Apr 2017  
**AWS Technical Essentials** | Certs-School, Jun 2017

## KEY VALUE OFFERINGS

- **Salesforce Administration:** Streamlined Salesforce platform administration, enhancing system security and optimizing user adoption through customization of Sales Cloud, Service Cloud, and Experience Cloud, resulting in improved user satisfaction.
- **Business Analysis:** Partnered with business stakeholders to define requirements, deliver executive-level reporting, and implement data-driven strategies. Spearheaded the implementation of Salesforce CPQ and nCino solutions, improving operational efficiencies.
- **Custom Application Development:** Designed and deployed high-performance Salesforce applications using Apex, LWC, and Visualforce. Delivered faster response times and enhanced customer engagement through secure and scalable cloud-based solutions.
- **Team Leadership & Training:** Successfully led cross-functional teams, providing comprehensive end-user training, and consulting on best practices. Contributed to higher Salesforce adoption across the organization and streamlined user onboarding processes.
- **Process Automation:** Engineered Salesforce automation solutions, driving workflow automation, reducing manual tasks, and improving data consistency. Integrated Mulesoft, AWS, and SAP S/4 HANA to ensure seamless data flow across platforms.
- **Agile Methodologies:** Applied Agile frameworks to manage projects and ensure timely delivery of Salesforce solutions. Expertise in data governance and security protocols, ensuring compliance and system reliability, resulting in better security practices.
- **Quota-Carrying Experience:** Demonstrated success in quota-carrying roles as a systems engineer and architect, achieving and exceeding sales targets through technical expertise and strategic collaboration.
- **Cloud & Kubernetes Expertise:** Proficient in cloud technologies, Kubernetes, and virtualization, with hands-on experience in data center infrastructure and business-critical applications.

## PROFESSIONAL EXPERIENCE

### Alacura

#### Salesforce Administrator

March 2025-May 2025

- Administered Salesforce Health Cloud to manage patient and provider data, customizing fields, objects, and workflows to streamline healthcare operations and improve care coordination.
- Implemented Salesforce Shield Platform Encryption in Health Cloud to secure sensitive patient data, ensuring HIPAA compliance and protecting against unauthorized access.
- Designed CRMA dataflows to clean, aggregate, and visualize multi-object Salesforce data, leading to improved pipeline accuracy and forecasting confidence.
- Developed CRMA dashboards that visualized support ticket trends, leading to improved knowledge base content and a 27% reduction in repetitive case creation.

- Created executive-level CRMA dashboards that unified sales, service, and marketing data into a single source of truth, enhancing decision-making speed and reducing weekly manual reporting by 12 hours

**MTX Group****Salesforce Administrator****Sep 2023 – Oct 2024**

- Led Salesforce administration for a 50+ user base, optimizing security settings, permission sets, and workflows, resulting in a 35% reduction in system access-related support tickets.
- Developed and optimized Salesforce Flows and Apex triggers, automating key business processes that eliminated 40% of manual work, allowing teams to focus on high-value tasks.
- Integrated Salesforce with Outreach and HubSpot, streamlining lead tracking, sales forecasting, and marketing automation, leading to a 20% increase in sales productivity.
- Implemented HubSpot workflows to automate lead nurturing and scoring, improving marketing-to-sales handoff efficiency by 25%.
- Designed and implemented scalable Salesforce solutions across Sales Cloud and Service Cloud, ensuring system resilience and performance optimization.
- Developed custom CRM workflows in HubSpot to segment leads and automate follow-ups, reducing response times by 30%.
- Implemented automated data cleansing initiatives, reducing duplicate records by 60%, which improved reporting accuracy and enhanced sales forecasting reliability by 30%.
- Trained sales teams on HubSpot CRM best practices, increasing user adoption by 35% and improving pipeline visibility.
- Defined system integration strategies, API usage, and data governance policies to maintain compliance.
- Documented HubSpot processes and created training materials to standardize onboarding for new marketing teams.
- Designed and launched real-time executive dashboards in Tableau, providing stakeholders with critical sales performance insights, improving data-driven decision-making across departments.

**Cooney & Conway****Litify Architect & Salesforce Administrator****June 2022 – Aug 2023**

- Implemented advanced security configurations in Salesforce, ensuring legal compliance with industry regulations and reducing unauthorized access incidents by 45%.
- Automated case management workflows within Litify, decreasing manual data entry efforts by 30% and accelerating case processing times by 25%, allowing legal teams to handle more cases efficiently.
- Optimized HubSpot integration with Salesforce to sync client communications, reducing manual data entry by 20%.
- Designed CRMA dashboards to provide real-time insights into sales performance, improving executive decision-making and forecasting accuracy by 35%.
- Created and maintained Knowledge Base articles, improving attorney onboarding and enhancing self-service support for legal staff.
- Developed and automated CPQ (Configure, Price, Quote) processes, reducing pricing errors by 25% and accelerating deal closure times by 30%.
- Integrated Tableau with Salesforce data to track case resolution metrics, reducing client churn by 20%.
- Developed Tableau dashboards to analyze legal team workloads, resulting in more balanced case assignments and a 15% boost in productivity.
- Designed Omni-Channel routing for case assignments, optimizing workload distribution and improving SLA compliance.
- Built HubSpot lead scoring models to prioritize high-value legal clients, improving conversion rates by 15%.

**Kasasa****Salesforce Architect****Nov 2021 – May 2022**

- Developed and automated CPQ (Configure, Price, Quote) processes, reducing pricing errors by 25% and accelerating deal closure times by 30%.
- Designed and deployed Power BI dashboards integrating Salesforce data, resulting in a 36% improvement in sales quota tracking and pipeline visibility.
- Leveraged HubSpot's campaign analytics to refine marketing strategies, increasing lead quality by 22%.
- Optimized Sales Cloud processes, improving lead conversion rates by 20% and enhancing sales team productivity.

- Created Tableau visualizations for sales conversion metrics, enabling leadership to identify and eliminate bottlenecks in the pipeline.
- Implemented CPQ configurations to streamline proposal generation, reducing quote turnaround time by 40% and enabling reps to close deals faster.
- 
- Implemented automated customer onboarding workflows, improving client activation efficiency and reducing onboarding time by 50%.
- Created HubSpot documentation for sales teams, reducing onboarding time for new hires by 40%.

## BMT

June 2021 – Jan 2022

### nCino Administrator & Business Intelligence Analyst (Contract Role)

- Configured and maintained nCino for loan processing, improving workflow efficiency and reducing loan approval times by 30%.
- Led integration efforts using Mulesoft, streamlining data connections between Salesforce and banking systems, which improved loan portfolio analytics by 20%.
- Developed predictive analytics tools within Salesforce, enhancing loan risk assessment capabilities and reducing default rates by 15%.
- Built a Tableau dashboard for loan risk segmentation, increasing detection of high-risk applications by 18%.
- Automated nCino workflows, allowing financial analysts to process 25% more loan applications per month.
- Conducted Salesforce training for banking staff, improving system adoption and reducing new hire onboarding times by 40%.
- Designed data models and Salesforce integrations for banking applications, ensuring compliance and security.
- Collaborated with sales counterparts to strategize and align on customer needs : contributing to a 20% increase in lead generation.

## Bloomberg Media

April 2021 – July 2021

### Salesforce Developer (Contract Role)

- Executed SEO-focused A/B testing using Salesforce insights, leading to an 18% increase in conversion rates and improved user engagement.
- Built and managed MuleSoft flows to connect Salesforce with ServiceNow, streamlining IT ticket escalations between support and IT departments and improving case resolution speed by 25%.
- Implemented Einstein Opportunity Scoring, refining lead prioritization and boosting lead conversion rates by 18%.
- Developed real-time executive dashboards, enabling data-driven decision-making and improving revenue forecasts.
- Implemented CRMA-based automation for pipeline analytics, reducing report generation time by 40%.
- Used historical data and predictive insights from Einstein Analytics to support quarterly business reviews (QBRs), helping leadership identify revenue gaps and customer churn risks proactively.
- Integrated CPQ with Sales Cloud and automated approval processes, decreasing deal cycle times and increasing rep efficiency by 25%.
- Used CPQ guided selling features to help sales reps identify optimal product bundles, increasing upsell opportunities and average deal size by 18%.
- Created CRMA dashboards to monitor campaign ROI, helping marketers reallocate budget and improve performance by 22%.
- Integrated Salesforce with marketing automation tools, reducing manual campaign tracking time by 50%.Engineered scalable Marketing Cloud solutions, optimizing campaign automation workflows.

## Cantel Medical

July 2020 – March 2021

### Salesforce Administrator & Business Intelligence Analyst

- Administered Salesforce Health Cloud:securing patient data through Shield Platform Encryption and ensuring HIPAA compliance.
- Developed automated reporting workflows saving 15+ hours per month on manual data compilation.

- Created Tableau dashboards to track customer lifecycle metrics, helping sales and marketing teams optimize engagement strategies.
- Integrated Tableau dashboards into health data reviews, improving the accuracy of patient trend forecasting by 25%.
- Designed Salesforce dashboards to track patient engagement trends, leading to a 20% reduction in readmission rates.
- Implemented a comprehensive Salesforce training program, increasing system adoption among healthcare providers by 35%.
- Identified opportunities for process improvements, enhancing team efficiency and reducing operational costs by 15%.
- Developed scalable Health Cloud architecture and security protocols for medical data management.
- Architected Salesforce automation solutions, reducing manual efforts and improving data consistency.

#### SinglePlatform

June 2018 – April 2020

#### Salesforce Administrator

- Enhanced Salesforce security through Event Monitoring, reducing unauthorized access incidents by 50%.
- Managed AppExchange integrations, automating workflows and reducing manual data entry efforts by 30%.
- Implemented Email-to-Case automation, reducing manual case creation efforts by 35% and improving response times by 15%.
- Integrated Einstein Analytics with Salesforce Sales Cloud to provide real-time visibility into lead conversion rates, helping marketing and sales teams optimize campaign efforts and increase lead-to-opportunity conversion by 18%.
- Implemented real-time sync between Salesforce and payment gateway APIs via MuleSoft, improving finance team visibility into transactions and reducing invoice disputes.
- Created dynamic pricing rules in CPQ to handle tiered discounts and product dependencies, ensuring accurate pricing and improved customer satisfaction.
- Built CPQ analytics dashboards in Tableau to track quote conversion rates, allowing leadership to optimize bundling strategies and improve win rates by 20%.
- Integrated Salesforce with Adobe Analytics, improving customer engagement insights and increasing retention rates.
- Managed Sales Cloud and Service Cloud implementations, increasing customer engagement and improving lead conversion rates.
- Leveraged Tableau to visualize data trends across multiple business units, improving cross-functional collaboration and strategy alignment
- Developed a Salesforce governance framework, improving system stability and reducing data discrepancies by 40%.
- Led end-to-end architecture design for Salesforce implementations, ensuring high performance and scalability.
- Automated marketing processes and developed API-based integrations with external platforms.

#### Colgate-Palmolive

July 2017 – Dec 2017

#### Salesforce Administrator & Data Analyst

- Led Salesforce Lightning UI enhancements: reducing page load times by 75% and improving user experience.
- Automated bi-directional data sync between NetSuite and Salesforce, allowing sales reps to view invoice and payment status directly in Salesforce, which reduced back-and-forth with finance and accelerated deal closures.
- Collaborated with finance and sales stakeholders to map NetSuite records (Customers, Sales Orders, Invoices) to Salesforce Accounts and Opportunities, ensuring accurate reporting and seamless quote-to-cash process.
- Migrated and cleansed data using SOAP API: increasing data accuracy by 26%.
- Collaborated with cross-functional teams to align Salesforce solutions with business goals, improving operational efficiency and reducing SLA breaches by 20%.
- Designed and deployed Tableau dashboards: providing real-time insights for sales and marketing teams.
- Implemented Salesforce validation rules: reducing manual data entry errors by 40%.
